Dear Sir / Madam,

Sub: Investor Presentation

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we enclose herewith Investor Presentation on the Audited Financial Results of the Company for the quarter and financial year ended 31st March, 2026.

The aforesaid presentation has been uploaded on the Company's website viz., www.grpweb.com.

You are requested to take the above information on your records.

Thanking you,

Yours faithfully,
For **GRP Limited**

Shilpa
Narendra
Mehta

INVESTOR PRESENTATION

May 2026

This presentation and the accompanying slides (the “Presentation”), which have been prepared by **GRP Limited** (the “Company”), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company’s market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company’s ability to successfully implement its strategy, the Company’s future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company’s market preferences and its exposure to market risks, as well as other risks. The Company’s actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third-party statements and projections.

PERFORMANCE HIGHLIGHTS Q4 & FY26

Commenting on the Q4 & FY26 performance of the company Mr. Harsh Gandhi, Managing Director for GRP Limited said,

"FY26 was characterised by a challenging global operating environment, driven by a combination of geopolitical uncertainties, elevated trade barriers, policy uncertainty, and energy price shocks arising from Middle East developments in early 2026. Against this backdrop, we struggled to maintain overall volumes, aided by growth in crumb rubber and tyre pyrolysis oil businesses. Total income for the year stood at Rs. 5,380 Mn, reflecting a nominal decline on YoY basis.

Global tyre markets remained mixed during the year. PCLT demand was modest in most parts of the world, while Europe continued to remain subdued. Replacement demand stayed relatively resilient, whereas OE demand remained weak. The evolving US trade policy environment emerged as a key external challenge, disrupting demand visibility and global supply chains. Approximately 33% drop of reclaim revenues from key customers and 44% of corresponding raw material margins remained impacted by US tariffs till January, though revisions in February provided marginal relief towards year end. Domestically, reclaim rubber continued to outperform broader industry trends, supported by healthy growth in tyre applications and trade diversion opportunities. This enabled the Company to strengthen its domestic market presence and partially offset softness in export demand. However, the margin impact on the Reclaim Rubber business is meaningful.

Raw material inflation and cost volatility continued to weigh on margins across key product categories during the year. In response, the Company intensified pricing actions, widened sourcing channels, and accelerated operational efficiency measures. Initiatives around manpower productivity, energy optimisation, and phased transition toward newer technologies contributed to improved operating efficiencies and tighter cost control.

The non-reclaim portfolio experienced a year of transition amid softer demand conditions in plastics, impacted by correction in virgin prices and higher low-cost imports. Despite continued tariff-related challenges in the US market, the Custom Die Forms business delivered resilient growth during the year. As highlighted in previous quarter we discontinued contract manufacturing operations in the Polymer Composite business owing to weak economic viability, resulting in one-time closure-related costs in Q4 FY26. At the same time, Pyrolysis and Crumb Rubber operations continued to scale up, supported by increasing sales of tyre pyrolysis oil, char, and recovered steel to industrial customers.

With Crumb and Pyrolysis (branded as 'Pyrova Energy') operations stabilizing, we are focused on capacity expansion, commencement of rCB production, and phased transition toward newer reclaim technologies and reclaim rubber capacity expansion during FY27. Continued investments in renewable energy and early adoption of in-house biofuel-based heating systems ensured operational continuity amidst fuel uncertainties due to West Asia crisis, while supporting long-term cost efficiency. Further, EPR registration for the new facility is expected in the coming months and is anticipated to support profitability going forward."

Q4 & FY26 Performance Highlights - Consolidated

(in Rs. Mn)

Total Income

EBITDA

PAT

Gross Margins (%)

EBITDA Margins (%)

PAT Margins* (%)

- US tariff disruptions resulted in ~33% drop in reclaim revenues from key customers and ~44% impact on corresponding RM margins
- FY25 EPR income of Rs. 434 Mn included Rs. 214 Mn of prior-period accruals recorded in Q4 last year, creating a higher base for comparison. FY26 EPR income is Rs. 202 Mn

EBITDA & PAT impacted on account of:

- Increase in raw material costs of key grades
- One-time costs in Q4FY26 including Rs. 4.2 Mn towards QIP cost write-off and Rs. 7.9 Mn relating to closure of RC business
- Pyrova business commercialization phase resulted in EBITDA and PAT loss of Rs. 23.9 Mn Rs. 85 Mn respectively during FY26 (from Sep'25 onwards)
- Additionally, a forex loss of Rs. 41 Mn on working capital loan revaluation is recorded in FY26
- Income from subsidiaries is Rs.211 Mn, with a loss of Rs. 47 Mn for the year

Segment Wise Quarterly Performance Trend - Standalone

(in Rs. Mn)

Reclaim Rubber Revenue Trend¹

Non- Reclaim Revenue Trend¹

■ Reclaim income declined due to US tariffs and margins suffered from elevated RM costs in key grades. Non-RR volumes were impacted by weaker plastics demand and closure of the Polymer Composite business, partly offset by incremental contribution from Pyrova operations. Margins remained impacted by fixed costs of the new plant operating at sub-optimal levels, with gradual improvement expected ahead.

Segment Wise Revenue Split – Standalone

Key Highlights

Standalone revenue (excluding EPR) grew by 3% in FY26, driven by 1% volume growth and 4% improvement in realizations. Total EPR income stood at Rs. 199 Mn in FY26 versus Rs. 427 Mn in FY25, which included Rs. 210 Mn accounted on accrual basis for previous periods

FY26 EBITDA was impacted by 12% higher RM cost per ton in Reclaim, weaker non-reclaim mix, and a 41% decline in margins from key US reclaim customers due to tariffs, with conditions expected to improve following recent tariff reductions

Standalone raw material cost increased by 567 bps YoY, driven by ~43% rise in select reclaim rubber grades. The impact was further amplified by lower export volumes, though cost optimization initiatives and conversion cost savings partly offset the pressure. Renewable energy and biofuel initiatives delivered savings of Rs. 100 Mn in FY26

PBT was impacted by Rs. 85 Mn loss during FY26 arising from commercialization costs of the Pyrolysis project, which operated at sub-optimal levels before achieving stabilization in Feb'26. With full capacity utilization and commencement of rCB production expected from Q3, margins are expected to improve in FY27

Finance costs increased during the year with withdrawal of interest subvention and interest costs associated with the Pyrova Energy business commencement

Unlocking New Horizons Through Crumb Rubber, Pyrolysis, and Soon-to-Launch recovered Carbon Black

A phased growth in Pyrova Energy

Phase 1 (Oct 2025):

- Commissioned India's largest single-line continuous reactor of 15KTPA
- Commissioned Integrated Crumb Rubber Facility for Pyrova, Reclaim Rubber Unit

Phase 2 (Under commissioning through Feb 2027):

- Set-up recovered Carbon Black facility at site in Solapur
- Capacity enhancement of Tyre Pyrolysis plant to 45KTPA

Phase 3 (Under planning, to be commissioned through Oct 2027)

- Set-up of an integrated facility for production of Crumb Rubber, Tyre Pyrolysis Oil and rCB in Gujarat

Enables the extraction of three material streams

**Tyre Pyrolysis Oil
(TPO)**

**Recovered Carbon
Black (rCB)**

**Recovered Steel
Wire**

Industry Applications
Petrochemicals (as feedstock)
Tyre and rubber product manufacturing
Pigments for paints and coatings
Plastics
Virgin carbon black production

Towards An Integrated Sustainable Solutions Company

1

Expansion of Reclaim Rubber Capacity

- Phase wise expansion of Reclaim Rubber using new technology
- Expansion of new product offerings

~88KTA to 110KTA

FY27- FY30

2

Adjacent EOL tire opportunity

- Phase wise expansion of Crumb rubber unit, TPO and rCB unit
- Expansion in Solapur and Dahej

~39KTA to 130KTA

FY27- FY30

79 cr¹

EPR Income
FY24 to 26

170 cr²

Consolidated Capex
FY24 to 26

3

Capacity expansion in Engineering Plastics

- Capacity expansion in Engineering plastics using alternate feedstock materials

4

Demand-driven portfolio expansion

- Expand Repurposed polyolefins capacity with regulation driving the demand & nylon in line with tyre recycling capacity growth

~90-100 cr³

Targeted Capex
FY27

✓ EoL Tyre Processing

✓ EoL Plastics Processing

Profit & Loss Statement - Consolidated

COMPANY OVERVIEW

GRP Is A Marquee Scalable Integrated Polymer Recycling Company

GRP AT A GLANCE

*Includes capacity of Crumb capacity added in Q4 FY25

With Clear Vision And Values...

Company

GRP is a sustainable materials producer that helps brand owners fulfil obligations for responsible use of end-of-life waste

Our Vision

The trusted global partner offering innovative sustainability solutions, committed to responsible value creation for all stakeholders

OUR VALUES

5 Decades Of Journey Towards An Integrated Recycling Platform

1. Operations at the Tamil Nadu unit have now been discontinued

Pioneering The Value Chain With 5 Business Verticals And Diverse Customer Segments...

Business Verticals

Key Customer segments

Maximizing the Use of End-of-Life Tyres Across Verticals

¹ Sold to local steel rolling mills

Made In India For The World With Well-diversified Procurement Network

Solapur

2011 | 1,15,960 sqm¹

Ankleshwar

1978 | 26,547 sqm

Panoli

2006 | 17,339 sqm

Indore

2015 | 3,310 sqm

Operational since | Total Land area

MADE IN INDIA FOR THE WORLD

8 strategically located manufacturing facilities across
5 locations with a capacity of **122000+** MTPA

Sourcing Network

Capacity	
Headquarters	
R&D Centre	
Reclaim Rubber	: 75,600 MTA ²
Crumb Rubber	: 31,875 MTA ^{\$}
Engineering Plastics	: 6,000 MTA
Repurposed Polyolefins	: 6,000 MTA
Polymer Composite	: 1,500 MTA
Custom Die Forms	: 1,400 MTA

1. Includes area of all the plants within Solapur including newly acquired plot for expansion; Additionally, Dahej plot is spread across land area of 31,020 sqm
2. Includes capacity of 3600MTA which was added in Reclaim Rubber, 3. Production from this will be subsequently used as input for upcoming pyrolysis plant

Wide Range of Applications for Reclaim Rubber

RECLAIM RUBBER IN TYRE APPLICATIONS

NATURAL RUBBER RECLAIM

- Whole Tyre Reclaim
- High Tensile Reclaim
- High Performance Material

SPECIALITY RUBBER RECLAIM

- Butyl Reclaim
- Chlorobutyl Reclaim

RECLAIM RUBBER IN NON-TYRE APPLICATIONS

VALUE PROPOSITION

ECONOMIC

- Cost-saving by replacing virgin rubber & Carbon Black
- Reduced processing costs

PROCESSING

- Faster mixing cycle & Improved extrusion rate
- Reduced splicing defects
- Controlled die swell

ENVIRONMENTAL

- Provides alternative to hazardous, landfills
- Substitutes natural rubber & crude based synthetic rubbers saving scarce natural resources
- Reduces carbon emissions by 3-5MT per ton

Advanced solutions for Engineering Plastics and Repurposed Polyolefins

ENGINEERING PLASTICS

POLYAMIDE 6

- High quality engineering plastic, used in applications requiring superior mechanical properties
- Appropriate for customers seeking weight savings, function integration and design freedom

Engine Cover

MCB Cover

Chair Star Base

PBT

- Used primarily in electrical/electronics applications
- Highly heat-resistant up to 150 degree C (or 200 degree C, if reinforced)
- Has low moisture absorption and high dimensional stability

Connectors

Bulb Housing

Consumer Appliances

POLYAMIDE 66

- Offers higher toughness with high hydrolytic stability
- PA66 is well-known for flowability and quick crystallization
- Used in highly stressed technical parts and electrically insulating parts

Automotive Fasteners

Wiper Motor Cover

Cable Ties

REPURPOSED POLYOLEFINS

ICPP

- Used across various applications in the automotive and industrial sectors

Paint Pail

Lubricant Pail

Automotive Battery Cover

TPE - PP BASED ELASTOMERS

- Blend of EOL PP and EPDM reclaim rubber from EoL tires
- Improved flexibility, impact resistance and low temperature performance

Basket

Gear Knob

Castor Wheels

PP GLASS FILLED AND TALC FILLED COMPOUNDS

- Used across various applications in the household, automotive and electrical sectors

Consumer Appliances

Chair

Dashboard Components

Polymer Composite and Custom Die Forms For Diverse Industries

POLYMER COMPOSITE

BOARDS

- Highly customizable boards include tongue and groove, lug boards, planks etc.
- Trailer decking application as an alternative to steel and wood leads to a 25% - 28% reduction in carbon footprint coupled with a reduction of 1 MT of solid waste generated

WHEEL CHOCKS

- Used by commercial vehicles and planes to prevent accidental movement

DUNNAGES

- Largely used to secure and support the cargo
- Used for storage and distribution of steel as coil rest
- Used to protect corner cracks in glass applications

PALLETS

- Combat offload pallets are used in military for Container Delivery Systems, and Aerial Drop Training, as it sustains heavy weight and heavy impact.
- Rigid material used to load and secure in transportation and warehousing

BUMPERS

- Used by commercial vehicles to withstand impacts and protect the front and rear from damage during collisions

CUSTOM DIE FORMS

LINK MATS

- Installed for workplace safety to provide impact absorption and grip at industrial sites

VIBRATION PADS

- Assisting in noise reduction, employee safety, and machinery & equipment protection

DOCK FENDERS

- Installed to provide protection to trailers, vehicles, loading dock equipment, etc.

HARVESTOR BLADES

- Used in agriculture harvesting machines

SNOW MOVING BLADES

- Rubber pads used to plow snow in snow moving equipment

GRP has developed an in-house R&D for Product, Process and Application Research

Department of Scientific & Industrial Research Recognized

Key Principles

Product:

Continuous development of new products and categories

Process:

Development / improvement of sustainable processes

Application:

Products designed to adhere to customer needs

Product:

- The R&D team develops new grades in response to market demand
- These grades enable customers to substitute virgin compounds more effectively

Process:

- Focused efforts on reducing CO₂ emissions through process innovations that minimize the use of coal, oil, and natural gas in manufacturing
- Developed proprietary mechanical devulcanization processes, replacing the previously used thermal methods

Application:

- Joint R&D to help customers utilize higher content of recycled materials as substitutes
- Concentrated efforts on reclaiming materials from non-tyre sources for broader use in the rubber industry

Limitless Possibilities In Waste To Wealth With Growing Market Globally

Key Growth Drivers

Rising focus on sustainability by governments across the globe as the need for circular economy and environment friendly products / process gain steam

Focused efforts by leading tire manufacturers globally who have set sustainability targets to achieve c. 40% sustainable sourcing by 2030 and c. 100% carbon neutrality / sustainable sourcing by 2050

Introduction of EPR guidelines shall further lead to increased usage of sustainable materials by tire manufacturers and add a new revenue stream for recyclers without additional capital expenditure

India is one of the fastest growing automotive markets globally across both passenger and commercial vehicles, and has emerged as the 3rd largest market by volume in 2022

Significant Growth Opportunities in the Plastic Market

Plastic waste generation

Globally, around **400mn** MTA of plastic waste is generated, **10%** of this is recycled

Rest is either incinerated or dumped into landfills or leaked into the environment.

Key Growth Drivers and Synergies

Nylon

Access to in-house raw material:

- Nylon extracted from end-of-life tyres provides raw material for the plastics vertical, thus increased tyre processing enhances access to secondary Nylon

Growing end-use applications:

- Significant growth driven by rising demand across various end-use applications like automotive, electrical, building and construction, etc.

Sustainability focus:

- Increased focus on use of sustainable materials across the value chain by leading manufacturers globally

Polypropylene

Rising demand for recycled polypropylene:

- Robust growth in demand due to rapid increase in usage of recycled polypropylene in packaging and allied sectors

Demand supply gap of Virgin Polypropylene:

- Shortfall in supply against growing demand is increasing imports and reducing exports of Virgin polypropylene

Introduction of sustainability guidelines:

- Introduction of EPR coupled with increasing sustainability targets of brand owners, has further accelerated the demand for recycled material

Well Entrenched Customer Relationships With Reputed Tyre And Non-tyre Customers

40+
percent

Customers have been associated with GRP for >10 years in reclaim rubber

Celebrating Excellence: Awards and Accolades Recognizing Our Achievements

Recent inclusion to our achievements

MOVING FROM LINEAR ECONOMY TO CIRCULAR ECONOMY

Voluntarily published Business Responsibility and Sustainability Report (BRSR)

Target of 30% women participation in workforce by 2030

HIGHLIGHTS

Zero Liquid Discharge
Operations

Green Tech Investments
Products
with LCA results

37%¹
Energy needs harnessed using renewable sources – up from 11% last year

59%¹
Reduction in Scope 1 emissions and **18%¹** reduction in combined Scope 1&2 emissions per rupee turnover

Sustainable Development Goals (Adopted By GRP)

GRP believes in 'giving back to the society and the planet', it has shown a high level of engagement across following six out of the seventeen SDGs adopted by all UN member states to build a better world for people and planet

Wellness initiatives

Health checkups, Stress management, Holistic wellness, Yoga, Dance sessions, Power nap at HO, Birthday celebrations

Healthcare support

Outdoor workforce safety, Fire safety

Substance abuse awareness

Community contribution

Educational donations at Orphanage homes, Visually impaired and special needs children school

Mobile Education Vans

Internship opportunities for students

Encouraging employees in pursuit of higher education

Signatory of the UN WEP

Support for women entrepreneurs

Creating appropriate infrastructure and environment for women workers

POSH awareness sessions

Celebration of men's and women's day

Drinking water stations and toilets for girls

Water coolers at plants

Zero Liquid Discharge Operations

Installation of Effluent Treatment Plants and Multiple Effect Evaporator systems to enhance wastewater treatment

Target to harness 50% of energy needs through renewables by 2025

Way ahead with solar energy as a sustainable solution

Investments in wind solutions

Greener technologies and energy sources such as Biofuel systems to reduce carbon emissions

Recycling, reusing and reducing EoL tyres, plastics and converting into sustainable materials through multiple verticals

Responsible packaging - Reduction in Wooden pallet consumption

Replaced diesel forklifts with electric forklifts

CSR - Leading Positive Initiatives For A Better Future

At GRP, CSR contributes in shaping the 'How' and the 'Why' of almost every activity we undertake. Over the years, we are happy to have played a role in giving back to the community through our products as well as our CSR activities. We are grateful to have witnessed the positive impact of our efforts; in making a long-lasting difference to the people of India and the world at large

EDUCATION

- Mobile vans for elementary education
- Vocational training for adult education
- Merit based scholarship to support University Education
- Strengthen / support existing institutes engaged in providing primary, secondary and higher level education

SUSTAINABLE LIVELIHOOD

- Vocational training aimed at employability
- Supporting initiatives around Yoga, meditation and self-help
- Awareness programs for clean living/housing facilities
- Awareness programs on hygiene, safe water
- Encouraging plantation of trees through self help groups of women

HEALTHCARE

- Primary healthcare centres
- Mobile healthcare projects
- Healthcare through awareness programs
- Blood donation camps
- Sponsorship for Dialysis center

WOMEN EMPOWERMENT

- Girl child education upto University
- Supporting groups for women empowerment
- Building toilets for better women hygiene
- Rewards to women leaders who created positive change in villages

GROWTH OPPORTUNITIES

Key Rights to Win: Strategic Advantages for Market Leadership

GRP has built a reputable recycling brand which is trusted by leading brand owners globally

Trusted Global Recycling Brand in Reclaim Rubber

Partnerships with leading brand-owners

Developed long-standing relationships with leading brand-owners in India and globally

Superior Product Capabilities

Superior product portfolio combined with enhanced capabilities and wider applications

Expansive Vendor Base

Experience of building an expansive vendor base from scratch over the past 5 decades

Execution-focused Management

Industry pioneers with a track record to execute complex greenfield projects successfully

Process Knowhow and Technology

Eco-friendly manufacturing practices developed in-house supported by global technologies

Capitalizing on EPR Guidelines: Opportunities for Leading Tire Recycling Companies like GRP

Recent government guidelines for implementation of EPR in the domestic market shall further boost the need for rubber recycling in India and open up a new revenue stream for players like GRP

- Tire manufacturers and importers are required to recycle 100% of the quantity of new manufactured or imported tires after 2025
- Alternatively, they need to acquire EPR certificates of equivalent quantity of tires manufactured or imported
- These certificates shall be generated on portal set-up by the CPCB
- EPR certificates shall be earned by recyclers based on the quantity recycled

	Weightage Allocated (W_p)	Conversion Factor (C_F)
Reclaim Rubber	1.30	1.30
Recovered Carbon Black	1.25	3.68
Crumb Rubber Modified Bitumen	1.10	0.20
Crumb Rubber	1.00	1.33
Pyrolysis Oil ¹ and Char: <i>Continuous Method</i>	0.80	1.49
Pyrolysis Oil and Char: <i>Batch Method</i>	0.50	1.49

Quantity eligible for generation of EPR certificate

$$Q_{EPR} = Q_p * W_p * C_F$$

EPR In Plastic Packaging Overview: Producer (Category - 1 Only)

The Government guidelines which mandate rigid plastic packaging producers to recycle and incorporate recycled content in their products shall drive the demand for recycled polypropylene

Producer

Historical Consolidated Financial Performance

Note: EBITDA Includes Other Income *FY26 – Adjusted for Labour Code Impact
