Sector Outlook

- Moderation in business growth in FY2025 & Q1 FY2026 vis-à-vis FY2024 resulting in book growth by 21% YOY in FY25 and Q1FY 26. The underpenetrated market and the Government's thrust on "housing for all" are likely to support growth. On-book portfolio of AHFCs are expected to grow by 20-22% in FY2026.
- Overall cost of funds is expected to stay elevated despite the recent reduction in systemic interest rates as the transmission will happen when bank borrowings become due for reset.
- Healthy business margins and low credit cost support earnings. Impact of leverage and competition, making improved efficiency key.
- While asset quality indicators improved in Q4 FY2025 aided by fresh slippages, recoveries and the base effect, they weakened in Q1 FY2026 because of seasonality. Although the asset quality remains range-bound, the effects of portfolio seasoning are yet to fully materialise.

Chola's Position

- Chola's home loans business is well positioned to benefit from steady demand for affordable housing with a continued focus on first-time buyers in semi-urban and rural areas.
- The company is growing in a measured manner, with emphasis on balancing growth and profitability through prudent underwriting, careful risk segmentation and a balanced product mix.
- Operating efficiency is improving through a low-cost hub-and-spoke branch network, supported by higher digitization and ongoing process improvements.
- Chola remains aligned with government housing initiatives such as PMAY 2.0 and continues to assist customers in availing applicable subsidies.
- Asset quality and collection performance are supported by established legal recovery processes and focused collection efforts across customer segments.
