Mortality - 10% increase	26,169	(2.7%)	899	(7.8%)	21.5%	(1.8%)
Mortality - 10% decrease	27,626	2.7%	1,050	7.8%	25.1%	1.8%
Expenses - 10% increase	26,647	(0.9%)	867	(11.0%)	20.8%	(2.6%)
Expenses - 10% decrease	27,142	0.9%	1,081	11.0%	25.9%	2.6%
Risk free rates - 1% increase	26,020	(3.3%)	978	0.4%	23.4%	0.1%
Risk free rates - 1% reduction	27,885	3.7%	970	(0.4%)	23.2%	(0.1%)
Equity values - 10% immediate rise	27,222	1.2%	974	Negligible	23.3%	Negligible
Equity values - 10% immediate fall	26,568	(1.2%)	974	Negligible	23.3%	Negligible
Corporate tax Rate - 2% increase	26,305	(2.2%)	940	(3.5%)	22.5%	(0.8%)
Corporate tax Rate - 2% decrease	27,484	2.2%	1,008	3.5%	24.1%	0.8%
Corporate tax rate increased to 25%	24,259	(9.8%)	823	(15.5%)	19.7%	(3.6%)

1. Reduction in interest rate curve leads to an increase in the value of assets which offsets the loss in the value of future profits, resulting in an overall increase in EV.
2. Risk free rate sensitivities under new business allow for the change in the value of assets as at the date of valuation.

Market consistent methodology

- The EV and VNB have been determined using a market consistent methodology which differs from the traditional EV approach in respect of the way in which allowance for the risks in the business is made.
- For the market consistent methodology, an explicit allowance for the risks is made through the estimation of the Time Value of Financial Options and Guarantees (TVFOG), Cost of Residual Non-Hedgeable Risks (CRNHR) and Frictional Cost (FC) whereas for the traditional EV approach, the allowance for the risk is made through the Risk Discount Rate (RDR).

Components of EV

The EV is calculated to be the sum of:

- Net Asset value (NAV) or Net Worth: It represents the market value of assets attributable to shareholders and is calculated as the adjusted net worth of the company (being the net shareholders' funds as shown in the audited financial statements adjusted to allow for all shareholder assets on a market value basis, net of tax).
- Value of In-force (VIF): This component represents the Present Value of Future expected post-tax Profits (PVFP) attributable to shareholders from the in-force business as at the valuation date, after deducting allowances for TVFOG, CRNHR and FC. Thus, $VIF = PVFP - TVFOG - CRNHR - FC$.

Covered Business

- All business of Axis Max Life is covered in the assessment except one-year renewable group term business and group fund business which are excluded due to their immateriality to the overall EV.

Present Value of Future Profits (PVFP)

- Best estimate cash flows are projected and discounted at risk free investment returns.
- PVFP for all lines of business except participating business is derived as the present value of post-tax shareholder profits from the in-force covered business.
- PVFP for participating business is derived as the present value of shareholder transfers arising from the policyholder bonuses *plus* one-tenth of the present value of future transfers to the participating fund estate and one-tenth of the participating fund estate as at the valuation date.
- Appropriate allowance for mark-to-market adjustments to policyholders' assets (net of tax) have been made in PVFP calculations to ensure that the market value of assets is taken into account.
- PVFP is also adjusted for the cost of derivative arrangements in place as at the valuation date.

Cost of Residual Non-Hedgeable Risks (CRNHR)

- The CRNHR is calculated based on a cost of capital approach as the discounted value of an annual charge applied to the projected risk bearing capital for all non-hedgeable risks.
- The risk bearing capital has been calculated based on 99.5 percentile stress events for all non-hedgeable risks over a one-year time horizon. The approach adopted is approximate.
- The stress factors applied in calculating the projected risk capital in the future are based on the latest EU Solvency II directives recalibrated for Indian economic conditions.

Time Value Of Options and Guarantees (TVFOG)

- The TVFOG for participating business is calculated using stochastic simulations which are based on 5,000 stochastic scenarios.
- Given that the shareholder payout is likely to be symmetrical for guaranteed non-participating products in both positive and negative scenarios, the TVFOG for these products is taken as zero.
- The cost associated with investment guarantees in the interest sensitive life non-participating products are allowed for in the PVFP calculation and hence an explicit TVFOG allowance has not been calculated.
- For all unit-linked products with investment guarantees, extra statutory reserves have been kept for which no release has been taken in PVFP and hence an explicit TVFOG allowance has not been calculated.

Frictional Cost (FC)

- The FC is calculated as the discounted value of tax on investment returns and dealing costs on assets backing the required capital over the lifetime of the in-force business.

Economic Assumptions

- The EV is calculated using risk free (government bond) spot rate yield curve taken from FBIL¹ as at September 2025. The VNB is calculated using the beginning of respective quarter's risk free yield curve (i.e. 31st March 2025 and 30th June 2025).
- No allowance has been made for liquidity premium because of lack of credible information on liquidity spreads in the Indian market.
- Samples from 30th September 2025 and 31st March 2025 spot rate (semi annualized) yield curves used are:

Year	1	2	3	4	5	10	15	20	25	30	40	50
Sept-25	5.56%	5.84%	5.94%	6.12%	6.30%	6.68%	7.07%	7.40%	7.53%	7.54%	7.66%	7.91%
Mar-25	6.44%	6.43%	6.44%	6.45%	6.49%	6.65%	6.76%	7.00%	7.10%	7.13%	7.19%	7.14%
Change	-0.88%	-0.59%	-0.50%	-0.33%	-0.19%	0.03%	0.31%	0.40%	0.43%	0.41%	0.47%	0.77%

Demographic Assumptions

The lapse and mortality assumptions are approved by Board committee and are set by product line and distribution channel on a best estimate basis, based on the following principles:

- Demographic assumptions are set to reflect the expected long term experience.
- Assumptions are based on company's own experience along with expectations of future experience given the likely impact of any current and proposed management actions on such assumptions.
- Aims to avoid arbitrary changes, discontinuities and volatility where it can be justified.
- Aims to exclude the impacts of non-recurring factors.

¹ Financial Benchmark India Pvt. Ltd.

Expense and Inflation

- Maintenance expenses are based on the recent expense studies performed internally by the Company.
- The future CSR rate is derived after allowing for the exemption on dividend income and is applied to the post-tax, risk-adjusted profits emerging each year.
- The commission rates are based on the actual commission payable, if any.

Tax

- The Corporate tax rate is the effective tax rate, post allowing for exemption available on dividend income. Tax rate is nil for pension business.
- For participating business, the transfers to shareholders resulting from surplus distribution are not taxed as tax is assumed to be deducted before surplus is distributed to policyholders and shareholders.
- Goods and Service tax is assumed to be 18%.
- The mark to market adjustments are also adjusted for tax.

This Presentation (“document”) has been prepared by Max Financial Services Limited (the “Company”) solely for the announcement of the Company’s financial results (the “Presentation”). References to “document” in this disclaimer shall be construed to include any oral commentary, statements, questions, answers and responses at the Earnings call.

This document contains certain forward-looking statements relating to the Company that are based on the beliefs of the Company’s management as well as assumptions made by and information currently available to the Company’s management. These forward-looking statements are, by their nature, subject to significant risks and uncertainties. When used in this document, the words “anticipate”, “believe”, “could”, “estimate”, “expect”, “going forward”, “intend”, “may”, “ought” and similar expressions, as they relate to the Company or the Company’s management, are intended to identify forward-looking statements. These forward-looking statements reflect the Company’s views as of the date of the Presentation with respect to future events and are not a guarantee of future performance or developments. You are strongly cautioned that reliance on any forward-looking statements involves known and unknown risks and uncertainties. Actual results and events may differ materially from information contained in the forward-looking statements. The Company assumes no obligation to update or otherwise revise these forward-looking statements for new information, events or circumstances that occur subsequent to the date of the Presentation.
