

Max Life Insurance Corporate Presentation

SECTION I

- ▶ Indian Life Insurance Industry so far & Looking ahead
- 

Life insurance industry has seen multiple cycles since 2001. Structural changes in the economy have resulted in positive flow towards financial assets aiding the insurance industry

Phase 1 – Joyful Entry & Industry Expansion (2001-2008)

- Entry of Private Players
- Equity Bull Run
- ULIP introduced by private players

Phase 2 – Discovering New Normal (2009-2015)

- Global Financial crisis/ Bearish Indian Stock Market
- Frequent regulatory interventions
 - New ULIP guidelines
 - New product guidelines

Phase 3 – Reinvigoration (2015-2022)

- Stock Market Revival
- De-monetization
- GST Implementation
- Regulations:
 - Expense of Management Guidelines
 - Open Architecture for Corporate Agents
 - Distributor Compensation Guidelines

Phase 4 – Regulatory Transformation (Ongoing)

- Regulatory sandbox
- Improved ease of doing business:
 - Use and file norms
 - Revised Expenses of Management & Commission guidelines
 - New Capital Avenues for growth
 - Increase in distribution tie-up limits

xx Individual FYP adjusted for Single Premium (INR 'Bn)

Life insurance penetration

(Percentage of insurance premium to GDP)

LIC

Private Players

Life Insurance is a business of Risk Management; plays available for Life Insurers include Disciplined savings, Mortality & Morbidity and Longevity

A

Disciplined savings

B

Mortality & Morbidity

C

Longevity

Disciplined Savings (1/3): India continues to maintain high savings culture; higher savings proportion dedicated towards financial assets. Life Insurance among the preferred asset class

High Savings Culture

Household Savings flow - Growth in financial assets flow higher than physical assets flow

Retail wealth in India - Increasing preference for avenues other than cash and bank deposits

Source: Karvy India Wealth Report 2015/2016/2017/2018/2019/2020

Bank Deposits include FD, CA deposits, SA deposits, NRI deposits; Others primarily include unlisted equity

A

Disciplined Savings (2/3): Significant opportunity for Life Insurance to grow in India on plank of ensuring disciplined savings over a long term – Only asset class effective in addressing the gap

India lags behind other developed countries on Life Insurance penetration

Gap between other countries and India is significant for Life Insurance density

Long Term Nature of Savings

- Life Insurance inculcates disciplined savings mind-set which help retain AUM for longer
 - For better Asset Liability management, Banks' preference remains for shorter tenure deposits
 - Stock market volatility impacts investment in direct equities and does not ensure discipline

Disciplined Savings (3/3): Improving affluence, Household income increase will continue providing impetus to the Life Insurance industry

Protection Landscape: India has the highest protection gap in Asia with low protection penetration levels; long term protection and health opportunity attractive

Protection gap for India is significant

Protection penetration levels quite low

Health insurance penetration relatively low in India

India health GDPi grew at a CAGR ~19%

- Only 1 out of 40 people (2.5%) who can afford it, is buying a term policy every year
- India has **highest protection gap** vis-à-vis other major Asian economies.
- Opportunity for Life insurers under health portfolio: **Health Combi** (Life + health), **Fixed benefit health riders**, **Fixed benefit long term products**

Retirement Landscape: India undergoing a rapid demographic & economic transition – moving towards an aging society, majority of them facing the risk of living too long

Rising Elderly Population

The growth of the elderly population in India is outpacing the growth of the overall population by a stunning margin

Increased Life Expectancy

Decline in birth & death rates along with rising life expectancy will trigger population aging & lengthen post-retirement life, requiring better pension planning

Pension Assets to GDP

Very low GDP invested in retirement funds as compared to other global economies, leaving a vast population exposed to the risk of living long

Limited Retirement Planning

Per India's Retirement Index Study (Max Life initiative), limited urban Indian population does informed financial planning incl. determination of their post-retirement health expenses

Retirement Opportunity

- Structural Shift in India's Demographic Profile
- India's current pension structures are highly fragmented
- Dependence of elderly parents on their children for retirement income continues

SECTION II

B

Product mix in proprietary and Bancassurance channels aligned to customer needs;

Proprietary Channels Product mix* - biased towards traditional products and protection for driving margins

Bancassurance Product Mix* - has been biased towards ULIPs to cater to target customer segments

*Numbers for few years will not sum to 100% due to rounding off effect

Max Life has been at the forefront of driving Products Innovation by creating first-in-industry propositions

1. Break the endowments category clutter with Industry **First Whole Life plan**
2. Provide **liquidity & flexibility through First Cash & Premium Offset Bonus** options
3. **First PAR Top Up** option

6. Enabled transparent customer participation in Bonds with **First Index-Linked Non PAR plan**

10. **Hedged Guarantees with Derivatives**
11. Launched industry **First COVID-19 Rider** (diagnosis & death benefit)

4. Enable Customer Obsession **through First “Freelook Period”**, became Regulation later
5. **Created Universal Life product** – Enable transparent customer participation in Debt market

7. **Scaled “Monthly Income” category** first on Non PAR and then on PAR platforms

12. **Differentiated Term plan** with industry firsts (Special exit value, Premium holiday option)
13. **Strengthened PAR proposition** (guarantees under early income variant)
14. Launched new savings proposition **Smart Fixed-return Digital Plan**

Max Life offers product suite at affordable premiums to cater to all customer segments across various life-stage needs

- Option to get Return of Premium as minimum Death Benefit³**

- April'22 PFM license obtained
- Aug'22 PFM company launched
- Oct'22 POP license obtained
- Nov'22 POP operations launched
- Feb'23 Max Innings (retirement ecosystem) launched

Product design & mix monitoring

- 1 Prudent pricing assumptions (interest rates, risk margins)
- 2 Regular monitoring & repricing
- 3 Product designs optimization (shorter pay designs) to minimize exposure to future interest rate movement
- 4 Large part of annuity portfolio (>95%) is Return of Premium, which has negligible exposure to longevity risks

Prudent ALM approach

- 1 Cash flow matching of assets and liabilities (for non-par savings + group protection portfolio)
- 2 Duration matching to manage parallel shifts in yield curve
- 3 Enabled by a deep and liquid long sovereign bond market

Hedging

- 1 Managing the asset liability cashflow profile of entire non-par fund to derive synergies of natural cash flow hedge
- 2 External hedging (using FRAs, IRFs, Swaps etc.)

Max Life's 5-Year Aspirations

1

Leader in online acquisition

Leader in online protection

2

Fastest growing profitable proprietary distribution

#5 player in offline proprietary distribution

3

Leader in Protection + Health & Wellness proposition

#5 player in Protection and health

4

Leader in Retirement

#4 Annuity player

5

Inorganic expansion

No addition of a material partner / inorganic

FY21

Leader in online Protection + Savings

7-9x sales in 5 years

Among top 3 in offline proprietary distribution

~2.5x sales in 5 years

Among top 3 players in protection and health

3-4x sales in 5 years

Among Top 3 providers of holistic retirement offering
~8-9x annuity sales in 5 years

Augment partnership distribution with M&A / addition of large Bank account

Aspiration (FY26)

Continued leadership in protection and savings grew 17x
2x sales since FY21

~1.5x sales since FY21

Continuous innovation to cater to various segments to bolster growth

~3x YoY growth on APE
6x annuity sales since FY21 on APE

Added 4 New Bank partners

FY23

SECTION IV

▶ ESG

Four pillars of our sustainability framework

Four pillars of our sustainability framework (contd...)

Work Ethically & Sustainably

-  Corporate Governance
-  Ethics & Compliance
-  Digital Initiatives
-  Ethical usage of Data
-  Operational Risk Management

Care for People

-  Diversity & Inclusion
-  Employee Development
-  Health & Wellness programs
-  CSR (with Financial Empowerment)

Financial Responsibility

-  Sustainable Investing
-  Product responsibility
-  Customer feedback integration

Green Operations

-  Waste Management
-  Water Management
-  Energy efficiency
-  Emissions control

Governance

- 🔥 Dedicated **ESG Management Committee**
- 🔥 **ESG Head** to oversee ESG initiatives/ Dedicated resources for ESG, DE&I, CSR
- 🔥 **Diverse Board composition Independent Directors** (~50%- MFSL; ~30%- Max Life Insurance)
- 🔥 Average Board experience > **30 years**

Data Privacy & Security

- 🔥 MLI received the **DSCI Excellence Award** for Best Security Practices in India in 2021
- 🔥 BitSight rating of 810, which is best in financial services
- 🔥 Certified on International standards **ISO 27001 and ISO 22301**
- 🔥 Data privacy policy and practices in place
- 🔥 Board approved Information security policy in line with **Aadhar Act, I-T Act** and other regulatory guidelines
- 🔥 Dedicated CISO reporting to CRO for independence and better governance

Risk Management

- 🔥 Max Life has a **robust governance framework with Board risk committee (REALMC)** supported by domain expertise committees (MRC, ALCO, DMC, ORG, IS BCM etc.)
- 🔥 **Risk Appetite and Risk Management framework** in place
- 🔥 Robust derivative program as well as an ALM framework
- 🔥 Detailed review process of Business Plan in place by CRO with focus on solvency risk and capital management

Compliance & Policies

- 🔥 **Platforms, mechanisms, channels** in place for grievance addresses, incident investigations and corrective actions and policies
- 🔥 Dedicated **whistle-blower platform** managed by independent external partner
- 🔥 Approved **Business Code of Conduct, Anti Bribery, Gifts and Meals policies**
- 🔥 Max Life won an award for the best in-house legal team in Insurance Industry across Asia from Biz Asia

Diversity & Inclusion

- Gender diversity ratio at 26% at Max Life
- Capability building program for women's leadership – 'She Leads'
- Allyship Signature Campaign launched to promote inclusion at workplace.
- An exclusive Max Sync open house session with CEO organized for all women employees on International Women's Day.
- 55 women participated in the Kudos Allyship Recognition Campaign.

Well-being of Employees

- Launched the Visit Health app as part of the holistic employee wellness campaign, (free - doctor consultations, counselling sessions, financial advisory, water intake tracking, daily step goals, etc.)
- Launched the Health and wellness campaign #MaxThrive (**Yoga sessions, health camps, counsellor visits, eye and dental check up camps, breast cancer awareness, Dietician visits**)
- Hobby Clubs launched to promote Intergenerational inclusion : Bikers, Yoga, Poetry, Music and Cricket

Employee Development & Policies

- High **employee engagement** - 2023 sustainable engagement score of 95% in the Annual Engagement Survey through Willis Towers Watson
- Launch of **Visit Health App** to provide for free doctor's consultation & discounted in-clinic visits along with the host of other health & wellness benefits

CSR Initiatives

- Joy of Giving: 42,500+ beneficiaries positively impacted** through virtual and physical volunteering initiatives by employees.
- Financial literacy and insurance awareness:** 54,700+ applications submitted and **46,700+ unique beneficiaries (~50% female)** serviced for availing benefits of various Govt. schemes from Haridwar and Purbi Singhbhum serviced.
- Education:** 24,694 children were benefited through the education initiatives in partnership with Max India Foundation.
- Environment preservation:** Monthly maintenance and preservation work continued at the MG Road plantation site and Wazirabad lake in partnership with GMDA. 98,796 saplings planted across Gurugram, Bangalore, Chennai and Kolkata at the Wazirabad lake

Committed to responsible investments

-  **100% ESG integration** will be ensured in all equity investment research and decision making
-  **75%** of equity portfolio to be ESG compliant
-  **100%** compliance for equity portions of shareholders fund to be adhered to

Responsible Investments

-  **Comprehensive stewardship policy** in place and a detailed summary of MLI's voting actions are disclosed on a quarterly basis.
-  Max Life evaluates detailed governance reports of all its investee companies in detail
-  Launched new ESG Fund

Product Responsibility

-  Benefits for females/transgenders for financial inclusion :
 -  Under Smart Wealth Insurance Plan, we provide a preferential discount for women
 -  Under Smart Wealth Advantage Guarantee Plan, higher returns for female lives and discount is available for transgenders
 -  Annuity plan improved to increase female rates
-  Max Life annuity plans, Smart Wealth Advantage Guarantee Plan and Smart Wealth Plan offer senior customers guaranteed income throughout their life
-  Additional health protection through our Rider Suite. Critical Illness and Disability Rider can be attached to almost the entire product portfolio; offers protection against 64 critical illnesses and disabilities.
-  Launched Ethical Fund where the investment excludes in sectors such as alcohol, gambling, contest, entertainment etc.

Integrating Customer Feedback

-  Consistent focus on integrating feedback from policyholders in our services, reflected in our NPS ratings, as per Kantar Studies. NPS improved from 35 in FY19 to 52 in FY23

Holistic approach

- Conducted a **carbon footprint assessment** of our pan-India offices.
- Striving to be carbon neutral by FY28

Energy Management

- Home Office (HO) building is a **LEED Platinum certified building** with “**5 star rating**” in health and safety by British safety council
- Replacement of CFL with LED lights ongoing in all offices to reduce energy consumption : Replacement concluded in **30% offices in last 3 yrs.** ~**3%** of energy reduction achieved
- Replacement of old air-conditioners ongoing: Plan to replace **500 ton of AC in FY23**

Water Conservation

- Water is recycled with the help of **STP: 30 kilo litres of water recycled** in FY23
- 100% tap sensors** and water aerators in place in HO. ~**70%** water consumption is reduced

Waste Management

- MLI has pledged to completely ban **single-use plastic** in the next few years with emphasis on recycled plastic at tuck shop and pantries
- Implementing **dry and wet waste segregation process**
- Used **10000 kg of plastic**, **3000** being single use and **7000** being recycled plastic
- Working on Sanitary Pad disposal at HO for sustainable menstrual hygiene management

Accomplishments in our key strategic shifts identified in our ESG journey

Indicators	Key Metric for ESG Indicators	Key Targets	Current Status
 Digital Operations	Digital enablement (Self Servicing) in Business transactions	90% of all self- servicing operations to be digital by FY25	95% self-service enablement by March'23
 Diversity & Inclusion	Overall Gender Diversity Ratio	Achieve 30% gender diversity ratio by FY25 (23% in FY21)	26% gender diversity ratio in March'23
 Workforce Training	Number of Learning hours to upskill and reskill employees*	Improve total training hours by ~3X by FY25	28,468 training hours till March'23
 Responsible Investments	ESG integration* & Compliance^ in Investment Decision Making	100% ESG integration in equity investment research and decision making 75% of equity portfolio to be ESG compliant at all times	External Consultant on-boarded for ESG integration process Tracking ongoing for ESG compliance
 Carbon Neutrality	Reduce carbon footprint and achieve Carbon Neutrality	To achieve 80% carbon neutrality by FY28	Measurement of greenhouse gas is on-going

*ESG Integration refers to evaluation of ESG risks and opportunities for each company in the portfolio

^ESG compliance refers to all ESG rating categories excluding severe risk category, as per rating agency scores

*Includes MDP learning hours

Definitions of the EV and VNB

Market consistent methodology

- The EV and VNB have been determined using a market consistent methodology which differs from the traditional EV approach in respect of the way in which allowance for the risks in the business is made.
- For the market consistent methodology, an explicit allowance for the risks is made through the estimation of the Time Value of Financial Options and Guarantees (TVFOG), Cost of Residual Non-Hedgeable Risks (CRNHR) and Frictional Cost (FC) whereas for the traditional EV approach, the allowance for the risk is made through the Risk Discount Rate (RDR).

Components of EV

The EV is calculated to be the sum of:

- Net Asset value (NAV) or Net Worth: It represents the market value of assets attributable to shareholders and is calculated as the adjusted net worth of the company (being the net shareholders' funds as shown in the audited financial statements adjusted to allow for all shareholder assets on a market value basis, net of tax).
- Value of In-force (VIF): This component represents the Present Value of Future expected post-tax Profits (PVFP) attributable to shareholders from the in-force business as at the valuation date, after deducting allowances for TVFOG, CRNHR and FC. Thus, $VIF = PVFP - TVFOG - CRNHR - FC$.

Covered Business

- All business of Max Life is covered in the assessment except one-year renewable group term business and group fund business which are excluded due to their immateriality to the overall EV.

Components of VIF (1/2)

Present Value of Future Profits (PVFP)

- Best estimate cash flows are projected and discounted at risk free investment returns.
- PVFP for all lines of business except participating business is derived as the present value of post-tax shareholder profits from the in-force covered business.
- PVFP for participating business is derived as the present value of shareholder transfers arising from the policyholder bonuses *plus* one-tenth of the present value of future transfers to the participating fund estate and one-tenth of the participating fund estate as at the valuation date.
- Appropriate allowance for mark-to-market adjustments to policyholders' assets (net of tax) have been made in PVFP calculations to ensure that the market value of assets is taken into account.
- PVFP is also adjusted for the cost of derivative arrangements in place as at the valuation date.

Cost of Residual Non-Hedgeable Risks (CRNHR)

- The CRNHR is calculated based on a cost of capital approach as the discounted value of an annual charge applied to the projected risk bearing capital for all non-hedgeable risks.
- The risk bearing capital has been calculated based on 99.5 percentile stress events for all non-hedgeable risks over a one-year time horizon. The cost of capital charge applied is 4% per annum. The approach adopted is approximate.
- The stress factors applied in calculating the projected risk capital in the future are based on the latest EU Solvency II directives recalibrated for Indian and Company specific conditions.

Components of VIF (2/2)

Time Value Of Options and Guarantees (TVFOG)

- The TVFOG for participating business is calculated using stochastic simulations which are based on 5,000 stochastic scenarios.
- Given that the shareholder payout is likely to be symmetrical for guaranteed non-participating products in both positive and negative scenarios, the TVFOG for these products is taken as zero.
- The cost associated with investment guarantees in the interest sensitive life non-participating products are allowed for in the PVFP calculation and hence an explicit TVFOG allowance has not been calculated.
- For all unit-linked products with investment guarantees, extra statutory reserves have been kept for which no release has been taken in PVFP and hence an explicit TVFOG allowance has not been calculated.

Frictional Cost (FC)

- The FC is calculated as the discounted value of tax on investment returns and dealing costs on assets backing the required capital over the lifetime of the in-force business. Required capital has been set at 180% of the Required Solvency Margin (RSM) which is the internal target level of capital, which is higher than the regulatory minimum requirement of 150%.
- While calculating the FC, the required capital for non-participating products is funded from the shareholders' fund and is not lowered by other sources of funding available such as the excess capital in the participating business (i.e. participating fund estate).

Key Assumptions for the EV and VNB (1/2)

Economic Assumptions

- The EV is calculated using risk free (government bond) spot rate yield curve taken from FBIL¹ as at 31st March 2023. The VNB is calculated using the beginning of respective quarter's risk free yield curve (i.e. 31st March 2022, 30th June 2022, 30th September 2022 and 31st December 2022).
- No allowance has been made for liquidity premium because of lack of credible information on liquidity spreads in the Indian market.
- Samples from 31st March 2023 and 31st March 2022 spot rate (semi annualized) yield curves used are:

Year	1	2	3	4	5	10	15	20	25	30	40
Mar-23	7.16%	7.07%	7.17%	7.19%	7.17%	7.34%	7.38%	7.40%	7.45%	7.45%	7.45%
Mar-22	4.51%	5.10%	5.63%	6.08%	6.42%	7.02%	7.37%	7.51%	7.34%	7.52%	7.40%
Change	2.65%	1.97%	1.54%	1.11%	0.75%	0.32%	0.01%	-0.11%	0.11%	-0.07%	0.05%

Demographic Assumptions

The lapse and mortality assumptions are approved by Board committee and are set by product line and distribution channel on a best estimate basis, based on the following principles:

- Demographic assumptions are set to reflect the expected long term experience.
- Assumptions are based on last one year experience and expectations of future experience given the likely impact of current and proposed management actions on such assumptions.
- Aims to avoid arbitrary changes, discontinuities and volatility where it can be justified.
- Aims to exclude the impacts of non-recurring factors.

Key Assumptions for the EV and VNB (2/2)

Expense and Inflation

- Maintenance expenses are based on the recent expense studies performed internally by the Company.
- Future CSR related expenses have been taken to be 2% of post tax (risk adjusted) profits emerging each year.
- The commission rates are based on the actual commission payable, if any.

Tax

- The Corporate tax rate is the effective tax rate, post allowing for exemption available on dividend income. Tax rate is nil for pension business.
- For participating business, the transfers to shareholders resulting from surplus distribution are not taxed as tax is assumed to be deducted before surplus is distributed to policyholders and shareholders.
- Goods and Service tax is assumed to be 18%.
- The mark to market adjustments are also adjusted for tax.

Thank You
