Our Core Values

The Foundation of Our Success

At the heart of our business lies a steadfast commitment to integrity, honesty, and responsibility. True success is built on trust, which is why we maintain an uncompromising focus on delivering quality and exceptional customer service at every step.

We are equally dedicated to fostering a culture of respect – toward our team members, partners, customers, suppliers, and everyone we engage with. These values are not just words; they guide every decision we make and every action we take. Upholding these principles is what drives us forward and ensures that we continue to grow with purpose and accountability.

CORPORATE INFORMATION

OUR VISION

To be seen as an Indian organization with a global perspective that has created an integrated, quality driven, customer sensitive Contract Research and Testing service platform, which is the most comprehensive of its kind across the globe.

OUR CORE VALUES

- Integrity of service through honesty, responsibility and an uncompromising commitment to Quality and Customer service.
- Respect for all our team members, partners, customers, suppliers, and all other people our business interacts with.

OUR CREDO

The values, beliefs and principles that guide us in our decisions and actions.

We believe our work impacts the wellbeing of millions of people across the globe. Our responsibility is to the end consumers, patients, and all others who use the products we help discover or develop and test for quality. In protecting the interests of these key stakeholders, everything we do must be with integrity, honesty, responsibility and of high quality.

We are strongly committed to provide value to our customers in terms of scientific knowledge, time and cost. Regulatory and quality system compliance must be the corner stone for our services. Customers' orders must be serviced as per promised timelines and accurately.

Our partner vendors must have fair and transparent opportunities to grow their business with us.

We are responsible to our employees to provide a safe, harmonious, and unbiased work environment where we are committed to each person's individual learning and development. Employees must feel valued and believe that each one of them contributes to the success and growth of the organization, and that their work impacts the society beneficially. We must respect them, recognize their merit, and encourage them to make suggestions and complaints. We must support the health and well-being of our employees and help them to fulfill the needs of their work-life balance. There must be equal opportunity for employment, development, and advancement for those qualified. We must have highly capable leaders and their actions must be just and ethical. Compensation must be fair and working conditions safe, clean, and orderly.

We acknowledge our responsibility to the communities and environment in which we live and work. We must be a good corporate citizen and contribute to the development of weaker sections of society. We must be a good corporate citizen and abide sincerely with all applicable laws and good governance practices. We must protect and even try to enrich the environment we live in, and also consciously use the natural resources that we are privileged to have.

Our final responsibility is to our shareholders. Our business must have intrinsic potential to flourish and make a sound profit. We

must plan well for growth and sustainability and execute our plans well. We must pay close attention to the markets we work in and continuously evaluate the opportunities and risks to act upon. We must innovate our services to stay relevant to market needs and make investments with balance. We have to build state-of-the-art facilities, maintain current and reliable technologies, and use materials that befit the purpose of our activities. Capacities must be enhanced, and expansions must be pursued. Reserves must be created to provide for adverse times. When we operate according to these fundamental principles, the shareholders should realize a fair return.

OUR COMPANY (State of the Company's affairs)

Vimta Labs Ltd., originally established in 1984 as a Partnership firm, is India's most comprehensive contract research and testing organization, providing a wide range of services to pharmaceutical, biopharmaceutical, food, consumer goods, electronic, electrical, agrochemical, medical device, power, cement, oil & gas, ores & minerals, infrastructure and many other industries, government organizations as well as other industry participants. Over the span of 40+ years, we have developed a track record of consistent quality, delivery and continuous innovation that has enabled us to grow faster than our underlying markets and deliver strong financial results. We believe our scientific expertise, along with our cutting-edge technologies and knowledge of applicable regulatory requirements help our customers bring to market safe and quality products and maximize returns on their outsourcing spends. Broadly, these services include:

- Drug discovery, development, and drug life cycle management support services in the areas of preclinical research, clinical research and analytical services for biopharmaceutical companies;
- Contact research and development of biologics and peptides;
- Preclinical research and testing services for medical device companies;
- Contract research and testing for agrochemical and specialty chemical companies;
- Food testing and analytical development services to support manufacturers, processors, farmers, retailers, traders, exporters and regulators (viz. FSSAI, BIS, APEDA, EIC, etc);
 - VIMTA's Food Lab in Hyderabad is a National Reference Lab for testing of Water, Alcoholic & Non-Alcoholic Beverages;
 - VIMTA setup and operates the National Food Laboratory at Navi Mumbai, under PPP model with FSSAI. The contract was awarded to VIMTA in 2021 with a term of 25 years;
- Post project monitoring to various industries such as power, infrastructure, cement, oil & gas, mining etc;
- EMI/EMC testing for electronic and electrical products/components. Electrical/Electronic safety, Environmental and physical security products testing.

2. MANAGEMENT DISCUSSION AND ANALYSIS

A. Macro Economy

Global Economy

The global economy entered the year on a stable footing, supported by resilient output and steady investment momentum. Early-year estimates projected global GDP growth at 3.3% for 2026 and 3.2% for 2027 according to the January 2026 IMF Update. Inflation was expected to continue moderating, with global headline inflation easing to 3.8% in 2026 and 3.4% in 2027. Against this backdrop, several major economies were positioned for solid performance: the United States was projected to grow 2.4% in 2026 supported by fiscal policy and lower policy rates, while India was expected to expand at 6.4% in 2026 owing to strong underlying momentum and a positive tariff environment. Global trade volumes were anticipated to normalize after expanding 4.1% in 2025.

However, the economic landscape shifted following the outbreak of conflict in the Middle East in late February 2026, which disrupted energy markets and critical shipping routes. The oil prices which previously were expected to decline are now projected to rise by 21.4% in 2026 because of supply interruptions through the Strait of Hormuz. Energy commodity prices as a whole are expected to increase by 19% in 2026. This shock prompted a downward revision of global growth to 3.1% for 2026, compared with the earlier 3.3% estimate. Global inflation projections were revised upward to 4.4%, reflecting higher energy and food costs partially tied to disrupted transport and fertilizer markets. Emerging market and developing economies particularly energy importers face the sharpest impact, with growth for this group revised down by 0.3 percentage points for 2026.

Despite these headwinds, several structural positives continue to support global activity. Advanced economies

are expected to record combined growth of 1.8% in 2026, while technology-related investment remains a key driver of output as firms continue to expand AI-related capital expenditure. Global trade volumes are projected to grow 2.8% in 2026 and 3.8% in 2027, supported by resilient services trade and the gradual reorientation of supply chains. Financial conditions, although affected by risk-off sentiment at the onset of the conflict, remain broadly accommodative relative to historical norms. These factors help offset the near-term drag from commodity-linked inflation and supply bottlenecks.

Outlook

Looking ahead, global growth is expected to stabilize at 3.2% in 2027, assuming a gradual normalization of energy supplies and a stabilization of geopolitical conditions. Key tailwinds include sustained productivity gains from AI investment, resilient domestic demand in several large economies, and easing trade policy uncertainty as temporary tariff measures expire or are replaced by negotiated arrangements. However, the outlook remains sensitive to persistent energy price volatility, elevated geopolitical risk, and tighter financial conditions. Under the adverse-case scenario outlined in the April 2026 WEO, global growth could slow further to 2.5% in 2026, and in a severe scenario involving prolonged energy market disruption it could approach 2%, bringing the world close to recession territory. Even so, the global economy has demonstrated considerable adaptability in recent years, and with constructive policy coordination and improving supply conditions, a gradual return to stronger medium-term growth remains achievable.

(Source: IMF January 2026, IMF April 2026)

Indian Economy

India continued to stand out as one of the fastest-growing major economies, underpinned by strong domestic demand, resilient services exports, and sustained public investment. Real GDP growth for 2025 is estimated at 7.3% in the IMF January 2026 Update and was revised upward to 7.6% in the IMF April 2026 World Economic Outlook, reflecting stronger-than-expected momentum and favourable carryover effects into 2026. Growth is projected to moderate to around 6.4–6.5% in 2026 and 2027, primarily as cyclical factors normalize, yet remains well above both the global average and peer emerging-market economies.

Inflation conditions improved markedly in 2025, aided by subdued food prices and easing supply pressures. While global commodity prices rose sharply following the escalation of conflict in the Middle East, India's inflation is expected to remain broadly contained. Consumer price inflation is projected at 4.7% in 2026, before easing to 4.0% in 2027, broadly aligned with the Reserve Bank of

India's target range. Stable labor-market conditions further support domestic demand, with unemployment projected to remain around 4.9% during 2025–2027.

The outbreak of war in the Middle East in early 2026 introduced new external risks for the Indian economy, primarily through higher global energy and food prices and increased volatility in shipping and financial markets. Oil prices are projected to rise significantly in 2026 under the baseline conflict scenario, increasing import costs for energy-dependent economies such as India. As a result, India's current account deficit is projected to widen from –0.9% of GDP in 2025 to –2.0% in 2026, before narrowing to –1.6% in 2027 as price pressures ease and services exports remain strong. Despite these pressures, India benefits from resilient remittance inflows, a competitive services sector, and improved market access following reductions in U.S. tariffs on Indian goods.

Overall, while global uncertainties have increased, India's economic fundamentals—supported by investment, formalization, and ongoing infrastructure expansion—continue to provide a degree of insulation against external shocks.

Outlook

Looking ahead, India's growth outlook remains favourable despite heightened global risks. The IMF expects India to remain a key driver of global growth through 2027, even as world output slows to 3.1% in 2026 and 3.2% in 2027 amid geopolitical tensions and tighter financial conditions. Downside risks for India stem primarily from prolonged energy price volatility, escalation of geopolitical conflicts, and slower global trade growth. At the same time, upside potential exists from faster adoption of digital technologies, continued public-sector capital expenditure, and structural reforms that enhance productivity and manufacturing competitiveness. In the baseline scenario, India is expected to sustain medium-term growth above 6.5%, reinforcing its position as one of the most resilient large economies in a challenging global environment.

B. Industry Overview

1. Contract Research Organisation

1.1 Global Scenario

The global Contract Research Organization (CRO) market is experiencing strong growth, driven by increasing outsourcing of clinical research by pharmaceutical, biotechnology, and medical device companies. The market is projected to grow from USD 91.4 billion in 2026 to USD 175.8 billion by 2033, at a CAGR of ~9.8%, supported by rising drug development complexity and the need for cost-efficient, faster time-to-market solutions.

(Source: [Coherent Market Insights](#))

- **Drug Discovery services**

The global drug discovery market is witnessing strong and accelerated growth, expanding from USD 124.1 billion in 2025 to USD 142.5 billion in 2026, and is projected to reach ~USD 250.5 billion by 2030, registering a CAGR of ~15%. Growth is driven by the rising prevalence of chronic and infectious diseases, increasing pharmaceutical R&D spending, and growing collaborations between biotechnology and pharmaceutical companies.

The market outlook remains highly positive, supported by advancements in molecular biology, increasing healthcare expenditure, and the need for continuous innovation in drug development. Emerging trends such as AI-driven drug discovery, personalized medicine, integration of genomics (omics data), and adoption of automation and robotics are significantly improving efficiency and accelerating drug development timelines.

Additionally, the market is witnessing structural shifts due to outsourcing to CROs and increasing use of advanced technologies such as high-throughput screening and nanotechnology. However, macroeconomic factors including geopolitical tensions, trade tariffs, and supply chain disruptions are increasing input costs—particularly for laboratory equipment and reagents—while also encouraging localization and self-reliance in certain markets.

Overall, the drug discovery market remains a critical and innovation-driven segment of the pharmaceutical industry, with strong long-term growth supported by technology adoption, rising healthcare needs, and sustained investment in R&D.

(Source: [Research and Markets](#))

- **Pre-Clinical services**

The global preclinical Contract Research Organization (CRO) market is witnessing steady growth, driven by increasing outsourcing of early-stage development activities and rising R&D investments.

Within this landscape, preclinical services for agrochemical and specialty chemical industries primarily comprise allied non-clinical studies such as toxicology, ecotoxicology, environmental fate, residue analysis, and regulatory dossier preparation, which are critical for demonstrating product safety and environmental compliance prior to commercialization.

Pharmaceutical, biotechnology, agrochemical, and specialty chemical companies are increasingly relying on CROs to access specialized expertise, reduce infrastructure costs, and accelerate development timelines, particularly as development pipelines

become more complex and compliance requirements intensify.

Technological advancements are significantly transforming the market, with the adoption of AI/ML, 3D cell culture models, and organ-on-chip platforms enhancing predictive accuracy and reducing reliance on traditional animal testing. These innovations support improved decision-making in early-stage safety and pharmacokinetic assessments across both pharmaceutical and chemical regulatory programs.

Global demand is further driven by stringent regulations, notably Europe's REACH framework, which mandates extensive non-clinical data for both new and existing chemicals, creating sustained opportunities for global CROs. While the market is mature in North America and Europe, Asia-Pacific has emerged as the fastest-growing execution hub due to cost efficiencies and expanding regulatory adoption. Despite challenges arising from diverse regulatory requirements and high GLP compliance costs, regulatory complexity, sustainability focus, technological innovation, and outsourcing trends underpin a stable, long-term growth outlook for CROs supporting these industries.

(Source: [ECHA](#), [Market Research Future](#), [Emergen Research](#), [VPA Research](#), [NCBI](#), [Outcome Capital, Research and Markets](#))

- **Bioanalytical testing and bioavailability/bioequivalence (BA/BE) and Clinical Trials**

The global bioequivalence studies market is witnessing steady growth, and projected to reach ~USD 1.35 billion by 2033, growing at a CAGR of ~7.5%. Growth is primarily driven by the rising demand for generic drugs, increasing patent expiries, and regulatory requirements mandating bioequivalence studies for drug approvals.

- Clinical trials market size was estimated is projected to reach USD 158.4 billion by 2033, growing at a CAGR of 7.7% from 2026 to 2033, driven by the rising prevalence of chronic and rare diseases, advancements in precision medicine and biotechnology, the expansion of decentralized & virtual trials, and growing R&D investments by pharmaceutical and biotech companies.

Technological advancements and biosimulation are reshaping the sector by enabling virtual bioequivalence assessments and reducing dependence on extensive in-vivo studies. Growing outsourcing to CROs and the rapid expansion of clinical research infrastructure particularly in emerging markets like India and China are further accelerating market growth.

However, the market faces challenges from stringent

regulatory requirements, high validation costs, and data quality constraints, which can increase timelines and operational complexity. Overall, the bioequivalence studies market remains a critical component of generic drug development, with stable long-term growth supported by regulatory compliance needs and the expanding global generics market.

(Source: [openPR.com](https://openpr.com), [Grandview research](https://www.grandviewresearch.com))

Outlook

The overall outlook for drug discovery, pre-clinical services, BA/BE studies, and the broader CRO sector remains strongly positive. Drug discovery is accelerating with advances in AI, genomics, automation, and sustained growth in global R&D spending. Pre-clinical services continue to expand as companies outsource complex toxicology and regulatory studies, supported by technologies like 3D cell culture and organ-on-chip. BA/BE studies show stable growth driven by rising generic drug demand, patent expiries, and biosimulation-based efficiencies. Across all segments, CROs benefit from deeper outsourcing, growing therapeutic complexity, and Asia-Pacific's rise as a cost-efficient research hub, reinforcing long-term sector resilience.

1.2 Indian Scenario

The Indian pharmaceutical Contract Research Organization (CRO) market is witnessing robust growth, supported by increasing outsourcing of drug development activities and the country's emergence as a preferred destination for clinical research. The market is projected to reach ~USD 5.0 billion by 2033, growing at a CAGR of ~9.5%.

Growth is driven by rising R&D costs, increasing patent expiries, and the need for cost optimization, prompting pharmaceutical companies to outsource clinical and pre-clinical activities. India's cost-effective healthcare ecosystem, skilled talent pool, and growing number of CROs are further strengthening its position as a global outsourcing hub.

Services-wise, clinical research dominates the market, while pre-clinical services are expected to witness the fastest growth, reflecting increasing demand for early-stage drug development support. Additionally, factors such as increasing healthcare investments, favorable regulatory environment, and logistical advantages are expected to sustain strong growth momentum. Overall, India continues to gain prominence in the global CRO landscape, driven by outsourcing trends.

(Source: [Grand View Research](https://www.grandviewresearch.com))

- **Drug Discovery Outsourcing**

The India drug discovery outsourcing market is witnessing strong growth, with market size projected to reach ~USD 497.7 million by 2033, growing

at a CAGR of ~10.8%. This growth is driven by increasing outsourcing by global pharmaceutical and biotechnology companies seeking cost efficiency, access to skilled scientific talent, and faster drug development timelines.

India is emerging as a key global hub for early-stage drug discovery services, supported by low operating costs (up to ~40% lower than developed markets), availability of skilled professionals, and WHO-cGMP compliant infrastructure. Demand is further supported by rising prevalence of complex and genetic diseases, increasing R&D investments, and government initiatives to strengthen the pharmaceutical ecosystem.

Segment-wise, lead identification and candidate optimization dominate the market, reflecting growing demand for early-stage discovery services, while other associated workflows are expected to witness the fastest growth. Overall, India's increasing integration into global drug development value chains and its cost-capability advantage position it as a high-growth, strategic outsourcing destination in the pharmaceutical industry.

- **Pre-Clinical Services**

The India preclinical CRO market is witnessing strong growth projected to reach ~USD 450.9 million by 2033, growing at a CAGR of ~9.7%. Growth is primarily driven by the increasing cost and complexity of drug development, rising R&D investments, and growing pressure on pharmaceutical companies to adhere to strict timelines, thereby accelerating outsourcing of preclinical research activities.

India is emerging as a preferred destination for preclinical outsourcing, supported by its, skilled talent pool, and increasing investments from global pharmaceutical companies. Service-wise, toxicology testing dominates the market, while bioanalysis and DMPK studies are expected to witness the fastest growth, reflecting rising demand for advanced and complex testing capabilities.

Overall, the market outlook remains positive, supported by increasing global outsourcing trends, technological advancements, and India's growing integration into the global drug development value chain.

- **Bioanalytical testing and bioavailability/bioequivalence (BA/BE) and Clinical trials**

The Bioequivalence (BE) studies market in India is projected to grow at a Compound Annual Growth

Rate (CAGR) of 9% from 2025 to 2030, with revenue expected to reach USD 42.6 million by 2030. The broader bioanalytical testing services market in India is projected to see an even higher CAGR of 10.7% to 11.3% from 2025 to 2032/2033.

India has introduced significant regulatory reforms through the New Drugs and Clinical Trials (Second Amendment) Rules, 2026, aimed at simplifying and accelerating export-focused bioavailability and bioequivalence (BA/BE) studies. The amendment introduces a “prior intimation” route, allowing eligible low-risk BA/BE studies to commence upon online submission and acknowledgment, eliminating the need for prior regulatory approval and thereby reducing approval timelines and procedural delays.

The relaxation applies to specific study types involving already approved molecules in India or major global markets, while maintaining safeguards such as mandatory ethics approvals and exclusions for high-risk drug categories. Overall, the reform is expected to enable faster study initiation, improve turnaround times for global regulatory submissions, and enhance India's competitiveness as a hub for pharmaceutical research and export-oriented clinical studies, while retaining necessary regulatory oversight.

- India's clinical trials ecosystem is expected to grow at a CAGR of 8.6% by from 2026 to 2030, supported by regulatory reforms, a large and diverse patient pool, and strong pharmaceutical capabilities. With rising global confidence and growing registrations, India is emerging as a key global hub for efficient, scalable clinical research.

Outlook

India's life sciences outsourcing market is set for strong growth across drug discovery, preclinical research, BA/BE studies, and CRO services. Rising R&D costs, increasing patent expiries, and demand for cost-efficient development continue to drive outsourcing to India's skilled, costcompetitive ecosystem. Drug discovery outsourcing is expanding rapidly, supported by advanced capabilities and growing global integration. Pre-Clinical services and BA/BE studies are also accelerating, aided by regulatory reforms, expanding clinical research infrastructure, and rising demand for toxicology, bioanalysis, and generics development. Clinical trials market is also expanding significantly, driven by increasing global demand for cost-effective research and modernized, faster approval processes under the New Drugs and Clinical Trials (NDCT) Rules. Overall, India is strengthening its position as a high-growth global hub for pharmaceutical R&D and clinical research.

2. Pharmaceutical Analytical Testing

2.1 Global Scenario

The global pharmaceutical analytical testing market is witnessing robust growth, driven by increasing regulatory stringency, rising complexity of drug development, and the expanding pipeline of biologics and biosimilars. The market is estimated at approximately USD 10.5 billion in 2026 and is projected to reach USD 15.7 billion by 2031, growing at a CAGR of ~8.3%.

Growth is primarily supported by stringent regulatory frameworks such as evolving validation and compliance standards, which require continuous verification of analytical procedures across the drug lifecycle. Additionally, the increasing complexity of modern therapeutics including cell and gene therapies, antibody-drug conjugates, and mRNA based drugs has significantly elevated the demand for advanced analytical capabilities.

A key structural trend is the outsourcing of analytical testing to specialized contract research organizations (CROs), driven by cost optimization and the need for advanced instrumentation and expertise. Furthermore, rising scrutiny around impurities (e.g., nitrosamines) and stability testing is increasing testing volumes. Despite challenges such as high equipment costs and data security concerns, the market remains resilient, underpinned by its non-discretionary role in regulatory compliance and drug safety.

(Source: [Mordor Intelligence](#))

2.2 Indian Scenario

The Indian pharmaceutical analytical testing outsourcing market is witnessing strong and sustained growth, driven by increasing regulatory stringency, rising R&D investments, and the growing complexity of drug development. The market is projected to reach ~USD 780 million by 2035, expanding at a CAGR of around 8.7%.

Growth is primarily supported by the increasing shift toward outsourcing, as pharmaceutical and biopharmaceutical companies seek to optimize costs, access specialized expertise, and focus on core competencies. Heightened regulatory scrutiny and compliance requirements, particularly around quality assurance, are further accelerating demand for advanced analytical testing services.

Additionally, the expansion of biologics, personalized medicine, and complex formulations is driving the need for sophisticated testing capabilities, including characterization, impurity testing, bioassays, bioanalytical testing, stability studies, and method validation. Technological advancements such as automation, digitalization, and advanced analytical techniques are further enhancing testing efficiency and accuracy.

Overall, India is emerging as a strategic hub for pharmaceutical analytical testing outsourcing, supported by strong scientific talent, cost competitiveness, and increasing integration into global pharmaceutical value chains.

3. Testing, Inspection & Certification Market

3.1 Global Scenario

The global Testing, Inspection and Certification (TIC) market is a key enabler of quality assurance and regulatory compliance across industries. It is projected to reach USD 555.9 billion by 2033, growing at a CAGR of 3.6%. Growth is driven by increasing regulatory requirements, rising

consumer awareness of safety and quality, and expanding global trade requiring adherence to international standards.

Demand for TIC services remains strong across sectors such as healthcare, food & agri, automotive, Electronics, energy, and manufacturing, supported by rapid industrialization, infrastructure development, and increasingly complex supply chains. Technological advancements, including automation, artificial intelligence, IoT, and data analytics, are enhancing efficiency, accuracy, and scalability of services.

Testing services dominate the market due to their widespread use in industrial and manufacturing processes, while certification services are expected to grow faster, driven by sustainability and regulatory needs. Although in-house services currently lead due to greater control, outsourcing is gaining traction as companies seek specialized expertise and cost efficiencies.

Manufacturing remains the largest application segment, while healthcare is expected to grow at a faster pace due to stringent safety standards. Regionally, Asia Pacific leads the market, driven by strong industrial growth and export-oriented economies such as China and India, while North America and Europe benefit from established regulatory frameworks.

Overall, the TIC market is expected to witness steady, compliance-led growth, with emerging sectors such as electric vehicles, renewable energy, and advanced manufacturing creating new opportunities, alongside increasing digitalization and outsourcing.

• Food and Agricultural Testing Industry

The global food safety testing market is witnessing strong growth, driven by increasing concerns over foodborne illnesses, rising consumer awareness, and stringent regulatory requirements. The market was valued at approximately USD 26.3 billion in 2025 and is projected to reach USD 48.0 billion by 2033, growing at a CAGR of 7.8% (2026–2033). Growth is further supported by the rising consumption of processed and packaged foods, globalization of food supply chains, and parallel expansion in agricultural testing, which ensures quality and safety at the source level. Agricultural testing, involving analysis of soil, water, seeds, and fertilizers, is gaining importance due to the need for higher crop productivity, contamination control, and sustainable farming practices, with the market expected to grow at over 7% CAGR.

Demand for food safety testing is underpinned by regulatory frameworks and standards such as HACCP and ISO, as well as enforcement by authorities like the FDA and FSSAI. Increasing incidences of

contamination, product recalls, and health risks are prompting food manufacturers to adopt robust testing protocols, while agricultural testing is being increasingly integrated into the farm-to-fork value chain to enhance traceability and quality assurance.

Technological advancements including PCR-based testing, biosensors, DNA-based agricultural diagnostics, and rapid testing methods are improving the speed, accuracy, and efficiency of testing processes, enabling real-time monitoring across both agricultural inputs and downstream food processing systems. From a segment perspective, microbiological testing dominates the food safety market due to its critical role in detecting pathogens, while soil and water analysis represent key segments within agricultural testing, driven by concerns over pollution and nutrient management.

Traditional testing methods continue to hold the largest share due to their reliability and regulatory acceptance, although rapid testing technologies are expected to grow at a faster pace due to shorter turnaround times across both domains. Meat, poultry, and seafood remain the largest application segment in food testing due to high contamination risks, while increasing demand for organic produce and precision farming techniques is driving growth in agricultural testing services.

Regionally, Europe leads due to stringent food safety regulations, while Asia Pacific is the fastest-growing region, supported by expanding food processing industries, rising agricultural modernization, and stronger regulatory enforcement in countries such as India and China. Overall, the market is characterized by growing integration between agricultural and food testing ecosystems, technological innovation, and increasing consolidation, positioning testing services as a critical enabler of food safety, sustainability, and regulatory compliance.

- **Electrical and Electronics Testing**

The global Electrical & Electronics (E&E) Testing, Inspection, and Certification (TIC) industry remains a critical enabler of product safety, regulatory compliance, and international trade. The market is expected to reach USD 25.58 billion by 2033, growing at a CAGR of approximately 4.5% during 2026–2033.

Growth continues to be driven by stringent regulatory standards, increasing adoption of electrified and connected devices, and the expanding scale of global electronics manufacturing. Mandatory requirements related to electrical safety, electromagnetic compatibility (EMC), and energy efficiency support

stable demand across consumer and industrial segments.

Asia Pacific remains the largest regional market, supported by strong manufacturing activity, while India is expected to record the highest growth rate over the forecast period due to rapid industrialization and strengthening compliance frameworks.

Outlook

Looking ahead, the industry outlook remains stable, with sustained demand anticipated from electrification, digitalization, and evolving regulatory requirements. Providers with strong technical capabilities, global accreditations, and digital testing infrastructure are well positioned for longterm growth.

(Source: [Verified Market Reports](#))

3.2 Indian Scenario

The Indian Testing, Inspection and Certification (TIC) market is witnessing robust growth, driven by increasing regulatory enforcement, industrial expansion, and deeper integration with global supply chains. The market is projected to reach USD 33.2 billion by 2033, growing at a CAGR of 7.2%, significantly higher than the global average. India accounted for around 4.5% of the global TIC market in 2025 and is expected to remain one of the fastest-growing markets in the Asia Pacific region, supported by stricter compliance requirements across sectors such as food, healthcare, and electronics.

Testing services dominate the market, accounting for over 80% share, driven by strong demand across manufacturing and industrial applications. Certification services are expected to grow at a faster pace due to increasing regulatory scrutiny, export requirements, and rising focus on quality and sustainability standards. Government initiatives such as Make in India and the Smart Cities Mission, along with growth in infrastructure, pharmaceuticals, and healthcare, are further driving demand for TIC services.

Outlook

Overall, the India TIC market is expected to sustain strong growth over the medium to long term, supported by regulatory tightening, infrastructure development, and increasing participation in global trade, alongside a gradual shift toward specialized and outsourced testing and certification services.

(Source: [Grand View Research](#))

- **Food Testing**

The food safety testing market in India is characterized by robust expansion, driven by a compound annual growth rate (CAGR) of 9.8% from 2024 to 2033. Valued at USD 655.4 million in 2024, the market is projected

to reach approximately USD 1.51 billion by 2033. This growth is underpinned by rising consumer awareness regarding foodborne illnesses and the increasing stringency of domestic food safety regulations.

Segment and Regional Insights

- **Dominant Segments:** Meat, poultry, seafood, daily products, fruits and vegetables testing remains the largest application area, reflecting India's significant role in global protein exports and the high safety standards required for these commodities. Microbiological testing is the primary service requested, focusing on the detection of pathogens like *Salmonella* and *Listeria*.
- **Technological Shifts:** There is a notable transition toward rapid testing methods, including PCR-based assays and immunoassay-based technologies, as manufacturers seek to reduce turnaround times and enhance supply chain efficiency.
- **Geographical Drivers:** The market is concentrated in regions with high industrial activity and food processing hubs. These areas benefit from a dense network of accredited laboratories and proximity to major export ports, facilitating seamless compliance with both local and international safety mandates.

The ongoing geopolitical hostilities in Eastern Europe and the Middle East have significantly disrupted global food trade, placing food export shipments to Gulf markets at risk due to the instability of critical shipping corridors. Exports of key agricultural products have declined sharply, with rice, bananas, and other food items seeing steep drops, including reported declines of up to 58% in March 2026. Large volumes of Basmati rice and seafood remain stranded due to shipping disruptions, while instability around the Strait of Hormuz has driven up logistics, insurance, and fuel costs, causing delays and container shortages. Rising prices of imported fertilizer inputs from the Gulf are further pressuring domestic agricultural production.

These disruptions have forced a strategic pivot toward intensified shelf-life and stability testing to manage extended transit times, alongside frequent re-verification of products rerouted to alternative destination markets. Furthermore, surging energy costs and supply chain volatility for laboratory reagents have increased operational overhead, accelerating an industry wide shift toward localized, on-site testing and mobile diagnostics to de-risk quality assurance from centralized, vulnerable logistics hubs.

Outlook

The Indian market is poised for long-term sustainability as the food processing industry matures. The integration of advanced analytical tools and the expansion of third-party testing services are expected to remain key themes. As regulatory oversight continues to harmonize with global standards, the demand for comprehensive contaminant testing covering pesticides, antibiotics, toxins, and heavy metals will serve as a critical pillar for brand protection and public health safety.

Electrical and Electronics Testing

India has emerged as a highgrowth market, driven by the government's push to develop a global electronics manufacturing hub and strengthen indigenous R&D capabilities, including in the defence and strategic sectors. The expansion of mandatory BIS certification continues to create stable, non-discretionary demand for domestic TIC services, while India has become the fastest-growing TIC submarket in Asia-Pacific, supported by up to USD 5 billion in production-linked incentives. Under the Atmanirbhar Bharat framework, scaling domestic manufacturing alongside defence-related R&D in areas such as aerospace, missiles, electronics, and secure communications is increasing the need for compliance with international certification standards, including advanced EMI/EMC testing to support reliable and mission-critical systems. The forthcoming USD 5 billion Mobile PLI 2.0 scheme is expected to further deepen the domestic manufacturing base and drive incremental certified testing requirements.

Near-term risks have risen due to the Iran-US-Israel conflict, which has pushed up energy costs for a country sourcing roughly half of its crude and most LNG from the Middle East. Higher input prices are pressuring manufacturing margins, delaying product launches, and slowing the flow of goods entering the certification cycle, while heightened geopolitical uncertainty is weighing on private investment and R&D pipelines.

Outlook

Despite these pressures, the medium-term outlook for India's E&E TIC sector remains strong. Growth will be supported by automation-led testing innovations, rising demand for complex compliance services such as EMI/EMC driven by defence and high-reliability electronics R&D, supply-chain diversification into India, and policy-driven manufacturing expansion. The combination of regulatory requirements, domestic capability building across commercial and defence sectors, and global supply-

chain realignment positions India's TIC sector for sustained outperformance.

4. Environment Testing Industry

4.1 Global Scenario

The global environmental testing market is evolving rapidly, shaped by increasingly stringent compliance requirements, advances in analytical technologies, and a growing emphasis on sustainable operations. The market expanded from USD 8.07 billion in 2025 to USD 8.61 billion in 2026, reflecting steady demand for accurate and timely environmental monitoring across industrial, utility, laboratory, agricultural, and government applications.

Environmental testing supports regulatory alignment, public-health protection, and environmental risk mitigation through comprehensive analysis of air, water, soil, and noise samples. The market encompasses a broad range of testing technologies, from conventional methods to advanced solutions such as chromatography, mass spectrometry, molecular diagnostics, and PCR-based testing, enabling faster, more reliable, and increasingly field-deployable assessments of chemical, microbiological, physical, and radiological contaminants.

Outlook

Over the forecast period, the environmental testing market is projected to grow at a compound annual growth rate of 6.9%, reaching approximately USD 12.9 billion by 2032. Growth is expected to be supported by tighter environmental regulations, expanding sustainability initiatives, and increased adoption of digital, AI-enabled, and real-time monitoring solutions. While rising tariffs and supply-chain pressures have increased procurement costs for analytical equipment and reagents, organizations are responding through localized sourcing and diversified supplier strategies, supporting continued market resilience and long-term growth. (Source: [Research and markets](#))

4.2 Indian Scenario

The environmental testing market in India continues to expand, driven by stricter environmental regulations, increased industrial activity, and rising ESG compliance across sectors. In 2025, the market generated revenues of approximately USD 535.9 million, supported by demand from manufacturing, infrastructure, pharmaceuticals, and utilities. Rapid testing technologies led the market due to faster turnaround times and growing adoption for regulatory compliance and monitoring applications.

Outlook

Looking ahead, the India environmental testing market is expected to grow at a CAGR of around 8.9% during 2026–2033, reaching an estimated USD 1,053.0 million by 2033. Growth is anticipated to be driven by tighter enforcement of environmental norms, sustained industrial and infrastructure development, increased corporate focus on sustainability disclosures, and continued adoption of rapid and automated testing solutions. The long-term outlook for the sector remains positive, with stable demand visibility and opportunities for technology-led service expansion.

5. Overall Industry Outlook

Global Scenario

The global CRO, drug discovery, pre-clinical, BA/BE, CT, TIC, food safety, E&E testing, and environmental testing industries are positioned for continued growth despite rising geopolitical and macroeconomic risks. Strong R&D investments, increasing therapeutic complexity, and rising outsourcing to specialized CROs support long-term demand across drug discovery and pre-clinical services. BA/BE and analytical testing continue to expand due to generics growth and evolving regulatory standards. In TIC and food/agri testing, supply chain globalization and stringent compliance drive sustained activity. While energy-linked inflation, disrupted shipping routes, and equipment cost pressures pose near-term challenges, digitalization, AI adoption, and supply-chain reorientation underpin a resilient medium-term global outlook.

Indian Scenario

India's life sciences, CRO, TIC, food testing, and environmental testing sectors are set for strong expansion, supported by cost advantages, regulatory reforms, and growing integration into global value chains. Pharmaceutical CRO and drug discovery outsourcing markets are accelerating due to rising R&D costs, patent expiries, and India's deep scientific talent pool. Pre-clinical and BA/BE services benefit from simplified approval pathways, expanding clinical trial infrastructure, and increasing generics demand. The TIC sector is strengthened by industrial growth, mandatory certification, and PLI-

driven electronics manufacturing. Food and environmental testing are rising due to stricter standards and supply-chain disruptions. Overall, India remains a high-growth, strategic hub despite global volatility.

Risks and Concerns

The Company operates in an environment marked by heightened global uncertainty. The escalation of geopolitical tensions, particularly the 2026 Middle East conflict, poses significant macroeconomic risks through rising energy prices, volatile shipping routes, and elevated inflationary pressures. These developments may adversely impact operating costs, laboratory consumables, freight, and turnaround timelines across the services Vimta provides. The risk of global growth deceleration, as projected in revised IMF assessments, remains a source of concern for demand visibility in export-linked segments.

Across the CRO, drug discovery, pre-clinical, and BA/BE markets, the increasing complexity of R&D, tightening regulations, and varying global compliance requirements elevate execution risks. Stringent cGMP, GLP, GCP, and REACH-driven obligations can increase project timelines and operational costs. BA/BE studies face risks from evolving regulatory scrutiny, data integrity expectations, and the need for robust bioanalytical validation. Delays or changes in regulatory frameworks despite recent process simplifications in India remain a key area of uncertainty.

The TIC and analytical testing industries face challenges from equipment cost inflation, reagent supply instability, and rising expectations for advanced testing capabilities. The food and agri-testing ecosystem remains exposed to logistics disruptions, supply chain bottlenecks, and volatile fertilizer import prices, which can affect sample flow and test volumes. In electrical and electronics testing, especially for defence EMI/EMC services, rising input costs and delayed capital expenditure cycles may slow customer investments.

Competitive pressures are intensifying across all service lines due to consolidation, global CRO expansion, and increased entry of domestic players. Maintaining pricing discipline amid tightening margins, especially in commoditized segments, is an ongoing challenge. Talent availability and retention, particularly in specialized scientific and regulatory roles, represent structural operational risks.

Cybersecurity, data protection, and confidentiality risks also remain high due to the sensitive nature of client research data, clinical records, and regulatory submissions. The shift toward digital and decentralized testing models increases exposure to system vulnerabilities, requiring sustained investment in secure digital infrastructure.

Overall, while long-term demand fundamentals remain strong, the Company must navigate an environment

characterized by geopolitical volatility, regulatory complexity, supply chain fragility, cost pressures, and intensifying competition, any of which may affect operational performance and growth trajectories.

Competitive Landscape

Global Landscape

Globally, the CRO, drug discovery, pre-clinical, bioanalytical, and TIC industries are witnessing increased consolidation, driven by rising R&D complexity, demand for end-to-end capabilities, and the need for scale in technology and regulatory compliance. Large multinational CROs are expanding portfolios through acquisitions in advanced modalities, bioanalysis, toxicology, and digital clinical platforms. The TIC industry is also consolidating, with leading players strengthening capabilities in food testing, E&E testing, environmental testing, and specialized regulatory services. Competitive intensity continues to increase as technology-enabled service models AI-driven discovery, biosimulation, organ-on-chip, rapid diagnostics, and automated laboratories differentiate global leaders from mid-size and niche providers.

India Landscape

India's competitive environment is strengthening as the country emerges as a preferred global hub for CRO, drug discovery outsourcing, BA/BE studies, analytical testing, and TIC services. Domestic CROs are expanding capacity, building GLP/GCP/GMP - aligned infrastructure, and investing in toxicology, bioanalysis, DMPK, and specialty chemistry capabilities. Regulatory reforms and cost advantages are attracting global partnerships, while local consolidation is accelerating as firms seek scale, deeper scientific expertise, and multi-site capabilities. In TIC, competition is intensifying across food, E&E, and environmental testing, supported by expanding PLI incentives, mandatory certification requirements, and growing demand for EMI/EMC, and high-reliability testing. Overall, India's competitive positioning is improving as companies integrate advanced technologies, expand geographic reach, and align with global quality standards.

Outlook for VIMTA

The outlook for Vimta remains constructive over the medium to long term, supported by favourable industry growth trends and sustained outsourcing across its service lines, alongside increasing opportunities to leverage AI and other technological advancements to enhance productivity, turnaround times, and operating efficiency. However, the short-term outlook remains uncertain given potential disruption from supply-chain constraints in critical reagents and chemicals, volatility in food-testing volumes linked to trade flows between India, the Middle East, and Europe, constraints in sourcing for large-animal testing and soil imports for European REACH-related programs, and rising

manpower costs amid growing competition for scientific talent. Notwithstanding these near-term uncertainties, the Company remains well positioned to navigate such factors through its diversified service portfolio, strong domestic franchise, expanding international client base, proven quality and compliance track record, specialised scientific capabilities, economies of scale, and ability to ramp up capacity in line with demand. The Company's experienced senior management and scientific leadership further strengthen execution resilience and strategic agility. Taken together, these strengths provide a strong foundation for sustained growth, deeper client engagement, improved operating leverage, and a positive medium- to long-term outlook.

2.1 OUR STRENGTHS & STRATEGIES

Your Company's strengths have been its human resources, processes, partnerships, and unparalleled laboratory infrastructure. VIMTA provides services to its customers through processes and procedures that are oriented to deliver strong compliance with regulatory requirements, thereby maintaining the integrity of data and the reports, and minimizing risks to the customers. VIMTA has a track record of strong science and quality over a 42-year history, earning it a reputation as a leading, high-quality, sophisticated contract research and testing organization. Over the years, it has developed a wide range of capabilities and offers high-value, advanced testing services to support product research and development. VIMTA believes it is amongst the leaders in the domestic market for GMP analytical services and GLP nonclinical services. The GMP, GLP and GCP compliant services have been successfully audited several times during the year by customers, regulatory agencies, accrediting and certifying bodies.

In addition to its established pre-clinical research, clinical research, and analytical capabilities, VIMTA has strengthened its biopharmaceutical services platform through backward integration across the biologics and peptides drug development continuum. The Company has introduced integrated contract research and development services spanning clone development to product development, including upstream and downstream process development, impurity control studies, and titer enhancement. This integrated capability enables VIMTA to engage across the biologics and peptides development value chain, thereby enhancing scientific continuity, strengthening customer relevance, and expanding value capture across multiple stages of development. It positions the Company as a differentiated, end-to-end contract research and development partner for biologics and peptides, with the ability to deliver integrated solutions spanning the service continuum.

Similarly, in the food testing business, VIMTA is recognized as the leader not only in its testing expertise, technologies, and quality, but also in its scale. VIMTA has the largest pan-

India network of full-fledged laboratories, positioning it to take more market share within the industry and continue to grow. It is counted as a center of excellence for the country by government organizations as well.

In both food and above-mentioned product development services for biopharmaceutical companies, the broad spectrum of our services, cutting edge instrumentation and facilities with large footprint allows VIMTA to offer a comprehensive set of scientific laboratory services. Further, the scale of services enables us to continuously develop and refine our expertise and enhance our ability to bend the cost and time curve of services to our customers.

The Company has strengthened its presence in Electronics and Electrical testing and is better positioned to serve the defence, industrial, telecom, and medical devices sectors with enhanced operational capacities and wider market reach.

Across all its business units, the company believes that the technical and scientific expertise of its dedicated employees provides it with a competitive advantage. With a large pool of scientists holding advanced, masters or equivalent degrees, including PhDs, VIMTA has an edge due to the varied-scientific talent pool. The compliment of scientific domain expertise is leveraged often to create innovative as well as comprehensive solutions for customers across industries.

VIMTA has strategically developed and oriented its research and testing laboratory services towards the lucratively growing industries and their outsourcing needs, to position itself to win high value-add business. The service model is focused on providing customers with both stand-alone services as well as a mix of full-service contracts. VIMTA leverages its experience in managing laboratory operations for over 40+ years, to create efficient processes delivering quality outputs that help in maintaining long-term stable customer relationships. Furthermore, your company is focused on continuous operational improvements and prudent cost management. Your company believes that its strong financial profile demonstrates the quality and efficiency of the business model and positions it for continued growth.

2.2 KEY FINANCIAL RATIOS

Ratio	Financial Year 2025-26	Financial Year 2024-25
Days, Sales Outstanding	94.97	102.52
Days, Inventory Outstanding	124.43	127.84
Debt Service Coverage Ratio	19.65	8.18
Current Ratio	3.43	2.92
Debt Equity Ratio	0.01	0.02
Price Earnings Ratio	21.88	33.46

Reason for % change from previous year: Debt service coverage ratio improvement aided by decrease in interest

cost owing to debt repayment and increase in earnings available for debt service driven by higher operating revenue.

2.3 MATERIAL DEVELOPMENTS IN HUMAN RESOURCES/ INDUSTRIAL RELATIONS, INCLUDING NUMBER OF PEOPLE EMPLOYED

Vimta has highly talented workforce of 1384 employees out of which 71.11% are scientists. During the year, with the commitment to upskill and retain talent, the company continued to provide various trainings as well as other employee engagement activities. We are focused on increasing productivity of our employees and engaging them well for achieving greater connect to business goals and objectives using various initiatives. The company is using technology effectively to drive some of these employee centric initiatives.

2.4 INFRASTRUCTURE

Vimta is one of India's largest Contract Research & Testing Organisations, headquartered in Hyderabad. As on 31st March 2026, the Company has a network comprising its Registered Office & Central Laboratory at Cherlapally, Hyderabad, a Life Sciences Campus at Genome Valley, Hyderabad. The Company also operates one (1) Electricals & Electronics laboratory and six (6) Food branch laboratories, and one (1) liaison office in Kolkata. The total built-up area of the laboratories is approximately 6,00,000 sq. ft.

2.5 FORAY INTO BIOLOGICS

Vimta has forayed into the niche segment of contract research and development of biologics and peptides in the year 2025-26. The program commenced with strategic manpower recruitment, assessment of infrastructure and technical requirements across upstream, downstream, and analytical development functions. Based on the project scope, procurement of advanced laboratory equipment and development of dedicated laboratory infrastructure were systematically executed. The laboratories have been fully commissioned, including completion of equipment installation, operational qualification and facility readiness. This was followed by establishment of quality and operational systems to support compliant and efficient biopharmaceutical development activities.

We have been engaged in advanced discussions with several customers and are confident of successfully commercializing this business in FY 2026-27, in line with our expectations.

2.6 RISKS & CONCERNS

Risks are inherent to any business. They are managed by the Company through a risk management process of risk identification and risk mitigation, through risk reduction strategies & plans and continuous monitoring of the effectiveness of the risk mitigation measures to control them.

The Company has established a robust risk management framework for identifying, assessing, monitoring, and mitigating risks across its operations. The Risk Management Committee continues to oversee the implementation and effectiveness of the Company's Risk Management Policy and Enterprise Risk Management Framework, supported by a comprehensive Risk Register for systematic monitoring and management of key risks. The Board of Directors periodically reviews the risk management framework to ensure that significant risks are appropriately identified and mitigated, and the Company maintains adequate internal control systems and procedures commensurate with the nature and size of its business.

Vimta continues to strive to stay ahead on the competition curve through creation of new service opportunities, operational excellence and uncompromising commitment to quality, regulatory compliance, and customer service. However, there may be certain risk factors that could adversely impact business.

Quality related risks: Poor performance in regulatory audits and accreditation body audits could adversely impact our business. Maintaining quality and compliance is part of every activity in the organization. The management leads the quality culture, understanding very well that this is critical for business success and survival. However, unforeseen poor or inadequate performance by employees could lead to regulatory risks. There are adequate built in controls and checks to mitigate this risk. Nevertheless, these risks cannot be ruled out.

IT related risks: The Company's operations are dependent on the reliability, security, and uninterrupted functioning of its laboratory, data management, and communication systems. Any system failure, cyber-attack, unauthorized access, or data breach could adversely affect operations and business continuity. To mitigate these risks, the Company maintains robust backup and disaster recovery mechanisms, continuously upgrades its IT infrastructure. Systems and tools such as multi stage authentication, least-privilege access, device validation, and enhanced monitoring across critical digital assets have been implemented. However, despite these measures, the risk of disruption cannot be entirely eliminated.

Service failure related risks: We are a scientific services organization and quality of service to the customers is critical for growth of our business. Quality of service is related to our ability to deliver reports and projects with scientifically reliable and accurate information; compliance to contractual requirements, regulations, standards, guidelines as applicable; and service customers with professional and ethical conduct. If we fail to perform our services per these expectations, we could lose confidence of our customers who may choose not to award further work to us or make claims against us for breach of our contractual obligations. Any such action could have a material adverse effect on our reputation,

business, results of operations, financial condition and/or cash flows. Our mitigation strategy is directed towards continuously strengthening our capabilities and learning and implementing best practices. In addition, we have strengthened our customer feedback mechanisms through stringent review systems and appropriate preventive actions.

Financial risks: Vimta makes continuous investments in capacity expansion, market reach and new business streams. These investments are based on good business judgement through market study, backed by strong planning and risk mitigation measures. However, time factors and market dynamics could delay results and/or create risks in obtaining returns on such investment. Other financial risks include bad debts from customers for various reasons; and liquidity risks as a result of any poor cash flows that could further lead to non-servicing of loans. Your company has dedicated groups for customer relations management and credit control. There are adequate checks to identify risky customer accounts and control business with them to minimize risks. Nevertheless, these risks cannot be completely ruled out.

Data risks: As a third-party provider of services, we often get into various service agreements, with customers including requirements on data confidentiality, data security and IP protection. Given the large scale of human resources involved in our organization, and the inherent vulnerability of IT solutions deployed, we may be at risk as a result of unintentional violations of customer contracts and agreements, which could further lead to significant legal risks for the business. This is mitigated through strong physical security and electronic security systems; trainings to employees, business continuity processes such as electronic data disaster recovery systems; confidentiality oaths from employees; well-propagated whistle blower policies etc. Nevertheless, these risks cannot be completely ruled out.

Growth and personnel related risks: Growth if not managed well places a strain on human, operational and financial resources. To manage our growth, we must continue to attract and retain talented staff across the business operations. Management pays strong attention to continuously building and improving operating and administrative systems to enhance productivity of personnel and processes and also to have a stronger administrative control on the businesses spread at various locations across the country. Given the dependency of business on quality of personnel there are inherent risks associated with personnel's abilities and ethical conduct, which may impact adversely customer satisfaction. Thus, if we are unable to manage our growth effectively, we could lose business from our customers. Further, if we are unable to recruit, retain and motivate key personnel, our business could be adversely affected. Our success

depends on the collective performance, contribution and expertise of our senior management team and other key personnel throughout our businesses, including qualified management, professional, operational, scientific, technical, and business development personnel. There is significant competition for qualified personnel in all the industries that we operate in, particularly personnel with significant experience and expertise. The loss of any key executive, or our inability to continue to recruit, retain and motivate key personnel in a timely fashion, may adversely impact our ability to compete effectively and grow our business and negatively affect our ability to meet our short and long-term business and financial goals. Company takes several steps to maintain a motivated and engaged team. Initiatives such as ESOPs to attract & retain talent, rewards and recognition programs, personnel competency enlargement programs etc., are among the many best practices followed by the company. Nevertheless, the risks related to growth and personnel cannot be completely ruled out.

Other risks: A few more such risks and concerns are, change in regulations and regulatory environment; downturn in economies that our business operates in; steep drop-in service prices from competition; increase in prices of input material; changes in laws such as tax laws etc. External risks also include foreign exchange risks; interest rate risks; risks from terrorism etc. Further there are also risks of critical equipment breakdowns, power breakouts, short supply of any input material or consumable, fire, and other natural calamities. These are handled through a robust business continuity plan where adequate backups are created and tested from time to time for their effectiveness, nevertheless, these risks cannot be completely ruled out. It is possible that the above list of risks does not cover all risks exhaustively. However, being an experienced organization, the mitigation measures are in-built into the organization, its strategy and processes, which have so far helped the organization go through, and grow through, various phases of business and the market situations. It will be management's continuous endeavour to develop strategies that would help the organization de-risk its business & grow with opportunities.

30 RISK MANAGEMENT POLICY

The Risk Management Committee, constituted by the Board of Directors during the previous financial year, continues to oversee the implementation and effectiveness of the Company's Risk Management Policy and Enterprise Risk Management Framework, including the identification, assessment, monitoring, and mitigation of key risks. The Company also maintains a comprehensive Risk Register to

systematically monitor, evaluate, and manage identified risks across the organisation. The Committee ensures effective implementation of risk management practices throughout the Company.

During the financial year under review, two (2) meetings of the Risk Management Committee were held. The details of the meetings are provided in the Corporate Governance Report. The Board of Directors continues to review and support the Company's risk management framework to ensure that significant risks are periodically identified, assessed, and appropriately mitigated. Further, details of key risks and the management's perception thereof are provided in the Management Discussion and Analysis section (refer point no.2) of this Report and also in the Business Responsibility and Sustainability Report (BRSR).

31 ANNUAL EVALUATION OF BOARD PERFORMANCE AND PERFORMANCE OF ITS COMMITTEES AND OF DIRECTORS

Pursuant to the provisions of the Companies Act, 2013 and Regulation 25 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Board has carried out the annual performance evaluation of its own, that of its committees and individual directors.

A structured evaluation is performed covering various aspects of the Board's functioning such as adequacy of the composition of the Board and its Committees, Board culture, execution and performance of specific duties, obligations and governance aspects.

The performance evaluation of the Independent Directors was carried out by the entire Board. The performance evaluation of the Chairman and the Non-Independent Directors was carried out by the Independent Directors who also reviewed the performance of the Secretarial Department. All the evaluations had satisfactory outcomes.

32 CODE OF CONDUCT FOR BOARD OF DIRECTORS AND SENIOR MANAGEMENT PERSONNEL

The Company has adopted a comprehensive Code of Conduct ("Code") pursuant to Regulation 17(5) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, applicable to all Directors and Senior Management Personnel, including Independent Directors, as may be applicable based on their roles and responsibilities. The Code incorporates the duties of Independent Directors as prescribed under the Companies Act, 2013, and provides guidance for ethical conduct of business and compliance with applicable laws. Further, the Company has in place a policy on obligations of Directors and Senior Management Personnel for disclosure of committee positions and commercial transactions pursuant to Regulation 26(2), (5) and (6) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. All Directors and Senior Management Personnel have affirmed compliance with the Code. A declaration to this effect signed by the CEO forms part of this Report and

is annexed as **Annexure X** to the Corporate Governance Report.

33 PREVENTION OF INSIDER TRADING

Pursuant to Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015, the Company has adopted and complied to the Code of Internal Procedures and Conduct for Regulating, monitoring and reporting of trading by designated persons and their immediate relatives along with Code of Fair Disclosures.

34 PREVENTION, PROHIBITION AND REDRESSAL OF SEXUAL HARASSMENT AT WORKPLACE

The Company has complied with provisions relating to the constitution of Internal Complaints Committee under the Sexual Harassment of women at Workplace (Prevention, Prohibition and Redressal) Act, 2013. The company formed a committee to attend to the complaints and monitor implementation of the above Act. The number of complaints filed, disposed of, and pending as of the financial year under review is zero (0).

35 VIGIL MECHANISM/ WHISTLE BLOWER POLICY

The Company has a Whistle Blower Policy in place, framed to deal with instances of fraud and mismanagement, if any in the Company. The Policy provides for adequate safeguards against victimization of employees who avail the mechanism and also provides for direct access to the Chairman of the Audit Committee. The details of the Policy are explained in the Corporate Governance Report and also posted on the website of the Company, which can be accessed at <https://vimta.com/wp-content/uploads/Whistle-Blower-Policy.pdf>.

36 INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

A robust internal control mechanism is a prerequisite to ensure that an organisation functions ethically, complies with all legal and regulatory requirements and observes the generally accepted principles of good governance.

Your Company has adequate internal control systems for business processes, efficiency in its operations, and compliance with all the applicable laws and regulations. Regular internal checks and audits ensure that the responsibilities are being effectively executed. In-depth review of internal controls, accounting procedures and policies of Company is conducted. Your Company has adopted adequate internal controls and audit system commensurate with its size and nature of business. Internal financial control with reference to financial statement is adhered.

Internal audit is carried on a quarterly basis. The Internal Auditor reports directly to the Audit Committee of the Board, which ensures process independence. The Audit

Committee reviews the adequacy and efficacy of the internal controls, as well as the effectiveness of the risk management process across the Company. After reviewing the findings and suggestions, the Audit Committee directs the respective departments through Board to implement the same.

37 CASH FLOW STATEMENT

In compliance with the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Companies Act, 2013, and the applicable Accounting Standards, the Cash Flow Statement has been prepared and forms part of the Financial Statement for the year ended 31st March 2026 included in this Annual Report.

38 ADEQUACY OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO THE FINANCIAL STATEMENTS

The Company has established adequate internal financial controls with reference to the financial statements, commensurate with the size, scale, and complexity of its operations. These controls are designed to ensure the orderly and efficient conduct of business, safeguarding of assets, prevention and detection of frauds and errors, accuracy and completeness of accounting records, and timely preparation of reliable financial information. The internal financial controls were operating effectively during the financial year under review.

Based on the internal financial control framework and compliance systems established and maintained by the Company, the audit and review processes carried out by the Internal Auditors, Statutory Auditors, and Secretarial Auditors, along with the periodic reviews undertaken by the Management and the relevant Board Committees, including the Audit Committee, the Board of Directors is of the opinion that the Company's internal financial controls with reference to the financial statements were adequate and effective as at 31st March 2026.

Pursuant to the Circular dated 07th January 2026 issued by the National Financial Reporting Authority (NFRA) on "Effective Communication Between Statutory Auditors and Those Charged With Governance (TCWG), including Audit Committees", the Company has constituted a Those Charged With Governance (TCWG) Committee to oversee the implementation of the requirements prescribed under the said circular.

In line with the recommendations of the aforesaid circular, the Company has also adopted an appropriate framework to facilitate structured and effective communication between the Statutory Auditors and the TCWG, including documentation, monitoring, and governance mechanisms, thereby strengthening the overall corporate governance and audit oversight processes

Disclosures pursuant to Regulation 14 of the Securities and Exchange Board of India (Share Based Employee Benefits and Sweat Equity) Regulations, 2021.

1. The Board of Directors confirm that there have been no material changes in the scheme(s) during the year under review.
2. The scheme, i.e., "Vimta Labs Employee Stock Option Plan - 2021", is in compliance with the applicable regulations.
3. The Members of the Company, at their 31st Annual General Meeting held on 05th July 2021, approved the 'Vimta Labs Employee Stock Option Plan 2021' ('ESOP 2021') and the grant of stock options to eligible employees of the Company under the said plan, pursuant to which the Company obtained in-principle approval from the Stock Exchanges for 6,63,234 stock options; further, at the 35th Annual General Meeting held on 06th June 2025, the Members approved the issue of bonus equity shares in the ratio of 1:1 to eligible members as on the record date, i.e., 13th June 2025, consequent to which the Company obtained additional in-principle approvals for 5,18,260 stock options, aggregating to 11,81,494 stock options under ESOP 2021. The Board of Directors confirms that there have been no material changes to ESOP 2021 during the year under review, except for adjustments arising out of the aforesaid bonus issue, and that the scheme is in compliance with the applicable provisions of the Companies Act, 2013 and the SEBI (Share Based Employee Benefits and Sweat Equity) Regulations, 2021.
4. Relevant disclosures in terms of the 'Guidance note on accounting for employee share-based payments' issued by ICAI form part of the notes to the financial statements provided in this Annual Report.
5. The Company recognizes compensation expenses relating to share-based payments in the statement of profit and loss using fair value in accordance with IND AS 102, share based payments. The fair value determined at the grant date of the stock options is expensed on a straight-line basis over the vesting period, based on the Company's estimate of the equity instruments that will eventually vest, with a corresponding increase in share-based payments reserve in equity.

At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the original estimates, if any, is recognised in statement of profit and loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the share-based payments reserve in equity.

Annexure - VII contd.,

BOARD DIVERSITY POLICY

Pursuant to Part D(A)(3) of Schedule II of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

1. PURPOSE

The Board Diversity Policy ('the Policy') sets out the approach to diversity in the Board of Vimta Labs Limited (the Company').

Building a Board of diverse and inclusive culture is integral to the success of VIMTA Labs Ltd. Age, gender and professional diversity are areas of strategic focus to the composition of our Board. The Board considers that its diversity, including gender diversity, is a vital asset to the business.

The Company believes that a diverse Board will contribute to the achievements of its vision and strategic objectives, including to:

- Drive business results;
- Make corporate governance more effective;
- Enhance quality and responsible decision making capability;
- Ensure sustainable development; and
- Enhance the reputation of the Company.

Company has approved and adopted this Policy as formulated in compliance with SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("the Listing Regulations") and provisions of the Companies Act, 2013 ("the Act"), at its meeting held on 12th May 2022, being the effective date of the Policy.

2. SCOPE

The Policy applies specifically to the Board and excludes diversity in relation to employees of the Company.

3. POLICY STATEMENT

Company recognizes and embraces the benefits of having a diverse Board and sees increasing diversity at Board level as an essential element in achieving a sustainable development and a competitive advantage.

A truly diverse Board will include and make good use of differences in the skills, industry experience and expertise, background, gender and other distinctions among Directors. These differences shall be considered in determining the optimum composition of the Board and when possible, shall be balanced appropriately on need basis.

The Nominations and Remuneration Committee ('the Committee') reviews and assesses Board's composition on

behalf of the Board and recommends the appointment of Directors as follows:

- In reviewing Board composition, the Committee will consider the benefits of all aspects of diversity including, but not limited to, those described above, to enable the Board to discharge its duties and responsibilities effectively.
- In identifying suitable candidates for appointment to the Board, the Committee will consider candidates on merit against objective criteria and with due regard for the benefits of diversity on the Board.

4. MEASURABLE OBJECTIVES

The Board shall have an optimum combination of Executive, Non-Executive and Independent directors in accordance with requirements of the Articles of Association of the Company, the Companies Act, 2013, Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 and the statutory, regulatory and contractual obligations of the Company.

Selection of candidates will be based on a range of diversity perspectives, including but not limited to gender, age, educational background, professional experience, skills and knowledge. The ultimate decision will be based on merit and contribution that the selected candidates will bring to the Board.

5. MONITORING AND REPORTING

Nomination and Remuneration Committee shall monitor and report compliance to this policy to the Board and ensure compliance with Section 178 of the Companies Act, 2013 read along with applicable rules thereto and Clause 49 under Listing Agreement effective from 1st October, 2014. This committee is (among other things) responsible for:

- Formally assessing the appropriate mix of diversity, skills, experience and expertise required on the Board and assessing the extent to which the required skills are represented on the Board;
- Making recommendations to the Board in relation to Board succession, including the succession of the Chairman, to maintain an appropriate mix of Diversity, skills, experience and expertise on the Board;
- To recommend to the Board the appointment and removal of Senior Management;

Annexure - VII contd.,

- To recommend to the Board on (i) policy relating to remuneration for Directors, Key Managerial Personnel and Senior Management and (ii) Executive Directors remuneration and incentive and
- Reviewing and reporting to the Board in relation to Board Diversity.

As part of the annual performance evaluation of the effectiveness of the Board, Board Committees and individual Directors, the balance of skills, experience, independence, knowledge and how the Board works together as a unit, and other factors relevant to its effectiveness would be considered.

The Nomination and Remuneration Committee will report to the Board on any initiatives undertaken and progress made by the Committee in relation to Board Diversity and to achieve the measurable objectives.

The Nomination and Remuneration Committee will report annually, in the Corporate Governance Report, on the Board's composition under diversified perspectives, and monitor the implementation of the Policy.

The effective implementation of this policy requires that shareholders are able to judge for themselves whether the Board as constituted is adequately diverse. To this end, Company shall continue to provide sufficient information to shareholders about the size, qualifications and characteristics of each Board Member.

6. REVIEW OF THE POLICY

The Committee will review the Policy as may be deemed necessary, discuss any revisions that may be required and recommend the same to the Board for approval.

7. DISCLOSURE OF THE POLICY

The Policy will be published on the Company's website for public information. The Policy together with the composition of the Board and the size, qualifications and characteristics of each Board Member will be disclosed in the Corporate Governance Report annually.

NA

Principle 6: Businesses should respect and make efforts to protect and restore the environment

Essential Indicators

1. Details of total energy consumption (in Joules or multiples) and energy intensity, in the following format:

Parameter	FY 2025-26	FY 2024-25
From renewable sources		
Total electricity consumption (A) (in GJ)	Nil	Nil
Total fuel consumption (B) (in GJ)	Nil	Nil
Energy consumption through other sources (C) (in GJ)	Nil	Nil
Total energy consumed from renewable sources (A+B+C) (in GJ)	Nil	Nil
From non-renewable sources		
Total electricity consumption (D) (in GJ)	43695	37351
Total fuel consumption (E) (in GJ)	1019.4	1027.5
Energy consumption through other sources (F) (in GJ)	Nil	Nil
Total energy consumed from non-renewable sources (D+E+F) (in GJ)	44714	38379
Total energy consumed (A+B+C+D+E+F) (in GJ)	44714	38379
Energy intensity per rupee of turnover (Total energy consumption/revenue from operations) (GJ/ ₹)	10.98	3.19
Energy intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total energy consumption/ revenue from operations adjusted for PPP) (GJ/ Revenue Mn)	223.30	226.94
Energy intensity in terms of physical output (GJ/ \$)	NA	NA
Energy intensity (optional) – the relevant metric may be selected by the entity (GJ/FTE)		

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency. No

2. Does the entity have any sites / facilities identified as designated consumers (DCs) under the Performance, Achieve and Trade (PAT) Scheme of the Government of India? (Y/N) If yes, disclose whether targets set under the PAT scheme have been achieved. In case targets have not been achieved, provide the remedial action taken, if any.

No.

3. Provide details of the following disclosures related to water, in the following format

Parameter	FY 2025-26	FY 2024-25
Water withdrawal by source (in Kilolitres)		
(i) Surface water	2158 KL	2139 KL
(ii) Groundwater	7377 KL	11052 KL
(iii) Third party water	28767 KL	30345 KL
(iv) Seawater / desalinated water	0	0
(v) Others (Harvested rainwater)	0	0
Total volume of water withdrawal (in Kilolitres) (i + ii + iii + iv + v)	38302 KL	43536 KL
Total volume of water consumption (in Kilolitres)	38302 KL	43536 KL
Water intensity per ₹ Mn of turnover (Kilolitres/₹) (Water consumed / revenue from operations ₹ Mn)	9.40	12.66
Water intensity ₹ Mn of turnover adjusted for Purchasing Power Parity (PPP) (Water	191.28	257.43
Water intensity in terms of physical output	NA	NA
Water intensity (optional) – the relevant metric may be selected by the entity (Kilolitres /FTE)		

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency?

(Y/N) If yes, name of the external agency. No.

4. Provide the following details related to water discharged

Parameter	FY 2025-26	FY 2024-25
Water discharge by destination and level of treatment (in kilolitres)		
(i) To Surface water	0	0
- No treatment	0	0
- With treatment – please specify level of treatment	0	0
(ii) To Groundwater	0	0
- No treatment	0	0
- With treatment – please specify level of treatment	0	0
(iii) To Seawater	0	0
- No treatment	0	0
- With treatment – please specify level of treatment	0	0
(iv) Sent to third-parties (Cherlapally Facility only upto 1440 KL)	1440 KL	1440 KL
- No treatment	0	0
- With treatment – please specify level of treatment	0	0
(v) Others	0	0
- No treatment	0	0
- With treatment – please specify level of treatment (In house treatment plant as prescribed by state pollution control board)	6853 KL (In-house Sewage Treatment Plant with zero external discharge)	11508 KL (In-house Sewage Treatment Plant with zero external discharge)
Total water discharged (in kilolitres)	8293 KL	12948 KL

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency?

(Y/N) If yes, name of the external agency: No.

5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.

Yes, the entity has implemented a Zero Liquid Discharge (ZLD) mechanism to ensure that no untreated wastewater is released into the environment at its Life Sciences Campus.

- The system includes STP, ETP, RO system removes contaminants.
- Treated water is further processed through MBR filtration enabling maximum recovery and reuse of water within the facility.
- The recovered water is reused for cooling, utilities, and other non-potable applications, thereby reducing freshwater consumption.

6. Please provide details of air emissions (other than GHG emissions) by the entity, in the following format:

Parameter	Please specify unit	FY 2025-26	FY 2024-25
NOx	mg/Nm ³ (at 15% O ₂)	62.6	60.5
Sox	mg/Nm ³ (at 15% O ₂)	70.3	70.8
Particulate matter (PM)	mg/Nm ³ (at 15% O ₂)	15.3	14.8
Persistent organic pollutants (POP)	-	-	-
Volatile organic compounds (VOC)	-	-	-
Hazardous air pollutants (HAP)	-	-	-
Others – please specify	mg/Nm ³ (at 15% O ₂)	26.2	25.9

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency?

(Y/N) If yes, name of the external agency. No.

7. Provide details of greenhouse gas emissions (Scope 1 and Scope 2 emissions) & its intensity, in the following format:

Parameter	Unit	FY 2025-26	FY 2024-25
Total Scope 1 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Metric tonnes of CO ₂ equivalent	76.3 MT	76.9 MT
Total Scope 2 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Metric tonnes of CO ₂ equivalent	0	0
Total Scope 1 and Scope 2 emissions intensity per rupee Mn of turnover (Total scope 1 and scope 2 GHG emissions/ revenue from operations)	tCO ₂ /₹	0.0187	0.0224
Total Scope 1 and Scope 2 emissions intensity per rupee of turnover adjusted for Purchasing Power Parity (Total scope 1 and scope 2 GHG emissions/ revenue from operations adjusted for PPP)	tCO ₂ /₹	0.381	0.455
Total Scope 1 and Scope 2 emission intensity in terms of physical output	-	NA	NA
Total Scope 1 and Scope 2 emission	Metric tonnes of CO ₂ equivalent/FTE	1.01	-
intensity (optional) – the relevant metric may be selected by the entity			

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency?

(Y/N) If yes, name of the external agency. No.

* The intensity has been restated owing to change in the unit of measurement considered in denominator for intensity calculation.

**The intensity adjusted for PPP has been restated following the guidelines set forth in SEBI's circular dated December 20, 2024, which outlines Industry Standards Forum guidance for BRSR Core.

8. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.

No.

The entity does not have any specific or dedicated project aimed exclusively at reducing Greenhouse Gas (GHG) emissions during the reporting period.

9. Provide details related to waste management by the entity, in the following format

Parameter	FY 2025-26	FY 2024-25
Total Waste generated (in metric tonnes)		
Plastic waste (A)	2.620MT	0.911MT
E-waste (B)	2.830MT	0.510MT
Bio-medical waste (C)	35.52MT	37.750MT
Construction and demolition waste (D)	-----	-----
Battery waste (E)	-----	-----
Radioactive waste (F)	-----	-----
Other Hazardous waste. Please specify, if any. (G)	3.160MT	2.853MT
Other non-hazardous waste generated (H). Please specify, if any. (Break-up by composition i.e. by materials relevant to the sector)	-----	-----
Total (A+B + C + D + E + F + G + H)	44.130MT	42.024MT
Waste intensity per rupee Mn of turnover (MT/₹) (Total waste generated / revenue from operations)	0.011	0.012
Waste intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (MT/\$) (Total waste generated/ revenue from operations adjusted for PPP)	0.220	0.248
Waste intensity in terms of physical output	NA	NA
Waste intensity (optional) – the relevant metric may be selected by the entity (MT/FTE)	-----	-----
For each category of waste generated, total waste recovered through recycling, re-using or other recovery operations (in metric tonnes)		
Category of waste		
(i) Recycled	NA	NA
(ii) Re-used	NA	NA
(iii) Other recovery operations	NA	NA
Total	NIL	NIL
For each category of waste generated, total waste disposed by nature of disposal method (in metric tonnes)		
Category of waste		
(i) Incineration	35.52MT	37.750MT
(ii) Landfilling	3.160MT	2.853MT
(iii) Other disposal operations	5.45MT	1.42MT
Total	44.13MT	42.024MT

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency?

(Y/N) If yes, name of the external agency. No.

* The intensity has been restated owing to change in the unit of measurement considered in denominator for intensity calculation.

**The intensity adjusted for PPP has been restated following the guidelines set forth in SEBI's circular dated December 20, 2024, which outlines Industry Standards Forum guidance for BRSR Core.

*** The waste under 'Other disposal operations' is being disposed off through PCB authorized vendors.

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

The entity follows regulated waste management practices by segregating waste at source and disposing all plastic, ewaste, biomedical and hazardous waste through PCB authorized vendors, while minimizing hazardous chemical usage through controlled processes and procurement.

11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format:

Sl. No.	Location of operations/offices	Type of operations	Whether the conditions of environmental approval / clearance are being complied with? (Y/N) If no, the reasons thereof and corrective action taken, if any.
NA			

12. Details of environmental impact assessments of projects undertaken by the entity based on applicable laws, in the current financial year:

Name and brief details of project	EIA Notification No.	Date	Whether conducted by independent external agency (Yes / No)	Results communicated in public domain (Yes / No)	Relevant Web link
NA (No projects requiring Environmental Impact Assessment)					

13. Is the entity compliant with the applicable environmental law/ regulations/ guidelines in India, such as the Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, Environment protection act and rules thereunder (Y/N).

Yes. If not, provide details of all such non- compliances, in the following format:

Sl. No.	Specify the law / regulation / guidelines which was not complied with	Provide details of the non-compliance	Any fines / penalties / action taken by regulatory agencies such as pollution control boards or by courts	Corrective action taken, if any
Nil				

Leadership Indicators

1. Water withdrawal, consumption and discharge in areas of water stress (in kilolitres): NA

For each facility / plant located in areas of water stress, provide the following information: NA

- (i) Name of the area:
- (ii) Nature of operations:
- (iii) Water withdrawal, consumption and discharge in the following format: Not applicable as none of our site are located in areas of water stress.

Parameter	FY 2025-26	FY 2024-25
Water withdrawal by source (in kilolitres)		
(i) To Surface water	NA	NA
(ii) To Groundwater		
(iii) To Seawater		
(iv) Sent to third-parties		
(v) Others		
Total volume of water withdrawal (in kilolitres)		
Total volume of water consumption (in kilolitres)		
Water intensity per rupee of turnover (Water consumed / turnover)		
Water intensity (optional) – the relevant metric may be selected by the entity		

Parameter	FY 2025-26	FY 2024-25
Water discharge by destination and level of treatment (in kilolitres)		
(i) Into Surface water	NA	NA
- No treatment		
- With treatment – please specify level of treatment		
(ii) Into Groundwater		
- No treatment		
- With treatment – please specify level of treatment		
(iii) Into Seawater		
- No treatment		
- With treatment – please specify level of treatment		
(iv) Sent to third-parties		
- No treatment		
- With treatment – please specify level of treatment		
(v) Others

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the Key Audit Matters to be communicated in our report.

Sl. No.	Key Audit Matter	How the matter was addressed in our audit
1	Revenue recognition as per Ind AS – 115 "Revenue from Contracts with Customers" Revenue recognition involves significant management judgements relating to identification of distinct performance obligations, determination of transaction price of the identified performance obligations, the appropriateness of the basis used to measure revenue recognised over a period. Additionally, accounting standard contains disclosures which involves collation of information in respect of disaggregated revenue and periods over which the remaining performance obligations will be satisfied subsequent to the balance sheet date. Refer Note No. 23 to the financial statements.	Principal audit procedures performed includes the following: - Assessed the appropriateness of the revenue recognition accounting policies in accordance with Ind AS-115 "Revenue from Contracts with Customers". - Evaluated the design and implementation of company's internal financial controls. - Tested the operating effectiveness of the internal controls relating to identification of the specific performance obligations in respect of selected sample of contracts. - Selected a sample of contracts and performed the following procedures. - Studied, analysed and identified the specific performance obligations in these contracts. - Compared these performance obligations with that of recorded by the company. - Performed analytical procedures for reasonableness of revenue disclosed by type and service offerings. - Evaluated appropriateness of disclosures made in financial statements.

Information other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about

whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3) (i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable

that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit, we report that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - (c) The financial statements dealt with by this Report are in agreement with the relevant books of account.
 - (d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under Section 133 of the Act.
 - (e) On the basis of the written representations received from the directors as on 31 March 2026, and taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2026, from being appointed as a director in terms of Section 164 (2) of the Act.
 - (f) With respect to the adequacy of the internal financial controls with reference to financial statements of the

Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the company's internal financial controls with reference to financial statements.

- (g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended we report that:

In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

- (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us:
 - i. The Company, as detailed in Note No.34 to the financial statements, has disclosed the impact of pending litigations on its financial position as at 31 March 2026.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses as at 31 March 2026.
 - iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company during the year ended 31 March 2026.
 - iv.(A) The management has represented that, to the best of its knowledge and belief, as disclosed in Note No.46 to the financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
 - (B) The management has represented, that, to the best of its knowledge and belief, as disclosed

in Note No.46 to the financial statements, no funds have been received by the company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- (C) Based on such audit procedures that we have considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (A) and (B) above contain any material mis-statement.
- (v) The dividend declared or paid during the year by the company is in compliance with section 123 of the Companies Act, 2013.
- (vi) Based on our examination, which included test checks, the Company has used accounting software for maintaining its books of account which has a feature of recording audit trail

(edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with in respect of accounting software. Additionally, the audit trail of previous years has been preserved by the Company as per the statutory requirements for record retention to the extent it was enabled and recorded in the respective years.

- 2. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government in terms of section 143 (11) of the Act, we give in "Annexure-B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

to the Independent Auditor's Report

(Referred to in paragraph 1(f) under "Report on Other Legal and Regulatory Requirements" section of our report of even date to the Members of Vimta Labs Limited)

Report on the Internal Financial Controls with reference to financial statements of the Company under Clause (i) of Sub-section (3) of Section 143 of the Companies Act, 2013

We have audited the Internal Financial Controls with reference to financial statements of **VIMTA LABS LIMITED** ("the Company") as of 31 March 2026 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining Internal Financial Controls based on the internal controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("The Guidance Note"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls with reference to financial statements of the Company based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness

exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with reference to financial statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to financial statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material

respects, an adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2026, based on the internal controls with reference to financial statements criteria established by the Company considering the essential components of Internal Financial Controls stated in the Guidance Note.

forming part of the financial statements

1 General Information

Vimta Labs Limited (the Company) is a public limited company domiciled in India was incorporated on November 16, 1990 under the provisions of the Companies Act, 1956. The registered office of the Company is situated at 141/2 & 142, IDA Phase II, Cherlapally, Hyderabad – 500 051. The Company is a leading contract research and testing services provider in India. The Company's equity shares are listed at Bombay Stock Exchange and National Stock Exchange of India Limited.

The financial statements are approved for issue by the Board of Directors at its meeting held on May 06, 2026.

2 Material accounting policies

2.1 Basis of Preparation of Financial Statements

(a) Statement of Compliance with Ind AS

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the "Act") read with the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016, as amended from time to time and other relevant provisions of the Act.

Accounting policies have been consistently applied to all the years presented except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

The financial statements have been prepared as a going concern on the basis of relevant Ind AS that are effective at the annual reporting date.

(b) Basis of measurement

The financial statements have been prepared on historical cost convention on accrual basis, except for the following items in the balance sheet:

- i) Certain financial assets and liabilities measured either at fair value or at amortised cost depending on the classification;
- ii) Defined employee benefit liabilities are recognised at the present value of defined benefit obligation adjusted for fair value of plan assets;

(c) Current and non-current classification

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle

and other criteria set out in the Schedule III to the Act. Based on the nature of services and the time between the rendering of service and their realization in cash and cash equivalents, the Company has fixed its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is classified as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

A liability is classified as current when:

- It is expected to be settled in normal operating cycle
 - It is held primarily for the purpose of trading
 - It is due to be settled within twelve months after the reporting period, or
 - It does not have the right at the end of the reporting period to defer the settlement of the liability for at least twelve months after the reporting period
- Current assets / liabilities include the current portion of non-current assets / liabilities respectively. All other assets / liabilities including deferred tax assets and liabilities are classified as non-current.

(d) Use of estimates

The preparation of financial statements in conformity with Ind AS requires the management of the Company to make judgments, estimates and assumptions to be made that affect the reported amounts of assets and liabilities on the date of financial statements, disclosure of contingent liabilities as at the date of the financial statements, and the reported amounts of income and expenses during the reported period. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised.

(e) Fair value measurement

The Company's accounting policies and disclosures require the measurement of fair values, for certain financial and non-financial assets and liabilities based on their classification.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

In estimating the fair value of an asset or liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

For the purpose of fair value disclosures, the company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

2.2 Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. Cost comprises of purchase price, freight, non-refundable taxes and duties, specified foreign exchange gains or losses and any other cost attributable to bring the asset to its working condition for its intended use.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to Statement of Profit and Loss during the year in which they are incurred.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as "capital advances" and the cost of assets not ready to use before such date are disclosed under 'Capital work-in-progress' and not depreciated.

Depreciation methods, estimated useful lives

Depreciable amount for assets is the cost of an asset or other amount substituted for cost, less its estimated residual value. Depreciation on property, plant and equipment is provided on straight-line method over their estimated useful lives which are the same as prescribed in Schedule II to the Act, except for the following:

Particulars	Useful Life as per Management Estimate	Useful Life as per Schedule II of the Act
Plant and Equipment	6.67-10 years	10-15 years
Computer Servers	3 Years	6 years

Based on the technical experts assessment of useful life, certain items of property plant and equipment are being depreciated over useful lives different from the prescribed useful lives under Schedule II to the Act. The management has assessed the useful life of such assets on the basis of technical expert advice and past experience in the industry as it believes that such estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Depreciation on addition to property plant and equipment is provided on pro-rata basis from the date of acquisition. Depreciation on sale/deduction from property plant and equipment is provided up to the date of sale/deduction, as the case may be. Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in Statement of Profit and Loss.

Assets held for sale

Non-current assets held for sale are measured at the lower of their carrying value and fair value of the assets less costs to sale. Assets and liabilities

classified as held for sale are presented separately in the balance sheet. Property, plant and equipment once classified as held for sale are not depreciated/amortised.

2.3 Intangible Assets

Intangible assets are stated at cost less accumulated amortisation and impairment. Intangible assets are amortised over their respective individual estimated useful lives on a straight-line basis, from the date that they are available for use. The estimated useful life of an identifiable intangible asset is based on a number of factors including the effects of obsolescence, other economic factors etc. Amortisation methods and useful lives are reviewed periodically including at each financial year end.

Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

Amortisation

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period, with the effect of any change in the estimate being accounted for on a prospective basis. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Operating rights 10 Years

Amortisation method, useful lives and residual values are reviewed at the end of each financial year and adjusted if appropriate.

2.4 Impairment of non-financial assets

At each reporting date, the Company assesses whether there is any indication that an asset may be impaired, based on internal or external factors. If any such indication exists, the Company estimates the recoverable amount of the asset or the cash generating unit. If such recoverable amount of the asset or cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The

reduction is treated as an impairment loss and is recognised in the Statement of Profit and Loss. If, at the reporting date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount. Impairment losses previously recognised are accordingly reversed in the Statement of Profit and Loss.

2.5 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(a) Financial assets

Initial recognition and measurement

All financial assets are recognised in balance sheet when, and only when, the entity becomes party to the contractual provisions of the instrument and initially measured at fair value except for trade receivables which are initially measured at transaction price. In the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset or liability are added to or deducted from the fair value.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified into four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments and equity instruments at fair value through profit or loss (FVTPL) and
- Equity instruments measured at FVTOCI

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, financial assets are subsequently measured at amortised cost using the Effective Interest Rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss. This category covers Trade Receivables, Loans, Cash & Bank Balances and Other Receivables.

Debt instruments at fair value through other comprehensive income (FVTOCI)

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the other comprehensive income (OCI). On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified to the Statement of Profit and Loss. Interest earned while holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instruments and equity instruments at fair value through profit or loss (FVTPL)

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortised cost or as FVTOCI, is classified as at FVTPL.

Debt and Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

Equity instruments measured at FVTOCI

All equity investments in the scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Company decides to classify the same either as at FVTOCI or FVTPL. The Company makes such election on an instrument-by-instrument

basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

De-recognition

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss for the following financial assets and credit risk exposures:

- Financial assets that are debt instruments and are measured at amortised cost e.g., loans, deposits and bank balance.
- Trade Receivables that result from transactions that are within the scope of Ind AS 115.

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. The application of simplified approach does not require the Company to track changes in credit risk. It recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

As a practical expedient, the Company uses a provision matrix to determine impairment loss allowance on portfolio of its receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward looking estimates are analysed.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12 quarter ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12 quarter ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12 quarter ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date. ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive.

When estimating the cash flows, the Company is required to consider:

- All contractual terms of the financial assets (including prepayment and extension) over the expected life of the assets.
- Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

(b) Financial Liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Gains or losses on liabilities held for trading are recognised in the Statement of Profit and Loss.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

This category generally applies to interest-bearing loans and borrowings.

Trade and other payables

These amounts represent liabilities for goods and services provided to the Company prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid as per agreed terms. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

De-recognition

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.6 Taxes

Tax expense for the year, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the year.

(a) Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the year end date.

The Company recognises interest levied and penalties related to income tax assessments in interest expense.

(b) Deferred tax

Deferred tax is provided using the Balance Sheet method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax relating to items recognised outside the statement of Profit and Loss is recognised outside the Statement of Profit and Loss (either in other comprehensive income or in

equity). Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

2.7 Inventories

Inventories consist of chemicals and consumables, stores and spares, are measured at the lower of cost and net realisable value. Cost includes purchase price, duties and taxes (other than those subsequently recoverable by the Company from the concerned revenue authorities), freight inwards and other expenditure incurred in bringing such inventories to their present location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses. In determining the cost, First In First Out (FIFO) method is used. The carrying cost of inventories are appropriately written down when there is a decline in replacement cost of such materials.

Work in progress are valued at the lower of cost and net realisable value. Cost of work in progress is determined on the basis of cost and on the cost which comprises direct material consumed and human resource cost.

2.8 Provisions and contingent liabilities

Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the year end.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent liabilities and assets are not recognised in financial statements. A disclosure of the contingent

liability is made when there is a possible or a present obligation that may, but probably will not, require an outflow of resources.

2.9 Revenue Recognition

Rendering of services

The Company primarily earns revenue from Contract research and testing services.

Revenue is recognised upon transfer of control of promised services to customers in an amount that reflects the consideration the Company expect to receive in exchange for those services.

Revenue from providing services is recognised in the accounting period in which such services are rendered.

At contract inception, the Company assesses its promise to transfer services to a customer to identify separate performance obligations. The Company applies judgment to determine whether each service promised to a customer is capable of being distinct, and are distinct in the context of the contract, if not, the promised services are combined and accounted as a single performance obligation. The Company allocates the arrangement consideration to separately identifiable performance obligation based on their relative stand-alone selling price or residual method.

In case of fixed-price contracts, the customer pays the fixed amount based on a payment schedule. If the services rendered by the Company exceed the payment, a contract asset is recognised. If the payments exceed the services rendered, a contract liability is recognised.

Revenues in excess/short of invoicing are classified as assets/liabilities, as the case may be.

Export incentives

Export incentives are recognised when the right to receive the credit is established in respect of the exports made and where there is no significant uncertainty regarding the ultimate collection of the relevant export proceeds and utilization of export incentives within its validity period.

Interest

Interest income is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principle outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's gross carrying amount on initial recognition.

Interest income is included in other income in the Statement of Profit and Loss.

Service Concession Arrangements

The Company constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time. These arrangements may include Infrastructure used in a public-to-private service concession arrangement for its entire useful life.

Under Appendix C to Ind AS 115 – Service Concession Arrangements, these arrangements are accounted for based on the nature of the consideration. The intangible asset model is used to the extent that the operator receives a right (i.e. a concessionaire) to charge users of the public service.

The financial model is used when the operator has an unconditional contractual right to receive cash or other financial assets from or at the direction of the grantor for the construction service. When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for each component. If the operator performs more than one service (i.e. construction, upgrade services and operation services) under a single contract or arrangement, consideration received or receivable is allocated by reference to the relative fair values of the service delivered, when the amount are not separately identifiable.

The intangible asset is amortised over the shorter of the estimated period of future economic benefits which the intangible assets are expected to generate or the concession period, from the date they are available for use.

An asset carried under concession arrangements is derecognised on disposal or when no future economic benefits are expected from its future use or disposal.

The Company recognises a financial asset to the extent that it has an unconditional right to receive cash or another financial asset from or at the direction of the grantor. In case of annuity based carriageways, the Company recognises financial asset.

2.10 Government grants

Grants from the government are recognized at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.

Government grants relating to income are deferred and recognized in the Statement of Profit and Loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to the Statement of Profit and Loss on a straight-line basis over the expected lives of the related assets and presented within other income.

2.11 Foreign Currency Transactions

(a) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.

(b) Transactions and balances

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction. Gains/Losses arising out of fluctuation in foreign exchange rate between the transaction date and settlement date are recognised in the Statement of Profit and Loss.

All monetary assets and liabilities in foreign currencies are restated at the year end at the exchange rate prevailing at the year end and the exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

2.12 Retirement and other Employee Benefits

(a) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the year in which the employees render the related service are recognized in respect of employees' services up to the end of the year and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

(b) Other long-term employee benefit obligations

(i) Defined contribution plan

Provident Fund: Contribution towards provident fund is made to the regulatory authorities, where the Company has no further obligations. Such benefits are classified as Defined Contribution Schemes as

the Company does not carry any further obligations, apart from the contributions made on a monthly basis which are charged to the Statement of Profit and Loss.

Employee's State Insurance Scheme: Contribution towards employees' state insurance scheme is made to the regulatory authorities, where the Company has no further obligations. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made on a monthly basis which are charged to the Statement of Profit and Loss.

(ii) Defined benefit plans

The Company has gratuity as defined benefit plan where the amount that an employee will receive on retirement is defined by reference to the employee's length of service and final salary. The Company has subscribed to gratuity scheme of Life Insurance Corporation of India ('LIC') to which the Company makes periodic Funding. Under the said policy, the eligible employees are entitled for gratuity upon their resignation, retirement, incapacitation, termination or in the event of death in lump sum after deduction of necessary taxes, as applicable. The liability in respect of defined benefit plans is calculated using the projected unit credit method consistent with the advice of qualified actuaries. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms of maturity approximating to the terms of the related defined benefit obligation.

The current service cost of the defined benefit plan, recognised in the statement of profit and loss under employee benefit expense, reflects the increase in the defined benefit obligation resulting from employee service in the current year, benefit changes, curtailments and settlements.

Past Service costs are recognised in statement of profit and loss in the period of plan amendment. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and fair value of plan assets. The cost is included in the employee benefit expenses in the statement of profit and loss. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income in the period in which they arise.

Compensated Absences (Leave Encashment): The Company's current policy permits employees to

accumulate and carry forward a portion of their unutilised compensated absences and utilise/ encash them in future periods in accordance with the terms of such policies. The Company measures the expected cost of accumulated absences as the additional amount that the Company incurs as a result of the unused entitlements that has accumulated at the balance sheet date and charge to Statement of Profit and loss. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Such measurement is based on actuarial valuation at the balance sheet date carried out by a qualified actuary. Actuarial losses/ gains are recognized in the statement of profit and loss in the year in which they arise.

(c) Share-based payment arrangements

The stock options granted to employees in terms of the Employee Stock Options Schemes, are measured at the fair value of the options at the grant date. The fair value of the options is treated as discount and accounted as employee compensation cost over the vesting period on a straight-line basis. The amount recognised as expense in each year is arrived at based on the number of grants expected to vest. If a grant lapses after the vesting period, the cumulative discount recognised as expense in respect of such grant is transferred to the general reserve within equity.

2.13 Leases (as a lessee)

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot

be readily determined, Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following: –

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee; and
- The exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if Company changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in the Statement of Profit and Loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.

Short-term leases and leases of low-value assets
The Company has elected not to recognise right-of-use assets and lease liabilities for short term leases of real estate properties that have a lease term of 12 months. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

2.14 Borrowing Costs

Borrowing costs consist of interest, ancillary costs and other costs in connection with the borrowing of funds and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to interest costs.

Borrowing costs attributable to acquisition and/or construction of qualifying assets are capitalised as a part of the cost of such asset, up to the date such assets are ready for their intended use. Other borrowing costs are charged to the Statement of Profit and Loss.

2.15 Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Earnings considered in ascertaining the Company's earnings per share is the net profit or loss for the year after deducting preference dividends and any attributable tax thereto for the year. The weighted average number of equity shares outstanding during the year and for all the years presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.

2.16 Dividend Distribution

The Company recognizes a liability to make the payment of dividend to owners of equity, when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

2.17 Cash Flows

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payment and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

2.18 Segment Reporting

The management has assessed and identified the reportable segments in accordance with the requirements of Ind AS 108 'Operating Segment' and the Company has only one reportable segment namely "Contract Research and Testing Services".

2.19 Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks, cash on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

2.20 Prior Period Items

Material prior period errors are corrected retrospectively by restating the comparative amounts for prior period presented in which the error occurred or if the error occurred before the earliest period presented, by restating the opening statement of financial position.

3. Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future years.

3.1 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the year end date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(a) Leases

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised. The Company applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement

date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

(b) Deferred Taxes

The assessment of the probability of future taxable profit in which deferred tax assets can be utilised is based on the Company's latest approved forecast, which is adjusted for significant non-taxable profit and expenses and specific limits to the use of any unused tax loss or credit. The tax rules in the jurisdiction in which the Company operates are also carefully taken into consideration. If a positive forecast of taxable profit indicates the probable use of a deferred tax asset, especially when it can be utilised without a time limit, that deferred tax asset is usually recognised in full.

(c) Defined benefit plans (gratuity benefits and leave encashment)

The cost of the defined benefit plans such as gratuity and leave encashment are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates, or longer or shorter participant life spans.

The assumptions include determination of the discount rate, salary growth rate, mortality rate, retirement age and attrition rate. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each year end.

(d) Fair value of financial instruments

Management uses valuation techniques in measuring the fair value of financial instruments where active market quotes are not available. In applying the valuation techniques, management makes maximum use of market inputs and uses estimates and assumptions that are, as far as possible, consistent with observable data that market participants would use in pricing the instrument. Where applicable data is not observable, management uses its best estimate about the assumptions that market participants would make. These estimates may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

(e) Impairment of financial assets

The impairment provisions of financial assets are based on assumptions about risk of default and expected loss rates. the Company uses judgment in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

(f) Impairment of non-financial assets

An impairment loss is recognised for the amount by which an asset's or cash-generating unit's carrying amount exceeds its recoverable amount to determine the recoverable amount, management estimates expected future cash flows from each asset or cash generating unit and determines a suitable interest rate in order to calculate the present value of those cash flows. In the process of measuring expected future cash flows, management makes assumptions about future operating results. These assumptions relate to future events and circumstances. The actual results may vary, and may cause significant adjustments to the Company's assets.

In most cases, determining the applicable discount rate involves estimating the appropriate adjustment to market risk and the appropriate adjustment to asset-specific risk factors.

(g) Research and Developments Costs

Management monitors progress of internal research and development projects by using a project management system. Significant judgment is required in distinguishing research from the development phase. Development costs are recognised as an asset when all the criteria are met, whereas research costs are expensed as incurred. Management also monitors whether the recognition requirements for development costs continue to be met. This is necessary due to inherent uncertainty in the economic success of any product development.

(h) Property, Plant and Equipment

Depreciation methods, useful lives and residual values are reviewed at each financial year end and adjusted prospectively, as appropriate.

(i) Current income taxes

Significant judgments are involved in determining the provision for income taxes including judgment on whether tax positions are probable of being sustained in tax assessments. A tax assessment can involve complex issues, which can only be resolved over extended time periods. The recognition of taxes that are subject to certain legal or economic limits or

uncertainties is assessed individually by management based on the specific facts and circumstances.

(j) Provision for expected credit losses (ECL) of trade receivables and contract assets

The Company uses a provision matrix to calculate ECLs for trade receivables and contract assets. The provision rates are based on days past due across all segments. The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed. The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

(k) Significant judgements

In the process of applying the Company's accounting policies, the management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements

Determination of applicability of Appendix C of Service Concession Arrangement ('SCA'), under Ind AS - 115 'Revenue from contracts with customers'

The Company, has entered into concession agreement with Food Safety and Standards Authority of India ('FSSAI') to setup, operate and transfer (SOT) a National food Testing Laboratory (NFL) in JNPT, Mumbai. The management of the Company conducted detailed analysis to determine applicability of SCA. The concession agreements of these entities, have significant non-regulated revenues, this arrangement has been considered as a "Service Concessionaire Arrangement" (SCA) and accordingly, revenue and costs are allocatable between those relating to lab setup services and those relating to operation and maintenance services. Further, the Company has acquired the right to charge the customer for the services to be rendered which has been assessed as an intangible asset.

4. Standards (including amendments) issued

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

In May 2025, MCA notified amendments to Ind AS 21 - The Effects of Changes in Foreign Exchange Rates, applicable w.e.f. April 1, 2025. The Company has reviewed the amendment and based on its evaluation has determined that it does not have any significant impact in its financial statements.

In August 2025, MCA notified the following amendments to:

Ind AS 1, Presentation of Financial Statements, applicable w.e.f. April 1, 2025 – The amendment relates to classification of liabilities as current or noncurrent and non-current liabilities with covenants. In the context of classifying a liability as current, it removes the requirement of existence of a right to defer settlement for at least 12 months after the reporting date and instead requires that the said right should exist on the reporting date and have substance. The amendment also introduces guidance on classification of liabilities with covenants. The Company has no impact of these amendments in its classification criteria of current and non-current liabilities.

Ind AS 7, Statement of Cash Flows and Ind AS 107, Financial Instruments: Disclosures, applicable w.e.f. April 1, 2025 – The amendment in Ind AS 7 requires to inform users of financial statements of the existence of supplier finance arrangements and explain the nature of the arrangements, the carrying amount of liabilities and the range of payment due dates. Ind AS 107 has been amended to add supplier finance arrangements as a factor that may cause concentration of liquidity risk. The Company has reviewed the amendment and based on its evaluation has determined that it does not have any impact in its financial statements.

Ind AS 12, International Tax Reform – Pillar Two Model Rules applicable immediately - The amendments provide a temporary mandatory relief from deferred tax accounting for top-up tax and disclose that they have applied the relief. The remaining disclosure requirements apply for annual reporting periods beginning on or after April 1, 2025.

The amendments had no impact on the Company's financial statements as the Company is not in scope of the Pillar Two model rules.

Trade Payables	20	116.58	104.93
Other financial liabilities	21	329.67	331.42
		479.57	521.50

The Company's principal financial liabilities comprise borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include loans, Investments, trade and other receivables, cash and cash equivalents and other bank balances that derive directly from its operations.

The carrying amounts of trade receivables, trade payables and cash and cash equivalents are considered to be the same as their fair values, due to their short-term nature. The difference between carrying amounts and fair values of bank deposits, other financial assets, other financial liabilities and borrowings subsequently measured at amortised cost is not significant in each of the years presented. For all other amortised cost instruments, carrying value represents the best estimate of fair value. For financial assets measured at fair values, the carrying amounts are equal to the fair values.

(Amount in INR millions, unless otherwise stated)

33 Financial risk management objectives and policies

The Company's activities expose it to a variety of financial risks, including market risk, credit risk and liquidity risk. The Company's primary risk management focus is to minimize potential adverse effects of market risk on its financial performance. The Company's risk management assessment and policies and processes are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor such risks and compliance with the same. Risk assessment and management policies and processes are reviewed regularly to reflect changes in market conditions and the Company's activities. The Board of Directors and the Audit Committee is responsible for overseeing the Company's risk assessment and management policies and processes. It is the Company's policy that no trading in derivatives for speculative purposes may be undertaken.

(i) Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices, will affect the Company's income or the value of its holdings of financial instruments. Market risk is attributable to all market risk sensitive financial instruments including foreign currency receivables and payables and long-term debt. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

a) Foreign Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency) in United States Dollar ('USD'), Euro ('EUR'), Great Britain Pound ('GBP'), Swiss Franc ('CHF'), Canadian dollar ('CAD') and borrowings in USD.

The Company's exposure to foreign currency risk from non-derivative financial instruments at the end of the financial year, are as follows:

Particulars	As at 31 March 2026		As at 31 March 2025

Canadian dollar	-	-	-	-

* Holding all other variables constant

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's fixed rate borrowings are carried at amortised cost and hence are not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates. Further, the Company's investments in deposits is with banks and electricity authorities and therefore do not expose the Company to significant interest rates risk. The Company's main interest rate risk arises from borrowings with variable rates, which expose it to cash flow interest rate risk.

The Company's exposure to fixed rate and variable rate instruments at the end of the financial year, are as follows:

Particulars	As at 31 March 2026	As at 31 March 2025
Fixed rate instruments		
Financial assets	562.83	248.67
Financial liabilities	-	-
Variable rate instruments		
Financial liabilities	33.32	85.15

(Amount in INR millions, unless otherwise stated)

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of borrowings affected. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

Particulars	As at 31 March 2026	As at 31 March 2025
Interest rates increase by 100 basis points *	0.33	0.85
Interest rates decrease by 100 basis points *	(0.33)	(0.85)

* Holding all other variables constant

c) Price risk

The Company does not have any investments which are classified in the balance sheet as fair value through OCI but the company has investments in Debt oriented Mutual Funds which are classified under Fair Value Through Profit or Loss. Since the Investments are in debt oriented mutual funds the price risk is very minimal.

ii) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

Trade and other receivables

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. The credit quality of a customer is assessed based on an extensive credit rating scorecard, internal evaluation and individual credit limits. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The expected loss rates are based on the payment profiles of sales over the last 12 quarters before the reporting date and the corresponding historical credit losses experienced at the end of each quarter. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The expected credit loss assessment from customers as at March 31, 2026 are as follows:

Particulars	Gross carrying amount	Expected credit losses	Carrying amount of trade receivables
31 March 2026			
Upto 180 days	924.56	2.78	921.78
Over 180 days	193.46	58.24	135.22
Total	1,118.02	61.02	1,057.00
31 March 2025			
Upto 180 days	974.03	8.49	965.54
Over 180 days	169.38	72.49	96.89
Total	1,143.41	80.98	1,062.43

Financial assets that are either not due or past due but not impaired

The Company's credit period for customers generally ranges from 0 - 180 days. The aging of trade receivables that are not due and past due but not impaired is given below:

Period in days	As at 31 March 2026	As at 31 March 2025
Upto 180 days	921.78	965.54
Over 180 days	135.22	96.89
	1,057.00	1,062.43

iii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Company's reputation.

Management monitors rolling forecasts of the Company's liquidity position (comprising the undrawn borrowing facilities) and cash and cash equivalents on the basis of expected cash flows. This is generally carried out by the Company in accordance with practice and limits set by the management. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

The Company had following working capital at the end of the reporting years :

Particulars	As at 31 March 2026	As at 31 March 2025
Current assets	2,248.70	1,878.16
Current liabilities	655.23	643.67
Working capital	1,593.47	1,234.49

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments at the reporting period:

iv) Excessive risk concentration

Concentrations arise when a number of counter parties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

In order to avoid excessive concentrations of risk, the Company's policies and procedures include specific guidelines to focus on the maintenance of a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly. Selective hedging is used within the Company to manage risk concentrations at both the relationship and industry levels.

Attrition / Withdrawal rate (per annum)	34.70%	20.00%
The estimates of future salary increase considered in actuarial valuation taken into account of inflation, seniority, promotions and other relevant factors such as supply and demand in the employment market. The Company evaluates these assumptions annually based on its long-term plans of growth and industry standards.		

Impact on defined benefit obligation

Particulars	As at 31 March 2026	As at 31 March 2025
Discount Rate		
1% increase	129.59	103.43
1% decrease	134.84	110.50
Salary Growth Rate		
1% increase	135.16	110.71
1% decrease	129.23	103.12
Attrition Rate		
50% increase	131.11	107.93
50% decrease	130.92	102.66
Mortality Rate		
10% increase	132.17	106.86
10% decrease	132.13	106.81

The sensitivity analysis above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

Risk exposure

Through its defined benefit plans, the Company is exposed to a number of risks, the most significant of which are detailed below:

- Asset volatility: The plan liabilities are calculated using a discount rate set with reference to current investment patterns in the economy; if plan assets underperform this yield, this will create a deficit. The plan asset investments are subject to interest rate risk. The Company has a risk management strategy where the aggregate amount of risk exposure is maintained at a fixed range. Any deviations from the range are corrected by rebalancing the investments. The Company intends to maintain the investment pattern in the continuing years.
- Changes in bond yields: A decrease in bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.
- Life expectancy: The defined benefit obligation is to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plans' liabilities. This is particularly significant where inflationary increases result in higher sensitivity to changes in life expectancy.

42 Capital management and ratios

The Company's objectives when managing capital are to safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Company monitors capital on the basis of the following gearing ratio i.e. Net debt (total borrowings net of cash and cash equivalents) divided by total equity (as shown in the balance sheet):

Particulars		As at 31 March 2026	As at 31 March 2025
Equity Share Capital		89.34	44.47
Other Equity		4,479.39	3,744.01
Total Equity	(i)	4,568.73	3,788.48
Long-term borrowings		15.62	32.24
Short-term borrowings		17.70	52.91
Less: Cash and Cash equivalents		229.69	158.36
Total Debt	(ii)	(196.37)	(73.21)
Overall financing	(iii) = (i) + (ii)	4,372.36	3,715.27
Gearing ratio*	(ii)/ (iii)	*	*

* Borrowings are lower than the Cash and Cash equivalents and Bank Deposits resulting in a negative net debt.

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period. Further there were no changes were made in the objectives, policies or processes for managing capital for the year ended March 31, 2026.

43 The Company has entered into a Public Private Partnership (PPP) agreement with Food Safety and Standards Authority of India (FSSAI) on June 29, 2021 to setup, operate and transfer (SOT) a National food Testing Laboratory (NFL) in JNPT, Mumbai. The contract was awarded to Vimta in 2021 for a term of 25 years. Sale price for services rendered was fixed by FSSAI as per the terms of agreement and to be revised as and when fixed by FSSAI. At the end of the contract period all the assets installed at NFL in JNPT, Mumbai shall be transferred to FSSAI without any consideration. No changes were occurred to the arrangement during the current year. In accordance with the provisions of Ind AS 115, this arrangement has been considered as a “Service Concessionaire Arrangement” (SCA) and accordingly, revenue and costs are allocatable between those relating to lab setup services and those relating to operation and maintenance services. Further, the Company has acquired the right to charge the customer for the services to be rendered which has been assessed as an intangible asset.

Consequently, the amount of revenues from operations and lab setup expenses includes ₹ 1.2 million for year ended March 31, 2026 and ₹ 4.3 million for year ended March 31, 2025, respectively representing the revenues relating to lab setup services provided under SCA, the costs of fulfilling the contract and the right to charge the customer for the services to be rendered, respectively.

44 Pursuant to the Scheme of Amalgamation (“the Scheme”) under Section 230 to 232 of the Companies Act, 2013 sanctioned by the Hon’ble National Company Law Tribunal, Hyderabad bench vide order dated 23rd January 2025, EMTAC Laboratories Private Limited (EMTAC), a wholly owned Subsidiary of the Company has been amalgamated with the Company on the appointed date, i.e., 1st April, 2024. In terms of the Scheme, the assets and liabilities of EMTAC have been vested with the Company and have been accounted in accordance with the “Pooling of Interest Method” as laid down in Appendix - C, of Indian Accounting Standard i.e, Ind. AS 103 - Business Combinations.

45 Disclosure U/s.186(4) of the Companies Act, 2013. During the year under review, The Company has not given any loans, made Investment, given Guarantee, provided Security to any others.

46 Disclosure pursuant to requirements of Rule 11(e) (i) & (ii) of the Companies (Audit and Auditors) Rules

- (i) No funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities (“Intermediaries”) with the understanding, whether recorded in writing or otherwise, that the Intermediary shall lend or invest in party identified by or on behalf of the Company (Ultimate Beneficiaries).
- (ii) The Company has not received any fund from any party(s) (Funding Party) with the understanding that the Company shall whether, directly or indirectly lend or invest in other persons or entities identified by or on behalf of the Company (“Ultimate Beneficiaries”) or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

EXPLANATORY STATEMENT PURSUANT TO SECTION 102(1) OF THE COMPANIES ACT, 2013

A. Item No.4: Ratification of remuneration of cost auditors for financial year ended 31st March 2025

and

Item No.5: Ratification of remuneration of cost auditors for financial year ended 31st March 2026

The Company is maintaining cost records pursuant to the provisions of Section 148(1) of the Companies Act, 2013 and is required to have such records audited in accordance with Section 148(2) of the Act read with the rules made thereunder.

The Board of Directors of the Company, at its meeting held on 17th July 2025, took note of the change in constitution of M/s Lavanya and Associates, Cost Auditors, from a proprietorship firm to a Limited Liability Partnership, namely M/s Lavanya and Associates LLP, and treated the same as a casual vacancy. Based on the recommendation of the Audit Committee, the Board approved the appointment of M/s Lavanya and Associates LLP for two financial years, i.e., FY 2024-25 and FY 2025-26, at a remuneration of ₹50,000/- (Rupees Fifty Thousand only) plus applicable GST per financial year.

In pursuance of Rule 14(a)(ii) of the Companies (Audit and Auditors) Rules, 2014, the remuneration payable to the Cost Auditors as approved by the Board of Directors is required to be ratified by the Members of the Company. Accordingly, the above two resolutions (in point no.4 and 5) are placed before the Members for ratification. The Company has evaluated the performance track record, industry experience, past performance, and quality of services rendered by the Cost Auditors. Further, the proposed remuneration has been assessed having regard to relevant industry benchmarks and prevailing market standards applicable to companies of similar size and operational complexity.

None of the Directors or Key Managerial Personnel of the Company or their relatives is, in any way, concerned or

interested, financially or otherwise, in the resolutions. The Board recommends the Ordinary Resolutions for approval of the Members.

B. Item No.6: Reappointment of Dr. S P Vasireddi (DIN: 00242288) as Executive Chairman of the Company

Dr. S P Vasireddi, Founder of the Company, served as Chairman & Managing Director until 13th July 2013. Thereafter, he served as Executive Chairman upto 30th June 2018, and as Non-Executive Chairman from 1st July 2018 to 30th June 2023, following which he resumed the position of Executive Chairman. He has been associated with the Company since its inception and has played a pivotal role in its growth and development over the past four decades.

In view of his vast experience and continued guidance to the management, the Board of Directors at their meeting held on 06th May 2026, based on the recommendation of the Nomination and Remuneration Committee and on approval of the Audit Committee at their respective meeting held on 06th May 2026, considered it desirable to re-appoint Dr. S P Vasireddi as Executive Chairman of the Company for a term of five (5) years w.e.f., 01st July 2026, to 30th June 2031 i.e., upon completion of his current tenure as Executive Chairman.

Dr. S P Vasireddi has over 48 years of rich and varied experience in the industry and holds a Ph.D. in Chemistry and Honorary D.Sc. (Doctor of Science). Under his leadership and guidance, the Company has achieved significant growth and established a strong presence in its field. Considering his extensive industry experience, deep understanding of the Company's business and his valuable strategic guidance to the management, the Nomination and Remuneration Committee and the Board of Directors have evaluated his performance and are of the view that his continued association as Executive Chairman would be beneficial to the Company. The Board believes that his leadership, vision and mentorship will continue to provide valuable guidance in strengthening the Company's governance framework and contributing to its long-term growth and stability. Accordingly, the Nomination and Remuneration Committee and the Board of Directors have recommended his continuation on the Board.

Dr. S P Vasireddi, as Executive Chairman, is responsible for providing strategic leadership to the Company and the Board. His role includes setting the long-term vision and short-term business plans, formulating growth strategies, and guiding overall development of the Company's business. He will lead the Board in effective governance, provide mentorship and direction to the management team, and ensure alignment of business objectives with the Company's strategic goals. He shall also oversee key policy decisions, support performance monitoring, and contribute to strengthening the Company's governance framework and sustainable growth initiatives. Considering his extensive experience of over Five decades in the

industry, deep understanding of the Company's operations, and his continued association since inception, Dr. Vasireddi is well suited for the position of Executive Chairman. His proven leadership, strategic vision, and consistent guidance to the management have been instrumental in the Company's growth and stability. The Board is of the view that his continued leadership will be beneficial in driving the Company's long-term objectives and sustaining its governance standards.

Dr. S P Vasireddi has attained the age of 77 years and hence as per the provisions of Section 196(3)(a) of the Companies Act, 2013, his re-appointment and continuation as Executive Chairman requires approval of the members of the Company by way of a special resolution. Further, as the proposed remuneration to the appointee together with the remuneration to the other Executive Directors who are promoters or members of the promoter group, in aggregate, exceeds 5% of the net profit of the company, approval of Members is sought by way of Special Resolution as required under Regulation 17 (6)(e) of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

The Board of Directors, after due consideration of the applicable provisions of the Companies Act, 2013 and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, and in recognition of the invaluable contributions, leadership, and continued guidance of Dr. S P Vasireddi, recommends the aforesaid resolution for approval of the Members as a Special Resolution.

Brief profile of Dr. S P Vasireddi as required under the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 forms part of the Annexure to this Notice.

Dr. S P Vasireddi holds 5,197,050 equity shares in the Company. Ms. Harita Vasireddi, being his relative, may be deemed to be interested in the resolution. Save and except for the above, none of the other Directors, Key Managerial Personnel of the Company and their relatives are concerned or interested, financially or otherwise, in the resolution.

Dr. S P Vasireddi has given his consent to continue as Director of the Company and has confirmed that he is not disqualified from being appointed / continuing as a Director in terms of Section 164 of the Companies Act, 2013.

The Board recommends the Special Resolution set out in the accompanying Notice for approval of the Members.

Members may file only one consolidated claim in a financial year as per the IEPF rules.

INSTRUCTIONS FOR E-VOTING AND JOINING THE AGM ARE AS FOLLOWS:

19. INSTRUCTIONS FOR MEMBERS FOR ATTENDING THE AGM THROUGH VC/OAVM:

- i. The general meeting of the Company shall be conducted in accordance with the guidelines issued by the Ministry of Corporate Affairs ("MCA"), inter alia, vide General Circular No. 03/2025 dated 22nd September 2025 and other circulars issued in this regard (collectively referred to as "MCA Circulars"), which have extended the timeline for holding Annual General Meetings ("AGM") and Extraordinary General Meetings ("EGM") through Video Conferencing ("VC") or Other Audio-Visual Means ("OAVM") till further orders. Accordingly, the forthcoming AGM will be held through VC/OAVM, and the Members may attend and participate in the AGM through such means.
- ii. Pursuant to the provisions of Section 108 of the Companies Act, 2013 read with Rule 20 of the Companies (Management and Administration) Rules, 2014 (as amended) and Regulation 44 of SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015 (as amended), and other applicable circulars issued by Ministry of Corporate Affairs (MCA), the Company is providing facility of remote e-voting to its Members in respect of the business to be transacted at the AGM. For this purpose, the Company has entered into an agreement with Central Depository Services (India) Limited (CDSL) for facilitating voting through electronic means, as the authorized e-Voting's agency. The facility of casting votes by a member using remote e-voting as well as the e-voting system on the date of the AGM will be provided by CDSL.
- iii. The Members may join the AGM in the VC/OAVM mode 15 minutes before and after the scheduled time of the commencement of the Meeting by following the procedure mentioned in the Notice. The facility of participation at the AGM through VC/OAVM would be made available to at least 1000 members on first come first served basis. This does not include large Shareholders (Shareholders holding 2% or more shareholding), Promoters, Institutional Investors, Directors, Key Managerial Personnel, the Chairpersons of the Audit Committee, Nomination and Remuneration Committee and Stakeholders Relationship Committee, Auditors etc., who are allowed to attend the AGM without restriction on account of first come first served basis.
- iv. The attendance of the Members attending the AGM through VC/OAVM will be counted for the purpose

of ascertaining the quorum under Section 103 of the Companies Act, 2013.

- v. Pursuant to MCA Circular No. 14/2020 dated April 08, 2020, the facility to appoint proxy to attend and cast vote for the members is not available for this AGM. However, in pursuance of Section 112 and Section 113 of the Companies Act, 2013, representatives of the members such as the President of India or the Governor of a State or body corporate can attend the AGM through VC/OAVM and cast their votes through e-voting.

THE INSTRUCTIONS TO SHAREHOLDERS FOR E-VOTING AND JOINING VIRTUAL MEETINGS ARE AS UNDER:

Option 1: Access through Depositories CDSL/NSDL e-Voting system in case of individual shareholders holding shares in demat mode.

Option 2: Access through CDSL e-Voting system in case of shareholders holding shares in physical mode and non-individual shareholders in demat mode.

- i. The voting period begins on **22nd June 2026; 09:00 A.M.** and ends on **24th June 2026; at 05:00 P.M.** During this period shareholders of the Company, holding shares either in physical form or in dematerialized form, as on the **cut-off date 18th June 2026** may cast their vote electronically. The e-voting module shall be disabled by CDSL for voting thereafter.
- ii. Shareholders who have already voted prior to the meeting date would not be entitled to vote at the meeting venue.
- iii. Pursuant to SEBI Circular No. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated 09th December 2020, under Regulation 44 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, listed entities are required to provide remote e-voting facility to its shareholders, in respect of all shareholders' resolutions. However, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level.

Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to **all the demat account holders, by way of a single login credential, through their demat accounts/websites of Depositories/Depository Participants**. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

iv. **Option 1: Access through Depositories CDSL/NSDL e-Voting system in case of individual shareholders holding shares in demat mode.**
