Outlook

The Indian economy continues to exhibit resilience characterized by steady growth and low inflation. Q2 GDP growth came in at 8.2%, driven by strength in the manufacturing and services sectors. With a reduction in the repo rate by the RBI to 5.25% and soft price pressures and easing food costs, FY26 GDP growth is likely to be around 7.4%.

The Union Budget 2026-27 is expected to increase outlays for technology, defence and urban revitalization. Continued policy stability and the expansion of flagship initiatives are expected to serve as key catalysts for economic growth. Furthermore, the private sector's capital expansion witnessed in 2025 - supported by large-scale greenfield investments and favourable funding conditions - provides a solid foundation for sustained macroeconomic momentum.

The global economy enters 2026 with projected GDP growth of around 3%, indicating a modest expansion for the year. The GCC region, a major geography for the Company's Projects business, is poised for strong growth, underpinned by major investments in AI infrastructure, Data Centers, and large-scale urban projects in Saudi Arabia and the UAE.

The Company is confident that the various reform measures currently being undertaken will continue to foster a supportive investment climate, further strengthened by the country's demonstrated resilience. The Company remains well positioned to capitalize on emerging opportunities. Its strategy of expanding its geographical footprint, driving efficient execution across the Projects & Manufacturing portfolio, focus on cost & cash flow management and strengthening its services businesses in a rapidly evolving business environment is expected to enhance returns to all stakeholders.
