Normalised Financial Workings: The impact of the exchange rate on foreign currency loans and current assets and liabilities, including cash and bank balances, has been removed. Additionally, numbers have been adjusted for tax reversals and impairments (taken in FY25).

NCD & Currency Swaps:

- Funds raised through NCDs have been swapped into USD using INR-FCY swaps, thus creating synthetic fixed rate USD loans.
- The MTM change of these swaps impacts the reported numbers.
- Normalized numbers are worked out after making necessary adjustments to reported numbers to reflect the effective cost of the synthetic USD loans.

THE GREAT EASTERN
SHIPPING CO. LTD.

Business Overview

Crude and Product Tanker

Crude Tankers

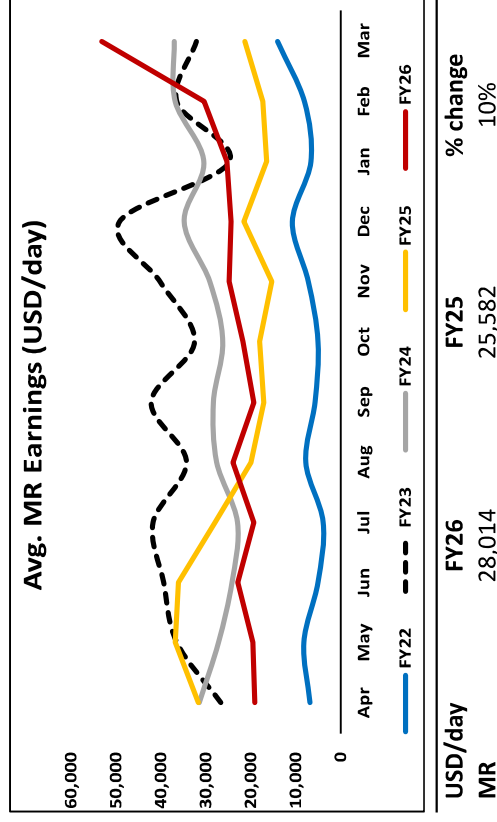

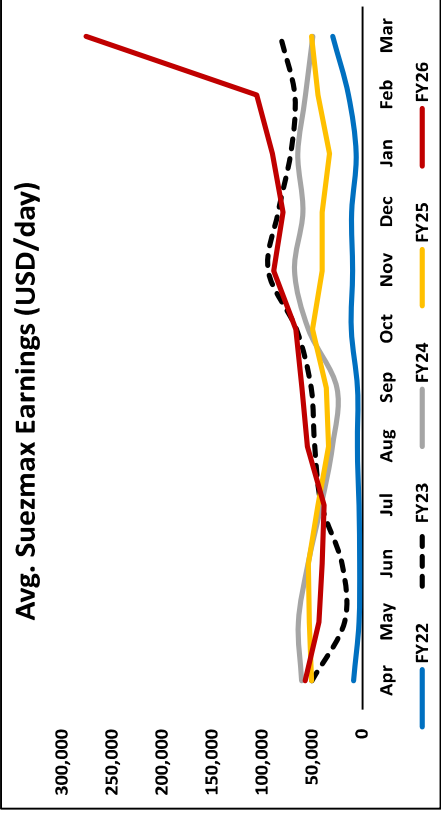

- Global dirty trade volumes dropped by 2% y/y in Q4 FY26 primarily led by 15% y/y volume drop in Mar-26 due to the conflict in Middle East.
- Middle East dirty exports dropped by ~10mbpd in Mar-26 (~50% drop vs Feb-26) due to closure of Strait of Hormuz.
- Surplus crude oil on water pre crisis (~200mn barrels drawdown in Mar) and IEA stockpile release of 400 mbpd acted as immediate buffers.
- Industry estimates suggest Asian refinery runs saw cuts of ~3mbpd while Middle East saw cuts of ~2mbpd in Mar-26.
- The crude tanker fleet grew by only 1% y/y in Q4 FY26. However, nearly ~30 LR2 tankers have switched to dirty in Q4 FY26. Idling of vessels (especially VLCCs) and fleet inefficiencies kept crude tanker earnings elevated despite loss of volumes.

Product Tankers

- Total seaborne product trade declined by 3% y/y in Q4 FY26 (~13% y/y drop in Mar-26 trade). Middle East exports dropped by ~60% (Mar vs Feb)
- Higher US refinery utilizations enabled robust product exports from US (+22% y/y in Q4 FY26). In addition, demand for US products from markets as far as Asia and Africa (due to the conflict) has led ton-miles growth stronger.
- Nominal product tanker fleet expanded by approximately 5% y/y but the switching of LR2 to dirty created some tightness in product fleet

Tanker asset prices & order book

- Asset prices for Crude & Product tankers inched up 10-20% q/q across age & type
- The orderbook for crude and product tankers stood at 22% and 19% of respective fleet as on 31-Mar-26.

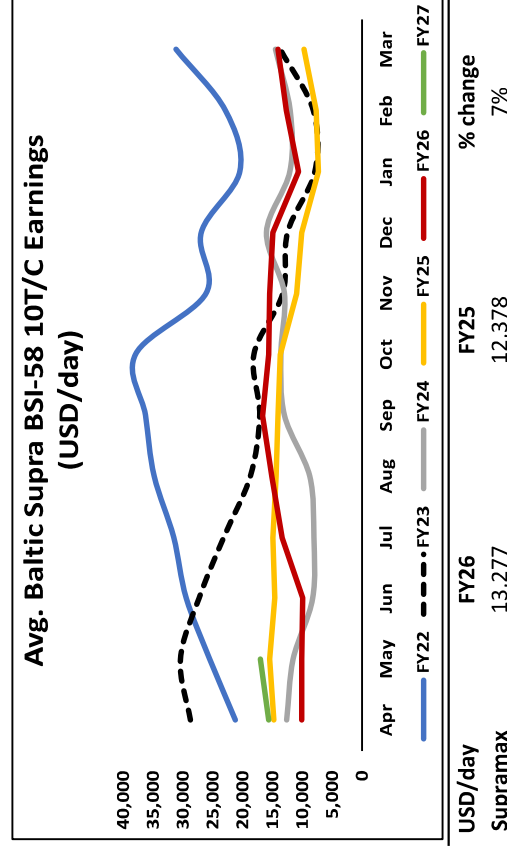

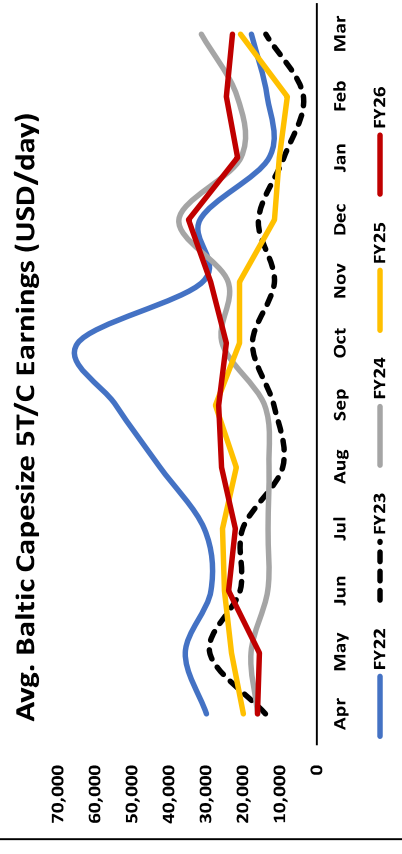

Dry Bulk

THE GREAT EASTERN
SHIPPING CO. LTD.

- During Q4 FY26, bulk carrier earnings were significantly higher y/y across all segments. Capesize earnings rose by 77% y/y, while Kamsarmax and Supramax earnings grew y/y by 60% & 50%, respectively.
- Iron ore trade witnessed robust growth of ~4% y/y during Q4 FY26 as lower seasonal weather disruptions improved supply from Australia and Brazil. Import demand was driven by continued stockpiling of iron ore by China.
- Coal trade declined by 3% y/y in Q4 FY26 as import demand continued to be subdued from China and India. Notably, Indonesian coal exports declined sharply by ~7% y/y during the quarter.
- Grain trade remained very strong during Q4 FY26, growing by ~11% y/y as Chinese imports of US soybeans improved during the quarter. South American grain exports also remained firm aided by healthy crop harvests.
- Bauxite trade grew by ~14% during Q4 FY26 as Guinea continued its export strength for robust Chinese demand.
- Bulker Carrier asset prices firmed ~5-10% during the quarter depending on vessel type and age profile.
- Bulk carrier fleet grew by 3% y/y during Q4 FY26.
- Order book for the dry bulk sector stands at ~13% of fleet.

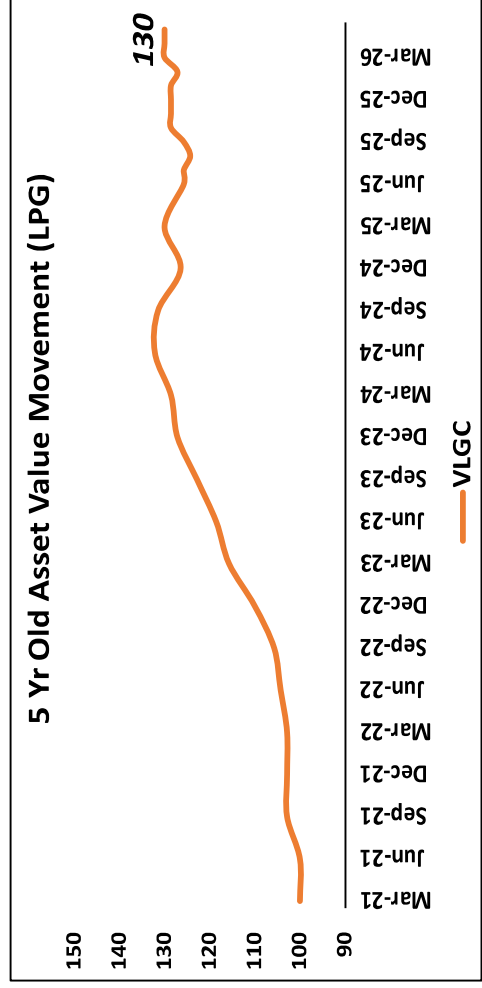

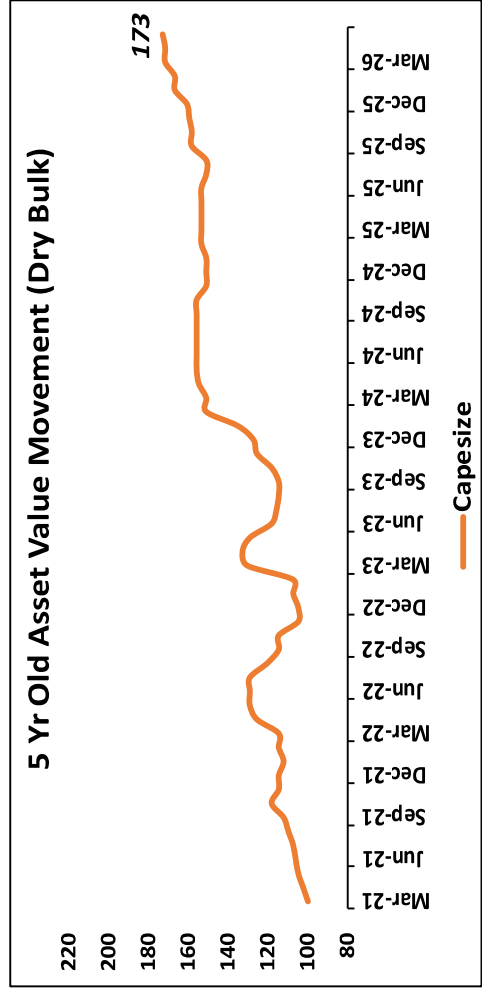

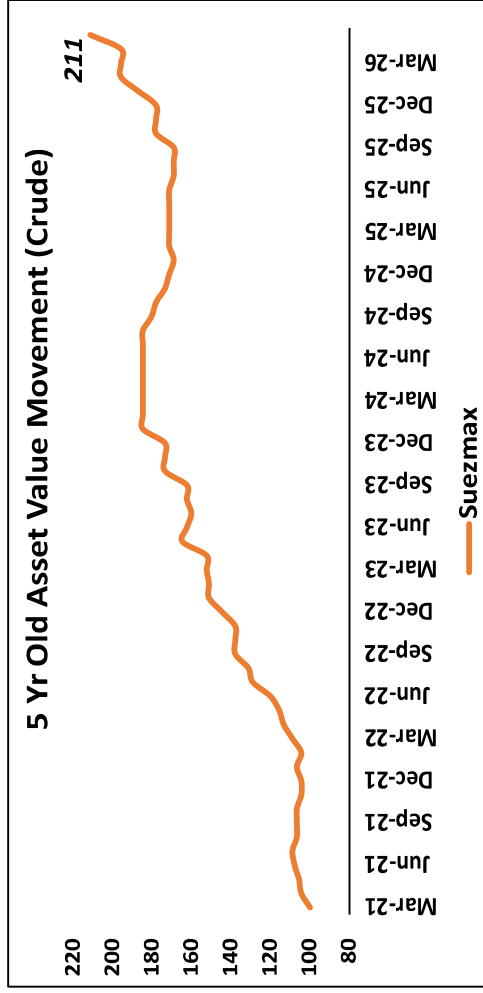

- VLGC spot earnings grew by 145% y/y in Q4 FY26.
- Overall trade volumes were down 5% y/y, primarily due to a sharp decline in export volumes from Middle East region amid the ongoing conflict.
- US exports remained robust and continued to underpin tonne-mile demand, with cargo flows increasingly redirected towards India & SE Asia
- A significantly stronger arbitrage on the U.S.–Far East route enabled freight markets to capture a larger share of the value chain, resulting in a pronounced uplift in earnings.
- Earnings were further supported by fleet inefficiencies, including increased waiting times at the Panama Canal and ships idling off Indian ports.
- Asset values continue to remain at historical highs.
- VLGC fleet grew by 5% y/y in Q4 FY26.
- The total VLGC orderbook-to-fleet remains elevated at 28%.
