Engineering the Next-Gen Retail Investing Platform

Low-Latency Infrastructure × Curated Product Depth × Investor Education — Built for Compounding Engagement

01 INFRASTRUCTURE MOAT Institutional-Grade Trading Stack

- Migrated legacy OMS/RMS to new-age C++ architecture — serving 85% of users across North, West & East India
- Sub-millisecond execution, higher uptime, stable performance through peak-market loads
- Core APIs rebuilt for ultra-low latency

Outcome:

Foundation to scale active traders without re-platforming risk

02 PRODUCT DEPTH Expanding Beyond Equities

- NCD investing as a first-class experience — dedicated Company & Order pages
- Trending NCDs, live yield calculator, credit-rating gauge for instant decisions
- Users discover fixed-income opportunities contextually, without manual search

Outcome:

Revenue diversified beyond broking cycles

03 ENGAGEMENT FLYWHEEL Educate → Execute → Retain

- Choice Academy: structured, market-aligned curriculum embedded inside FinX
- Execution-focused modules convert learners into active users on the same platform
- Continuous UX refinement: credit-for-sale 80%→95%, off-market price updates, synced commodity averages

Outcome:

Lower CAC, higher LTV, stronger activation of New-to-Market cohorts

A client-first trading platform converting infrastructure depth, product curation & investor education into durable engagement and diversified revenue
