Voluntary enhancement of the Bank's provisioning framework for standard assets

During Q4 of FY26, the Bank proactively strengthened its balance sheet by voluntarily enhancing its prudent provisioning framework for standard assets, in line with our conservative risk-management philosophy. Based on an assessment of evolving and unpredictable macroeconomic and geopolitical uncertainties, the Bank created an additional one-time provision of ₹2,001 crores during the quarter. This approach is aligned with our practice to enhance resilience of our balance sheet during periods of elevated uncertainty while maintaining transparency and discipline in risk governance. This action is prudent and precautionary in nature and does not reflect any deterioration in asset quality or adverse credit trends in the Bank's loan or investment portfolio as of the reporting date. Our Core asset quality metrics remain stable and within our risk guardrails.

At March 31, 2026, the Bank holds cumulative provisions (standard + additional other than NPA) of ₹15,473 crores. It is pertinent to note that this is over and above the NPA provisioning included in our PCR calculations. These cumulative provisions translate to a standard asset coverage of 1.26% as on 31st March 2026. referred to as Citi India Consumer Business on a going concern basis. In accordance with an independent valuer's report, intangibles (excluding goodwill) amounting to ₹8,714.24 crores were recognised in the Bank's financial statements. Despite retaining access to and business use of these assets, as a prudent measure aimed at protecting its capacity to pay dividends, the Bank opted to fully amortise these intangibles through the Profit and Loss account in FY 2022-23. Furthermore, the Bank elected not to create any deferred tax asset in FY 2022-23 on such intangibles, nor did the Bank consider the deductibility on the said intangibles while providing for current tax in the books until the regular tax assessment for the said financial year was completed.

During the quarter and year ended March 31, 2026, following the conclusion of regular assessment proceedings by the income tax authorities, tax depreciation on these intangibles was allowed. As a result, the tax expense for Q4FY26 and FY26 is lower by ₹2,193.20 crores, which includes the reversal of excess tax provisions made in prior years amounting to ₹1,129.80 crores, reduction of current year's tax expense by ₹265.85 crores and recognition of a deferred tax asset of ₹797.55 crores.

Legacy asset quality issues adequately addressed

Overall Credit Costs: FY12 to FY26

Drivers of Credit Costs

- **Reduced lumpiness of the wholesale business:** Given quality and granularity of the wholesale book, the new credit costs should be lower for this cycle as compared to previous cycle
- **Provisioning rules tightened and rule based, PCR an outcome:** We now operate at 15% to 20% higher than where we used to previously operate. This needs to be factored in the incremental provisioning in the short term
