CMD's Comment on Quarter Performance

“We are pleased to report solid results for the quarter and half-year ended September 30, 2025. These financials reflect our strong execution capabilities. While our gross margin for the quarter was lower than usual due to the delivery of a low-margin strategic contract, we remain confident about achieving a stronger margin for the full year 2025-26. Our order inflow in the first half of the current financial year is in line with expectations, and our order book includes two significant orders for the EW products developed with QIP funds. We are optimistic that these initiatives will soon translate into high-value contracts. We remain committed to sustaining our growth trajectory, maintaining strong revenue growth and profitability, and delivering value to our stakeholders.”
