A testament to our
Gold Standard in
Exceptional patient care.

- Country's **first pediatric hospital** to have 2 **flagship hub hospitals**, one each in Hyderabad and Bengaluru, **awarded with JCI Accreditation**
- Country's **first standalone fertility center** BirthRight Fertility, Kondapur, Hyderabad received **re-accreditation** from **JCI**

An insight into the Rainbow approach

Dr. Ramesh Kancharla

Pediatric Healthcare Visionary

Chairman & Managing Director

Dr. Ramesh comes from an agricultural background from a village in Andhra Pradesh, India where the accessibility to healthcare was very poor. This motivated Dr. Ramesh to pursue medical education

Garnered rich experience in pediatric gastroenterology and liver disease at best pediatric hospitals in the United Kingdom and got exposed to the nuances of pediatric healthcare model at these hospitals

Lack of quality pediatric healthcare in the country and his resolve that no child should suffer due to lack of dedicated medical facilities led to the foundation of Rainbow Children's Hospitals in 1999

Rainbow is currently the country's largest pediatric hospital chain with 23¹ hospitals spread across 9 cities

Bestowed with Healthcare leader of year award by the Financial Express, Healthcare award, 2024

¹ Including Electronic city Hospital, Bengaluru

25 years of Rainbow Journey

1999-2010

Established standalone pediatric specialty hospital concept

Integrated perinatal services within the children's hospital

Expansion within Hyderabad and a new city - Vijayawada

2011-2020

Nurtured perinatal services

Enhanced Pediatric multi specialty and tertiary care services

Investment by the CDC Group, UK

Foray into newer cities - Bengaluru and New Delhi

Hub and Spoke model nurtured in Hyderabad

2021-2024

Successful listing on the stock exchanges - NSE and BSE

Largest chain of comprehensive pediatric care with cutting-edge quaternary care services

Largest pediatric training program in private healthcare in the country

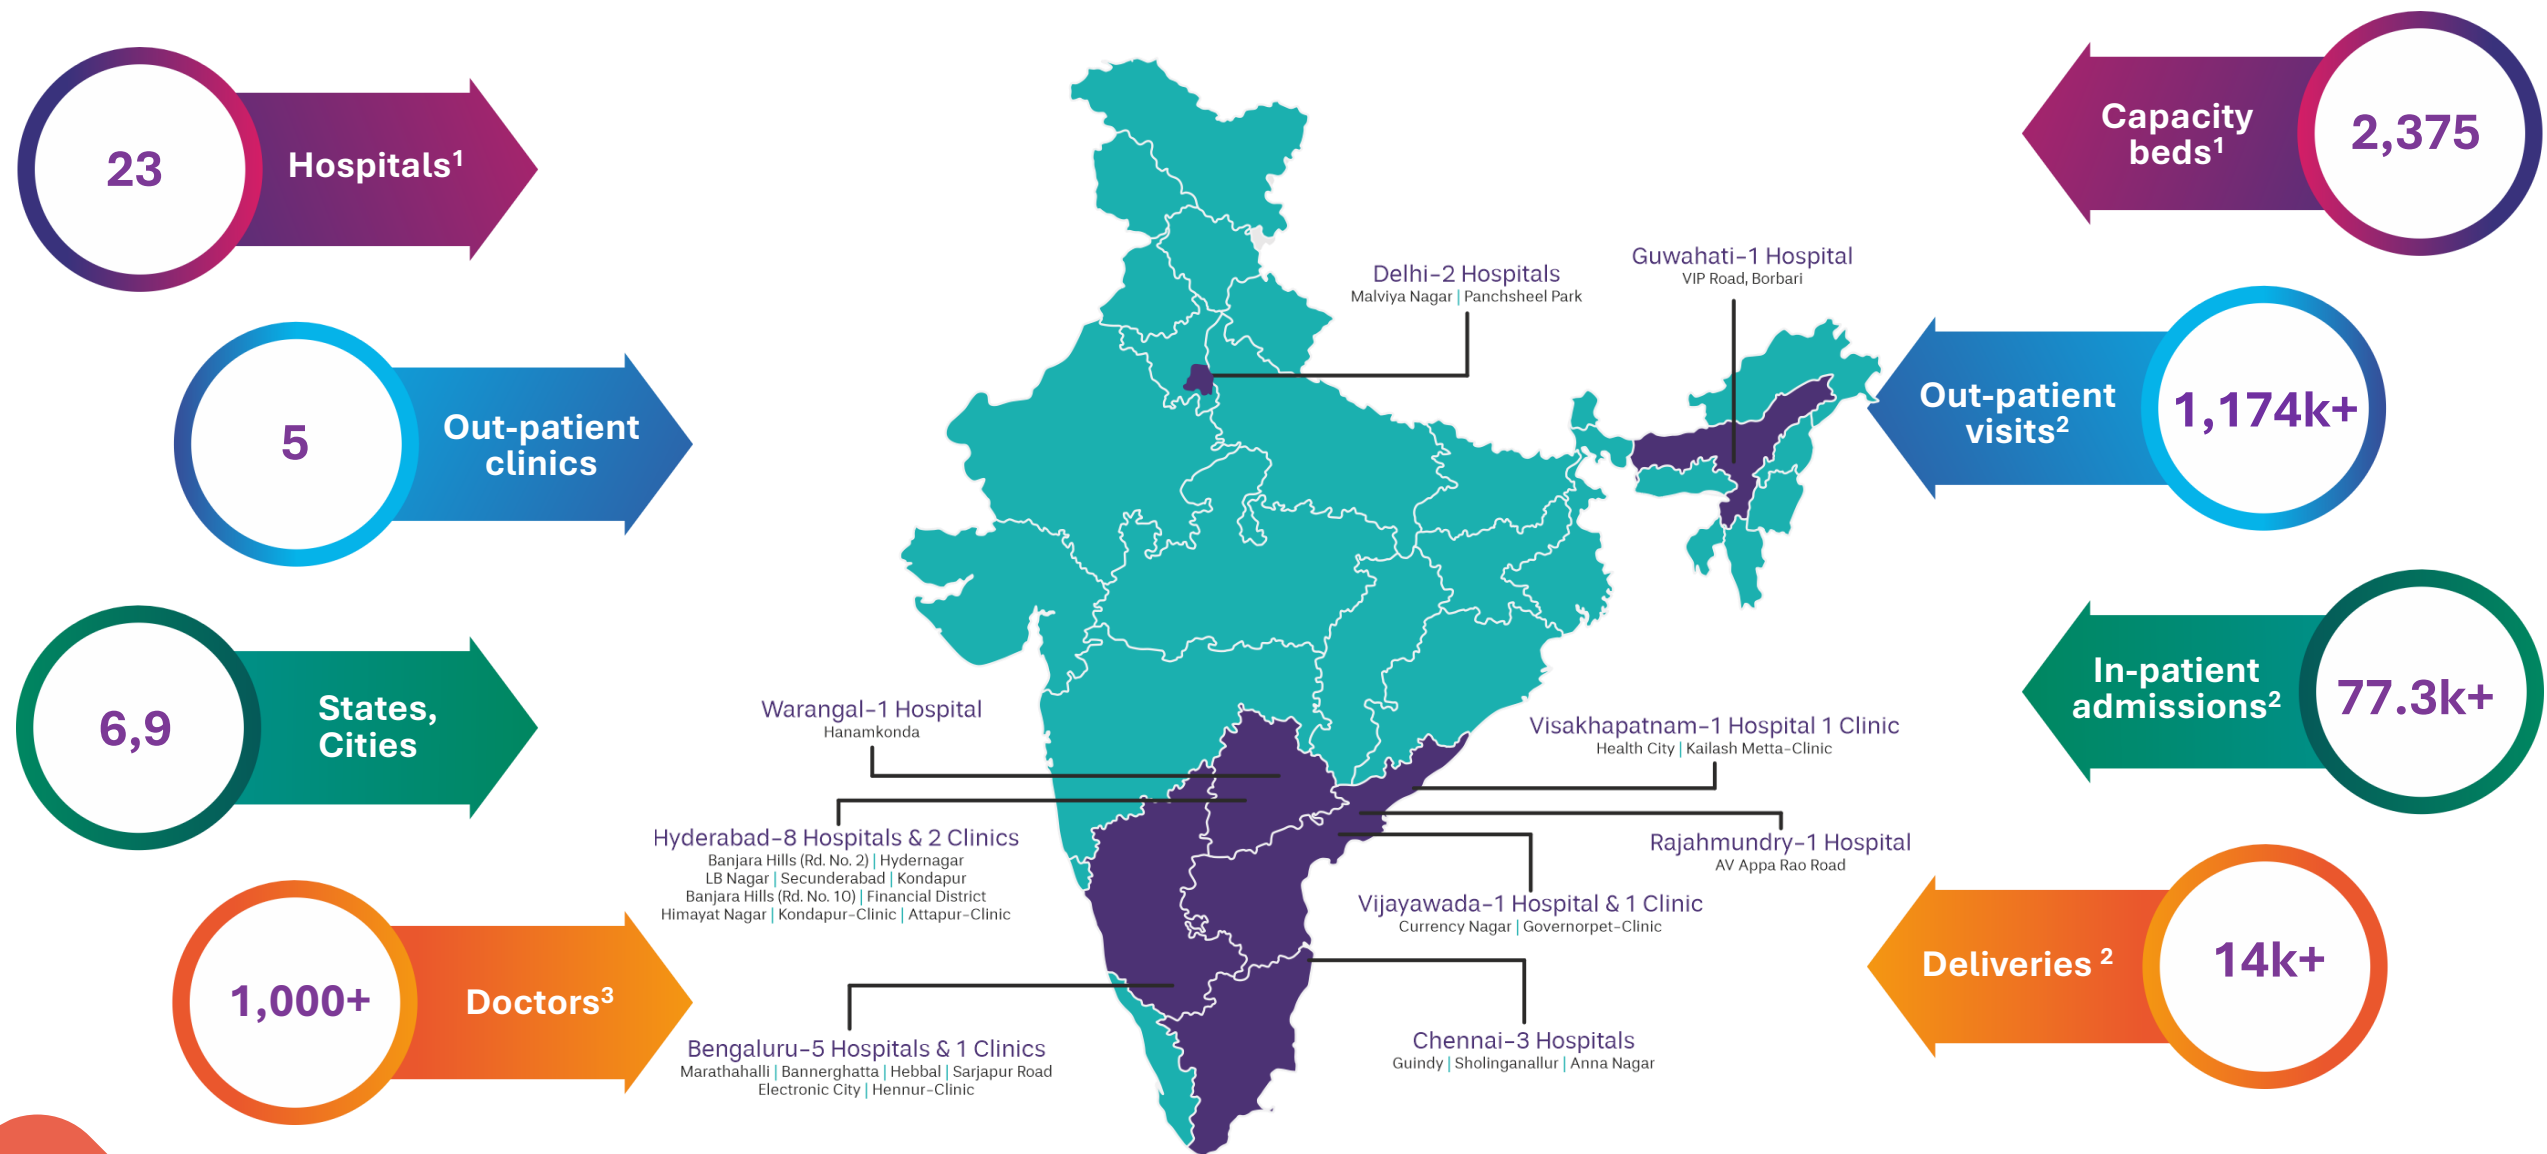

Venturing into newer territories: Chennai and Visakhapatnam

Pioneering the way: The first pediatric and fertility hospital to earn prestigious JCI accreditation in the country

2025

Acquisition of:

Prashanthi Hospital, Warangal
& Pratiksha Hospital, Guwahati

Note: ¹ Including Electronic city Hospital, Bengaluru
² Numbers for 9M FY26; ³ Including full time residents and DNB

A novel approach in pediatrics healthcare services

Ability to conceptualize, create and operate specialized children's hospitals

Children Centric Hospitals

Children centric environment and soothing interiors help in children to recover faster

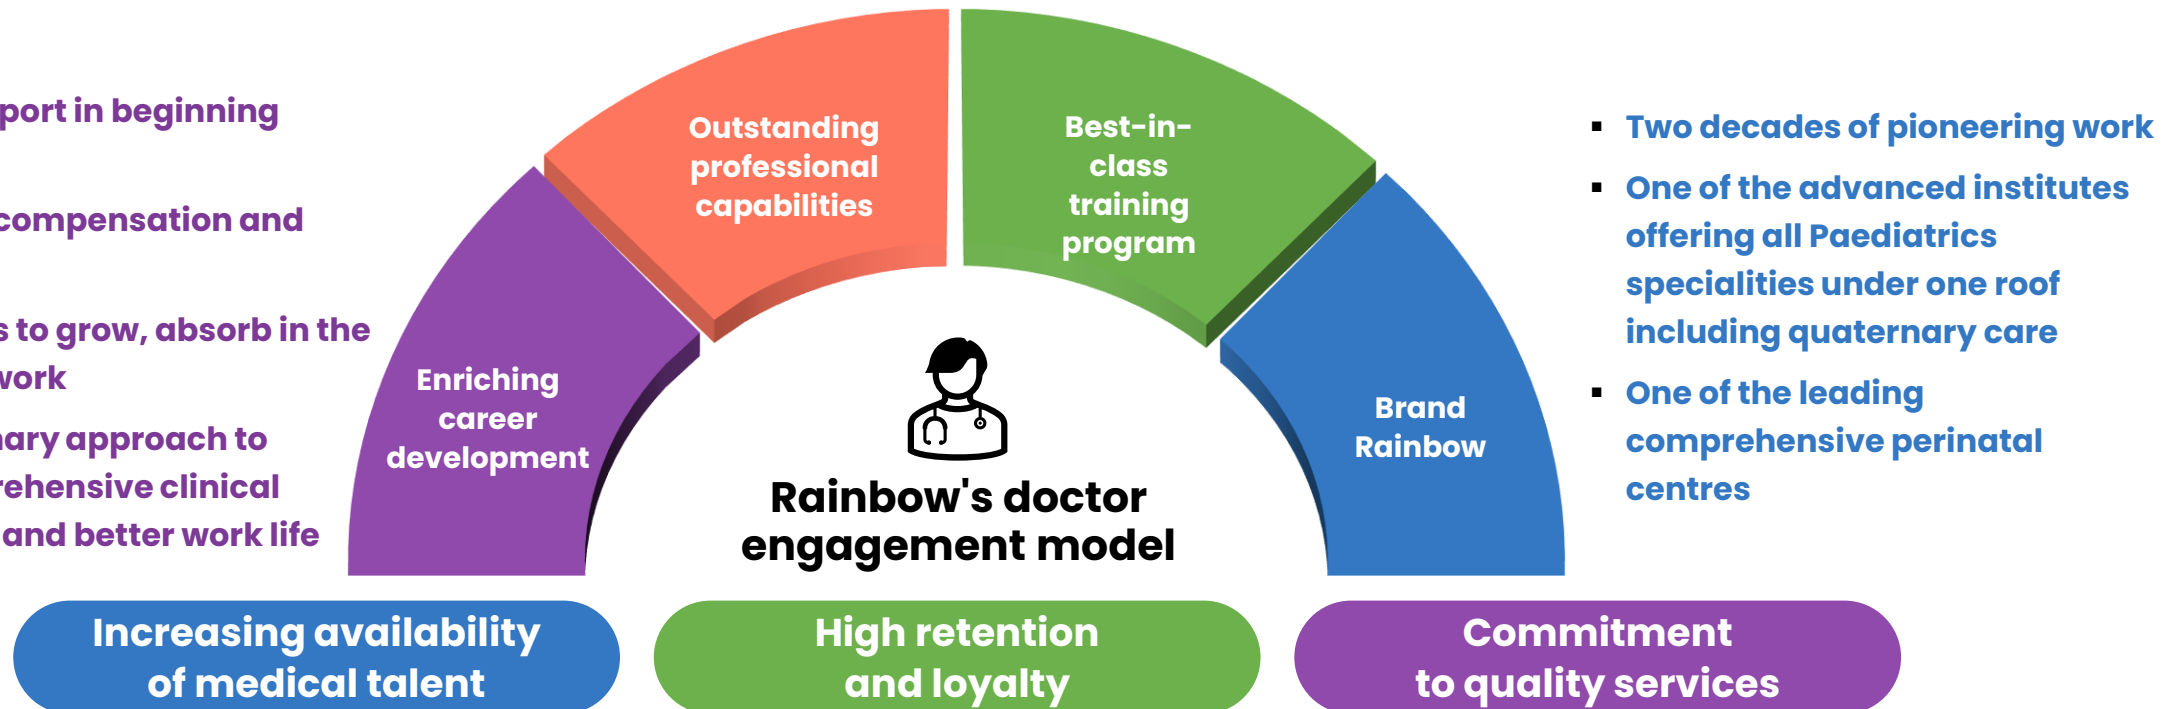

Allocation of significant portion of capex towards interiors of hospitals for creating congenial environment

Doctor engagement model fostering loyalty and sustainability with an institution-first approach

- **1000+ full time doctors**
- **A number of doctors trained or possess qualifications from the UK, USA, Canada, Australia**
- **Modern infrastructure and clinical back-up to provide quality care**
- **Recognised as MRCPCH Examination Centre**
- **Recognised as training center¹ by National Board of Examinations**
- **Leading training program in India approved by National Board of Examinations**

- **Retainer/Support in beginning years**
- **Competitive compensation and rewards**
- **Opportunities to grow, absorb in the Rainbow network**
- **Multidisciplinary approach to create comprehensive clinical environment and better work life balance**

Note: ¹ For offering training in Pediatrics, Neonatology, Pediatrics Intensive Care, Pediatric subspecialties, Obstetrics and Gynaecology

The specialist in **comprehensive children's care**

Full suite of Pediatric offerings

Pediatric Secondary Care

- Pediatric outpatients
- Immunizations
- Developmental Screening
- Acute and seasonal illness

Pediatric Tertiary Intensive Care

- Care of preterm babies with low/extremely low birth weight
- Newborn emergency transports
- Neonatal surgical Services
- Advanced ventilation including HFOV
- Pediatric neurocritical care services
- ECMO services

Pediatric Multi-specialty & Quaternary Care

- Pediatric Surgery, urology and minimal invasive surgery
- Pediatric Cardiology and cardiac surgery
- Pediatric Neurology and neuro-surgery
- Pediatric Haemato-oncology
- Pediatric Gastroenterology and liver diseases
- Pediatric Nephrology
- Pediatric Pulmonology and allergy
- Pediatric transplantation (liver, kidney, bone-marrow)
- CRRT, plasmapheresis, hemodialysis

**~1/3 of Beds Allocated
to Critical Care**

**3 Hospitals
Accredited by JCI#**

**13 Hospitals
Accredited by NABH**

Comprehensive perinatal care provider, with synergies between paediatric and perinatal services

Comprehensive services for all pediatric care needs

Pediatrics

- 24*7 full spectrum of Pediatric multi specialty cover with level 4 NICU care

Coordinated handholding for both perinatal and pediatric services

Ease of seeing both pediatrician and obstetrician

- Comprehensive perinatal service
- 24/7 Obstetrics, anesthesia, blood bank
- Maternity ICU

Obstetrics, Fetal Medicine & Fertility

Fully integrated maternity care and fertility services

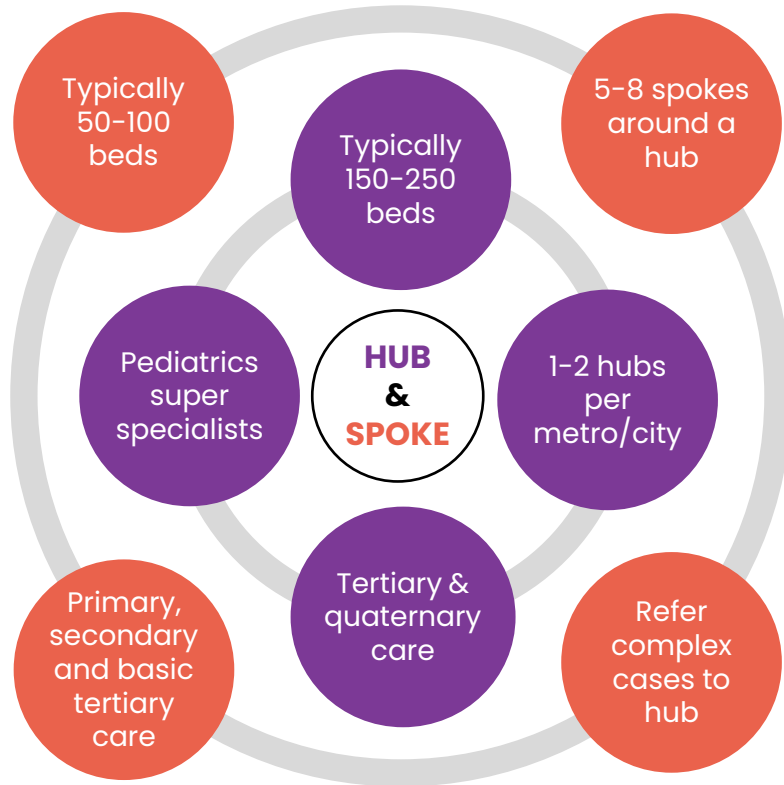

**Accessibility/nativity/comfort/
knows the system/strong
recommendation from pediatrician**

**Full range of fetal service included
cardiac echo/neonatologist
consultation prior to delivery**

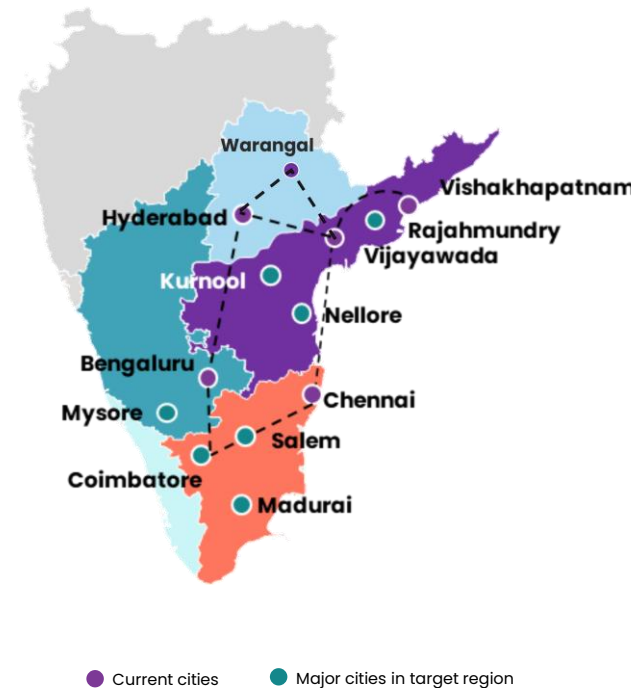

Hub and Spoke approach to **optimise delivery of patient care services** at scale

City level hub and spoke model

Accessibility of super-specialty at hubs, general pediatrics at spokes

Regional level "South Connect" model

Regional spokes at 200-250 kms from city hubs

Regional spokes to provide high quality Pediatric, obstetrics and gynaecology care at tier-II cities and act as connecting bridge to address a large market

- Robust transport network to save sick newborn and children from districts
- Establish Pediatric sub-specialty outreach clinic at districts
- Provide emergency service for maternal and Pediatric patients

Financially prudent expansion

Network effect and synergies enhance operational efficiencies

Hub & Spoke Model

Hyderabad

Bengaluru

Chennai

● Hub ● Spoke ● Upcoming Hospital

- Hub Hospital is centrally situated, providing accessibility from all part of the city
- Spokes hospitals are situated at areas experiencing rapid growth and development, strategically located to ensure convenient access for nearby towns and cities

Robust governance framework

High Governance Standard

Board of directors

Dr. Ramesh Kancharla

Chairman & Managing Director
MD (Pediatrics) & MBBS (UK)

- Specialist in Pediatric Gastroenterology, Hepatology and Nutrition
- Worked in prestigious hospitals such as King's College Hospital, London, Great Ormond Street Children's Hospital – London and is a member of the Royal Colleges of Physicians of the United Kingdom
- Bestowed with 'healthcare leader of year' award at the Financial Express, Healthcare award, 2024

Key Developments

Mr. Abrar Ali Dalal – Onboarded as Group CEO

Mr. Abrarali Dalal

Group Chief Executive Officer

- Mr. Abrarali Dalal is a seasoned business leader with over 25 years of experience spanning healthcare and allied sectors. He has successfully led large, multi-location hospital networks through transformational growth journeys, driving scale, profitability, and operational excellence, while serving in multiple CXO roles and steering organizations from top leadership positions.
- Over the years, he has held progressive leadership roles across operations, strategy, and business development, with a proven track record in turnaround management, brownfield expansions, clinical excellence, and brand repositioning.
- His strategic focus has been on digital transformation, star clinician recruitment and retention, and productivity-led profitability improvement. Mr. Dalal is known for his sharp business acumen, people-first leadership, and ability to deliver strong investor outcomes through disciplined execution and value creation.
- He holds an MBA and a Diploma in Foreign Trade from reputed institutions in Pune, and a Bachelor's degree in Science.

Commencement of new 100 beds hospital at Rajahmundry, AP

- Ms. Brahmani Nara (Executive Director, Heritage Foods) and Ms. Tejaswini Mathukumilli (Philanthropist) formally inaugurated the 100-bed greenfield hospital in Rajahmundry, Andhra Pradesh.
- With steady economic activity from agriculture, aqua and allied sectors, and increasing urban development, the city is emerging as a strong demand center for healthcare services.
- The hospital has been conceived as a regional hub to address healthcare needs across East and West Godavari regions, with affluent tier two cities, and adjoining districts together representing an addressable population of nearly 10–12 million
- Strengthens Rainbow's footprint in the state, making Rajahmundry its third hospital in Andhra Pradesh, after Vijayawada and Visakhapatnam.

Appendix

Gift of Life from Mother: Saving a Child with Liver Failure – Rainbow Bangalore's First Liver Transplant

- An 11-year-old child was born with biliary atresia, a serious condition in which the bile ducts are absent.
- As an infant, the child underwent a Kasai surgery at another hospital in an attempt to restore bile flow. Although there was an improvement for a few years, the liver continued to fail over time and was referred to Rainbow Children's Hospital, Marathahalli
- The child continued to progress to end stage liver disease where liver transplant is the only option for survival.
- After detailed evaluation, the mother's liver found to be appropriate for liver donation.
- Our liver transplant team performed living related Liver Transplant, using left lobe from the mother.
- The new liver began functioning well, and the child made a steady recovery. Today, the child is stable and thriving, with a second chance at life — **made possible by a mother's sacrifice and the advanced transplant care at Rainbow.**

A Battle Beneath the Surface: Saving a Child from a Recurrent Facial benign Tumor

- An 11-year-old child from Africa came to us with a feeling of heaviness on the right side of the face and a bulging of the right eye. There was no pain, no fever, no redness, and no bleeding from the nose or mouth.
- The child had a history of a similar problem before and had already undergone surgery at the age of 10. Because the swelling came back, two more surgeries had been done within a few months.
- On examination, the right eye was pushed forward and the right side of the face looked swollen. The swelling was firm but not painful. New scans and tests were done, and doctors considered a few possible bone-related tumors of the upper jaw.
- A team of specialists—including pediatric surgeons, dental surgeons, ENT doctors, radiologists, anesthesiologists, and eye specialists—discussed the case together. They decided that the best treatment was to remove the growth completely through open surgery.
- The surgery was done successfully. The extracted tumor histologically showed benign nature.
- After the operation, the child was kept in the intensive care unit for one day for close monitoring. The next day, the nasal packing was removed. Liquids were started by mouth on the second day, and the child was then shifted to the regular ward.
- Recovery went well, and the child was discharged on the fifth day after surgery, eating normally and in stable condition.

Deciphering Prader-Willi Syndrome - A rare genetic disorder in a neonate

- A 22-day-old newborn, born late preterm, was referred with persistent poor feeding, reduced activity, and excessive sleepiness since birth.
- The baby had a difficult neonatal course with brief breathing problems requiring CPAP support.
- On examination, the infant had generalized hypotonia (a “floppy” baby), along with subtle facial differences and differences in eye pigmentation. Initial brain imaging, including ultrasound and MRI, did not show any structural abnormality, making the cause of the central hypotonia unclear.
- In view of the ongoing feeding difficulty and low muscle tone, a detailed metabolic and genetic evaluation was undertaken. Rapid whole genome sequencing confirmed a **diagnosis of Prader-Willi syndrome, a rare genetic disorder affecting muscle tone, feeding, growth, and later development.**
- The newborn was started on assisted feeding methods, physiotherapy, and oromotor stimulation. Plans have been made for long-term follow-up and early initiation of growth hormone therapy, which can significantly improve muscle strength, growth, and overall outcomes.
- This case highlights the importance of considering **Prader-Willi syndrome in any preterm or term neonate with persistent hypotonia and feeding difficulty**, as early genetic diagnosis allows timely intervention and better long-term prognosis.

About Us

Rainbow network comprises of 23¹ hospitals and 5 clinics in 9 cities, with a total bed capacity of 2,375¹ beds. Our Pediatric services under “Rainbow Children’s Hospital” includes newborn and pediatric intensive care, pediatric multi-specialty services, pediatric quaternary care (including organ transplantation); whereas our women care services under “Birthright by Rainbow” offers perinatal care services which includes normal and complex obstetric care, multi-disciplinary fetal care, perinatal genetic and fertility care along with gynecology services.

Rainbow Children’s Hospital built on strong fundamentals of multidisciplinary approach with a full-time consultant led clinical service along with 24/7 commitment in a child centric environment. The company follows a hub-and-spoke operating model where the hub hospital provides comprehensive outpatient, inpatient care, with a focus on tertiary and quaternary services, while the spokes provide emergency care in pediatrics and obstetrics, large outpatient services and comprehensive obstetrics, pediatric and level 3 NICU services. This model is successfully operational at Hyderabad and is gaining traction in Bengaluru. The endeavor is to replicate this approach in Chennai and across the National Capital Region. Subsequently Rainbow intends to expand into tier-2 cities of Southern India.

Rainbow embraces a unique doctor engagement model, where doctors work exclusively on a full-time, retainer basis. The doctors work in teams and have 24/7 commitment, which is particularly important for children’s emergency, neonatal, pediatric intensive care services and to support pediatric retrieval services. The Company also operates the country’s largest pediatric DNB training programme in private healthcare, offering post graduate residential DNB and fellowship programme.
