A testament to our
Gold Standard in
Exceptional patient care.

- Country's **first pediatric hospital** to have 2 **flagship hub hospitals**, one each in Hyderabad and Bengaluru, **awarded with JCI Accreditation**
- Country's **first standalone fertility center** BirthRight Fertility, Kondapur, Hyderabad received **re-accreditation** from **JCI**

An insight into the Rainbow approach

Dr. Ramesh Kancharla

Pediatric Healthcare Visionary

Chairman & Managing Director

Dr. Ramesh comes from an agricultural background from a village in Andhra Pradesh, India where the accessibility to healthcare was very poor. This motivated Dr. Ramesh to pursue medical education

Garnered rich experience in pediatric gastroenterology and liver disease at best pediatric hospitals in the United Kingdom and got exposed to the nuances of pediatric healthcare model at these hospitals

Lack of quality pediatric healthcare in the country and his resolve that no child should suffer due to lack of dedicated medical facilities led to the foundation of Rainbow Children's Hospitals in 1999

Rainbow is currently the country's largest pediatric hospital chain with 22¹ hospitals spread across 9 cities

Bestowed with Healthcare leader of year award by the Financial Express, Healthcare award, 2024

¹ Including the acquisition of Prashanthi Hospital, Warangal & Pratiksha Hospital, Guwahati

25 years of Rainbow Journey

1999-2010

Established standalone pediatric specialty hospital concept

Integrated perinatal services within the children's hospital

Expansion within Hyderabad and a new city - Vijayawada

2011-2020

Nurtured perinatal services

Enhanced Pediatric multi specialty and tertiary care services

Investment by the CDC Group, UK

Foray into newer cities - Bengaluru and New Delhi

Hub and Spoke model nurtured in Hyderabad

2021-2024

Successful listing on the stock exchanges - NSE and BSE

Largest chain of comprehensive pediatric care with cutting-edge quaternary care services

Largest pediatric training program in private healthcare in the country

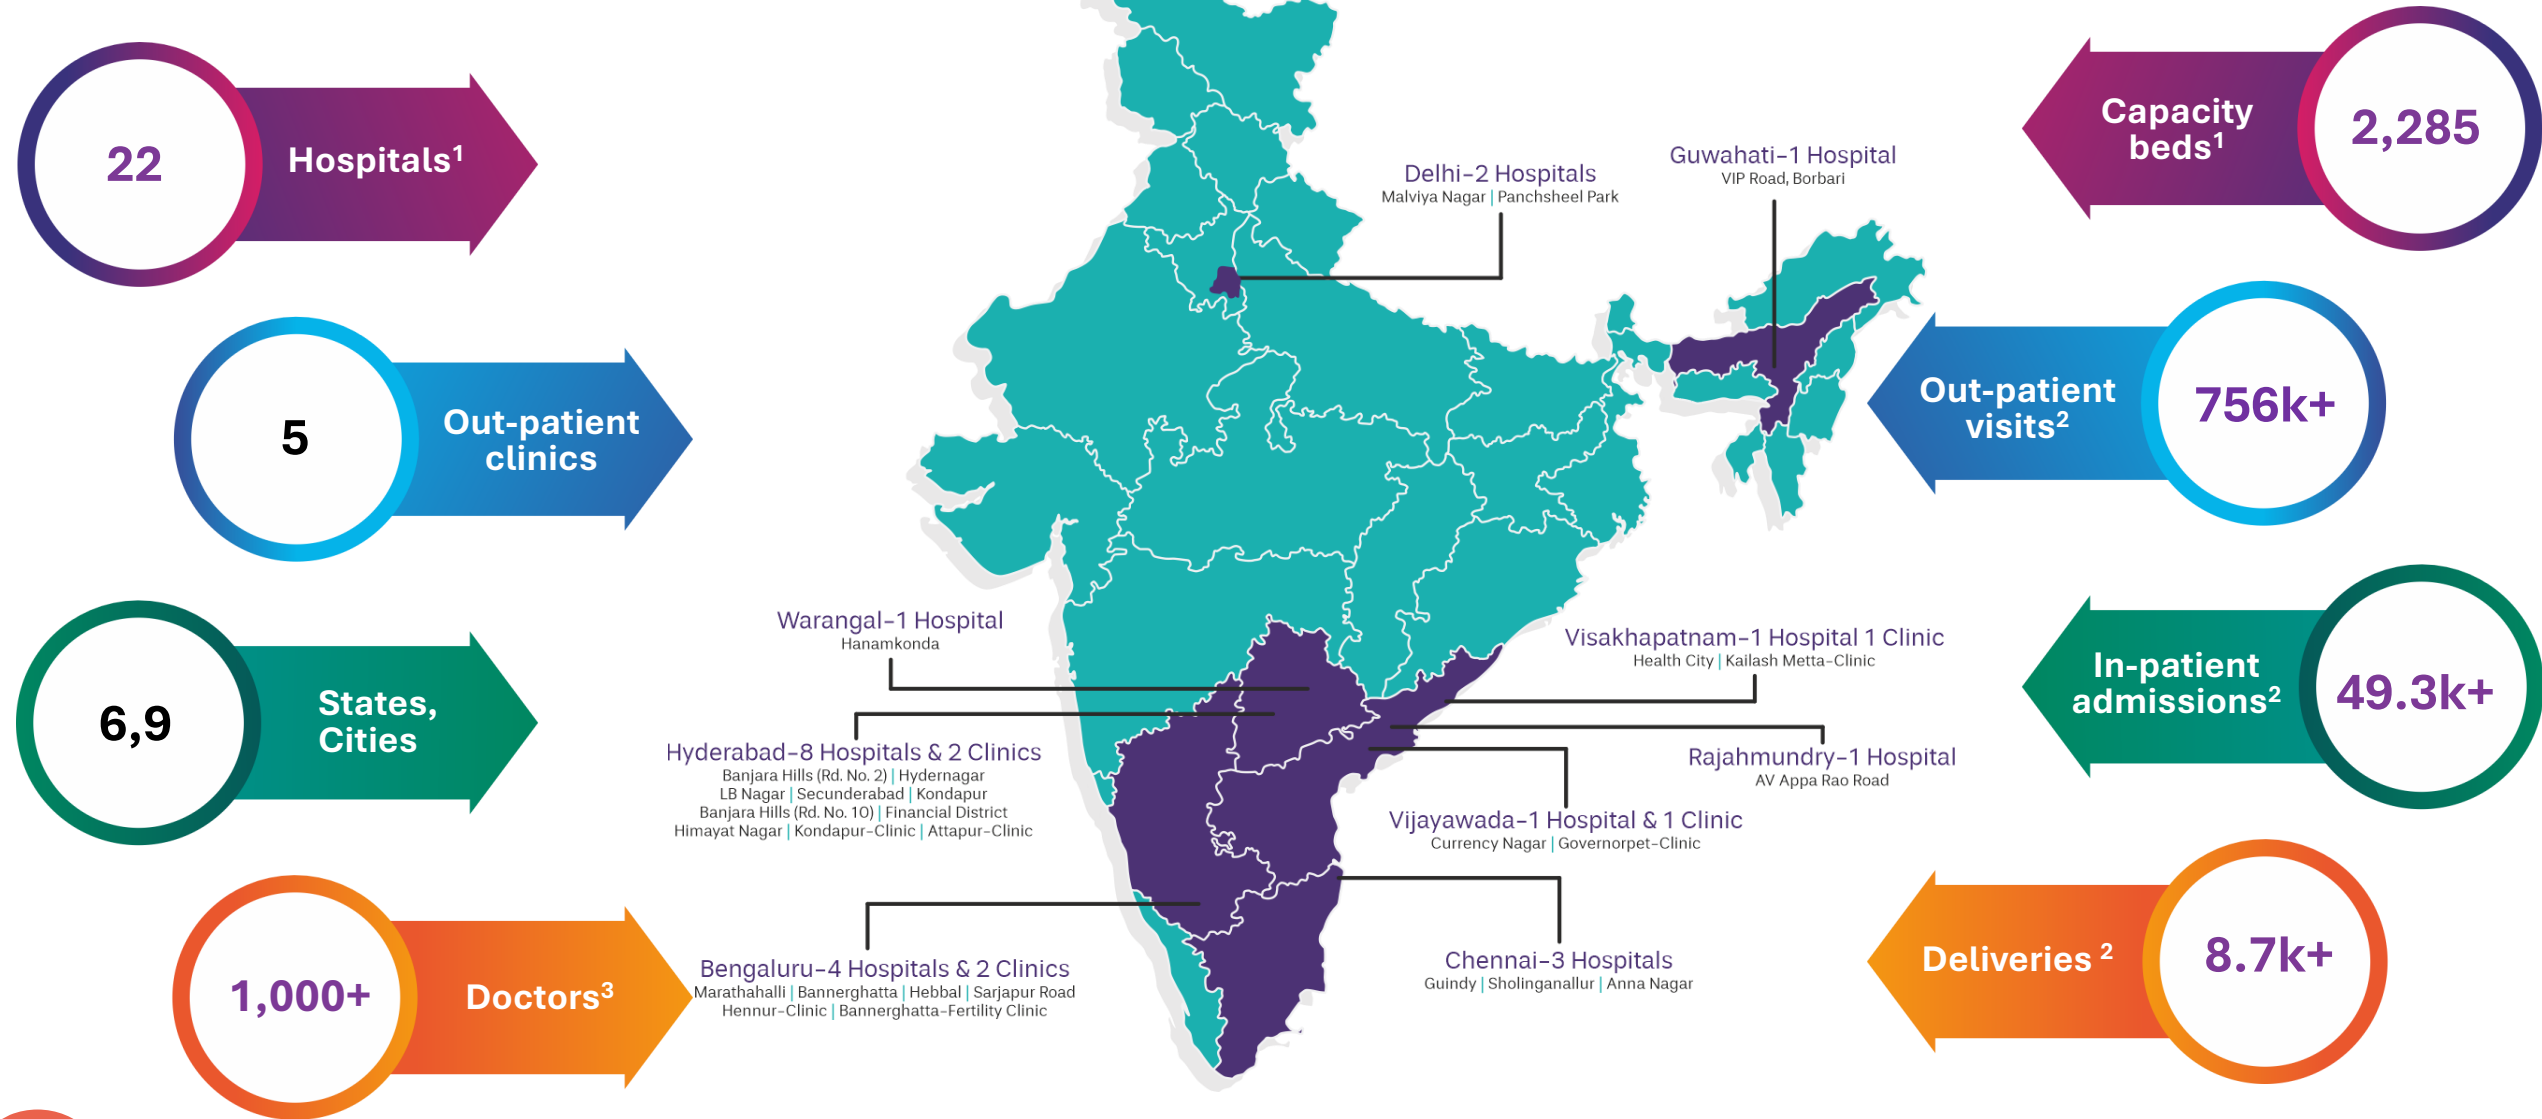

Venturing into newer territories: Chennai and Visakhapatnam

Pioneering the way: The first pediatric and fertility hospital to earn prestigious JCI accreditation in the country

2025

Acquisition of:
Prashanthi Hospital, Warangal
& Pratiksha Hospital, Guwahati

Footprint of Rainbow Hospital

Note: ¹ Including the acquisition of Prashanthi Hospital, Warangal & Pratiksha Hospital, Guwahati
²Numbers for H1 FY26; ³ Including full time residents and DNB

A novel approach in pediatrics healthcare services

Ability to conceptualize, create and operate specialized children's hospitals

Children Centric Hospitals

Children centric environment and soothing interiors help in children to recover faster

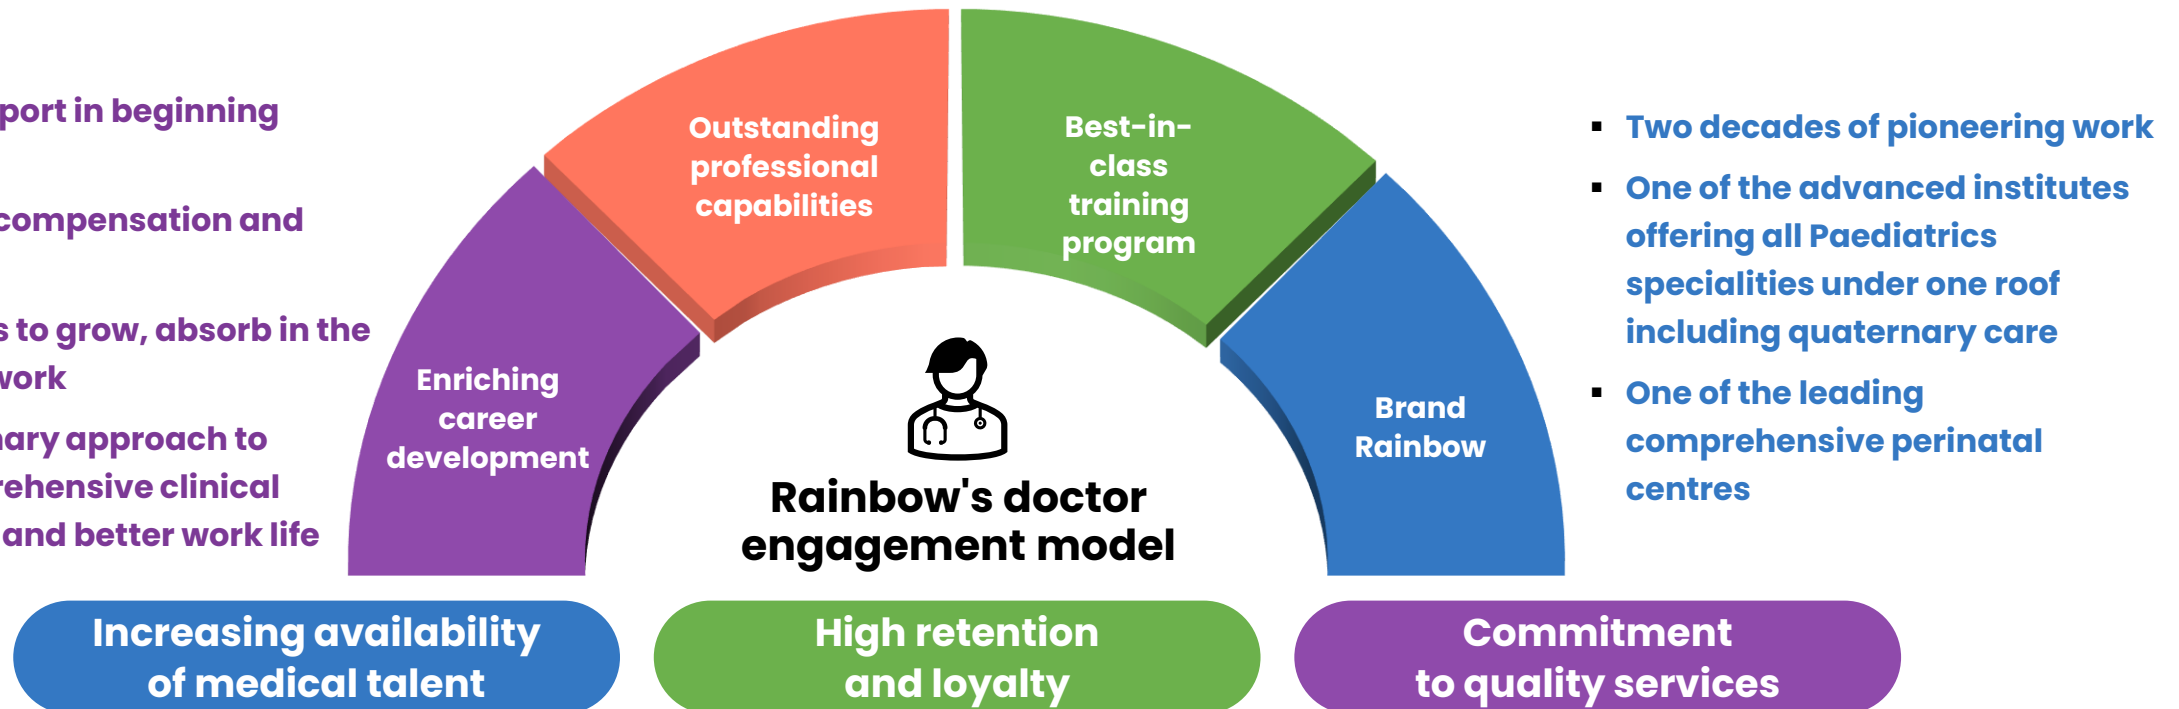

Allocation of significant portion of capex towards interiors of hospitals for creating congenial environment

Doctor engagement model fostering loyalty and sustainability with an institution-first approach

- **1000+ full time doctors**
- **A number of doctors trained or possess qualifications from the UK, USA, Canada, Australia**
- **Modern infrastructure and clinical back-up to provide quality care**
- **Recognised as MRCPCH Examination Centre**
- **Recognised as training center¹ by National Board of Examinations**
- **Leading training program in India approved by National Board of Examinations**

- **Retainer/Support in beginning years**
- **Competitive compensation and rewards**
- **Opportunities to grow, absorb in the Rainbow network**
- **Multidisciplinary approach to create comprehensive clinical environment and better work life balance**

Note: ¹ For offering training in Pediatrics, Neonatology, Pediatrics Intensive Care, Pediatric sub specialities, Obstetrics and Gynaecology

The specialist in **comprehensive children's care**

Full suite of Pediatric offerings

Pediatric Secondary Care

- Pediatric outpatients
- Immunizations
- Developmental Screening
- Acute and seasonal illness

Pediatric Tertiary Intensive Care

- Care of preterm babies with low/extremely low birth weight
- Newborn emergency transports
- Neonatal surgical Services
- Advanced ventilation including HFOV
- Pediatric neurocritical care services
- ECMO services

Pediatric Multi-specialty & Quaternary Care

- Pediatric Surgery, urology and minimal invasive surgery
- Pediatric Cardiology and cardiac surgery
- Pediatric Neurology and neuro-surgery
- Pediatric Haemato-oncology
- Pediatric Gastroenterology and liver diseases
- Pediatric Nephrology
- Pediatric Pulmonology and allergy
- Pediatric transplantation (liver, kidney, bone-marrow)
- CRRT, plasmapheresis, hemodialysis

**~1/3 of Beds Allocated
to Critical Care**

**3 Hospitals
Accredited by JCI#**

**13 Hospitals
Accredited by NABH**

Comprehensive perinatal care provider, with synergies between paediatric and perinatal services

Comprehensive services for all pediatric care needs

Pediatrics

- 24*7 full spectrum of Pediatric multi specialty cover with level 4 NICU care

Coordinated handholding for both perinatal and pediatric services

Ease of seeing both pediatrician and obstetrician

- Comprehensive perinatal service
- 24/7 Obstetrics, anesthesia, blood bank
- Maternity ICU

Obstetrics, Fetal Medicine & Fertility

Fully integrated maternity care and fertility services

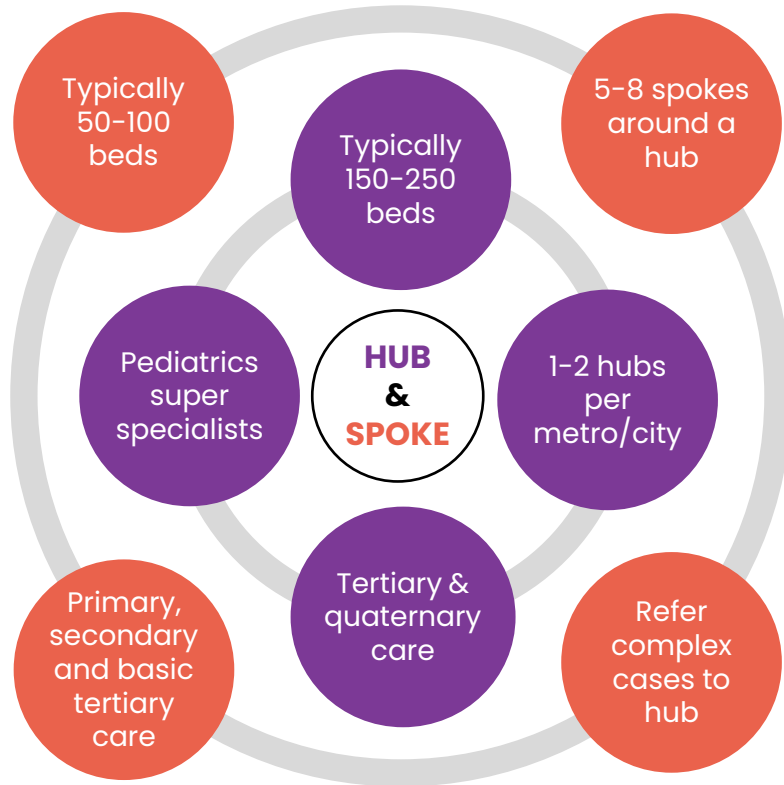

**Accessibility/nativity/comfort/
knows the system/strong
recommendation from pediatrician**

**Full range of fetal service included
cardiac echo/neonatologist
consultation prior to delivery**

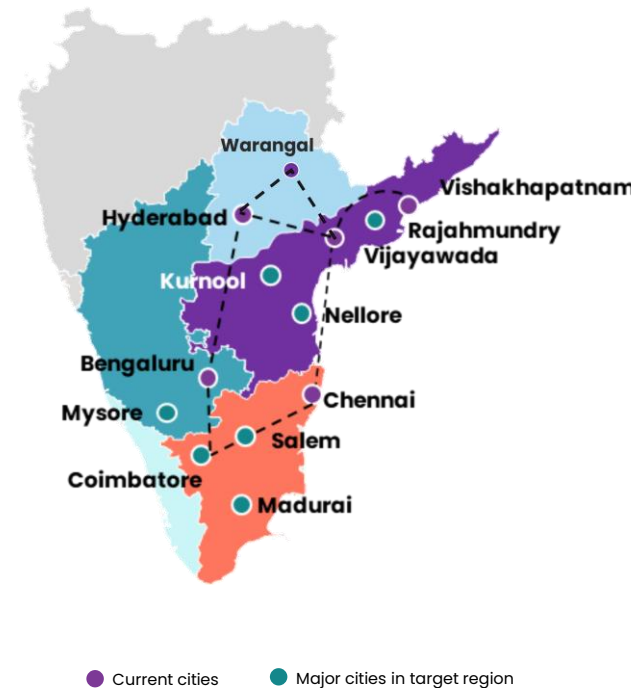

Hub and Spoke approach to **optimise delivery of patient care services** at scale

City level hub and spoke model

Accessibility of super-specialty at hubs, general pediatrics at spokes

Regional level “South Connect” model

Regional spokes at 200-250 kms from city hubs

Regional spokes to provide high quality Pediatric, obstetrics and gynaecology care at tier-II cities and act as connecting bridge to address a large market

- Robust transport network to save sick newborn and children from districts
- Establish Pediatric sub-specialty outreach clinic at districts
- Provide emergency service for maternal and Pediatric patients

Financially prudent expansion

Network effect and synergies enhance operational efficiencies

Hub & Spoke Model

Hyderabad

Bengaluru

Chennai

● Hub ● Spoke ● Upcoming Hospital

- Hub Hospital is centrally situated, providing accessibility from all part of the city
- Spokes hospitals are situated at areas experiencing rapid growth and development, strategically located to ensure convenient access for nearby towns and cities

Robust governance framework

High Governance Standard

Board of directors

Dr. Ramesh Kancharla

Chairman & Managing Director
MD (Pediatrics) & MBBS (UK)

- Specialist in Pediatric Gastroenterology, Hepatology and Nutrition
- Worked in prestigious hospitals such as King's College Hospital, London, Great Ormond Street Children's Hospital – London and is a member of the Royal Colleges of Physicians of the United Kingdom
- Bestowed with 'healthcare leader of year' award at the Financial Express, Healthcare award, 2024

Appendix

Optimizing Maternal Oxygenation – A Remarkable Fetal Rescue Story (1/2)

- GUCH (grown-ups with congenital heart disease) – domain of pediatric cardiology program

- A 27-year-old expectant parent with 3 earlier abortions, at 21 weeks of pregnancy, came with a rare and complex medical background.
- As a child, they had undergone a bilateral bidirectional Glenn (BDG) shunt surgery for a complex cyanotic congenital heart disease (CHD) — a condition in which the heart structure and blood flow are abnormal, causing low oxygen levels.
- Over the years, the patient developed multiple health challenges, including hearing loss due to chronic ear infection (mastoiditis), a history of ureteral obstruction with kidney stones (obstructive megaureter with urolithiasis), and hypothyroidism managed with medication.
After 20 months of marriage and fertility treatment, conception was achieved.
- At 21 weeks, the patient presented with severe oxygen desaturation (SpO₂ 75%), leading to referral for cardiac assessment. An echocardiogram revealed a complex heart defect (situs inversus, dextrocardia, double outlet right ventricle, large ventricular septal defect, severe pulmonary stenosis, and moderate ventricular dysfunction).
- Given the severity of the condition, the patient was classified as **mWHO Class III (unrepaired cyanotic heart disease) — indicating high risk in pregnancy**. A multidisciplinary team evaluated the case in detail, balancing both maternal and fetal outcomes.
- After a team discussion, it was collectively decided to defer the Fontan completion surgery, as the heart's pumping function (ventricular function) and valve performance (AV valve regurgitation) were not optimal for surgical correction at this stage. The focus shifted toward optimizing maternal oxygenation and supportive management, ensuring the best possible environment for both mother and baby during this critical phase.

Optimizing Maternal Oxygenation – A Remarkable Fetal Rescue Story (2/2)

- GUCH (grown-ups with congenital heart disease) – domain of pediatric cardiology program

- The family received detailed counselling regarding all available options. **They were informed that in women with CCHD and oxygen saturation below 85%, the risk of spontaneous abortion or intrauterine death (IUD) is significantly high. As per ESC guidelines, this risk reduces to about 10% if oxygen saturation improves beyond 85%.**
- After understanding the prognosis and potential interventions, the family opted for a right ventricular outflow tract (RVOT) stenting — a procedure aimed at improving oxygen saturation and enabling continuation of pregnancy.
- The patient underwent RVOT stenting successfully. Post-procedure, the patient was shifted to the Cardiac Intensive Care Unit (CICU) for monitoring. SpO₂ improved to 96% Blood pressure: 110/70 mmHg
- She was ventilated for 24 hours, with a wedge placed under the right hip to ensure optimal circulation during recovery.
- This carefully coordinated fetal rescue procedure helped stabilize the mother, improving oxygen delivery to both her and the growing baby. **The case exemplifies the multidisciplinary high precision care.**

Miracle Journey: Saving a Tiny Fighter with a Complex Airway

- Some stories are written in courage, faith, and miracles.
- This is about the journey of a long-awaited baby (16 years post marriage) born prematurely at 31 weeks, weighing only 1.8 kg, who faced life's toughest battle from the very first breath.
- The baby struggled to breathe, and intubation (insertion of a breathing tube) was extremely difficult. Two doses of surfactant were given to help the lungs, but breathing without support remained impossible.
- Further tests — a CT scan and bronchoscopy — revealed a narrow windpipe (tracheal stenosis). The newborn also developed Candida sepsis (a severe fungal infection), requiring prolonged treatment and mechanical ventilation for nearly two months.
- A balloon dilation was attempted, but when breathing didn't improve, the medical team performed a life-saving thoracotomy with slide tracheoplasty to reconstruct and widen the airway.
- Within eight days, the baby began breathing independently with minimal support (nasal CPAP). Follow-up tests showed healthy healing — a moment of immense relief and gratitude.
- After weeks of care, the baby finally went home breathing freely — a living symbol of hope, resilience, and the power of modern medicine.

A Triumph Over Relapsed Ewing's Sarcoma: An Extraordinary Recovery Story

- An 8-year-old child presented with a rare and aggressive “Ewing’s Sarcoma” cancer. The child was initially treated at district hospital with chemotherapy, surgery, and radiation, but the cancer relapsed after a year and was referred to Rainbow Hospitals.
- The tumor had spread to the chest wall and mediastinum (the area between the lungs housing the heart and major blood vessels), making treatment extremely challenging.
- A multidisciplinary team designed an intensive treatment plan combining salvage chemotherapy, hematopoietic stem cell transplantation (HSCT), and targeted radiation therapy.
- Despite partial residual disease before the transplant, the team proceeded with HSCT at age 10, leading to remarkable tumor regression and, ultimately, complete remission.
- Following transplant, targeted radiation, and oral maintenance therapy, the child made a full recovery and remains disease-free — a story of resilience, precision, and hope.
- “Ewing’s Sarcoma relapse near vital organs is extremely difficult to treat, but through careful planning, teamwork, and the child’s determination, we achieved a cure. His recovery is not just a medical success — it’s an emotional victory.”
- **Ewing’s Sarcoma accounts for only 1–2% of childhood cancers in India**, most often affecting children aged 10–20 years. This extraordinary recovery highlights the power of coordinated, compassionate, and cutting-edge pediatric oncology care..

About Us

Rainbow network comprises of 22¹ hospitals and 5 clinics in 9 cities, with a total bed capacity of 2,285 beds. Our Pediatric services under “Rainbow Children’s Hospital” includes newborn and pediatric intensive care, pediatric multi-specialty services, pediatric quaternary care (including organ transplantation); whereas our women care services under “Birthright by Rainbow” offers perinatal care services which includes normal and complex obstetric care, multi-disciplinary fetal care, perinatal genetic and fertility care along with gynecology services.

Rainbow Children’s Hospital built on strong fundamentals of multidisciplinary approach with a full-time consultant led clinical service along with 24/7 commitment in a child centric environment. The company follows a hub-and-spoke operating model where the hub hospital provides comprehensive outpatient, inpatient care, with a focus on tertiary and quaternary services, while the spokes provide emergency care in pediatrics and obstetrics, large outpatient services and comprehensive obstetrics, pediatric and level 3 NICU services. This model is successfully operational at Hyderabad and is gaining traction in Bengaluru. The endeavor is to replicate this approach in Chennai and across the National Capital Region. Subsequently Rainbow intends to expand into tier-2 cities of Southern India.

Rainbow embraces a unique doctor engagement model, where doctors work exclusively on a full-time, retainer basis. The doctors work in teams and have 24/7 commitment, which is particularly important for children’s emergency, neonatal, pediatric intensive care services and to support pediatric retrieval services. The Company also operates the country’s largest pediatric DNB training programme in private healthcare, offering post graduate residential DNB and fellowship programme.
