Dear Sir/Madam,

Sub: Earnings Presentation

We enclose herewith a copy of the 'Earnings Presentation' in respect of the Unaudited Financial Results declared for the Quarter and Nine Months ended December 31, 2025.

The Earnings Presentation is also being hosted on the Company's website at www.timetechnoplast.com

This is for your information and records.

Thanking You,

Yours Faithfully,
For TIME TECHNOPLAST LIMITED

BHARAT KUMAR VAGERIA
MANAGING DIRECTOR

LOOKING FORWARD

REVENUE GROWTH DRIVERS		
SR. NO.	**SEGMENT**	**GROWTH**
1	Packaging Products- Drums, Jerry Cans, Pails & IBCs	**11-13%**
2	Composite – LPG,CNG, Hydrogen, Fire Extinguishers, etc.	**25-30%**
3	PE Pipes	**20-25%**
4	Other	**10-12%**

EBITDA GROWTH DRIVERS

- **Increase In Efficiencies:** Consolidating moulds and machinery into a centralized, high-efficiency production system to reduce costs, maximize asset utilization
- **Consolidation of Products & Units:** Streamlining products and consolidating units to enhance operational efficiency and reduce overhead costs.
- **Manpower Costs:** Lowering manpower costs through strategic workforce optimization and process reengineering to eliminate redundancies and improve productivity
- **Power Costs:** Reducing energy expenses through the adoption of solar solutions and implementation of long-term Power Purchase Agreements (PPAs)
- **Finance Costs:** Decreasing finance costs by reducing overall debt through QIP proceeds and strong internal cash flow generation
- **Working Capital Cycle:** Targeting a reduction in working capital cycle to 90 days to improve liquidity and capital efficiency
- **Non-Core Assets:** Divesting non-core assets to redeploy capital into higher-margin, value-added products that strengthen profitability

Other Highlights

1. Sale of Non-Core Assets:

Company had identified non-core assets for disposal with an estimated realization value of Rs. 125 Crores (approx.) which has now reduced to Rs. 37 Crores being balance amount already realized

2. Qualified Institutional Placement (QIP):

The Company successfully completed its ₹800 crore QIP, issuing 397.77 lakh equity shares at ₹201.12 per share (including premium of ₹200.12). Pursuant to the allotment on 11 November 2025, the paid-up equity share capital increased from ₹4,538.58 lakh to ₹4,936.36 lakh. List of allottees who have been allotted more than 5% of the equity shares offered pursuant to the qualified institutions placement:

- 3P India, Aberdeen Group, Axis Mutual fund, Edelweiss Mutual Fund & Edelweiss Life.
- Fund Utilisation as on 31st December 2025 (***CARE Ratings Limited dated 12th February, 2026 appointed as a Monitoring Agency for QIP being filed separately.***)

SR. NO.	OBJECT (Rs Cr)	ORIGINAL ALLOCATION	FUNDS UTILISED	BALANCE TO BE UTILISED
1	Repayment/ Pre-payment in full or in part, of certain outstanding borrowings	400	321.2	78.8
2	Capital Expenditure for purchase of Machinery and Equipment towards automation and re-engineering	89.4	-	89.4
3	Purchase of Equipment for recycling plants at Umbergaon-Gujarat and Gadarpur –Uttarakhand	54.9	3.0	51.9
4	Capital Expenditure for purchase of de-odorizing equipment	14.8	1.8	13.0
5	Funding inorganic growth, including but not limited to acquisitions, strategic investments, and joint ventures and general corporate purpose.	222.1	-	222.1
6	Fees. Commissions and Expenses relating to this issue	18.9	14.1	4.8
	TOTAL	800	340	460

3. Focus on Improving ROCE:

We had earlier targeted the FY25 Return on Capital Employed (ROCE) at 18%, which has been successfully achieved with an actual ROCE of 18.6%. Building on this momentum, we are now targeting a ROCE of 20% for FY26. This will be driven by our continued focus on cost reduction through automation, re-engineering of machinery and moulds, and optimization of the working capital cycle—initiatives strategically aimed at enhancing net earnings and overall capital efficiency

Other Highlights

4. Consolidation of Products and Manufacturing Units:

The Company has made a strategic decision to consolidate its products and manufacturing units. This includes Brownfield expansion and adding New Units, which will better align with evolving market demands while optimizing operational costs

5. Green Energy- Conversion of Electricity Units consumed to Solar Power:

The Company has committed to transform 75% of its electricity consumption to green energy within the next two years by tie up with solar power generating Companies. This transition will not only result in cost savings but also contribute to a significant reduction in carbon emissions. As part of its dedication to sustainability, the Company is actively participating in global efforts to reduce carbon emissions.

6. Products under development and approval:

- Composite Products: Fire Extinguisher, CNG Cylinder of more than 200 litres higher capacity, Hydrogen Cylinders, LPG Cylinder of 14.2kg or higher capacity
- Batteries: Power Sector OP-Z batteries

7. PowerBuild Batteries Pvt Ltd. , a subsidiary of Time Technoplast Ltd. and Monbat AD, Europe:

PowerBuild Batteries Pvt. Ltd., has signed a multi-year exclusive agreement with Bulgaria's Monbat AD to supply advanced VRLA stationary batteries in India. The partnership will serve fast-growing data centre, IT, BFSI, and other mission-critical segments, combining Monbat's global technology with PowerBuild's nationwide manufacturing and service network.

8. Drone Trials:

We have successfully developed and flight-tested India's first hydrogen-powered drone with an integrated Type-III composite hydrogen cylinder and fuel-cell system, meeting all key performance targets. The breakthrough delivers 3–5x longer endurance, rapid refueling, higher payload capacity, and zero emissions compared to battery drones. It positions the company at the forefront of clean-energy UAVs, unlocking opportunities in the ~$30B global drone market (projected ~$70B by 2033) and supporting India's Green Hydrogen and Make-in-India initiatives.

9. Hydrogen Storage Systems Developments:

Time Technoplast Ltd., Imperial Auto Industries Ltd., and Poppe + Potthoff GmbH (Germany) have formed a strategic partnership to jointly develop and deploy comprehensive hydrogen system solutions in India, marking a significant milestone in the country's clean-energy transition. The collaboration brings together advanced hydrogen technologies and manufacturing expertise to capitalize on opportunities across mobility and industrial applications, strengthening the hydrogen value chain and supporting India's long-term decarbonization goals.

Other Highlights- Projects to be Completed in Q4FY26

1. **GREENFIELD COMPOSITE CNG PROJECT:**
   - **Location: Morai, (Near Vapi, Gujarat)**
   - **Background:** We are setting up a fully automated CNG Plant at Morai with a total capacity of 1,080 cascades (~65,000 cylinders). The plant will consolidate the existing 480-cascade capacity from the Daman facility, along with an additional 600 cascades being added at the same location.
   - **Current Status:** The factory shed is completed and the imported machines have arrived. Installation teams from abroad are arriving to set up and commission the plant.
   - **Benefits:** Cost savings, availability of expert manpower at one location, improved capacity utilisation, and freed-up space at Daman for future LPG expansion.

2. **GREENFIELD RECYCLING PLANT: TIME ECOTECH PVT. LTD. (Wholly Owned Subsidiary of TTL)**
   - **Location: Bhilad, Gujarat**
   - **Background:** We are setting up a fully automated greenfield recycling plant at Bhilad in line with PCR compliance and the QIP fund utilization plan. This will be the first of three planned recycling facilities across India, with an annual capacity of 12,000 MT for captive consumption, catering to the western region
   - **Current Status:** The factory shed construction is completed and machinery installation is currently underway
   - **Benefits:** Strengthens backward integration, ensures steady availability of recycled raw material for captive use, supports regulatory compliance under PCR norms, and enhances long-term cost efficiency

3. **BROWNFIELD AUTOMATED IBC FACILITY:**
   - **Location: Silvassa- Phase I**
   - **Background:** We are undertaking a fully automated brownfield expansion at Silvassa to manufacture IBC cage lines. The facility will have an annual capacity of 150,000 IBCs. Phase II work has started and is expected to be completed by the end of FY26-27. Capacity post completion of Phase II will be 300,000 IBCs p.a.
   - **Current Status:** Phase I Completed & production started
   - **Benefits:** Enhances manufacturing capacity, strengthens our presence in the industrial packaging segment, improves supply reliability for customers, and supports future revenue growth.

Other Highlights- Projects to be Completed in Q4FY26

4. **BROWNFIELD CONSOLIDATION OF PE PIPES:**
   - **Location: Gummidipoondi, Near Chennai, Tamil Nadu**
   - **Background:** We are undertaking a brownfield expansion at our existing Gummidipoondi facility to enhance manufacturing efficiency and address space constraints. A second shed has been developed on the same land parcel to create a dedicated pipe manufacturing unit, while the existing shed continues to focus on packaging products.
   - **Current Status:** Construction of the new shed has been completed, and machinery installation is mostly completed. Operations have already commenced at the plant.
   - **Benefits:** Improves operational segregation, enhances throughput, optimizes space utilization, and provides scalability to support future growth

5. **OVERSEAS CAPACITY EXPANSION (USA):**
   - **Location: Georgia, USA**
   - **Background:** Our fifth plant in Georgia, USA, operational since May 2025, features a fully automated IBC manufacturing line. We are now expanding the facility to add an additional IBC line along with a drum manufacturing line to further strengthen our presence in the region
   - **Current Status:** The expansion activities are underway and are expected to be completed within the next 45 days
   - **Benefits:** Enhances production capacity, broadens product offerings in the U.S. market, improves customer service levels, no impact of tariffs due to local manufacturing.

6. **PROJECTS TO BE COMPLETED IN FY27**

PARTICULARS	SANAND- GUJARAT (TTL)	ODISSA (CUTTACK) (TTL)	CHIPLUN – MAHARASHTRA (TPL)

motilal oswal
Investment Banking

47th Deal – YTDFY26 TIME

Motilal Oswal Investment Banking successfully delivers the ₹ 800 Crores QIP of Time Technoplast as the Sole BRLM; our 9th QIP of the Year and 2nd Back-to-Back Sole Delivered Transaction!

MOIAL Role
– Sole BRLM

QIP size
– INR 800 cr

QIP Price per share
INR 201.12

Post Issue Dilution
8.8%

Deal Announcement

- Motilal Oswal Investment Advisors Limited (MOIAL) acted as the **Sole BRLM to the INR 800 cr QIP of Time Technoplast Limited, only industrial packaging player with presence across segments** including rigid industrial packaging (including IBC), composite/ type IV cylinders, energy storage systems, and piping solutions amongst other players in the polymer and composite product industry
- MOIAL was trusted by the Company to execute its **first external capital raise via QIP** since its listing in 2007
- This transaction marks MOIAL's **9th successful QIP of the year**, re-affirming our **top position** on the league tables
- MOIAL efficiently led all work streams and **guided the company** across every stage - from seamless documentation and regulatory coordination, sizing and investor communication,
- MOIAL played the pivotal role of procuring demand from **marquee long only investors** and timing the launch amidst market volatility

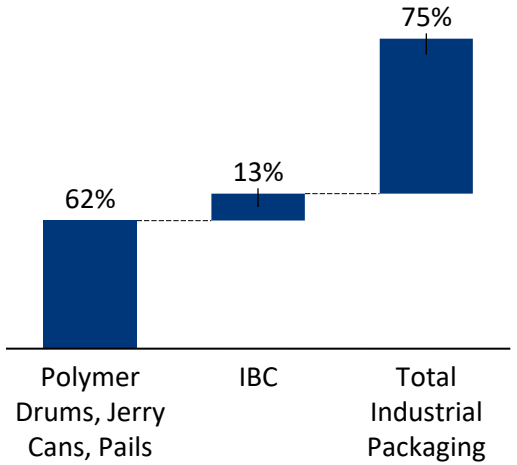
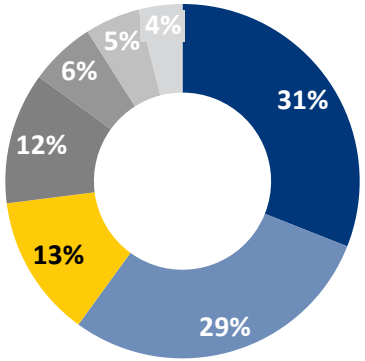
Industrial Packaging Sales by User Industry





- Specialty Chemicals
- FMCG
- Construction Chemicals
- Paints
- Pharmaceuticals
- Food Products
- Lube Oil & Additives

- Strong presence in Asia & MENA regions
- 14+ recognized brands with over 900 institutional customers globally
- Well established in-house R&D team of over 30 people combined experience of 450+ years

...with over three decades of leadership position

Pre IPO (prior to 2007) | **Post IPO (from 2007)**

1992 - 2000

- Incorporated Pvt. Ltd. Co.
- Production facilities in western region

- Launched Lifestyle products

- Expanded in North and South India

2001 - 2006

- Launched Automotive related Products

- Production facilities in East India
- Ventured in Thailand
- Acquisition of TPL Plastech Ltd. formerly known as Tainwala Polycontainers Ltd.

2007 - 2010

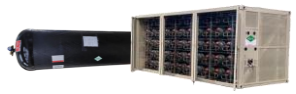
- Got listed on NSE & BSE
- Entered into battery business by way of acquisition of NED Energy Ltd.
- JV with Mauser for manufacturing steel drums
- Green field manufacturing set up in Sharjah (UAE)
- Additions in products base such as Plastic Fuel Tanks, IBC and Disposal Bins

2011 - 2020

- Green field manufacturing set up overseas - Bahrain, Indonesia, Vietnam, Egypt, Malaysia and USA
- Acquisition in Industrial Packaging Segment – Thailand, Taiwan and Saudi Arabia
- Started HDPE and Cable Ducts pipe manufacturing
- Acquisition of company for technology of Composite Cylinders, consolidation with existing operations and Launch of LPG cylinders
- Started MOX films business

2020 onwards

- Expanded in USA with 3rd Greenfield unit
- 1st and only company in India to receive PESO approval for manufacturing of Type-IV CNG cylinders for Cascade and on-board applications.



- Expanded composite cylinder portfolio with launch of Type-III Cylinders for breathing air and medical oxygen.
- 1st company in India to receive PESO approval for manufacturing of High-Pressure Type-IV Composite Cylinders for Hydrogen.

LEADING THROUGH INNOVATION AND TECHNOLOGY

Leading Global Industrial packaging company

First to launch Type-IV Composite Cylinder for LPG, CNG (CNG cascade and on-board application), and Hydrogen in India. **2nd Largest** Composite Cylinder manufacturer worldwide.

Dominant market position with over 55% market share in domestic Industrial packaging. **World's largest manufacturer** of large size plastic drums

2nd largest MOX film manufacturer in India

Market leader in 9 out of 11 countries it operates in

Major Player in manufacturing of HDPE pipes in India

First to launch Intermediate Bulk Container (IBC) in India and **3rd Largest** IBC manufacturer worldwide.

Way Forward

IBCs growing faster

Time Technoplast is the largest and major player in most countries it operates in

Polymer and Composite products to gain share from metals

Recycling efforts to encourage sustainability

Chemical production shifting from China to other Asian countries

Market Potential

Industrial Packaging Industry – Market & Development

Market

- The global market for industrial packaging is estimated to reach $123.2 Bn by 2032, at a CAGR of over 5.9% owing to increasing trends in end-use industries such as automotive, food & beverages, chemical, construction and oil & lubricant.

Drivers

- Shift from metal to polymer packaging due to technical and operational advantages and lower costs.
- A clear trend towards IBC is visible, which is correlated with a growing demand for reconditioning solutions mainly in developed regions.
- Given the presence of strong domestic demand for specialty chemicals, low cost of production and availability of skilled labour, large foreign players are increasingly looking at India as an alternative investment destination due to implementation of strict environmental norms in China.

Emerging Packaging Scenario

- Multinational companies looking east for lower cost of production.
- Bringing in Good Manufacturing practices and improved handling systems.
- Improvement in transportation and handling facilities.
- Bulk transportation reducing logistic and shipping costs

Packaging Product (Market Size)	Asia (Mn Units)			Global (Mn Units)		
	India	Rest of Asia	Total	Asia	RoW	Total
Steel Drum	11 (41%)	131 (87%)	142 (80%)	142 (80%)	127 (81%)	269 (81%)
Polymer Drums	16 (59%)	19 (13%)	35 (20%)	35 (20%)	30 (19%)	65 (19%)
Total	27 (100%)	150 (100%)	177 (100%)	177 (100%)	157 (100%)	334 (100%)
IBCs	1 (28.5%)	2.5 (71.5%)	3.5 (100%)	3.5 (19%)	15.0 (81%)	18.5 (100%)

Time Tech Customer Segment- Industrial Packaging

Segment	% Business	Expected Growth in FY25
Speciality Chemicals	31%	11% - 13%
FMCG	29%	11% - 13%
Construction Chemicals	13%	6% - 8%
Paints & Inks	12%	6% - 8%
Pharmaceuticals	6%	8% - 10%
Lube Oils & Additives	4%	6% - 8%
Others	5%	5% - 7%

Focus on Composites

We are at inflection point
Shifting from Tech based products to High-Tech products with focus on Composites

Type IV CNG Cylinder Cascades Lighter – Carries 220% More Gas

- Composite is a material of future replacing metals in high performance applications

- Tectonic shift

Type IV CNG Cylinder – Metal Free

- Harnessing new growth opportunities in existing business
  - Launching new products with huge business potential
  - Aspire to be largest Composite product company in the country
  - New product launches will help improve margins and reduce working capital
  - We draw strength from the launch of LPG Composite Cylinders and maintaining market leadership in 10 years

CNG Cylinder : Overall Market Potential

Huge revenue potential given India's low penetration of CNG fuel stations and CNG vehicles

	Total Estimated Business (Rs. Cr.)	Business in No. of Years	Estimated Market Per Year (Rs. Cr.)	Conversion %	Total Estimated Business (Type-IV) per year (Rs. Cr.)
CNG Cascades	11,453	8	1,432	50%	716
MRUs	1,320	4	330	50%	165
Compressed Bio Gas	6,000	3	2,000	20%	400
Gas Generators for Telecom Towers	4,800	4	1,200	20%	240
CNG for Intracity Buses	5,304	4	1,326	50%	663
Total Estimated value of Business	**28,877**		**6,288**	→	**~2,200**

Focus on buses; Commercial vehicles and passenger cars, estimated to have equal or more potential Business from commercial vehicles and passenger cars not factored

Value Added Products Recent Developments

Type-III Composite Cylinder for Breathing Air / Medical OXYGEN

- Successfully developed Fully Wrapped Carbon Fibre Reinforced (Type-III) Composite Cylinder for Breathing Air/ Medical Oxygen; 1st locally manufactured cylinder to get approval from PESO in India.
- **Application as Self-Contained Breathing Apparatus (SCBA) by-**
  - Fire Fighters,
  - Divers (SCUBA)
  - Mountain climbers at high altitudes
  - Hospitals
  - Portable home oxygen bottles
  - Emergency use in ambulances

Numerous advantages over Type-I metal cylinders

Explosion Proof

60% lighter in weight than Type-I metal cylinders

No Rusting and No Corrosion

Long service life

Type-III Composite Cylinders form a part of High-Tech Composite Products and are classified under Value-added products.

Hydrogen Type III Composite Cylinder for Drone Applications

Hydrogen Type III Composite Cylinder

Fly Longer, Higher & Faster

~50% Lighter
Than Battery variant*

3 Times More Flying Hours*
In single fueling

5 minute
Refueling time* Vs 3 hour charging time for battery variant

5000+ hours for Fuel cell system
500-1000 charge cycles for battery* variants

Approved by PESO in November 2024 for Type-III cylinder for the FIRST TIME IN INDIA.

Composite – Type III Hydrogen Cylinder for Drone Application

Drone Application – Advantages of Hydrogen V/s Lithium-Ion Batteries	
Longer Flight Duration Hydrogen fuel cells can provide a higher energy density compared to lithium-ion batteries, allowing drones to fly for longer periods without recharging/refuelling.	**Lighter Weight for Energy Storage** Hydrogen systems generally offer better energy-to-weight ratios, which can be crucial for drones where weight significantly impacts performance.
Faster Refuelling Refuelling a hydrogen cylinder takes a few minutes, whereas recharging lithium-ion batteries may take hours.	**Higher Altitude Performance** Hydrogen-powered drones perform better at higher altitudes due to less dependency on air density for cooling compared to battery systems.
Eco-Friendly Hydrogen fuel cells produce water as a byproduct, offering a more environmentally friendly solution compared to lithium-ion batteries, which may involve rare earth materials and hazardous chemicals.	

Key Takeaways	
Long Flight Missions Hydrogen variants are ideal for long-duration missions, such as surveying or mapping.	**Cost Considerations** Initial costs for hydrogen systems can be higher, but operational costs may decrease over time due to longer life cycles and reduced refuelling times.
Weight Efficiency Hydrogen systems reduce the drone's weight, improving flight efficiency.	**Environmental Advantage** Hydrogen systems are more sustainable in the long term.

eSTART with *SELENIUM*: E-rickshaw Battery

More distance, less weight and cost efficient

~1.6 Mn E-Rickshaws In India
*As of 31.03.2025

4 Batteries in each E-Rickshaw
*Each Battery costs ~10K INR

~6,400 Cr Market Size
*As of 31.03.2025

0.4 Mn New E-Rickshaws are added every year in India

This is a product of our subsidiary company **POWER BUILD BATTERIES PRIVATE LIMITED.**

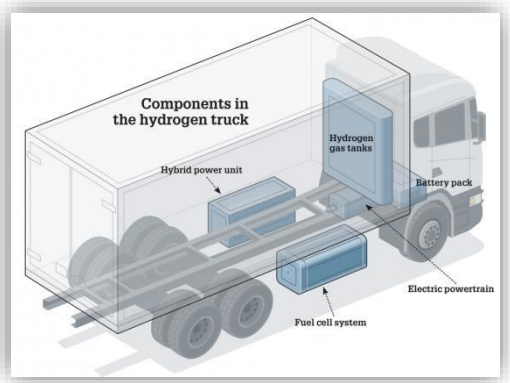
Upcoming Cutting-Edge Products

Hydrogen Cylinder for Fuel Cells



- Type-IV Carbon wrapped cylinders
- Light weight (90% weight reduction) - provides better fuel economy and better payload
- Reliable and safe
- Applications – Hydrogen Cars, power generation (Towers)

Composite Fire Extinguisher

- Made with HDPE inner liner
- Light Weight, Carbon Neutral and 100% recyclable
- Higher Strength with winding
- Maintenance Free & Corrosion Free
- Long shelf life

E-Rickshaw Battery

- Made with Lead-Selenium Alloy
- High Cycle Life – Provides up to 450 cycles
- Extended Battery Life – Reduced water loss
- Enhanced Efficiency & Cost Savings – Delivers extra mileage
