Ref: Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

Dear Sirs

The Board of Directors of the Company had, at its meeting held on 10th February 2026 considered and approved the Investor Presentation, copy whereof is attached herewith. This presentation shall be considered for the Earnings Call scheduled by the Company on 10th February 2026 at 04:00pm (IST), intimation whereof was given on 21st January 2026.

The presentation will be uploaded on the website of the company at <https://www.ddevgroup.in/media-centre-interaction> under the tab Earnings Call

Kindly take the aforesaid information on record and oblige.

Thanking You,

Yours faithfully,

For Ddev Plastiks Industries Limited

Ddev Plastiks Industries Ltd.

Leading Manufacturer of Compounds

Earning Presentation **Q3FY26 & 9MFY26**

Disclaimer

This presentation contains statements that contain “forward looking statements” including, but without limitation, statements relating to the implementation of strategic initiatives, and other statements relating to **Ddev Plastiks Industries Ltd.'s (“Ddev Plastiks” or “the Company”)** future business developments and economic performance.

While these forward - looking statements indicate our assessment and future expectations concerning the development of our business, a number of risks, uncertainties and other unknown factors could cause actual developments and results to differ materially from our expectations.

These factors include, but are not limited to, **general market, macro - economic, governmental and regulatory trends, movements in currency exchange and interest rates, competitive pressures, technological developments, changes in the financial conditions of third parties dealing with us, legislative developments, and other key factors that could affect our business and financial performance.**

Ddev Plastiks Industries Ltd undertakes no obligation to publicly revise any forward-looking statements to reflect future / likely events or circumstances.

About Us 4-10

Ddev Value Proposition

A+ Stable

S&P Global
Ratings

- 01 An experienced Management Team
- 02 India's Largest Listed Polymer Compound Supplier
- 03 Value Creation through Innovation
- 04 A Proud Legacy Spanning Three Generations
- 05 Well diversified client base and product mix
- 08 Strong Financial Headroom
- 09 Conservative Financial Strategy
- 10 Stable and supportive ownership

Ddev Plastiks : India's Largest Listed Manufacturer of Polymer Compounds

4 Decade of Operations – current capacity **2,68,400 MTPA (as of December, 2025)**.

5 manufacturing units with state-of-the art machinery, infrastructure, equipment, and R&D facilities.

Diverse product portfolio with more than 200+ compounds.

Strong track record: FY20 - FY25 CAGR
Revenue – 9%, EBITDA – 28%, PAT- 46% (Consolidated)

India's **largest and leading manufacturer** of XLPE compounds, product portfolio further extended to High Voltage PE based Cable Compounds and HFFR Compounds.

Capacity Addition:
Commissioned a new PVC facility with an installed capacity of **15,000 MT in October 25**.
Additional capacity of 5,000 MT of HFFR and 10,000 MT of PVC has become operational from December,2025.

Note: EBITDA includes Other Income. ROCE is calculated as Earning before Interest and Tax divided by Capital Employed (i.e. Total Assets less Current Liabilities). ROE is calculated as Profit after tax divided by Total Equity (i.e. Equity Share Capital+ Reserve and Surplus+ Money Received against Share Warrants). Net Debt to Equity is calculated as Long and Short-term borrowing less Cash and Cash Equivalents divided by Total Equity.

Management's Commentary on 3Q & 9MFY26 results

"I am pleased to announce that Ddev Plastiks has delivered a robust performance for the nine months of FY26. Revenue reached ₹2,182 crore, marking a 17% year-on-year increase. EBITDA grew by 13% year-on-year to ₹234 crore, representing an 11% margin, while PAT increased by 11% year-on-year, totaling ₹147 crore. Notably our exports also grew strongly for 9MFY26, exports reached ₹523 crore, reflecting 33% yoy growth. These results demonstrate our sustained growth momentum despite a challenging geopolitical environment.

India's renewable and power sector is on the cusp of strong growth momentum, building strategically on this overarching trend towards renewable energy adoption, we have made the decisive move to enter the high-potential sunrise sector of Battery Energy Storage Systems (BESS) manufacturing. The global energy storage market is experiencing rapid evolution and expansion, strongly supported by ambitious worldwide decarbonization objectives and the accelerating integration of renewable energy sources across diverse geographies; this forward-thinking diversification firmly positions Ddev Plastiks at the vanguard of the broader energy transformation landscape.

Our capacity enhancement initiatives are progressing on schedule, aligning with the strategic roadmap that underpins Ddev Plastiks' growth momentum. In the quarter we added 30,000MTPA capacity out of which 25,000MT is towards PVC and 5,000 MT of installed capacity is towards HFFR. On the back of strong balance sheet, we have funded all our capex plans through internal accruals. Looking ahead, we are also planning further capacity expansions in XLPE compounds, where we already command an impressive ~33% market share.

As we look ahead, I am confident that our shared commitment, resilience, and ambition will continue to propel us toward greater milestones. Thank you for walking this path with us - the best chapters of our story are yet to come.

Narrindra Suranna
Chairman and Managing Director

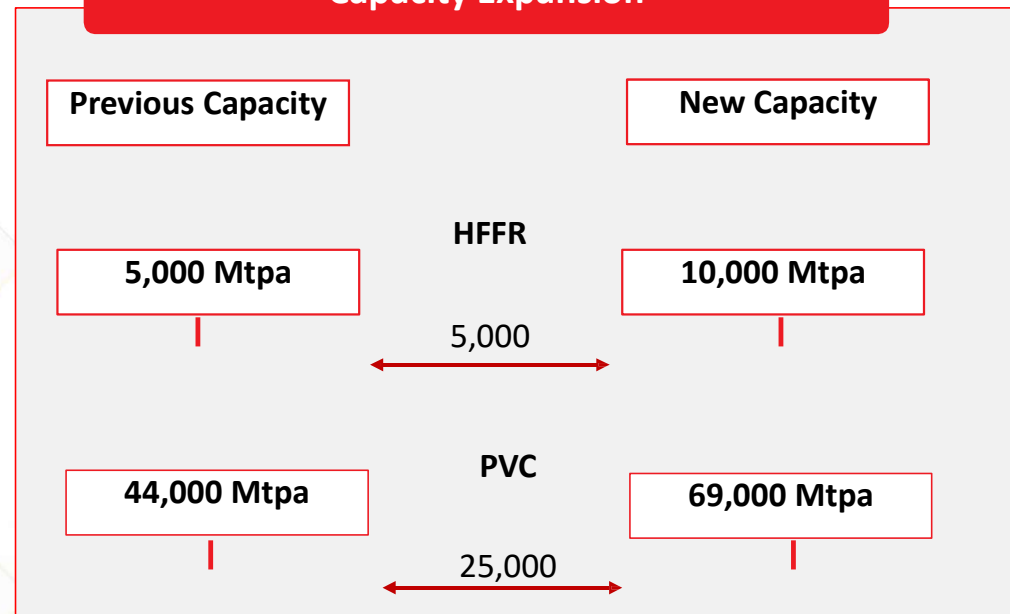

Business update: Greenfield expansion

Capex Incurred
Rs. 50Cr

Capacity additions for HFFR and PVC compounds have been completed, and further capacity additions for XLPE compounds are also proposed.

Capacity Expansion

HFFR is expected to replace PVC house wiring cables and the government has mandated its use in Malls, Metro Stations, Hospitals, Schools and other Public areas. HFFR is vital for making Solar Cables.

PVC is widely used compound in Cable Industry and with the growing demand and entry of new participants in the Industry such as Adani and Ultratech, its demand is expected to rise

BESS (Battery Energy Storage Systems) Market Outlook

Global Market Growth

- The global BESS market is expected to grow rapidly, driven by increasing renewable integration, grid modernisation, and industrial demand.
- Estimates suggest the global market could expand from **~\$56.3B in 2024 to ~\$68.7B in 2025**, and reach **\$186.9B by 2030** – a **~22% CAGR**.

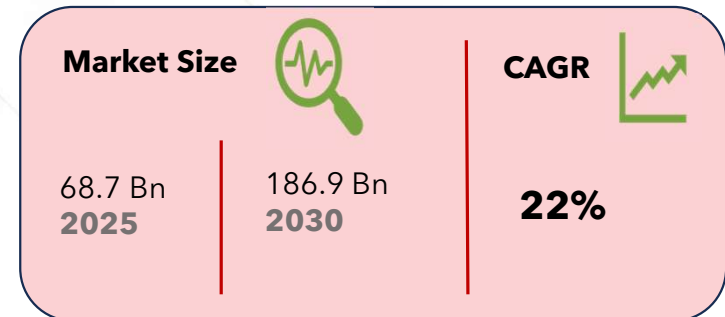

India's **BESS** sector remains in a **nascent phase** today but is poised for explosive growth

- Projections indicate **India's BESS capacity could reach ~208 GWh by 2030 (~\$32B value)**.
- Local initiatives and tenders for standalone energy storage are accelerating uptake, especially in utility, commercial & industrial segments.

Key Growth Drivers

- ❖ **Renewable energy integration:** Storage essential for grid stability & peak load management.
- ❖ **Declining costs:** BESS system costs have declined significantly, improving project economics.
- ❖ **Policy tailwinds:** Supportive schemes and renewable mandates under government programs.

DDev Plastiks: New Strategic Move into BESS

Strategic Rationale

1. Structural Growth Opportunity

- BESS is a critical enabler for renewable energy integration and grid stability.
- With India entering a multi-year storage capacity build-out, the segment offers long-term, policy-supported growth visibility.

Early Entry with Scalable Platform

- Entering the market at a formative stage allows DDev to establish EPC relationships and build execution track record.
- Scale capacity in line with demand, creating a strong foundation for future expansion.

Capital-Efficient & Controlled Risk Model

- Assembly-led manufacturing enables faster go-live, lower capital intensity and phased capacity addition
- Ensuring disciplined capital deployment while retaining upside from volume growth.

Diversification & Margin Upside

- BESS adds a new, future-ready revenue stream aligned with energy transition themes.
- Initial margins are expected to stabilize at ~6-7%, with scope for improvement through scale, localization and value-added integration.

Execution Plan

Facility & Capacity

- ❖ Targeting **multi-phase BESS manufacturing**, serving utilities, C&I customers, and residential sectors.
- ❖ **PHASE 1:**
5 GWh assembly plant expected by Q3 FY27 (3rd quarter of FY 2026-27). Investment of ₹150-200 crore funded through internal accruals, capacity aligned with early market demand.

R&D Focus

- ❖ A **state-of-the-art R&D center** to strengthen technology capabilities and differentiation

Customer Targeting

- ❖ Primary customers will be **EPC players and storage integrators**, positioning DDev as a **BESS systems assembler/supplier** in the value chain.

Revenue Recognition & Segment Reporting

- ❖ Revenue will be recognized on **sales** as a new business segment from 2HFY27.
- ❖ Initial EBITDA margins are expected at **~6-8%** due to early-stage operations

'Our entry into BESS represents a calibrated expansion into a structurally growing, policy-supported and scalable clean-energy segment, aligned with the company's manufacturing strengths and long-term value creation strategy.'

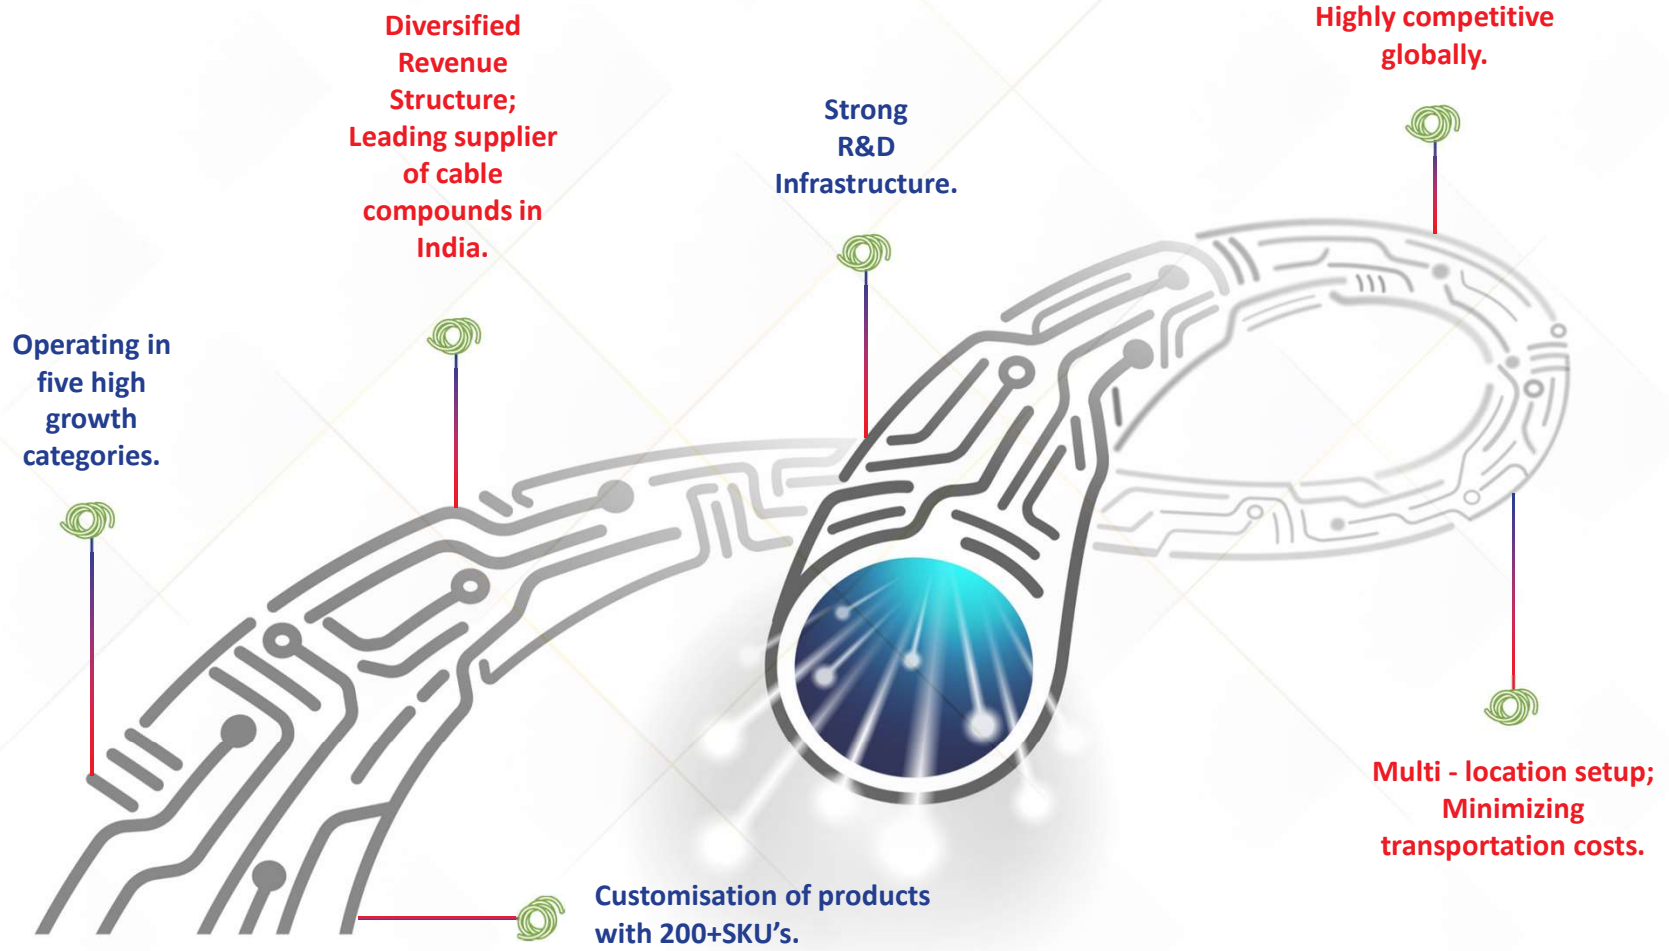

Our Business Value Chain

Ability to scale quickly on back of manufacturing capability and capacity to deliver high quality products

Key USP's

Operating in 5 High Growth Categories with 200+SKU's

Antifab / Filled Compounds / Master Batches

- Extensively used in packaging industry like woven bag and cement bag.
- **We stand as the leading organized player** in the highly fragmented unorganized market.
- **EBITDA Margins – ~3-5%**

PVC Compounds

- Niche Product with high margin
- Widely used in **Wire & Cable Industry, Construction Industry & Footwear**
- **Global polymer compounding market** is expected to reach **USD 115bn by FY30**
- **EBITDA Margins – ~4-6%**

Sioplas / XLPE Compounds / Semicons

- **Global leader** in XLPE and MV compounds since 1980
- **Only player** in country to offer products from the range of 66kv to 132kv
 - Major revenue contributor ~**50% market share in Sioplas** and ~**33% in XLPE** compounds
- **EBITDA Margins – ~8-12%**

Engineering Plastic Compounds

- Mostly used in **White Goods & FMEG Industry**
- High growth potential with very less.
- **EBITDA Margins- ~10-15%**

Halogen Free Flame Retardant (HFFR)

- Amongst the **two producers of HFFR in India**
- HFFR is expected to replace PVC house wiring cables and the govt mandate has come to use/replace in mall, metro stations, hospitals, schools.
- HFFR compounds are vital for making solar cables safe, eco-friendly and durable meeting global standards
 - **EBITDA Margins- ~10-12%**

- Energy Security

Global Polymer Compounding Market Growth (in USD bn)

The current opportunity landscape presents a fertile ground for businesses to achieve exponential growth in the medium - to - long term

Powering the Future: Key Drivers of Cable & Wire Growth

Factors driving growth in the cables segment

- Investments in power transmission and distribution
- Capacity addition in solar and wind energy
- Smart cities mission
- Increasing investments in Railways for electrification

- Affordable housing schemes
- Spike in nuclear families
- Investments in commercial and residential infrastructure
- Increased construction activity supported by growing infrastructure projects

- Capex rising across industries such as Auto, Steel, Oil and Gas, and Power
- Investment expenditure by Indian Railways and in other mass transit systems
- Increased focus on automation in 'manufacturing and processing' to monitor and control quality

Expanding XLPE Capacity: A Strategic Choice

Enhanced Safety and Accuracy

XLPE cables offer superior electrical insulation, improving power transfer efficiency and reducing electrical faults that could lead to short circuits.

Temperature Resistance

They are highly resistant to temperature fluctuations, making them suitable for both indoor and outdoor applications, even in high-temperature environments.

Mechanical Strength

XLPE cables possess strong mechanical properties, allowing them to function effectively in diverse environments.

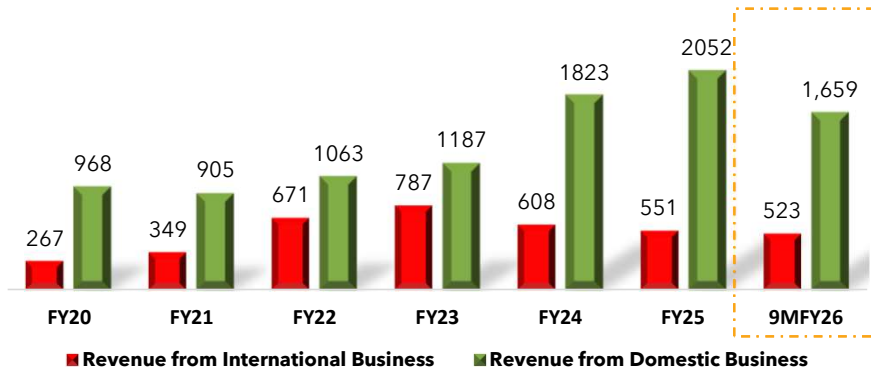

Chemical Resistance

They exhibit excellent resistance to chemicals such as oil, solvents, acids, and alkalis, which prolongs their lifespan, especially in industries with frequent chemical exposure.

HFFR Cables

HFFR used in Solar Panels

- **Usage** : used in the insulation and outer sheath of photovoltaic (PV) cables, which connect the solar panels to the inverter and other electrical components.
- **Enhanced Safety**: HFFR cables are crucial for fire safety because they produce significantly less smoke.

Benefits of using HFFR

- HFFR materials are designed to resist flame propagation.
- Halogen-free materials reduce the environmental impact of cable manufacturing and disposal.
- Minimizes the risk of smoke and toxic fumes spreading during a fire.

Applications

- Power Stations and Industrial Plants
- Airports and Transportation Hubs
- Data Centers
- Metro Stations and Tunnels
- Shopping Malls and Commercial Buildings
- Solar photovoltaic systems

Halogen Free Flame Retardant Cable (HFFR)

In FY24 :

India's HFFR market value stands at **USD 613.25 million**, growing at a CAGR of 4.25%

By 2030:

India's HFFR market expected to increase to **USD 778.87 million**. Estimated Global Market ~ **USD 4091.3 million**.

Global HFFR Market Size

Key Priorities: Our Focus Areas

Moving up the value chain

- Getting certification for 132KV and making it ready for commercial use.
- Going upto 220kv in the future.

Entering new geographies

- Awaiting under writers approval for direct exports to Americas.
- Tapping newer geographies.

Capex

- Increasing the HFFR capacity to 20,000 MTPA by FY27
- Expanding PE compound capacity by 25,000 MTPA by FY27.

Revenue

- INR 5,000cr by FY30.

Volume Growth

Margin Expansion

Better Asset Turnover

Enhanced Profitability

Financials **28-31**

9MFY26 Key Result Highlights

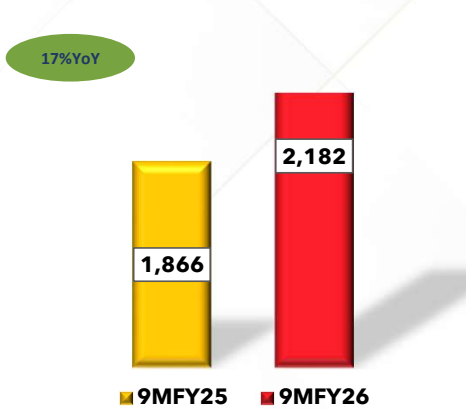

- 01

Despite the challenges posed by the heavy monsoon and geopolitical crisis, we achieved strong demand in the fiscal. Looking ahead, we anticipate this positive demand momentum will continue in the upcoming periods.
- 02

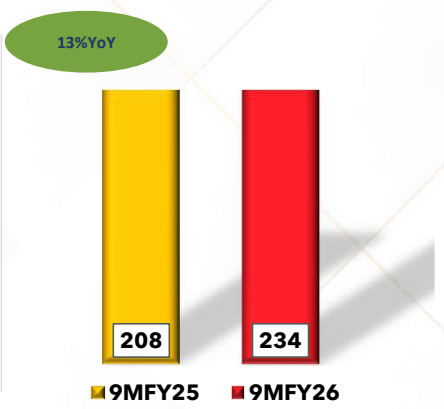

Our topline increased 17% yoy on the back of strong demand and improved export performance.
- 03

PVC demonstrated strong growth compared to Q1, while HFFR sales were impacted by subdued demand due to the effect of US tariffs during this period.
