^ Retail turnover market share for Overall Equity is calculated based on turnover for cash segment, notional turnover for equity futures and premium turnover for equity options segments. Retail turnover market share for F&O is calculated based on notional turnover for equity futures and premium turnover for equity options segments.

Commodity ADTO is calculated based on notional turnover across MCX, NCDEX and NCE.

Retail turnover market share in commodity turnover is calculated using notional turnover across MCX and NCE.

We further strengthened our leadership in February 2026, with our share in overall retail equity turnover reaching a lifetime high. We also recorded strong sequential gains in our commodity segment market share. While market shares strengthened, broader market activity remained relatively subdued during the month, resulting in moderation in average daily order run rate and the average client funding book.

The above information is as per limited review by the Management Team. The Company intends to provide the updates on a monthly basis.

Thanking you,

For **Angel One Limited**
