Mr. Girish Wagh, MD & CEO, Tata Motors Ltd., said, “We commenced FY27 on a positive note, delivering consistent double-digit growth in each month of Q1, on a year-on-year basis. Despite heightened geopolitical uncertainties, sales for the quarter stood at 1,08,488 units, up 27% year-on-year, reflecting healthy industry fundamentals and sustained demand across segments.

HCV growth continues to be led by increased freight availability, infrastructure and mining activity, while ILMCV demand is supported by e-commerce, FMCG, courier and parcel. SCVPU is seeing improving momentum in last-mile mobility, with electric SCVs and pick-ups achieving highest ever salience of ~10% for the months of May and June. Demand in the commercial passenger segment remains strong, driven by school transport and Government orders.

Our focus on future-ready solutions is translating into traction in the market. Customer interest in electric heavy trucks is strengthening, with our ecosystem-led approach supporting a growing order pipeline. For our international business, we have commenced shipments for the Indonesia order, and are gradually resuming supplies to the Middle East, following a two-month pause.

Looking ahead, while commodity pressures will persist, we expect the momentum to continue, driven by gradual improvement in customer sentiment which had seen softening during the quarter. The growth is expected to be driven by auto and port logistics, e-commerce and core sectors, with the monsoon remaining a key monitorable. With strong market acceptance of our refreshed portfolio and a continued focus on deepening customer engagement, we are well positioned to build on this positive trajectory and drive sustained growth in the coming quarters.”
