### Steady quarter; gradual re-acceleration in loan growth

#### NIM expanded QoQ; operating expenses slightly elevated

- MAS Financial Services' (MASFIN) 3QFY26 PAT grew ~16% YoY to INR903m (in line). Net total income rose 28% YoY to INR2.6b (in line). Opex grew ~49% YoY to INR1b (7% higher than est.). This included provisions of ~INR42m towards employee benefits on account of the new labor codes.
- PPoP stood at INR1.62b (in line) and grew 17% YoY. Credit costs stood at INR393m (in line), translating into annualized credit costs of 1.2% (PQ and PY: 1.2%). RoAUM was largely stable QoQ at ~2.9%.
- Management stated that despite healthy business momentum in 3QFY26, it is adopting a calibrated approach to near-term growth acceleration, allowing AUM to scale gradually over the next 2 to 3 quarters. The growth is expected to be primarily led by the MSME and Wheels segments, complemented by the salaried personal loan business. Additionally, ongoing geographic expansion across the northern and southern regions is likely to further strengthen growth traction.
- Management reiterated its commitment to a disciplined strategy, targeting AUM growth in the range of ~20-25%, while prioritizing risk management and profitability over headline expansion.
- The company shared that technology investments will remain a key lever for it to improve operating efficiency and scalability. The company is enhancing its underwriting framework through data-driven scorecards and back-tested models to enable faster credit decisions and lower TAT, with deployments prioritized in data-rich segments (2W and SME).
- Asset quality indicators have remained broadly stable, with early delinquency buckets showing improvement. Management attributed the improved performance in the 30+ dpd and 60+ dpd buckets to strengthened borrower cash flows and repayment behavior.
- MASFIN is positioned for steady, risk-managed growth, with AUM expansion to be led by the MSME and Wheels segments and gradual geographic expansion. Management also highlighted its focus on delivering an RoA of ~2.75-3% by calibrating margins across segments, enhancing operational efficiency, and further improving asset quality. Technology and data-driven underwriting are expected to support efficiency and faster credit decision-making.
- We estimate an AUM/PAT CAGR of 19%/23% over FY26-28, with an RoA/RoE of ~2.9%/16% in FY28E. **Reiterate BUY with a TP of INR395 (based on 2x Dec'27E BV).**

#### AUM grows ~18% YoY; MSME segment drives growth

- Standalone AUM stood at ~INR138b and rose ~18% YoY/6% QoQ. Within this, AUM of Micro-enterprise/ SME/ 2W/ CV loans was up 19%/ 15%/ 26%/ 9% YoY. Salaried PL grew ~29% YoY to ~INR11.9b.

- Avg. ticket size of micro-enterprise loans declined to ~INR82k (PQ: ~INR88k), while SME loans increased to ~INR3.1m (PQ: ~INR2.6m).
- Around ~34% of the underlying assets in the standalone AUM were through partner NBFCs. The MSME segment contributed 73% in the incremental YoY AUM growth, while other segments also contributed meaningfully.
- Salaried Personal Loan (PL) segment's growth is expected to remain at ~22–25%, but the product will be capped at ~10% of AUM.
- Management has guided for an AUM CAGR of ~20-25%, and we model MASFIN's AUM to expand at a CAGR of ~20% over FY26–28.

### NIM expands ~10bp QoQ

- Yields (calc.) declined ~20bp QoQ to 14.35%, while CoF (calc.) remained largely stable QoQ at ~9.2%. This resulted in ~20bp QoQ contraction in spreads to ~5.2%. NIM (calc.) expanded ~10bp QoQ to ~7.8%.
- We expect MAS to deliver NIMs of ~6.6%/6.8% for FY27/28E.

### Asset quality broadly stable

- GNPA (basis AUM) rose ~5bp QoQ to 2.6%, while NNPA was stable at 1.7%.
- Management does not foresee any stress in asset quality, and we model credit costs of ~1.3% each in FY27/28E for MASFIN.

### Other highlights

#### HFC subsidiary

- MAS Housing reported AUM of ~INR8.6b, which grew ~22% YoY.
- GNPA/NNPA in the housing segment remained stable QoQ at ~0.97%/0.67%, respectively.
- Long-term growth potential is seen at ~30–35% for the housing finance segment, though growth was moderated in 3QFY26 due to overlap with stressed MFI borrowers.

### Key highlights from the management commentary

- CV growth, which was deliberately slowed due to stress in certain pockets, is now expected to recover over the next two quarters
- The textile sector is exhibiting green shoots in Gujarat, Rajasthan, and Maharashtra, while South India remains weak.

### Valuation and view

- MASFIN reported in-line earnings for 3QFY26, with AUM growing ~18% YoY. Asset quality and credit costs remained stable. Going forward, while operating expenses are expected to remain elevated due to ongoing investments in distribution and technology, management remains focused on delivering an RoA of ~2.75–3%, balancing growth with efficiency and asset quality.
- We estimate an AUM/ PAT CAGR of 19%/23% over FY26-28, with an RoA/RoE of ~2.9%/16% in FY28E. **Reiterate BUY with a TP of INR395 (based on 2x Dec'27E BV).**

## Highlights from the management commentary

### Guidance

- Management has guided for AUM growth of ~20-25%, with calibrated execution depending on market conditions.
- RoA guidance is maintained at ~2.75–3.0%, to be achieved through a balanced mix of margins, operating efficiency, and credit costs.

### Business Updates

- Ground-level conditions continue to improve, with management tracking recovery through eligible demand rather than headline growth.
- AUM growth in 3QFY26 was supported by festive demand. However, management remains cautious about accelerating growth immediately. Growth is expected to gradually improve over the next ~2-3 quarters, aligning with the targeted ~20-25% AUM growth trajectory.
- Risk and profitability are prioritized over AUM growth, with management willing to moderate growth in specific products if conditions warrant.
- Asset quality remains stable and benign across businesses, including the housing finance subsidiary.
- The company continues to benefit from its multi-product model, allowing growth in some segments to offset temporary headwinds in others.

### Operational Highlights

- Branch network has been stabilized at ~208 branches, with focus on sweating existing branches before incremental expansion.
- Workforce stands at ~4,500 employees. Management is focused on improving productivity per employee to support RoE expansion.
- Technology continues to be a strategic priority, with a dedicated team of ~100 professionals.
- Standalone disbursements stood at ~INR36b, while consolidated disbursements were ~INR36.6b during the period.
- Capital adequacy remains comfortable with CRAR at ~22.8% and Tier 1 at ~21.5%.
- Debt-to-equity stood at ~3.35x
- Average CoB stood at ~9.53%, while incremental CoB is lower at ~9.0-9.25%.

### Housing (MAS Housing)

- Housing AUM stood at ~INR8.6b, growing ~22% YoY.
- Long-term growth potential is seen at 30–35%, though growth was moderated this quarter due to overlap with stressed MFI borrowers.
- ATS is ~INR800–900k, with strong asset quality despite sector headwinds.
- Growth is expected to pick up sequentially from next quarter.

### Growth Strategy and Outlook

- Management plans to grow at ~20-25%, while recognizing that growth is driven both by market opportunity and execution capability. Management remains open to growing faster than guidance if risk-adjusted opportunities improve, given adequate capital and resources.
- MSME and Wheels are expected to be the key growth drivers, with higher-ticket SME loans scaling (as they have better asset quality).
- Salaried PL has scaled meaningfully and is expected to grow ~22–25%, but will remain capped at ~10% of AUM.

- CV growth, which was deliberately slowed due to stress in certain pockets, is expected to recover over the next two quarters.
- Expansion plans include North and South India, with ~5–6 branches planned in UP and deeper penetration in southern markets as teams stabilize.

### Asset Quality and Collections

- In NBFCs, 90+ DPD does not automatically imply loss, with provisioning done strictly under the ECL framework based on 5-year historical recovery data. No excess provisioning is taken beyond ECL, given the recoverable nature of the book.
- Improvements are visible in 30dpd and 60dpd buckets, supported by better borrower intent, improved collections, and tighter underwriting.
- New lending has been undertaken prudently, and eligible demand is showing early signs of revival.

### Opex and Fintech Partnerships

- The company works with several fintech partners across 4–5 products, following a revenue-sharing model.
- Interest income is booked upfront, while fintech revenue share is recognized as opex, leading to an increase in opex.

### Technology and Digital Initiatives

- LOS is fully operational across all products, and BRE engines are live for major products.
- Scorecards are being fine-tuned using back-testing and historical data, with a green–yellow–red channel framework to improve TAT and approval efficiency.
- 2W lending has seen real-time approvals and disbursements, while SME scorecards are under active development.
- Technology deployment is prioritized in products where data availability is high, enabling faster scaling with controlled risk.

### Segment-wise Performance

#### MSME (MEL & SME)

- MSME growth remains strong, with SME secured lending and MEL continuing to scale steadily.
- MEL origination is feet on street led, with 200–300 identified clusters. The customers are sourced directly and the loan amount is disbursed post understanding the requirement of the client.
- MEL is unsecured due to smaller ticket size but covered under CGFMU, and the ATS is further expected to increase to ~INR300–400k.
- Embedded finance has also been introduced with an ATS of ~INR150k under the MSME umbrella.
- Segment-wise GNPA: MEL GS3 stood at 2.87% and SME GS3 stood at 1.49%.

#### Two-Wheelers (2W)

- Strong growth observed, supported by festive demand and GST-related momentum.
- 2W GNPA stood at ~3.35%.

#### Commercial Vehicles (CV)

- The company focuses on small-ticket, used CVs.
- Stress is visible in Rajasthan and MP, leading to deliberately slower growth in these regions.

- Collection efficiency for CV stands at ~88–89%, with GNPA at ~4.14%.
- Growth in CV is expected to recover gradually over the next two quarters.

**Salaried Personal Loans (SPL)**

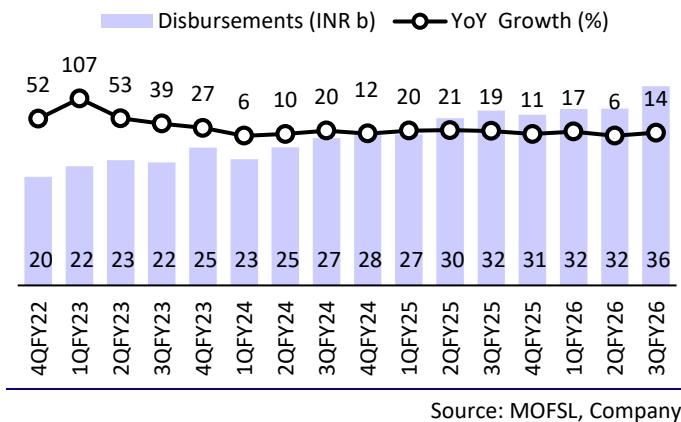

- SPL growth is expected to remain at ~22–25%, but the product will be capped at ~10% of AUM.
- GNPA stood at ~3.45%.

**Other Highlights**

- Approval ratios have improved meaningfully from ~14–15% during stressed periods to ~20% currently (enquiry-to-sanction).
- Textile sector shows green shoots in Gujarat, Rajasthan, and Maharashtra, while South India remains weak.
- The FMCG segment remains under stress. Agro is facing a temporary cycle in select geographies like MP, with no structural concerns.
- Gems and jewelry financing has been discontinued for a prolonged period.
- Dividend payout policy remains unchanged at ~10% of PAT. Dividend of INR1.25/share has been declared.
