1)	Name of the Company :	UNITE	CH LTD.
2)	Annual financial : statements for the year ended	31 st Ma	arch, 2015.
3)	Type of Audit : qualification	Follow Report	ing "Qualified Opinions" have been reported in the Auditors'
	Draw attention to relevant notes in the annual financial statements	A.	Reference is invited to Note 50 to the standalone financial statements according to which an amount of ₹ 7,242,711,244 (previous year ₹ 7,718,890,401) is outstanding which is comprised of advances towards purchase of land, projects pending commencement, advances paid to joint ventures entities and collaborators. The management has explained that such advances have been given in the normal course of business to land owning companies, collaborators, projects and for purchase of land. As per information made available to us and explanation given ₹ 476,179,157 (previous year ₹ 1,529,898,595) have been recovered / adjusted during the current financial year. The management, based on internal assessments and evaluations, have represented that the balance outstanding advances are still recoverable/ adjustable and that no accrual for diminution of advances is necessary as at balance sheet date. The management has further represented that as significant amounts have been recovered / adjusted during the previous and current financial year and since constructive and sincere efforts are being put in for recovery of the said advances, they are confident of appropriately adjusting / recovering significant portions of the remaining outstanding balance of such amounts in the foreseeable future. However, we are unable to ascertain whether all the remaining outstanding advances, as above, are fully recoverable / adjustable since the outstanding balances as at balance sheet date are outstanding / remained unadjusted for a long period of time, and further that, neither the amount recovered nor rate of recovery of such long outstanding amounts in the current year, clearly indicate, in our opinion, that all of the remaining outstanding amounts may be fully recoverable, consequently, we are unable to ascertain whether all of the remaining balances as at balance sheet date are fully recoverable. Accordingly, we are unable to ascertain the impact, if any, that may arise in case any of these remaining advances are subsequently determine
		В.	Reference is invited to Note 51 to the standalone financial statements. According to information available and explanations

obtained, in respect of non-current investments (long term investments) in, and loans and advances given to, some subsidiaries, it has been observed from the perusal of financial statements of these subsidiaries that the subsidiaries have accumulated losses and their net worth have been fully / substantially eroded. Further that, these subsidiaries have incurred net loss during the current and previous year(s) and, current liabilities of these subsidiaries exceeded their current assets as at the respective balance sheet dates. These conditions, along with absence of clear indications or plans for revival, in our opinion, indicate that there is significant uncertainty and doubt about the recovery of the loans and advances from these subsidiaries. Further, that there is a clear indication that there is a decline in the carrying amount of these investments which is other than temporary.

Consequently, in terms of stated accounting policies and applicable accounting standards, diminution in the value of investment which is other than temporary amounting to ₹ 1,002,590,750 and an accrual for diminution of doubtful debts and advances amounting to ₹ 21,279,415 need be accounted for in the financial statement for the year ended 31st March 2015. Management is however of the firm view that the diminution is only temporary and that sufficient efforts are being undertaken to revive the said subsidiaries. However, in the absence of significant movement in the operations of the investee companies, and any adjustment for diminution of expenses in this regard, in our opinion, management has not diminution. accounted for the imminent adequately Consequently, the loss for the year ended 31st March 2015 is understated and reserves as at 31st March 2015 are overstated to the extent of ₹ 1,023,870,165.

Management response : to the qualification(s) in the Directors' Report

Management's response to Point A-

The advances for the purchase of land, projects pending commencement and to joint ventures and collaborators amounting to ₹ 7,242,711,244 (previous year ₹ 7,718,890,401) have been given in the normal course of business to land owning companies, collaborators, projects and for purchase of land. Further ₹ 476,179,157 (previous year ₹ 1,529,898,595) have been recovered / adjusted during the current financial year. The management of the company based on the internal assessment and evaluations considers that these advances. the normal course of business are in which recoverable/adjustable and that no provision is necessary at this The management is confident of appropriately adjusting the balance in due course.

		value of the investment. Further, the management believes that the loans and advances given to these companies are considered good and recoverable based on the future projects in these subsidiaries and accordingly no provision other than those already accounted for, has been considered necessary.

CHAIRMAN'S MESSAGE

Dear Shareholders,

Real estate in India has faced several headwinds over the last 5-6 years. While, off late, there are green shoots in pockets, the positives are yet to make a meaningful impact. In fact, I must admit that the pace of turnaround has been much slower than what many of us, who have a fairly long experience in the industry, had expected. The need today is for hard introspection and some tough decisions.

Let us roll back and see what the broad issues were over the last few years for the sector. To begin with, the sub-prime crisis led global economic meltdown in 2008 and its aftermath squeezed liquidity from the system and real estate demand largely shifted from investors to final property users. This was followed by a phase where the Government of India and the Reserve Bank of India (RBI) focussed solely on managing inflation and adopted a strong monetary policy mechanism that drove domestic interest rates to very high levels affecting financing costs of developers and end-user demand, as housing loan rates increased dramatically. Also, the extant policy framework virtually put a freeze on the capital flows to the real estate sector. Finally, in the period between 2011 and 2014, the Indian economy witnessed a major slowdown and the investor and consumer confidence hit major lows. In this economic uncertainty many held back on critical long term investment decisions like buying a house.

Today, the good news is that there are several positive external developments. To begin with, there has been a revival in economic growth. Real Gross Value Added (GVA) growth, which had slumped to 4.8% in FY2013, increased first to 6.6% in FY2014 and then to 7.2% in FY2015. This has helped stimulate investor confidence in the economy. In fact, net FII/FPI investments into India increased from ₹ 51,649 crore in 2013-14 to ₹ 277,461 crore in 2014-15 - a fivefold increase. More importantly, FDI inflows increased from US\$36,046 million in 2013-14 to US\$44,876 million in 2014-15. In another significant development, with inflation under control - consumer price index (CPI) inflation for industrial workers reduced from 10.9% in 2013 to 6.4% in 2014 – the RBI has eased monetary policy a bit and we have witnessed 4 reductions in the Repo rate, which is a benchmark for interest rates in the country.

The Government of India has also indicated a proactive reform agenda to stimulate growth. This included positive announcements on infrastructure spending, manufacturing and focus on greater skill development and job creation. While much of this is still at a policy level, one expects it to trickle

down to ground level action soon. Broadly, the macro-economic outlook for India is for economic strengthening through higher infrastructure spending, increased fiscal devolution to the states, and continued reform to financial and monetary policy. The government underscored its intention to move steadily to tackle politically difficult structural issues that have stalled investment and limited economic performance in recent years. I am fairly confident that these developments will translate into positives for the real estate sector in the near future.

During the year, two of the Company's affiliates transferred their economic interest in four IT SEZs/Parks. This transaction resulted in a reduction of over ₹ 1000 Crores of consolidated debt and other liabilities.

The Government has also made several specific announcements regarding the real estate sector. Of these, the efforts made to streamline creation of Real Estate Investment Trusts (REITs) is a positive development that can help bring in some amount of liquidity into the system. The efforts to bring in a real estate regulator is also a step in the right direction. However, I believe it is imperative to define the role of the regulator accurately and the focus should not only be to bring in regulatory clarity but also promote best practices in the sector. On the ground, still most regulatory clearances take a long time and impact delivery schedules. I hope the government will look into this as well.

As I had always maintained, project execution is and will continue to be a key differentiator. Accordingly, we have been focusing on building our execution capabilities. We developed our own in-house construction team to give impetus to the process of execution. While we have been fairly succesful in building our capacity, the challenge that we are still struggling to cope with is that of liquidity shortage. Sharp slowdown in demand combined with a squeeze on availability of finance did create a tight liquidity situation for the Company. Over the last few years, the market has largely shifted towards construction linked payment plans, so one needs to build before getting paid for it. It is pertinent to mention here that the ongoing projects of the Company have the potential to generate more cash flows than required for completion of those projects. In this backdrop, for Unitech, FY2015 has essentially been about generating sufficient liquidity to ramp up construction activity at its project sites.

During the year, two of the Company's affiliates transferred their economic interest in four IT SEZs/Parks. This transaction resulted in a reduction of over ₹ 1000 Crores of consolidated debt and other liabilities. The Company also exited completely from the wireless business and extinguished all its liabilities and obligations related to that business. As a strategic intent, we remain committed to deleveraging our balance sheet. However, it must be noted that we continue to have a large delivery backlog. Our primary focus is therefore on executing existing projects and delivering them. Accordingly cash generated,

united

We will continue to develop products with our land assets as per market requirements

both operating as well as non-operating, will be utilised first to execute existing projects. Successful delivery will start a virtuous cycle of cash generation facilitating reduction of debt on our balance sheet in the medium term. So in the immediate future, for Unitech I expect revenue growth but not much of reduction in consolidated debt. But, certainly, the overall cash position will improve.

With a focus on delivery and given market conditions, we have also slowed down launch of new projects. In fact, in the last 3 quarters of FY2015, we did not launch a single project. We will continue to develop products with our land assets as per market requirements and the cash position of the Company. India needs housing and I am confident with the gradual improvement in economic conditions, end-user demand will return and drive the market out of its present slump.

As a responsible corporate citizen, we continue with our efforts to work for the community at large. Lot of emphasis is given on labour welfare, safety and training at our sites. Our CSR programme "Saankalp" continues to undertake activities focused on social and community development.

I take this opportunity to thank all our stakeholders - our employees, our customers, our investors and the community at large for their relentless support. Together, we have gone through a difficult period in the last few years. As we emerge out of it as a more focused organisation with a clear strategic path, I urge you to continue to repose faith in our business. You are our strength.

Regards,

Ramesh Chandra

OVERVIEW

In 2003-04, Unitech Limited (also referred to as 'Unitech' or 'the Company') was a leading player in real estate space of the National Capital Region of Delhi, with a consolidated turnover of ₹ 631.43 crore and a consolidated balance sheet size of ₹ 380.60 crore. In a short span of 4 years, the Company had charted an expansive growth path. This was achieved by creating a pan India presence, building a wider portfolio of products and extending the scope of business to real estate related domains like retail and hospitality. By 2007-08, the Company's consolidated turnover was ₹ 4,322.35 crore and the consolidated balance sheet size had grown to ₹ 14,188.30 crore. By any yardstick, this was a meteoric growth in both income flows and creation of asset base over a fairly short span of time.

Unfortunately, the global economy was rocked by the sub-prime crisis in 2008 and the real estate sector in India was also badly affected. While there have been certain green shoots and some pockets of improvement, the Indian real estate market has not fully recovered since the shocks of 2008. The situation got further aggravated with the macro-economic slowdown between 2011 and 2014 in an environment of high inflation and interest rates. During this span of time, for companies like Unitech there has been a major re-alignment of strategy. The focus has been on deriving the best value from its asset base while juggling with the constant crisis of cash flow management.

2014-15 was another chapter in this consolidation phase for Unitech. While there have been some positive signals from the macroeconomic environment, the recovery for the real estate sector on the ground has been very slow.

MACRO-ECONOMIC ENVIRONMENT

In terms of macro-economics, 2014-15 was a step in the right direction. The Government of India has revised the methodology of calculating several macro-economic parameters. These new numbers, though yet to be wholly accepted by leading economists and statisticians in the country, do accurately present the general trend.

The traditional Gross Domestic Product (GDP) numbers have been replaced by Gross Value Added (GVA), which is conceptually similar. GVA data, in real terms suggests that the economic recovery in India is well on course. Data plotted in Chart A shows that after reaching a low of 4.8% in 2012-13, GVA growth recovered to 6.6% in 2013-14 and then to 7.2% in 2014-15. The business and consumer sentiments on the ground also suggest that economic growth is moving in the positive direction. This augurs well for a general improvement in demand for real estate.

Source: MOSPI (Government of India)

Importantly, the revival in growth has been accompanied by positive developments in investments into assets that drive future economic growth. To illustrate this let us look at the data for Gross Fixed Capital Formation (GFCF). What was alarming in 2012-13 was that the economic slowdown was accompanied by reduction in GFCF. This was a direct reflection of the negative investment sentiments prevailing in the economy at that time. Since then, the situation has improved and GFCF growth increased to 3% in 2013-14 and to 4.6% in 2014-15. This is a positive trend, however, the growth in GFCF has to pick up even more for the country to sustain the high growth trajectory that it aspires for.

In line with GFCF, construction activities also witnessed a pick up after recording negative growth of -3.8% in 2012-13. It has bounced back to 2.5% in 2013-14 and 4.8% in 2014-15. These growth levels, though, are nowhere close to the double-digit growth witnessed in the couple of years prior to 2012-13. Chart B plots construction growth data.

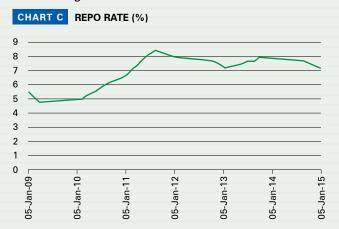

Source: MOSPI (Government of India)

The other macro-economic parameter that has an all pervading effect for the real estate sector is interest rates. It affects developers in terms of costs of working capital or long term loans for financing projects and consumers who finance their property purchase through home loans. After a fairly long period of strict monetary policy

MANAGEMENT DISCUSSION AND ANALYSIS

that focused on controlling inflation, the Reserve Bank of India (RBI) has given some signals of moving to a lower interest rate regime. Given that inflation is mostly under control, in 2015 itself, the RBI has thrice reduced the repo rate, which is the benchmark interest rate - on 15 January from 8% to 7.75%; on 4 March from 7.75% to 7.5%; and then on 2 June from 7.5% to 7.25%.

Chart C shows that between 2009 and 2011, the RBI steadily increased the repo rate from below 5% to over 8%, and the rate remained around 8% for the last few years. Clearly, the reductions in 2015 are welcome for any investment driven enterprise. However, it must be noted that the absolute levels still remain fairly high and the rate reduction is still far from creating any major impact on economic growth.

THE REAL ESTATE SECTOR

The real estate sector in India has been tumultuous in many ways in the year 2014. In an unsure political environment, slow moving markets plagued most parts of the country during Q1 and Q2 of 2014. However towards the latter part of the year, newly elected Central Government initiated certain measures to improve the sentiment.

Affordable housing was considered on par with infrastructure in the Union Budget 2014-15. Real Estate Investment Trusts or REITs, which is an alternate investment vehicle, got a green signal from the Government in 2014, and this will help ease the pressure on the balance sheets of cash-starved developers. However, the listing of new REITs will be slow and steady.

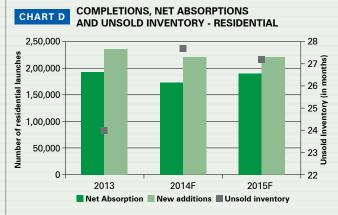

In the recent past, two landmark legislations that were introduced by the central government were the Land Acquisition, Redevelopment and Rehabilitation (LARR) Bill and the Real Estate Regulatory Authority Bill. However, after almost a year of these two bills being introduced, there has not been much progress. This is largely due to tough clauses included in both these bills, which were actively debated throughout 2014. Some of those clauses were seen as limiting the ability of the industry to function smoothly.

The newly-elected government has astutely identified the limiting factors within the two bills and attempted to rectify them rather than introduce new regulations. Once finalised, the revised bills will appear more investor-friendly and create a favourable environment for developers, buyers and investors to operate in the coming years.

While these have been positive developments, much of it is still in the implementation phase and needs wider consensus across the political spectrum including state governments. The effects of these reforms on the ground will take some time and some implications are expected to be seen only by the end of 2015.

For the housing sector, 2014-15 witnessed a consistent fall in new launches of residential units every quarter as a consequence of the subdued demand and continued prevalence of high prices. While this was largely the case with high-end projects, the affordable housing segment definitely began to gain favour. This segment was firmly lodged under the priority schemes of the government and central bank, and buyers were seen finding comfort in investing in such projects given the smaller ticket sizes and improving connectivity in the suburbs of the major cities.

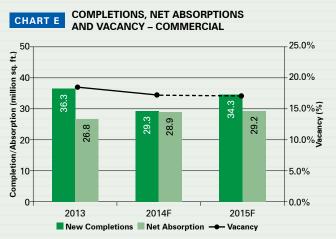

In the second half of 2014, many large developers who in the recent past concentrated on the mid-to-high segment due to better margins, were seen eager to play the volume game and entered into affordable-segment projects in the deeper suburbs. This development created the spade work for bridging the wedge between demand and supply in the major metropolitan cities.

Source: JLL Research

Chart D shows that both new additions and absorptions reduced in calendar year (CY) 2014 resulting in marginal growth in unsold inventory. A large portion of the total unsold residential inventory is in the under-construction projects, while completed projects have only moderate vacancy. Home buyers looking for ready-possession property will therefore find limited room for negotiations when compared to buyers who can wait for some time to get possession. Many of the under construction projects have seen slow progress as the industry is reeling under severe liquidity crunch. However, pricing of existing projects has been maintained at existing levels, so in fact, with some demand pick up in the second half of 2014-15, the National Housing Bank (NHB) real estate price index called Residex has witnessed a slight upward trend for most major cities since July-August 2014.

Commercial real estate has seen continuously higher supply than demand over the last few years until 2014 by around 4 to 10 million sq ft. However, since the middle of 2013, commercial real estate developers began to strategically reduce the incoming supply to a new-normal level of occupier demand in the range of 27 to 30 million sq. ft. each year. This helped bring down the vacancy rate to 17% from more than 18.5% just a year ago, even though office real estate prices have largely failed to recover. In this sense, 2014 has been a turnaround year for commercial real estate. Interestingly, while office real estate have not recovered fully from the fall in prices post the economic slowdown, there is significant room for upside in the event of a positive change in business sentiment. In fact, such an improvement was already seen after the general elections and is already reflecting in year-end office market leases. The trend of improved leasing rates is expected to continue in 2015. Chart E plots the data for new additions, absorptions and vacancy in commercial real estate.

Source: JLL Research

In 2014, the retail real estate sector was one of the biggest casualties to market conditions that increasingly favoured the online retail community, with the exclusion of well-managed and leasehold organised retail malls. Stratasold, poorly-managed, badly-located retail properties lost lustre as more retailers chose to avoid them.

2014 also saw a few of these malls either converting into Grade B office space or reeling under the compounding effect of rising vacancy rates. Vacancy in poorly-built and operated malls was as high as 20%, while good quality malls were relatively better off with about 10% of vacant space. The e-commerce frenzy that has been taking India by storm over the last two years was at its peak during 2014, and now poses a serious challenge to physical retailers and mall developers. The situation is compounded by the absence of adequate regulation on e-commerce in India currently.

However, a handful of mall developers have risen to this challenge by identifying key transitions that could help them sail through. The measures they have undertaken include a revamped tenant mix, adoption of the mixed-use format and delivering theme-based shopping experiences. These practices are now common in overseas markets, and Indian retail malls will be seen adapting to them more rapidly in 2015.

Overall, activity in the Indian real estate sector was low as key developers focused on reorganising their finances and streamlining to cater to a new market structure, which has much greater focus on affordable housing.

For most of its expansion, Unitech had been focusing on affordable housing since the global economic collapse of 2008. However, it still had large existing land assets and projects under execution that were not conducive to adopting the affordable housing model. These constituted a large part of the Company's existing portfolio, whose execution has been affected due to a liquidity crunch. The Company has been structuring innovative financial models and stressing on improving execution to overcome the situation.

Clearly, Unitech is in a challenging phase of consolidation where it is reorienting its business, reducing its size of operations and working painstakingly to chart a gradual recovery. This is reflected in the financial performance.

FINANCIAL REVIEW

Under these conditions, Unitech business performance was affected and the level of income achieved was not in line with the fixed costs of its large establishment. Table 1 gives the Summarised Statement of Profit and Loss of the Company on consolidated basis.

The accounts are prepared according to the 'percentage of completion' method where revenues and costs are accounted for based on the progress of project execution. Given the fact that most of today's sales are on construction linked plans, the launch of new projects and sales are a reflection of the order book, while project execution and delivery is what gets reported in the Statement of Profit and Loss.

The salient features of the performance are:

- Income from operations increased by 16.2% to ₹ 3,431.18 crore in 2014-15
- Consequently, EBIDTA (without other income and exceptional items) has increased significantly to ₹ 773.72 crore
- Profit after tax (before extraordinary items) was ₹ 828.06 crore, while net losses after accounting for extra-ordinary items and minority interests was ₹ (-)128.34 crore
- The Earnings per Share (EPS) for the 2014-15 was ₹ 3.30 before extraordinary items, and ₹ (-)0.49 after extra-ordinary items on an equity base of ₹ 523.26
- Though the company's net debt to equity ratio as at 31st March 2015 stands at a comfortable 0.58, its total quantum of consolidated debt of ₹ 6,332.4 crore puts pressure on cash flows due to servicing requirements.

During the year, two of the Company's affiliates transferred their economic interest in four IT SEZs/ Parks, which resulted in reduction of over ₹ 1,000 crores of consolideted debt and other liabilities. However, the extra-ordinary loss of ₹ 990.73 Crores due to the exit from the wireless business resulted in a net loss of ₹ 128.34 Crores. During the year, the Company extinguished all its liabilities and obligations related to wireless business to the tune of ₹ 1093.74 Crores. Going forward, the company shall have no liability in this regard.

From a continuing operations perspective most segments of the consolidated entity witnessed a reduction in revenues and profits. This is reflected in the segment performance given in Table 2.

REAL ESTATE AND RELATED ACTIVITIES

In line with the trend in the last few years, given depressed market conditions, Unitech focused on project delivery against launch and sale of new projects. In fact, since Q2, 2014-15, the Company has not launched any new projects and the total area sold in 2014-15 was almost half of what was sold in 2013-14. While the focus was on delivery, the Company has had to continuously grapple with cash flow and liquidity issues. Consequently, although completed area delivered increased marginally, revenues from this segment were down and at the PBIT level, the segment generated losses. Revenues from real estate reduced by (-) 24.3% from ₹ 2,347.27 crore in 2013-14 to ₹ 1,777.77 crore in 2014-15, while at the PBIT level, the Company generated ₹ (-)201.29 crore loss in 2014-15 against a profit of ₹ 119.88 crore in 2013-14.

The operational highlights in the real estate business for 2014-15 are:

- Delivered 3.16 million sq. ft. of completed area against 2.95 million sq ft of completed area in 2013-14
- Launched projects for total area of 0.64 million sq. ft.
- Achieved sales bookings of 1.3 million sq. ft.
- Total value of sales booked was ₹ 828 crore

PROJECT EXECUTION

Even though there was focus on the execution front, progress remained stymied due to liquidity crunch. Even then, the Company delivered more square feet in 2014-15 compared to 2013-14. In fact, the Company was successful in delivering 3.16 million sq. ft. during the year. Table 3 gives the details of the Company's delivery status in FY 2015. By the end of 2014-15, handing over is in progress in 41 projects across various regions of the country.

NEW PROJECT LAUNCHES AND SALES

Unitech's core strength in the real estate space is its large diversified pan India land base that gives the Company flexibility to develop various kinds of projects that are suitably designed to cater to the demand of the time. In the process, the company is careful in seeing to the fact that value creation is maximised.

With this philosophy, the Company has been developing a wide variety of properties that can be segmented differently. The segregation can be in terms of:

- Plots, low-rise, mid-rise and high-rise developments
- Suburban as well as city centre developments
- · Low cost to luxury housing

Given the prevailing market conditions and the value generation capabilities of its land base, the Company reduced product launches and undertook a very few calibrated new project launches. As a result, the total area launched was 0.64 million sq. ft.

The Company's traditional strength has been in the National Capital Region. It has a strong presence in both Gurgaon and Noida. Over the years, the company has created good base in Kolkata and Chennai, and also developed affordable housing across Tier 2 cities. In 2014-15, given a focus on affordable housing, major portion of the project launches were in cities other than the core cities. In fact, there were no launches in Kolkata and Delhi NCR, while 0.16 million sq. ft. was launched in Chennai.

In very difficult market conditions, Unitech managed to sell 1.3 million sq. ft. in 2014-15 with a total sales value of ₹828 crore.

Table 4 lists the total area of projects launched and sold across different geographies.

TABLE 4 NEW LAUNCHES AND SALES IN FY 2015

City	Area Launched (mn. sq. ft.)		Sales value (INR Cr)
Gurgaon	0.00	0.31	379
Noida & G Noida	0.00	0.21	197
Chennai	0.16	0.14	46
Kolkata	0.00	0.10	61
Other Cities	0.48	0.54	145
Total	0.64	1.30	828

Out of the total area sold in 2014-15, 0.31 million sq. ft. was sold in Gurgaon, 0.21 million sq. ft. in Noida and Greater Noida, 0.14 million sq. ft. in Chennai, 0.1 million sq. ft. in Kolkata and 0.54 million sq. ft. in other cities.

While the residential segment continued to dominate, its share in total sales in terms of area decreased from 73% in 2013-14 to 54% in 2014-15, while the proportion of non-residential sales increased from 27% in 2013-14 to 46% in 2014-15. However, the average realisation from the non-residential segment reduced from ₹ 8,700 per sq. ft. in 2013-14 to ₹ 7,233 per sq. ft. in 2014-15. For the residential segment the average realisation remained around ₹ 5,629 per sq. ft. in 2014-15.

MANAGEMENT DISCUSSION AND ANALYSIS

In addition to the conventional sales channels, the Company continued to increasingly utilise digital media to promote sales and manage customers. Emphasis was also laid on strengthening the IT systems for supporting sales and CRM teams.

CONSTRUCTION

The Construction Division is being developed to primarily undertake in house civil construction for Unitech's Real Estate Division for both residential and commercial projects. In addition to civil works, the division is also producing ready-mix concrete for captive consumption at its construction projects in Delhi NCR region. This is being done for maintaining high quality standards and timely delivery.

During 2014-15, the division continued to focus on strengthening the back end infrastructure of the division to improve the quality and output of the construction work. There was added thrust on restructuring the systems and procedures with periodic reviews to improve the overall working capabilities of the division. The endeavour is to execute the work professionally, adhering to all established construction process manuals and complying with the applicable legal statutes. In fact, through this division, Unitech intends to establish and demonstrate best in class construction practices that need to be followed by all its construction contractors.

Currently the division is executing several residential and commercial projects in Delhi NCR and Chennai Region. In line with the slowdown in overall pace of project execution at Unitech, the volume of work for this division reduced in 2014-15. However, with several projects under development, this is expected to increase in 2015-16.

TRANSMISSION TOWERS

Unitech Power Transmission Limited (UPTL), a subsidiary of the Company, is involved in the business of design, manufacturing and erection of transmission towers primarily for the power sector. This business is supported by a state-of-the-art manufacturing facility at Nagpur.

The wide range of services offered include site survey, soil investigation, access roads, foundations, tower design, tower testing, mobilization of manpower and equipment, testing and commissioning.

Key highlights of financial performance of UPTL during 2014-15 are:

Profit before Interest and Tax (PBIT) was ₹ 19.17 crore in 2014-15

Against a total of 35,674 MT of towers and structures supplied in 2013-14, UPTL had a lower output in 2014-15. In fact, it supplied during the year was 16,871 MT of towers and structures. The drop in production primarily because of major revamping of the galvanizing plant at the factory.

UPTL continued to aggressively pursue business development activities and despite severe market competition, it successfully secured the following projects worth around ₹ 400 crore in the recent past:

- Construction of 400 kV D/C (Triple Snow Bird Conductor) Darbhanga - Muzaffarpur Transmission Line worth ₹ 57.59 Crore from PAN India Infraprojects Private Limited (ESSEL GROUP)

With these orders in place, the Company has an unexecuted order book of around ₹ 450 crore as of 31st March 2015.

In view of the changed economic scenario and the Government's thrust on the energy sector, the transmission and distribution segment (T&D) business is opening up in a big way. Estimates suggest that transmission line projects of more than ₹ 40,000 Crore are lined up by PGCIL, Electricity Boards and Private sector for bidding in 2015-16. The Company is expected to grow its order book further and has already bid for projects worth ₹ 1,376 crore.

The Holding Company's Board of Directors is responsible for the preparation of these Consolidated Financial Statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as "the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group including its associates and jointly controlled entities in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with rule 7 of the Companies (Accounts) Rules, 2014. The respective Board of Directors of the Companies included in the Group and of its Associates and jointly controlled entities are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; the selection and application of appropriate Accounting Policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the Consolidated Financial Statements by the Directors of the Holding Company, as aforesaid.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these Consolidated Financial Statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the Accounting and Auditing Standards and matters which are required to be included in the Audit Report under the provisions of the Act and the Rules made there under.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Consolidated Financial Statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the Consolidated Financial Statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on whether the Holding Company has an adequate internal financial controls system over financial reporting in place and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the Accounting Policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the Consolidated Financial Statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other Auditors in terms of their reports referred to in sub-paragraph (a) of the other matters paragraph below, is sufficient and appropriate to provide a basis for our qualified audit opinion on the Consolidated Financial Statements.

BASIS FOR QUALIFIED OPINION

Reference is invited to Note 55 to the consolidated financial statements according to which an amount of ₹8,536,432,244 (previous year - ₹ 8,331,612,512) is outstanding which is comprised of advances towards purchase of land, projects pending commencement, advances paid to joint ventures entities and collaborators. The management has explained that such advances have been given in the normal course of business to land owning companies, collaborators, projects and for purchase of land. The management, based on internal assessments and evaluations, have represented that the balance outstanding advances are still recoverable/ adjustable and that no accrual for diminution of advances is necessary as at balance sheet date. The management has further represented that as significant amounts have been recovered / adjusted during the previous and current financial year and since constructive and sincere efforts are being put in for recovery of the said advances, they are confident of appropriately adjusting / recovering significant portions of the remaining outstanding balance of such amounts in the foreseeable future. However, we are unable to ascertain whether all the remaining outstanding advances, as above, are fully recoverable / adjustable since the outstanding balances as at balance sheet date

INDEPENDENT AUDITORS' REPORT ON CONSOLIDATED FINANCIAL STATEMENTS

are outstanding / remained unadjusted for a long period of time, and further that, neither the amount recovered nor rate of recovery of such long outstanding amounts in the current year, clearly indicate, in our opinion, that all of the remaining outstanding amounts may be fully recoverable, consequently, we are unable to ascertain whether all of the remaining balances as at balance sheet date are fully recoverable. Accordingly, we are unable to ascertain the impact, if any, that may arise in case any of these remaining advances are subsequently determined to be doubtful of recovery. This matter was also qualified in our report on the financial statements for the year ended 31st March 2014.

QUALIFIED OPINION

In our opinion and to the best of our information and according to the explanations given to us, except for the effects of the matter described in the Basis for Qualified Opinion paragraph above, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs of the Group, its associates and jointly controlled entities as at 31st March, 2015, and their consolidated loss and their consolidated cash flows for the year ended on that date.

1. SIGNIFICANT ACCOUNTING POLICIES:

I. PRINCIPLES OF CONSOLIDATION

The consolidated financial statements include the financial statements of parent company and its subsidiaries, joint ventures (JVs) and interest in associates (collectively referred to as "Unitech Group") on the following basis:

Subsidiaries

- i. The consolidated financial statements have been accounted as per Accounting Standard (AS) 21 "Consolidated financial statements" read with requirements of Section 129(3) and other relevant provisions of the Companies Act, 2013 ('The Act') and combined on a line by line basis by adding together the book values of like items of assets, liabilities, income and expenses, after fully eliminating intragroup balances and intra-group transactions resulting in unrealized Profits or Losses. However, no effect in respect of different method of charging depreciation by various subsidiaries, other than the method adopted by parent company, has been considered.
- ii. The excess of cost to the parent company of its investment in the subsidiary over the company's/ parent's portion of equity of the subsidiary at the date on which investment in the subsidiary is made, is recognised in the financial statements as goodwill.
- Goodwill arising on consolidation/acquisition of assets is not being amortized. It is tested for impairment on a periodic basis and written off, if found impaired.
- iv. If cost to the parent company of its investment in a subsidiary is less than the company's/parent's portion of equity of the subsidiary on which investment in subsidiary is made, is recognised in the financial statements as a capital reserve.
- v. Minority interest in the net assets of consolidated subsidiaries consist of:
 - (a) the amount of equity attributable to minorities at the date on which investment in a subsidiary is made; and
 - (b) the minorities' share of movements in equity since the date the parent subsidiary relationship came into existence.
- vi. The losses applicable to the minority in a consolidated subsidiary in excess of the minority interest are adjusted against the majority interest except to the extent only where the minority has a binding obligation, and is able to make good such losses.
- vii. Intra group balances and intra group transactions and unrealized profits have been eliminated in full.
- viii. The financial statements used in the consolidation are drawn up to the same reporting date. If it is not practicable to draw up the financial statements of one or more subsidiaries to such date and, accordingly, those financial statements are drawn up to different reporting dates, adjustments are made for the effects of significant transactions or other events that occur between those dates and the date of the parent's financial statements. The difference between reporting dates are not more than six months.

ix. Consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances. In a situation where it was not practicable to use uniform accounting policies in preparing the consolidated financial statements, that fact have been disclosed together with the proportions of the items in the consolidated financial statements to which the different accounting policies have been applied.

Joint Venture

- i. The financial statements of Joint Ventures have been combined by applying proportionate consolidated method (joint venture's share) on line by line basis on items of assets, liabilities, income and expenses after eliminating proportionate share of intra group balances and intra group transaction and resulting unrealized profit or losses in accordance with Accounting Standard (AS) 27 "Financial reporting of interests in joint ventures and the relevant provisions of the Companies Act, 2013 ('The Act').
- ii. Any excess of the cost to the venturer of its interest in a jointly controlled entity over its share of net assets of the jointly controlled entity, at the date on which interest in the jointly controlled entity is acquired, is recognised as goodwill.
- iii. When the cost to the venturer of its interest in a jointly controlled entity is less than its share of the net assets of the jointly controlled entity, at the date on which interest in the jointly controlled entity is acquired, the difference is treated as a capital reserve in the consolidated financial statements.
- iv. If losses pertaining to one or more investors in a jointly controlled entity exceed their interests in the equity of the jointly controlled entity then such excess, and any further losses applicable to such investors, are recognised by the venturers in the proportion of their shares in the venture, except to the extent that the investors have a binding obligation to, and are able to, make good the losses.
- v. The financial statements of the jointly controlled entity used in applying proportionate consolidation are drawn up to the same date as the financial statements of the venturer. When it is impracticable to do this, financial statements drawn up to different reporting dates may be used provided the difference in reporting dates is not more than six months. In such a case, adjustments are made for the effects of significant transactions or other events that occur between the date of financial statements of the jointly controlled entity and the date of the venturer's financial statements.
- vi. Jointly controlled entity uses accounting policies other than those adopted for the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to the financial statements of the jointly controlled entity when they are used by the venturer in applying proportionate consolidation. In a situation where it is not practicable to use uniform accounting policies in preparing the consolidated financial statements, that fact have been disclosed together with the proportions of the items in the consolidated financial statements

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2015

to which the different accounting policies have been applied.

Associates

- Investments in associate companies have been accounted for using the equity method as per Accounting Standard (AS) 23 "Accounting for investments in associates in consolidated financial statement" and the relevant provisions of the Companies Act, 2013 ('The Act').
- ii. The matter is still pending before DRT for final decision.

Accordingly, we are unable to ascertain the impact, if any, that may arise in

INDEPENDENT AUDITORS' REPORT

- case any of these remaining advances are subsequently determined to be doubtful of recovery. This matter was also qualified in our report on the financial statements for the year ended 31st March 2014.
- 2. Reference is invited to Note 51 to the standalone financial statements. According to information available and explanations obtained, in respect of non-current investments (long term investments) in, and loans and advances given to, some subsidiaries, it has been observed from the perusal of financial statements of these subsidiaries that the subsidiaries have accumulated losses and their net worth have been fully / substantially eroded. Further that, these subsidiaries have incurred net loss during the current and previous year(s) and, current liabilities of these subsidiaries exceeded their current assets as at the respective balance sheet dates. These conditions, along with absence of clear indications or plans for revival, in our opinion, indicate that there is significant uncertainty and doubt about the recovery of the loans and advances from these subsidiaries. Further, that there is a clear indication that there is a decline in the carrying amount of these investments which is other than temporary.

Consequently, in terms of stated accounting policies and applicable accounting standards, diminution in the value of investment which is other than temporary amounting to ₹ 1.002.590.750 and an accrual for diminution of doubtful debts and advances amounting to ₹ 21,279,415 need be accounted for in the financial statement for the year ended 31st March 2015. Management is however of the firm view that the diminution is only temporary and that sufficient efforts are being undertaken to revive the said subsidiaries. However, in the absence of significant movement in the operations of the investee companies, and any adjustment for diminution of expenses in this regard, in our opinion, management has not adequately accounted for the imminent diminution. Consequently, the loss for the year ended 31st March 2015 is understated and reserves as at 31st March 2015 are overstated to the extent of ₹ 1,023,870,165.

OPINION

In our opinion and to the best of our information and according to the explanations given to us, except for the possible effects of the matters described in the 'Basis for Qualified Opinion' paragraph above, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2015, and its loss and its cash flows for the year ended on that date.

1. SIGNIFICANT ACCOUNTING POLICIES

NATURE OF OPERATIONS

Unitech Limited ('the Company') was incorporated in 1971 and is a leading real estate developer in India. The Company's main line of business is real estate development and related activities including construction and consultancy services.

BASIS OF PREPARATION

The financial statements have been prepared under historical cost convention on an accrual basis in accordance with the requirements of schedule III and accounting standards prescribed in section 133 of the Companies Act,2013 ('the Act') read with the Rule 7 of the Companies (Accounts) Rules, 2014 as amended from time to time and the provisions of "the Act" to the extent notified.

All assets and liabilities have been classified as current or non-current as per the operating cycle of the Company as per the guidance set out in the Schedule III to the Companies Act, 2013.

III. USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the result of operations during the reporting period. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Significant estimates used by the management in the preparation of these financial statements include project revenue, project cost, saleable area, economic useful lives of fixed assets, accrual of allowance for bad and doubtful receivables, loans and advances and current and deferred taxes. Any revision to accounting estimates is recognized prospectively in accordance with applicable Accounting Standards.

IV. FIXED ASSETS AND DEPRECIATION

Fixed assets including capital work in progress are stated at cost (gross block) less accumulated depreciation and impairment losses, if any. Cost comprises, the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. It excludes refundable taxes. Borrowing costs relating to acquisition of fixed assets which take substantial period of time to get ready for its intended use are also included to the extent they relate to the period till such assets are ready to be put to use. Depreciation on fixed assets is provided based on useful lives of the assets assigned to each asset in accordance with Schedule II of the Companies Act, 2013 on straight-line method.

Fixtures and lease hold improvements installed in leased buildings are amortized over the initial period of lease.

As on the commencement of Schedule II of the Companies Act, 2013 on 1st April, 2014, the carrying amount of the assets outstanding as on that date: (a) has been depreciated over the remaining useful life of the assets either as per this schedule or revised rates as explained above; (b) after retaining the residual value, has been recognized/ adjusted in the retained earnings where useful life of the assets is NIL.

INTANGIBLES AND AMORTIZATION

Intangible assets are recognized when it is probable that future economic benefits that are attributable to asset will flow to the Company and the cost of the asset can be measured reliably.

Intangible assets (acquired or developed in house) are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs which meet capitalization criteria, are not capitalized and expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

Cost of software is amortized over a period of 5 years, being the estimated useful life as per the management estimates

VI. IMPAIRMENT OF ASSETS

Management at each balance sheet date assesses using external and internal sources whether there is an indication that an asset or group of assets or a cash generating unit as the case may be impaired. Impairment occurs where the carrying value exceeds the higher of value in use represented by the present value of future cash flows expected to arise from the continuing use of the asset and its realizable value. The impairment loss is charged off to Statement of Profit and Loss.

VII. LEASE ACCOUNTING

Finance leases, which effectively transfer to the Company substantially all the risks and benefits incidental to ownership of the leased asset, are capitalized at the lower of the fair value and present value of the minimum lease payments at the inception of the lease term and disclosed as leased assets. Lease payments are apportioned between the finance charges and reduction of the lease liability based on the implicit rate of return. Finance charges are recognized as borrowing costs in the Statement of Profit and Loss.

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term, are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term unless there is a more systematic basis which is more representative of the time pattern of the lease expenses.

VIII. INVESTMENTS

Long term investments are stated at cost. However, provision for diminution is made to recognise any decline, other than temporary, in the value of long term investments

Current investments are stated at the lower of cost and fair value.

STANDALONE

IX. INVENTORIES

- The cost of inventories comprises all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Inventories are valued at cost or net realizable value, whichever is lower on the basis of first in first out method or specific identification, as the case may be.
- Finished stock of completed real estate projects, land and land development rights are valued at lower of cost or net realizable value on the basis of actual identified units.

X. PROJECTS IN PROGRESS

Project in progress disclosed as at reporting date in respect of real estate development and related activities includes aggregate amount of project costs and recognized profit (less recognized losses) including unbilled revenue up to the reporting date less advances received from customers.

Project costs include cost of land, land development rights, construction costs, job work, allocated borrowing costs and other incidental costs that are attributable to project and such other costs as are specifically chargeable to the customer being costs incurred upto the reporting date.

Project contract costs that relate to future activity on the contract are recognised as project in progress as it is probable that these costs will be recovered in future.

XI. BORROWING COST

Borrowing cost relating to acquisition/construction development of qualifying assets of the Company are capitalized until the time all substantial activities necessary to prepare the qualifying assets for their intended use are complete. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use/sale. Borrowing cost that are attributable to the project in progress and qualifying land advances as well as any capital work in progress are charged to respective qualifying asset. All other borrowing costs, not eligible for inventorisation/capitalization, are charged to Statement of Profit and Loss.

XII. REVENUE RECOGNITION

Real estate projects

Revenue from real estate under development/sale of developed property is recognized upon transfer of all significant risks and rewards of ownership of such real estate/ property, as per the terms of the contracts entered into with buyers, which generally coincides with the firming of the sales contracts/ agreements, except for contracts where the Company still has obligations to perform substantial acts even after the transfer of all significant risks and rewards. Accordingly, revenue is recognized on the following

a) Real estate projects undertaken up to 31st March, 2004

Revenue is recognized to estimate the profit @ 20% of actual receipts and installments

fallen due during the year towards booking of plots/constructed properties, subject to final adjustment, on the completion of the respective project.

b) Real estate projects undertaken on and after 1st April, 2004.

Revenue from real estate projects is recognized on the 'percentage of completion method' (POC) of accounting.

Revenue under the POC method is recognized on the basis of percentage of actual costs incurred including construction and development cost of projects under execution and proportionate land subject to such actual cost incurred being twenty percent or more of the total estimated cost of

The stage of completion under the POC method is measured on the basis of percentage that actual costs incurred on real estate projects including construction and development cost and proportionate land bears to the total estimated cost of the project. The estimates including those of technical nature in respect of the projected revenues, projected profits, projected costs, cost to completion and the foreseeable loss are reviewed periodically by the management and any effect of changes in estimates is recognized in the period such changes are determined. Revenue including variations in contract work, claims and incentive payments to the extent that it is probable is recognized by reference to the stage of completion as explained above attributed to the work completed during the year.

c) Real estate projects which have commenced on or after April 1, 2012 and also to projects which have already commenced but where revenue is being recognized for the first time on or after April 1, 2012.

Revenue from real estate projects is recognized when all significant risks & rewards of ownership by way of a legally enforceable agreement to sale have been transferred to the buyer & subject to the satisfaction of contractual conditions mentioned herein after which signify transferring of significant risks & rewards even though the legal title may not be transferred or the possession of the real estate may not be given to the buyer. Consequently, any act on the real estate project performed by the Company is, in substance on behalf of the buyer in the manner similar to a contractor.

Accordingly, Revenue on real estate projects including variations in contract work, claims and incentive payments to the extent that it is probable is recognized on the 'percentage of completion method' (POC) of accounting, when:-

The outcome of the real estate project can be estimated reliably;

STANDALONE

- ii. It is probable that the economic benefits associated with the project will flow to the enterprise;
- iii. The project costs to complete the project and the stage of project completion at the reporting date can be measured reliably;
- iv. The project costs attributable to the project can be clearly identified & measured reliably so that actual project costs incurred can be compared with prior estimates.

Further, the Company recognizes revenue on POC on completion of the following events:-

- I. All critical approvals necessary for commencement of the project have been obtained including, wherever applicable Environmental & other clearances, approval of plans, designs etc., title to land or other rights of development / construction & change in land use.
- II. The expenditure incurred on construction & development is not less than 25% of the construction and development costs.
- III. At least, 25% of the saleable project area is secured by contracts or agreements with
- IV. At least, 10% of the total revenue as per the agreements of sale or any other legally enforceable document are realized at the reporting date in respect of each of the contracts & it is reasonable to expect that the parties to such contracts will comply with the payment terms as defined in the contracts.

When it is probable that total costs will exceed total project revenue, the expected loss is recognized as an expense immediately.

Construction contracts

- a) In construction contracts, income is recognized on percentage of completion method. The stage of completion under the POC method is measured on the basis of percentage that actual costs incurred on construction contracts to the total estimated cost of the contract.
- b) Revenue on account of contract variations, claims and incentives are recognized/ adjusted upon settlement or when it becomes reasonably certain that such variations, claims and incentives are both measurable and recoverable/adjustable.
- C) Accounting of projects with Co-developer

All the development expenses and sale proceeds booked during the year are transferred to the codeveloper at the year end in proportion to share of actual land pooled by each developer.

D) Sale of land and Land Development Rights

Revenue from sale of land and development rights is recognized upon transfer of all significant

risks and rewards of ownership of such real estate/ property, as per the terms of the contracts entered into with buyers, which generally coincides with the firming of the sales contracts/ agreements.

E) Sale of construction material

F) Sale of investment

Net sale proceeds of the investments held in subsidiaries, joint ventures and associates developing real estate projects are included in real estate revenue and is recognized on completion of sale of such investment.

G) Revenue from lease rentals and related income

H) Consultancy income

Consultancy income is recognized on accrual basis based on contractual terms on the performance of such services. Revenue is recognized proportionately by reference to the performance of acts defined contractually. The revenue recognized is determined on the basis of contract value, associated costs, number of acts or other suitable basis.

Interest income

Interest income is recognized only when no significant uncertainty as to measurability or collectability exists. Income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

J) Dividend income

Dividend income is recognized when the right to receive the same is established.

XIII. FOREIGN CURRENCY TRANSACTIONS

A foreign currency transaction is recorded, on initial recognition in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Monetary items denominated in a foreign currency are reported using the closing rate or at the amount which is likely to be realized from, or required to disburse such items at the balance sheet date as the situation demands.

Non-monetary items carried in term of historical cost denominated in foreign currency, are reported using exchange rate at the date of transaction.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2015

Exchange differences arising on the settlement of monetary items or on reporting an enterprise's monetary items at rates different from those at which they were initially recorded during the period, or reported in previous financial statements, are recognized as income or as expenses in the period in which they arise.

Exchange differences arising on reporting of long term monetary assets at rates different from those at which they were initially reported during the period or previous periods in so far they relate to the acquisition of depreciable capital asset is added to or deducted from the cost of assets.

The financial statement of an integral operation is translated using the above principle and procedures. In translating the financial statement of a non-integral foreign operation for incorporation in its financial statement, the following principles and procedures are followed:

- the assets and liabilities, both monetary and nonmonetary, of the non-integral foreign operation are translated at the closing rate.
- Income and expense items of the non-integral foreign operation are translated at exchange rates at the date of the transactions.
- All resulting exchange differences are accumulated in a foreign currency translation reserve until the disposal of the net investment.

XIV. TAXES ON INCOME

Tax expense comprises both current and deferred tax.

Current tax is measured at the amount expected to be paid to the tax authorities, using the applicable tax rates and tax laws that are enacted or substantially enacted.

Deferred tax is recognized on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets, subject to consideration of prudence, are recognized and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. The tax effect is calculated on the accumulated timing difference at the year-end based on the tax rates and laws enacted or substantially enacted on the balance sheet date. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits. At each balance sheet date the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

XV. EMPLOYEE BENEFITS

Short term employee benefits:

The Company recognizes the undiscounted amount of short term employee benefits expected to be paid in exchange for services rendered by employees as

STANDALONE

- (i) a liability (accrued expense) after deducting any amount already paid. Excess of amounts paid over liability incurred is treated as prepaid expenses; or
- (ii) an expense unless it is eligible to be charged to project in progress or capital work in progress or fixed asset as the case may be.

Post-employment benefits:

(i) Defined contribution plans

The Company, as per detail hereunder, operates defined contribution plans pertaining to employees state insurance scheme, government administered pension fund scheme and superannuation scheme for eligible employees.

The above defined contribution plans are postemployment benefit plans under which the Company pays fixed contributions into separate entities (funds) or to financial institutions or state managed benefit schemes. The Company's contribution to defined contribution plans are recognized in the statement of profit and loss in the financial year to which they relate.

(a) Employees state insurance/ pension fund scheme:

The Company makes specified monthly contribution towards employees state government insurance scheme and administrated pension fund scheme

(b) Superannuation insurance plan:

The Company has taken aroup superannuation policy with Life Insurance Corporation of India for superannuation payable to the eligible employees.

ii) Defined benefit obligations

The cost of providing benefits i.e. gratuity and leave encashment is determined using the projected unit credit method, with actuarial valuations carried out annually as at the balance sheet date. Actuarial gains and losses are recognized immediately in the statement of profit and loss. The fair value of the plan assets is reduced from the gross obligation under the defined benefit plan, to recognize the obligation on net basis. Past service cost is recognized as expense on a straight-line basis over the average period until the benefits become vested.

Provident fund contributions are made to the Company's Provident Fund Trust or Regional Provident Fund Commissioner, Delhi (South), as the case may be. Deficits, if any, based on the actuarial valuation performed on balance sheet date between the funds and estimated statutory or contractual obligation for funds contributed to the trust in this regard is recognized as additional liability.

STANDALONE

XVI. PROVISIONS, CONTINGENT LIABILITIES AND **CONTINGENT ASSETS**

Provisions are recognized in respect of liabilities which can be measured only by using a substantial degree of estimates when:

- the Company has a present obligation as a result of a past event;
- a probable outflow of resources embodying economic benefits will be required to settle the obligation; and
- the amount of the obligation can be reliably estimated.

Reimbursement expected in respect of expenditure required to settle a provision is recognized only when it is virtually certain that the reimbursement will be received.

Contingent liability is disclosed in the case of:

- a) a present obligation arising from a past event, when it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation;
- b) a possible obligation, that arises out of past events and the existence of which will be confirmed only by one or more uncertain future events unless the probability of outflow of resources is remote.

Contingent assets are neither recognized nor disclosed. However, when realization of income is virtually certain, related asset is recognized.

XVII. CASH & CASH EQUIVALENTS

Cash and cash equivalents for the purposes of cash

flow statement comprise cash at bank and in hand and short-term investments with an original maturity of three months or less. Cash flow statement is prepared using the indirect method.

XVIII.EARNING PER SHARE

Basic earning per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average numbers of equity shares outstanding during the period are adjusted for events of bonus issue, a share split and share warrants conversion.

Diluted earnings per share is calculated by adjusting net profit or loss for the period attributable to equity shareholders and the weighted number of shares outstanding during the period for the effect of all dilutive potential equity shares.

Further where the statement of profit and loss includes extraordinary items (within the meaning of AS 5, net profit and loss for the period, prior period items and changes in accounting policies), the Company discloses basic and diluted earnings per share computed on the basis of earnings excluding extraordinary items (net of tax expenses).

XIX. EXTRAORDINARY ITEM

Extraordinary item comprises event or transaction that is clearly distinct from the ordinary activities of the Company and is determined by the nature of the event or transaction in relation to the business ordinarily carried on by the Company. Such items are disclosed in the statement of profit and loss as a part of net profit or loss for the period in a manner that its impact on current profit or loss is perceived.
