Managing Director's Message

Managing Director's Message

Commenting on the results, Dr. S K Sundararaman, Managing Director, Shiva Texyarn Ltd. said:

"This quarter witnessed a continued gradual recovery in the overall markets. Despite a temporary lockdown to curb the second wave of the pandemic during the last few days of the quarter, the Company has sustained well during this time. As we did in the previous fiscal year, Shiva has proven its mettle to stay resilient even in turbulent market conditions. Our Company's capacities, agility and diversified product portfolio have been our key strengths during various phases.

Our revenue for the first quarter grew 67.09% year-on-year to Rs. 85.74 cr, while EBITDA and net profit were Rs. 13.42 cr and Rs. 5.05 cr, representing a year-on-year growth of 49.69% and 428.23% year-on-year, respectively. This was primarily due to the last year's first quarter being severely impacted by the COVID-related lockdown across the country. Subsequently, the Spinning business is regaining momentum. Defence orders executed during the quarter also supported our topline.

The spinning business was temporarily hampered during the lockdown period, and we reopened gradually at partial capacities in accordance with Government guidelines. On the technical textiles front, consumer sentiment for lamination products was dampened by the ongoing second wave of COVID. However, other products continue to gain traction, create new opportunities for our Company, and fetch margins to offset the general slowdown in the market.

While there is speculation of a third wave in several regions, industries are re-opening and consumer sentiment is improving. Our new products are gaining traction in the market and giving us a wide recognition as being one of leading technical textiles players in India. The overall scenario still remains uncertain due to the pandemic, but we are cautiously optimistic about the near future based on recovery in the domestic textile market.

I would like to thank all the stakeholders as well as the entire Shiva Texyarn team, which has come together to rise up to the challenges of the pandemic and to seize the opportunities that have come up at this time to create a better future for all of us."

Recent Developments contd...

- Over past year, we witnessed an unprecedented and unforeseen adversity in form of **COVID-19** virus outbreak - pandemic brought individual lives, businesses, and entire economy to standstill. Company had suspended operations temporarily in April-May 2020 and reopened gradually by June 2020
- In light of second wave of COVID, Company suspended operations at all its units in May 2021 as per Government guidelines. Consequently, operations at Spinning, Garments, Coating and Lamination units reopened in June 2021 at 25% capacity to cater to export orders and then eventually resumed full operations
- Company won **two orders worth Rs. 27.28 cr and Rs. 13.62 cr from Ministry of Defence**, for supply of bags for use by army personnel
- Shiva Texyarn came forth in this moment of need and began production of **several new and innovative products** to help fight the spread of this virus
- During the year, we have launched several new products aimed at medical and general public use, to prevent spread of virus and bacteria and help improve quality of lives

Some of these include:

1. **Protective Coveralls** – Started manufacturing protective coveralls for medical use in April 2020, to cater to surge in demand for such gear by the Government
2. **Face Masks** – In May 2020, launched new range of face masks for public use under brand name '**Smiley**'. These masks are re-usable and multi-layered, with fabric and filter layers. For this product, we partnered with 'Feed My City' initiative, wherein Rs. 10 from each mask sold is donated towards feeding under-privileged who have been worst affected during this time
3. **Anti-viral Fabric** – In June 2020, launched an innovative, first-of-its-kind anti-viral fabric, in collaboration with a Swiss company HeiQ Materials AG. This fabric is treated with unique technology that inhibits bacteria and virus to a great extent, including the novel Corona virus. The product can be used in PPE systems and is aimed at domestic as well as international markets
