Dear Sir/Madam,

Subject: Intimation of Schedule of Analyst / Institutional Investor meeting under the SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations"), we would like to inform you that the officials of Himadri Speciality Chemical Limited ("Company") will be having one-on-one and/or group meetings with Analysts/Investors through calls/video conference/in person meetings on 27th & 28th March 2025.

A copy of this schedule of the meeting is also placed on the website of the Company www.himadri.com

Presentation to be made at the Meeting is enclosed. Discussions will be based strictly on publicly available information and no unpublished price sensitive information shall be disclosed.

Note: The above schedule meeting may undergo changes due to exigencies on the part of the Analysts / Investors or the Company.

We request you to kindly take on record the same

Thanking You,

Yours faithfully,
For Himadri Speciality Chemical Ltd

(Company Secretary &
Compliance Officer)

Himadri Speciality Chemical Ltd

This presentation and the accompanying slides (the “Presentation”), which have been prepared by **Himadri Speciality Chemical Ltd** (the “Company”), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment what so ever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company’s market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company’s ability to successfully implement its strategy, the Company’s future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company’s market preferences and its exposure to market risks, as well as other risks. The Company’s actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third party statements and projections.

COMPLETION

**Expected commencement of
operations in 18 months**

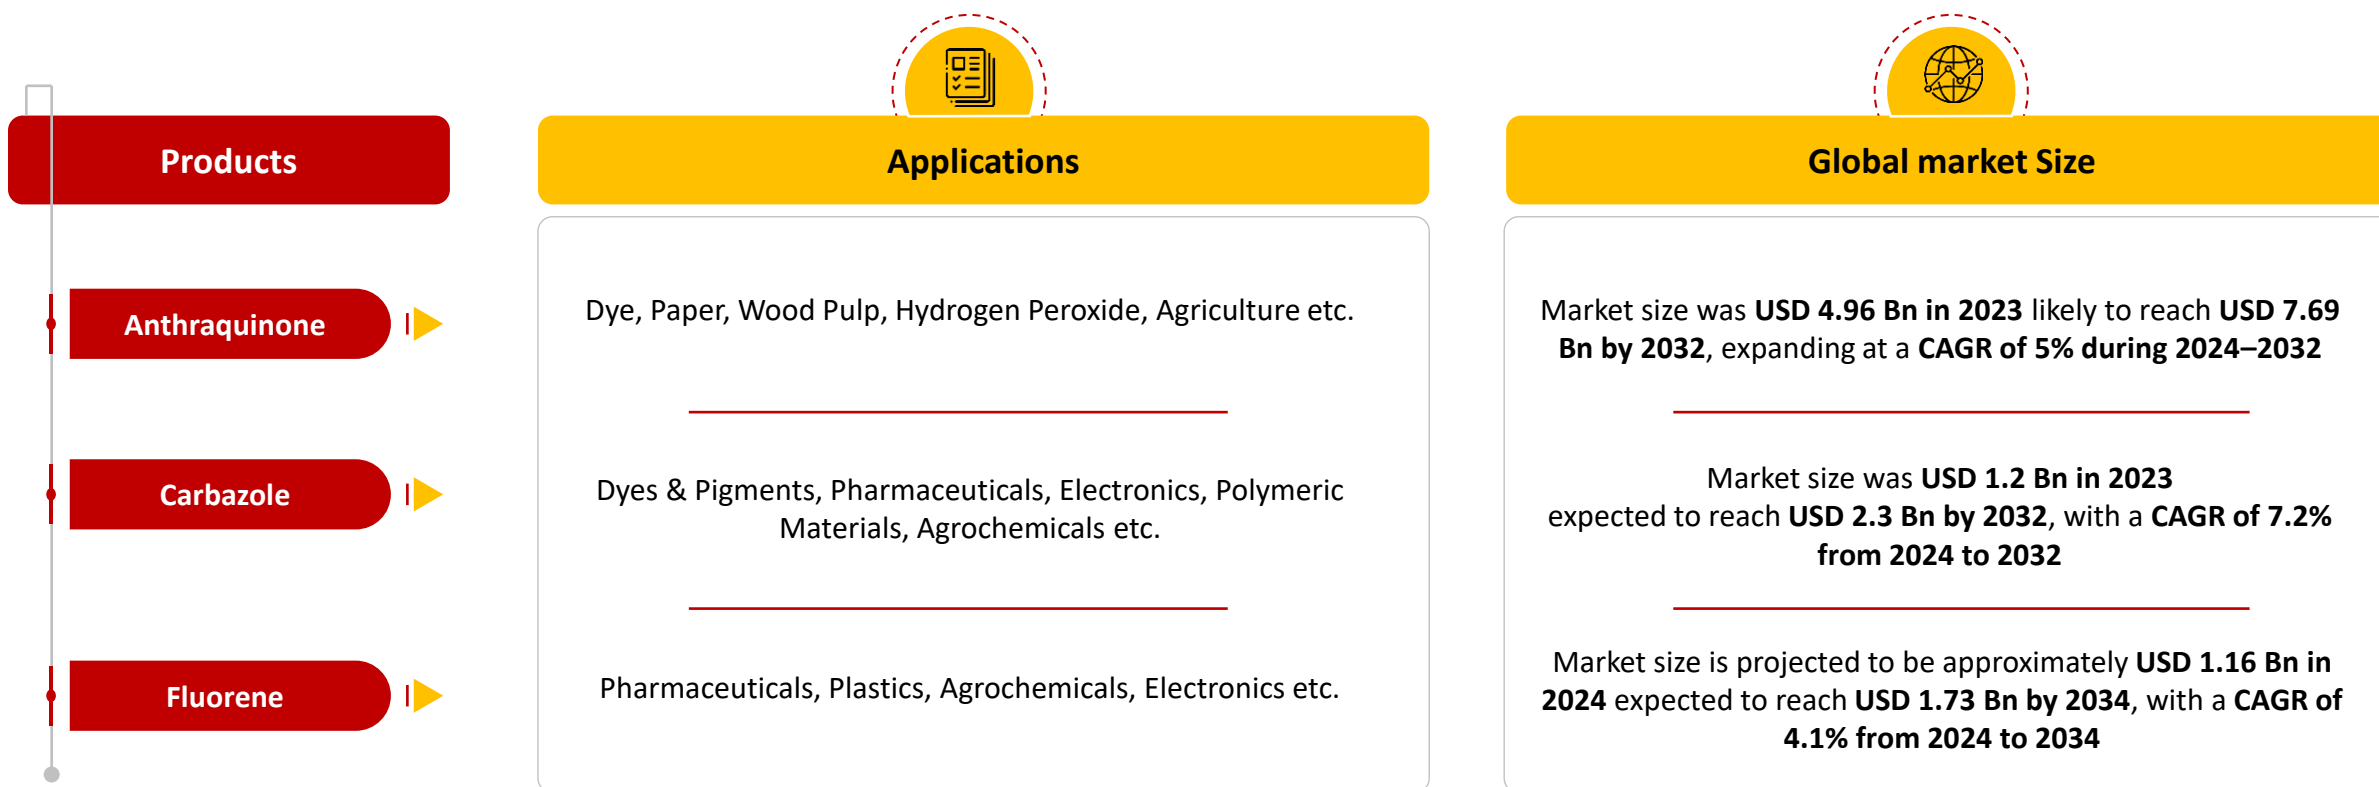

PURPOSE

**Setting up facility to extract high value-added speciality products namely Anthraquinone, Carbazole & Fluorene
from existing coal tar distillates**

(Note : No change in the total existing capacity)

Market Dynamics of our new High Value-Added Speciality Products

Himadri will forward integrate its existing coal tar distillates to produce a High Value-Added Speciality Products – Anthraquinone, Carbazole & Fluorene

Delivering high-value specialty chemicals tailored for niche industry applications, paving the way for robust profitability

Target Market

Our target markets encompass both domestic and global sectors

Forward Integration

Forward integrating from our existing coal tar distillates to unlock value

Enhanced Synergy

New facility will enhance the synergy within our already integrated state-of-the-art complex

New Markets

Unlock new markets and territories for the business

Customer Expansion

Leverage our existing customer base in the dyes and pigments market

Himadri's initiative is the first of its kind in India at this scale and aims to eliminate the country's reliance on chemical imports.

Himadri Achieves EcoVadis Platinum Medal

Himadri Speciality Chemical Ltd. proudly announces its recognition with the EcoVadis Platinum Medal, placing the company among the top 1% of over 130,000 companies assessed globally for sustainability practices. This distinction reflects the quality of the company's sustainability management system and demonstrates a commitment to promoting transparency throughout the value chain.

Mr. Anurag Choudhary, CMD & CEO of Himadri Speciality Chemical Ltd said: “We are honored to receive the EcoVadis Platinum Medal, a testament to our unwavering focus on sustainability and responsible growth.”

ecovadis

EcoVadis is one of the world's largest and most trusted providers of business sustainability ratings, based on international standards. It assesses companies' actions and practices on their corporate social responsibility around four main themes: the environment, ethics, labor & human rights, and sustainable procurement.

THE
FUTURE

Transformation Unfolds :
From Growing Carbon Value
Chain to Promising Mobility and
Energy Storage Opportunity

We will address substantial part of the critical raw material
requirements of Lithium-Ion Batteries

Sustainable business model powered by in-house R&D

Net Zero Roadmap

Research

- Explore innovative methods for capturing and transforming carbon emissions.
- Utilize upcoming technologies to capture and convert carbon dioxide into value-added innovative products.
- Achieve a substantial portion of our net-zero emissions target through these innovative technologies.

Recycle

- Design and create circular products.
- Encourage innovation and sustainability in customer solutions.
- Develop circular materials with reduced carbon footprint.
- Minimize material disposal in landfills.

Adapt

- Implement new energy sources and technology advancements.
- Integrate renewable energy solutions for reduced carbon footprint.
- Shift production to carbon positive inputs for a Low-carbon future.

Reduce

- Decrease reliance on conventional manufacturing methods.
- Emphasize maximum possible process optimization.
- Prioritize energy efficiency in all operational aspects.

Net Zero Roadmap (Scope 1, 2 & 3)

To **NET ZERO**

- Scope 3 – Baseline Year 2023 (FY23-24)
- Scope 1 – Baseline Year 2021 (FY 21-22)
- Scope 2 = 0, Baseline Year 2021 (FY 21-22)

OUR AMBITION

Assumption: India will be regulated carbon market with high tax imposed on conventional Fuel & PLI for clean fuel and technologies

- Scale successful science based offset projects.
- Zero Tolerance on Sustainable Procurement framework & Collaboration with value chain partners.

Scale

- Reduction of Scope 3 by 40%

- Scale carbon capture and utilization
- Scale renewable thermal energy consumption
- Scale usage of owned recycled plastics as packaging material
- Scale recycled and upcycled raw material input
- Scale usage of renewable fuels and energy for transportation

- Reduction of Scope 1 by 30 %

10% Offsets

-90% -90% 0

Accelerate

- Elimination of virgin plastic in packaging by 100%
- Reduction of Freight emission by 50%
- Science based off- set, Broadening horizon of successful pilot projects.
- Reinforcing sustainable procurement framework to make it more effective & efficient.

- Reduction of Scope 3 by 40%

- Consumption of new generations/carbon neutral fuel.
- 100% electrification of our operations
- Consumption of recycled RM by 50%.
- Carbon removal projects
- Consumption of renewable thermal energy

- Reduction of Scope 1 by 30 %

-20%

-30%

0

2030

+2.8 °C to +2.4 °C

-60%

-60%

0

2040

+2.4 °C to +1.5 °C

2050

Achieve

- Reduce Packaging Emission.
- Reduction of Upstream and down stream emission
- Lowering customer's carbon footprint by novel products.
- Science Based off-set, pilot projects.
- Focus on adding renewable energy source
- Deployment of Sustainable Procurement Framework

- Reduction of Scope 3 by 20%

- Introduction of fuel diversification/greener tech.
- Capture and convert carbon emissions
- Recycling initiatives
- Adapt circular economy products.
- Deployment of Sustainable Procurement Framework.
- Consumption of renewable energy
- Reduce Waste Generated

- Reduction of Scope 1 by 30 %

+3.3 °C to +2.8 °C

2023

Path to Net Zero

Sustainability Objectives 2024 – 25

Objectives	Measures	Target FY 24-25	FY 23-24	FY 22-23	Main Domain	UNGC -SDGs
Vision Zero Accident / Incident	By 2025, Loss Time Injury Frequency Rate below 1(Vs 2021)	< 1	1.18	2.27	 People	 
Energy Consumption	By 2025, Reduce Energy Intensity per metric tonne of product sold (Vs 2021)	-10%	-12.29%	-3.23%	 Planet	 
CO2e emission Intensity (Scope-1 & scope-2)	By 2025, Reduce Scope 1 and Scope 2 CO2e emission intensity per metric tonne of product sold (Vs 2021)	-25%	-24.20%	-14%	 Planet	  
CO2e emission Intensity (Scope-3)	By 2025, Reduce scope 3 CO2e emission intensity per Metric tonne of product sold (Vs 2023)	-5%	New Objective	New Objective	 Planet	  
Zero Liquid Discharge	All plant must operate with ZLD status(Vs 2021)	100%	100%	100%	 Planet	  
Solid Waste	Reduce solid waste (Hazardous and sent to landfill) per metric tonne of product sold (Vs 2021)	<1%	0.01%	0.01%	 Planet	 
Recycle Materials	Increase the proportion of Non-virgin raw material from external sources used in production to avoid depletion of natural resources(Vs 2021)	> 95%	98%	98.5%	 Planet	 
Gender Diversity	Increase female representation in management team(vs 2021)	5%	4.5%	4%	 People	
Compliance Training	Increase percentage of Targeted staff, who completed anti bribery and corruption training (Vs 2021)	> 95%	99.80%	99.86%	 Governance/ Communities	
Value Chain Management	By 2024, conduct sustainability assessment of our value chain partners covering at least 70% of group spend(Vs 2021)	85%	84% (against 50% Spend)	82% (against 50% Spend)	 Communities	  
Carbon Neutrality by Product Design	introduce recycled raw material or bio sourced materials into product to reduce customer's carbon footprint - % RM in MT	0.1%	New Objective	New Objective	 Planet	  

Robust Financial Performance + Strong outlook

New Capex for High Value - Added Speciality Products

Awards, Brand Recognition and Achievements

ESG-focused innovations

Capex – Next Phase of Growth

CAPEX TO MORE THAN DOUBLE SPECIALITY CARBON BLACK CAPACITY

Brownfield expansion of a new speciality carbon black line of 70,000 MTPA

Increasing the total speciality carbon black capacity to 130,000 MTPA making it world's largest speciality carbon black capacity at single site

Estimated capex of Rs. 220 Crores

Scheduled to be operational by Q3FY26

7 Speciality Black Series with more than 55 Grades

Applications

Speciality Carbon Blacks are premium grades that offer deep black color and high purity, making them ideal for use in synthetic fibers, high performance plastics, & U.S. FDA compliant applications

Speciality blacks are designed to provide reliable color and UV protection for pressure pipes, plastics film and moulding applications

KLAREX, “clean” speciality blacks offer low ash and grit levels, which make them easy to disperse and reduce defects, resulting in high processability

Speciality blacks offer low sulfur, low ionics, and low physical grit levels, making them ideal for use in products with long lifetimes that require protection against electrostatic discharge

New Li+ and LB Series of Speciality Blacks launched for Battery Application

7 Speciality Black Series with more than 55 Grades

Applications

COLORX is a powder black that function exceptionally well as a colorant for premium grade inks, paints, adhesives, sealants, and coatings, offering high jetness, smooth processing, and better dispersibility

BARONX is latest innovation in speciality blacks and is a premium-grade pigment that is highly valued in both solvent and aqueous-based coatings and industrial decorative paints.

Virtex black carbon series are for high performance speciality tyres application which provides large range of surface area, structure and ASD optimizing grip, rolling resistance & mechanical performance

New Li+ and LB Series of Speciality Blacks launched for Battery Application

Sicona Acquisition- Initiative in line with long term strategy

Investment

Sicona is an innovative Australian startup specializing in high-capacity silicon anode technology for lithium-ion batteries.

Sicona has developed next-generation battery materials technology used in the anodes(negative electrodes) of lithium-ion (“Li-ion”) batteries that enable electric mobility and storage of renewable energy.

Acquired – 12.79%

Why Sicona

- Sicona’s current generation silicon-composite anode technology delivers 50% to 100% higher capacity than conventional graphite anodes
- Its anode materials can deliver more than 50% higher cell energy density than current Li-ion batteries
- Sicona uses off-the-shelf equipment in a highly scalable and efficient manufacturing process to produce its active anode materials
- Producer of high performance active anode and binder materials into the fast growing global battery market

Synergies

To produce high-quality anode materials and reinforces the company's commitment to exploring innovative technologies in the battery material segment

About Invati Creations

- Invati, founded by alumni from IIM Kolkata and IIT Kharagpur, has a strong focus on engineering Lithium-ion electrode materials for efficient energy storage with higher energy density and longer battery life and using groundbreaking nanotechnology biosciences to provide real-world solutions.
- It also engages in R&D of various molecules and nanotech solutions, addressing challenges in life-science verticals, designing technology for diverse industries such as agrochemical, animal health and energy storage.
- Invati holds multiple patented and patentable technologies for novel molecule inventions spanning various applications, including the pioneering development of the first-ever broad-spectrum antiviral drug molecule.

Acquisition cost

40% stake for a consideration of Rs. 45.16 Crores

Directors

HSCL will have two nominee directors on the Board

Why Invati Creations?

Aligns with its vision of producing high-quality Lithium-ion (Li-ion) battery materials and reinforces its commitment in exploring innovative technologies in the battery material segment

A photograph of a large industrial facility, likely a lithium processing plant, at night. The facility is illuminated by numerous lights, and various structures, including tall chimneys and storage tanks, are visible. The background is dark, suggesting a night scene.

To produce 200,000 MTPA of Lithium Iron Phosphate (LFP) Cathode Active Material, catering to 100 GWh of Li-ion Battery, in phases in 5-6 years

1st Commercial plant for LFP Cathode Active Material in India to cater to domestic and global market – a pioneering step towards *Atma-Nirbhar Bharat*

Bringing breakthrough Innovation to the Indian and Global LiB Industry

- R&D on technology for Lithium Concentrate extraction and conversion to Lithium Carbonate and Lithium Hydroxide
- Next Gen R&D involving usage of AI to enhance the performance of battery cathode materials

Sustainable Sourcing

- Long term partnership with lithium concentrate producers in discussion
- Sustainable Supply Chain Model being developed for Customers
- Power sourced for the operations will primarily be sourced through renewable sources

Where we play a role

Pioneering Innovation and Sustainable Growth in Cathode Material Landscape

Large Global and Domestic Opportunity

Market Projection : Cathode Material demand to reach 9.4 million tonnes annually by 2030 for global LiB cell production

Domestic Demand : Expected growth to 311 KT (base scenario) and 499 KT (promising scenario) annually by 2030

Himadri's Capability

In-house R&D & Innovation

Continuous investment fosters innovation, keeping us at the forefront

Integrated Business Model

Optimal resource utilization, creating holistic value for stakeholders

Next-Gen Materials

Developing next-generation cathode materials, leveraging state-of-the-art lab and innovative capabilities

Project Plans and Highlights

Vision : Building the 1st Commercial plant for LFP Cathode Active Material in India, intending to produce 200,000 MTPA in phases in 5-6 years

Phase 1 Capacity : 40,000 MTPA, focusing on meeting domestic and global market demands

Phase 1 Timeline : Operational by Q3FY27

Sustainability : Emphasis on sustainable and eco-friendly products

Birla Tyres Ltd - Acquisition Highlights

- Himadri Speciality Chemical Ltd (HSCL, Strategic Partner) along with Resolution Applicant - Dalmia Bharat Refractories Limited (DBRL) participated in the corporate insolvency resolution process of Birla Tyres Limited.
- LOI from the Resolution Professional informing that the Committee of Creditors of the Corporate Debtor has approved the resolution plan submitted jointly by the HSCL and DBRL was received and accepted on August 22, 2023.
- The resolution plan was submitted to the NCLT, Kolkata Bench for its approval.
- Hon'ble NCLT, Kolkata Bench has approved on 19th October, 2023 the resolution plan submitted jointly by HSCL and DBRL for acquisition of Birla Tyres Limited under the corporate insolvency resolution process ("CIRP") in terms of the Insolvency and Bankruptcy Code, 2016 ("IBC").

Source of Funding

Transaction financed through internal accruals and debt

Status

Revamping of the asset is in progress

The total acquisition cost is Rs. 306 Crores. Additional capex is required to make the plant fully operational.

For Himadri Speciality Chemical Limited

The replacement cost for creating such a facility would have been to the tune of Rs. 3,400 Crores

Time consumed to create the asset organically would have taken 36 months, delay in opportunity

Forward integration into high margin niche offerings

Eligible for investment related incentives under State Government Policy

Sufficient land available for the future expansion

Birla Tyres Limited – Turnaround Opportunity

Having successfully forward integrated from Oil to Carbon Black, then to Speciality Carbon Black, Himadri stands at the threshold of an exciting transformation moving forward towards end customer, venturing into the world of Tyres

Existing capability

Sustainability Leadership

- › Over three decades of commitment to sustainable carbon solutions
- › Custom-made carbon black solutions tailored for tyre applications.

Quality Leadership

- › Production of carbon black with the lowest impurities
- › Achieved through backward integration into the cleanest feedstock.

Deep understanding of the Tyre Segment

- › Understanding of the tyre industry, with 70% of global carbon black production dedicated to tyre sector.

Strategic Acquisition

- › Strong synergies with HSCL operations, product integration and future vision
- › A forward integration step
- › Strategic fit towards Company's overall objective of being a lead player in EV space

Benefits of Acquisition

- › Foray into B2C segment
- › Expansion of Product Portfolio- High VA Niche products
- › New Segment- EV specialized tyres
- › Broadening of Customer base
- › Enhanced Geographical reach

Specialized Products

Marquee Clients across Industries

Sustainable Growth in Core Business through Value-added products

Our Core Business will continue to deliver strong growth

Coal Tar Pitch

Developed specialized pitch – one of the very few global manufacturers and Improved life of anodes through continuous process improvements

Battery Material

Developed technology to manufacture critical material for Lithium-ion Batteries and we are one of the few companies globally to have backward integration for this material. R&D towards next generation products is continuously on.

Carbon Black

Launched a series of application-specific speciality blacks with superior performance parameters which finds application in fibres, semicon cables, engineering plastics, inks and several other specialised applications.

SNF & PCE

Developed application-specific SNF for non-construction segment (agrochemicals, gypsum and latex) and next-generation products in PCE.

In-house R&D team enabled Himadri to forward integrate and regularly launch new specialised products

Positioned strong to cater the global demand for LiB raw materials

LiB Growth Potential

Himadri is actively positioning itself to cater to a significant portion of the global demand for LiB raw materials

Anode Material

- Strong R&D team and execution roadmap for Anode materials
- Developments in Natural, Synthetic, Hybrid and Silicon Anode Materials for multiple applications
- Ongoing interactions with potential customers for approval process

Positioned strong to cater the global demand for LiB raw materials

LiB Recycling

Recycling of Lithium-ion Batteries(LiB) will play a significant role:

1. Lowering the dependency on mined minerals and providing a circular economy structure
2. Reducing the total CO₂ emission

The Global Availability of EV batteries for recycling is expected to increase 25% YoY till 2040 resulting in a huge volume influx.

Himadri is keen to play a significant role in the LiB recycling in India.

The global supply of EV batteries for recycling is steadily increasing, driven primarily by production scrap before 2030 & end-of-life batteries after 2030*

Total CO₂e battery cell production emissions from a nickel-based lithium-ion battery with virgin versus recycled materials, kgCO₂e per kWh*

Primary Cathode Active Material Used now – NMC & LFP

Working of LFP battery

LFP batteries use lithium iron phosphate as the cathode material alongside a graphite electrode with a metallic backing as the anode.

Unlike many cathode materials, LFP has its atoms arranged in a crystalline structure forming a 3D network of lithium ions compared to the 2D slabs from nickel manganese cobalt, helping better electrical conductivity.

Phosphate in LFP is a non-toxic material compared to cobalt oxide, and LFP batteries are capable of delivering constant voltage at a higher charge cycle.
