Chairman's Message

It gives me great satisfaction on the impressive performance of the Kohinoor Foods Limited this financial year, as your company has delivered promising results compared to the previous year. The company has recorded an increase in revenues of 'Basmati Rice' exports by 40% mainly due to our concerted effort on Kohinoor Brand in international markets. In the similar way our processed food business has grown by 22% in revenues owing to introduction of range of new product variants & market penetration. Our endeavour has been to make 'Kohinoor' as the most preferred Indian food brand globally- though it's an ambitious proposition, but our whole team is focussed passionately and the results are very positive & encouraging.

Your company's export sales value stood at Rs. 6,849 Million as against Rs. 5,618 million last financial year. Our domestic sales recorded a steady top-line (Revenues) at Rs. 4,026 Million.

Your company's growth in the Export markets was due to the major impetus & focussed approach in the Middle East markets coupled with various promotional activities undertaken in key markets. Our Rice business, that includes Private Label as well grew in almost all geographies that we are present

in e.g., Asia Pacific, UK, USA, Africa and Middle East. We have added new product categories in our processed food business portfolio viz, Pure Ghee, Instant Mixes, Indian Sweets, Namkeens, premium Biscuits & Cookies. The said new product categories were successfully launched in select markets of Middle East, Asia Pacific & the US. The response so far has been very exhilarating and in future we intend to drive these categories aggressively. We will continue to expand our product offering in both in Ambient & Frozen range to give wide choice to our customers and add value & excellence to our export Food business operations.

To further augment our presence in Middle East, the company intended to enter into a Joint Venture agreement with Al Dahra International Investment LLC to allot 20% equity shares of our company as preferential issue and also to jointly develop and manage brown to white rice facility in Abu Dhabi with a capacity of approx. 60,000 MTs per annum scalable to 1,00,000 MTs and also to build storage facility of approx. 30,000 MT.

With the vision of bringing authentic Indian flavours to people all over the world, we want your company Kohinoor Foods Ltd., to become one of the leading name, not only in the Rice, but the entire Food category globally. In this endeavour, we would keep developing products to the needs of our consumers and come close to achieve our vision. We will continue to follow our successful strategies and try every step to make our future brighter & better. We would focus on improving our portfolio, increasing efficiency, product innovation and spread our business in order to get close to our ultimate goal of having 'Kohinoor' as the most preferred Indian food brand globally.

I am grateful to the Board of Directors for their unwavering support and guidance. I also take this opportunity to express my gratitude to all our consumers, business partners, employees and stakeholders who have shown their trust in us and have extended their constant support.

With best wishes,
Sincerely

Sd/-

"Kohinoor" - Finalist at 'Grocer SME Food & Drink Brand'

Indo European Foods Limited ('IEFL'), a 100% UK subsidiary of Kohinoor Foods Limited, added another feather to its cap with another year of achievement which saw Kohinoor Basmati rice becoming the Finalist of Grocer SME Food & Drink Brand of the year in 2013. This comes at a time when the UK market is at an all-time low in consumer confidence and premium brands are losing steam.

"Kohinoor" basmati – No. 1 in big bag category

Kohinoor was the #1* branded dry rice brand in big bags category in the UK Grocery Retail (*52 w/e 22 June 13 IRI value & vol. sales in SIG Grocery Outlets). This year, IEFL. was also the leading rice supplier in the big bags dry rice category (52 w/e 22 June 13 IRI value sales in SIG Grocery Outlets) with brands like Kohinoor, Trophy, Triple Diamond. Last year alone, Kohinoor added significant number of households to the brand achieving a tremendous penetration in the UK basmati market.

"Kohinoor" - Now listed at MORRISONS

Kohinoor Basmati is now available across all top 4 grocery retailer in UK with our flagship brand Kohinoor Platinum Basmati gaining new listing with Morrisons in February 2013

as well as having RH Amar, a leading fine foods distributor, on board, to distribute the smaller block packs in Impulse and Convenience Channels. Kohinoor is also making headway into the Foodservices channels with recruitment of various new foodservices accounts which will help to raise the profile of the brand among well-known chefs.

Christening of OLS - "Our Little Secret" – Value added gourmet food brand for the core fixture.

Apart from dry rice, Indo European Foods Limited has also now focussed its attention to enter the ever competitive core grocery fixture with introduction of a new brand "Our Little Secret" whose design and development was conceptualised in February 2013. The current product range comprises of Dine-In Kits, a complete meal solution offering consumers a premium restaurant experience in home, Pot Rice, a convenient quick two minute easy meal with less calories and Cooking Sauces, an exotic range of cooking sauces to cater to the growing trend of in-home ethnic meal consumption of the mainstream Brits. Several other New Product initiatives are further planned under the brand and four of the products under the brand have now secured final positions in Grocer New Product Awards 2013.

"Kohinoor" Launches new product lines for the World Foods & Ethnic market.

Whereas IEFL is trying to enter the core fixture grocery categories, it is also not losing focus on the ethnic grocery business. Several mouth-watering products are being planned for launch in the UK under the flagship Kohinoor brand including Kohinoor Premium Cookies, Kohinoor Instant Mixes and Kohinoor Savouries and Namkeens. These products will further help us to achieve deeper penetration in the competitive UK grocery retail landscape while elevating our status as a preferred supplier of World Foods with a wider range of products. Overall, this year IEFL had a satisfactory performance with roll out of new products and its existing products making headways into new accounts in major multiples, food services and the airline supply business

USA Operations:

Company has its wholly owned subsidiary based in New Jersey, Kohinoor Foods USA, Inc. that caters to the US and the Canada market. Through this subsidiary the Company has demonstrated its presence in both the Ethnic & the Mainstream segment of the business. Ethnic food in United States has traditionally meant Mexican and Chinese. The Indian foods and related food products are now being the hottest trend today. The modern day life and the rigors that tag along, leave most people with very little time for themselves. A need of healthy vegetarian food and growing awareness of the relationship between diet and health has driven consumer to look at food that has made the Indian convenience

food most popular in USA markets. The trend has been steadily evolving over the past decade.

We cater to over 3,000 ethnic stores across the US markets besides Kohinoor brand is widely available in the main stream supermarkets as well. Our success can be measured by the fact we are available in coveted retail chains like Target, Kroger, Wal-mart, Wegmans, Big Lots and many more and also in Canadian supermarkets such as Metro, Loblaw's, Wal-mart in Canada. In processed food category we have successfully launched this year new product variants such as Namkeens, Instant Mixes & Pure Ghee.

Dubai Operations

Rich Rice Raisers Factory LLC (RRR) was established as a joint venture Company in the financial year 2001 in Dubai to augment its marketing strengths in the middle-east region. RRR has a small rice processing facility in Dubai besides a full-fledged marketing office. RRR presently supplies Kohinoor range of basmati rice and other food products in mainstream stores like Lulu, Geant, Hyper Panda, KM Trading, Al Maya & Choithram Supermarkets. Kohinoor successfully launched frozen paneer in UAE and the response so far has been quite overwhelming, besides Kohinoor Foods also caters to the Iranian market from its Dubai base.

Overview - Food Processing Industry

The Indian market offers a huge potential for the food processing industry - more so because of the fact that it promotes two main growing factors of our Indian Economy - Industry & Agriculture. During the last one decade, India moved from a position of scarcity to surplus in Food. Given the trade in production of food commodities, the Food Processing Industry in India is on an assured track of growth and profitability. It is expected to attract phenomenal investment in capital, human, technological and financial areas. A reason why the Food Processing Industry sector in India has been accorded high priority by the Government of India, with a number of fiscal relief and incentives, to encourage commercialization and value addition. As per a study conducted by McKinsey and Confederation of Indian Industry (CII), the turnover of the total food market is approximately Rs.250,000 Crores, out of which value-added food products comprise Rs.80,000 Crores.

Basmati Rice

Like any other commodity business, Basmati Rice is a category which is little complex and widely unorganized. With an industry estimated consumption of around 1.5 million tonnes of Basmati Rice in India, this is one category which has grown significantly over the years and slated to grow further in times to come. Though majorly unorganized, but year on year this category is experiencing good number of conversions from unbranded to

branded packaged Basmati Rice in terms of consumptions in India. This is mainly due to introduction of branded and package basmati rice in many retail outlets. India's growing middle class has augmented the domestic demand of branded rice. Moreover, introduction of modern food retail formats has also propelled the packaged food market, facilitating the availability, visibility and accessibility of branded products. The domestic branded market in India is expected to grow at around 15%-20% as compared to 5% for unbranded rice. Eating rice is common habit in most of the Indian households and it is usually a part of one of the 3 meals cooked every day. Geographically, the consumption of Basmati is higher in the Northern & Western part of the country while culturally, its consumption is quite high in the Punjabi & Gujarati families. With the view of serving the best to their customers & employees, Basmati consumption is also higher in well recognized hotels & large institutions. The consumption of branded packaged Basmati Rice is also being driven by the modern retail that allows every consumer to select what they want.

Risks & Concerns

Macro-economic factors like recession, subdued demand and political uncertainty may affect the business of the Company and the industry at large as well. The Company is aware that uncertainties in business offer opportunities as well as downside risks and thus has identified and put in place mitigation tools for the same. Some key risk areas are:

Procurement risk: Adequate availability of key raw materials at the right prices is crucial for the Company. Being a generic natural product with low yield concentrated in a small region of the World, production of Basmati depends on the vagaries of nature. Therefore, any disruption in the supply due to a natural or other calamity or violent changes in the cost structure could adversely affect the Company's ability to reach its consumers with the right value proposition. However, we are ready with plans that might help us at such times. However, the Company's long term relationship with farmers built on trust ensures constant supply and thus over the years it has not faced any procurement problems. Also, adequacy of irrigation facilities in the Basmati producing regions mitigates these uncertainties.

High working capital requirement: Basmati rice requires to be aged for 9-12 months before selling, leading to huge working capital requirements. This results in low ROCE for the industry. Combating this risk, efficient working capital management system has been set in place by the Company and cash flow is monitored on daily basis.

Intense competition from unorganized sector: Another characteristic of this industry is the presence of unorganized

sector offering basmati in loose unbranded form which intensifies competition. The Company is moving towards branded products and has invested significantly in building strong brands which helps differentiate their product.

1. Significant Accounting Policies

(a) Basis of Preparation of Financial Statements :

The financial statements are prepared and presented under the historical cost convention, on the accrual basis of accounting and comply with the Accounting Standards prescribed by the Companies (Accounting Standard) Rules, 2006 and the relevant provisions of the Companies Act, 1956 to the extent applicable, as adopted consistently by the company.

(b) Use of Estimates and Judgments :

The preparation of financial statements are in conformity with the Accounting Standards which requires Management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures relating to the contingent liabilities as on the date of balance sheet and the reported amount of revenues and expenditures during the reporting period. The estimates and assumptions used in the Financial Statements are based upon Management's best evaluation of the relevant facts and circumstances as of the date of the Financial Statements. Examples of such estimates include useful life of fixed assets, creation of deferred tax asset, lease rentals and write off of deferred revenue expenditure. Actual results may differ from those estimates.

(c) Revenue Recognition :

The company follows the mercantile system of accounting and recognizes the income and expenditures on accrual basis except in case of significant uncertainties. Certain items of income such as insurance claim, market fees refund, overdue interest from customers etc have been considered to the extent the amount is accepted by the parties. The principles of the revenue recognition are given below:-

Sales are recognized as follows :

Domestic Sales - At the point of dispatches to customers.

Export Sales - At the time of issue of Bill of Lading.

Sales are recorded net of sales returns, price differences and sales tax.

Sale of license and duty draw back are recognized on realization basis.

(d) Fixed Assets:

Fixed assets are stated at cost less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price and any directly attributable cost of bringing the asset to its working condition for its intended use. All costs, including financing cost till commencement of commercial production, net charges on foreign exchange contracts, if capitalization criteria are met.

Capital work in progress is stated at cost. Capital WIP includes the cost of fixed assets that are not yet ready for their intended use, as on the balance sheet date.

(e) Depreciation:

Depreciation is provided on written down value basis at rates provided in Schedule XIV to the Companies Act, 1956. The depreciation rates which are different from the principal rates specified in Schedule-XIV are as follows:-

Depreciation on addition to fixed assets is provided on pro-rata basis from the date the assets are acquired/installed. Depreciation on sale/deduction from fixed assets is provided for upto the month of sale, deduction and discardment as the case may be.

In case of items having value of Rs. 5,000/- or below, acquired during the year have been charged to profit & loss account at 100% in the year of purchase.

(f) Impairment of Assets:

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets net selling price and value in use. In assessing value in use the estimated future cash flows are discounted to their present value at the weighted average cost of capital.

(g) Expenditure Incurred during Construction Period:

Expenditure directly relating to construction activity is capitalized, Indirect expenditure incurred during construction period is capitalized as part of the indirect construction cost to the extent to which the expenditure indirectly related to construction or is incidental thereto. Other indirect expenditure (including borrowing costs) incurred during the construction period which is not related to the construction activity nor is incidental thereto is charged to the Statement of Profit and Loss. Income earned during construction period is deducted from the total of the indirect expenditure.

All direct capital expenditure on expansion are capitalized. As regards indirect expenditure on expansion, only that portion is capitalized which represents the marginal increase in such expenditure involved as a result of capital expansion. Both direct and indirect expenditure are capitalized only if they increase the value of the asset beyond its original standard of performance.

(h) Leases:

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term are classified as operating lease. Charges are recognized as an expense in the Statement of Profit and Loss on a straight line basis over the lease term.

- (iii) Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets are recognized on carry forward of unabsorbed depreciation and tax losses only if there is virtual certainty that such deferred tax assets can be realized against future taxable profits. Unrecognized deferred tax assets of earlier years are re-assessed and recognized to the extent that it has become reasonably certain that future taxable income will be available against which such deferred tax assets can be realized.

The obligation is measured at the present value of estimated future cash flows. The discount rates used for determining the present value of obligation under defined benefit plans, is based on the market yields on Government securities as at the balance sheet date, years approximating to the terms of related obligations. Mark to market exposure arising out of derivative contracts has not been reflected in the financial statements.

The Company follows the Accounting Standards which are made mandatory.
