Management Discussion and Analysis

Cochin Minerals and Rutile Limited is a 100 percent Export Oriented unit in the Mineral Processing sector with manufacturing, marketing and research capabilities. The Company's products and their applications are:

a) Main Product

The main product is synthetic Rutile which finds application as raw material for the Titanium pigment and titanium sponge/metal industry. The annual licensed and installed capacity is 50000 MT.

b) By-Products

The following are the by-products.

- i) Ferric Chloride which has applications as an etching agent and is an effective coagulant for drinking water and Effluent Treatment.
- ii) Ferrous Chloride is coagulant for drinking water and effluent treatment.
- iii) Iron Hydroxide (Cemox) used for brick / tile making and substitute for iron ore.
- iv) Recovered TiO₂ as a cheaper substitute for TiO₂ pigment.

Raw Materials

The main raw materials of your company are Ilmenite and Hydrochloric Acid. The rationale of setting up of this plant was the indigenous availability of both these items. Now, while Hydrochloric Acid is indigenously available, the availability of ilmenite from domestic source has shown a declining trend. In the last three years including the year under review, the company was facing a major challenge in its procurement from domestic source. The supply from the domestic market was quite restricted. In the international market also the supply position was not good, the prices were high and the quality was inferior. Your company made all efforts to procure the material from various sources, and maintained the quality of product through process adaptation. The Company had initiated action for carrying out mining and mineral separation as early as in the year 1991. The Company had also promoted Kerala Rare Earths and Minerals Limited (KRML) during the year 2001 and applied for mining lease in the light of the change in policy by the Government of India and the Government of Kerala. Although the company obtained necessary approval from Central Government, mining lease from State Government could not be obtained.

The appeal filed by Kerala Rare Earths and Minerals Limited before the Appellate Authority on rejection of Mining lease applications by the State Government has been favourably disposed with direction to the State Government for issue of Mining Lease.

The Hon. High Court of Kerala has passed an order on 21st February, 2013, in the writ petition filed by K R E M L, with a direction to the Government of Kerala to do the needful for grant of mining lease to the company within a period of six months, which was subsequently extended upto 31st May 2014. Thereafter, the State Government filed a writ appeal with Hon. High Court. The Hon. High Court dismissed the above appeal. Subsequently, the State Government filed a special leave petition with Honourable Supreme Court against the aforesaid order of the High Court.

The Hon. Supreme Court has issued a final judgement on 8th April 2016 dismissing all the appeals filed by the Government of Kerala in the matter of issuing mining lease to M/s Kerala Rare Earths and Mineral Limited.

Operational Performance

The operational performance highlights for the year 2015-2016 are given below:

	2015-16	2014-15
Gross Revenue (Rs. lakhs)	15925.73	11939.88
Net Profit/Loss (Rs. lakhs)	(1403.92)	(2150.59)

The Company could make improvement in marketing the by-product Ferric Chloride during the year. The loss during the year was mainly due to steep fall in the price of Synthetic Rutile and high cost of production from use of imported Ilmenite due to non-availability of domestic raw material. The price of Synthetic Rutile which was in the range of US\$ 2000/- came down to about half the price in 2013-14 and about 1/3rd during 2015-16.

Outlook

The demand for the main product viz. Synthetic Rutile, has decreased due to recession in international market. Further, the scenario in respect of supply of main raw material, ilmenite, from domestic sources also remains uncertain. Supply from outside sources in terms of required quantity and quality is also uncertain and prices remain volatile. However the company is making all efforts to maintain maximum level of production. Your Directors are concerned about the shortage in availability of ilmenite and decrease in demand for synthetic Rutile and are making all out efforts for sourcing of Ilmenite and marketing of the product. The situation is expected to marginally improve in the current year. In the longer term, in view of the Supreme Court judgment the company expects that the State Government will grant mining lease so that the company will have its own source of Ilmenite.

The company is also taking steps to increase the production and marketing its by-products viz. Recovered TiO₂ and Ferric Chloride.

Risks, Concerns and Strength

The risk factors, as far as your company is concerned, are the unpredictable situation in the availability and price of Ilmenite and Hydrochloric Acid, the major and critical raw materials of your company.

The demand and volatile nature of prices of Synthetic Rutile and foreign exchange fluctuations have impact.

The market scenario for TiO₂ Pigment and Titanium Metal industries where-in Synthetic Rutile is used has not been favourable. Moreover due to technological developments, use of Ti Slag as raw material for Pigment and Ti Metal is posing a competition to Synthetic Rutile.

The major strength of your company is that its products are of highest International Standards and are well accepted by the buyers. Your company continues to be certified ISO 9001 : 2008 by the prestigious agency Bureau Veritas Quality International, with accreditation from UKAS London and NABCB India. The Company also got certification from NSF International for our products Ferric Chloride, Ferrous Chloride and Ferrous Chloride with hydrated Titania catalyst that these products conform to NSF/ANSI standard 60 for drinking water treatment.

Skilled and dedicated work force is another strength of our Company.

The company complies with all pollution control and environment protection regulations. The company also undertakes various environment protection programmes such as tree planting, water conservation measures, water purification and energy saving initiatives etc.
