Global economy

GDP growth – 2019 and 2020 projections in Oct 2019
(%YoY)

- IMF revises global GDP forecast for 2019 to 3.0% from 3.2% earlier
- US growth outlook has softened on the back of contraction in manufacturing, while service sector is in moderate expansionary mode. Fed's accommodative policies are supportive for moderate economic expansion
- Euro area growth remains fragile on the back of trade and political uncertainties
- Japan growth outlook is subdued as headwinds of external trade weakness and fiscal impulse fades way
- Chinese growth slowing down on expected lines. Policymakers likely to facilitate proactive fiscal and monetary measures to mitigate the downward pressure on economy
- Resolution of trade wars to stabilise global growth – geopolitical tensions are added risks

Resolution of trade conflicts and combination of fiscal and monetary policies to aid recovery

* China continued to close most of its outdated induction furnaces in 2017, a category which was not captured in official statistics. However it is believed that some degree of under-reporting from 2018 could still affect the 2019 growth rate. While nominal steel demand growth in 2019 stood at 7.9%, the dynamics of steel using sectors suggest growth of 4.0% in real terms. Accordingly, real global growth in 2019 is 2%.

Indian economy

Industry (GVA) Growth and Gross Fixed Capital Formation

- Economic activities during the quarter were weak, underpinned by credit squeeze, weakened consumer sentiment and prolonged monsoon season - IIP growth and manufacturing PMI dropped sharply
- Government has undertaken a series of measures -reduction in corporate tax rate, unclogging pending government payments, GST refunds which augurs well for the business sentiments and likely to aid economic growth
- Government is mulling measures to monetise investments in order to generate resources for infrastructure investment – likely to support an uptick in GFCF cycle over the medium term
- Weaker automotive volumes witnessed a modest recovery in September (vs Aug) on the back of festivity demand and various initiatives of government to facilitate credit availability in the system
- Good monsoon bodes well for recovery in the underlying rural demand and consumer sentiments
- Central bank's accommodative stance is supportive for growth

Total Vehicle Production vs. IIP

IIP - Use Based (Consumer)

Supportive fiscal and monetary measures likely to spur investment and consumer demand

Domestic steel demand growth likely to be ~ 5% in FY20

Government Initiatives for Steel Sector

Steel Import Monitoring System- SIMS

- ❖ SIMS implemented from 16th September
- ❖ Monitor real time import data on quality, quantity and value
- ❖ Arrest circumvention of mis-classification, mis-declaration and avoid under / over-invoicing
- ❖ Prevent imports of defective steel

Anti-Dumping Duty on Galvalume

- ❖ Anti-dumping duty ranging from \$28-200/t implemented on Galvalume products wef 15th Oct
- ❖ Imports from China, South Korea and Vietnam are subject to duties

Others

- ❖ **Draft Steel Scrap Policy**- Promote circular economy via resource conservation, energy efficient and low carbon foot print
- ❖ **Safety codes** - Draft code and guidelines for improving standards of safety in Iron and Steel sector
- ❖ **Competitiveness** - a) Proposal to reduce royalty from 15% to 5% on low grade Iron ore fines, b) Remission of Duties or Taxes on Export Products (RoDTEP) to replace existing MEIS
- ❖ **Steel usage** – Engagement with international agencies to promote steel intensive design for roads, bridges and commercial & residential housing

Q2 FY20 Results – Drivers of Performance

Volumes	- Production volume decreased by 8% YoY on back of prolonged monsoon, planned shutdown and slowdown in the automotive sector - Overall sales volume decreased by 9% YoY primarily driven by weak domestic demand, tactically increased exports (68% YoY) and share of exports in shipments stood at 31%
Realisation	Average sales realization was lower YoY, driven by lower domestic steel prices and higher share of exports
Other operating income	Recognized investment linked incentive (pertaining to Dolvi works) of ₹ 512 crores during the quarter, including ₹ 466 crores in relation to earlier years.
Operating Costs	- Lower cost of key raw materials like iron ore and coal - Ferroalloys and electrode costs are lower - Power, fuel costs and consumables decreased with lowering energy prices
Subsidiaries	JSW Steel Ohio (Acero) and JSW Steel Italy (Aferpi) are ramping up their operations
Taxation	Reversal of deferred tax liability amounting to ₹ 2,207 crore relating to the temporary differences that would reverse post migration to the new tax rate
