## MANAGEMENT DISCUSSION AND ANALYSIS

### INDUSTRY STRUCTURES & DEVELOPMENTS :

The Indian Textiles Industry has an overwhelming presence in the economic life of the country. Apart from providing one of the basic necessities of life, the textiles industry also plays a vital role through its contribution to industrial output, employment generation, and the export earnings of the country.

The sector contributes about 14 per cent to industrial production; 4 per cent to the country's gross domestic product (GDP); 17 per cent to export earnings. It is the second largest provider of employment after agriculture and provides direct employment to over 35 million people. Thus, the growth and all round development of this industry has a direct bearing on the improvement of the economy of the nation. India has the potential to increase its textile and apparel share in the world trade from the current level of 4.5 percent to 8 percent and reach US \$ 80 billion by 2020. The most significant change in the Indian textile industry has been the advent of man-made fibres (MMF). India has successfully placed its innovative range of MMF textiles in almost all the countries across the globe.

### OPPORTUNITIES AND THREATS:

The potential size of the Indian textile industry is expected to reach US\$220 Billion by 2020. A strong raw material production base, a vast pool of skilled and unskilled personnel, cheap labour, good export potential and low import content are some of the salient features of the Indian textile industry. We expect a huge growth in demand for our products in the upcoming years owing to the total Indian urban population which currently stands at 307 million which will provide huge growth opportunities. The Company predicts good market demand for the products which shall improve the margins of the Company substantially.

On the flip side, the Indian textile industry faces a host of constraints such as Fragmented structure with the dominance of the small scale sector, high power costs, higher interest rates and transaction costs and unfriendly labour laws. India's textile industry urgently needs to diversify beyond its traditional markets to remain competitive in the wake of the global economic downturn. Additionally, the industry is vulnerable to its over dependence on western markets and had not sufficiently embraced new technology to remain competitive against China, Korea and Indonesia. Moreover the textile industry is fiercely competitive and this remains as one of the major concerns as the threat of competition arises from organized as well as disorganized sector.

### PRODUCT WISE PERFORMANCE:

BSL is one of the leading manufacturers of Fashion Fabrics and Yarns in India. The Company produces a wide range of polyester viscose fabrics and premium range of Worsted suitings, including Cashmere, Mohair, Angora and Camelhair blends. For the production of special furnishing fabrics, the company uses imported Silk material.

To improve the operational and financial performance the company has:

- Implemented various energy-saving initiatives.
- Introduced new, high-value fabric collections in the market.

The Product wise performance during the year is as under :

( ₹ in Crore)

### OUTLOOK:

The outlook for textile industry is very optimistic. It is expected that Indian textile industry would continue to grow at an impressive rate. Assuming the inflation is brought under control and input prices revert to a more moderate level, the domestic market is expected to continue to deliver a healthy growth. The raw material prices are expected to stabilize. The demand growth is likely to push up due to overall economic recovery. The government is also very optimistic of the textile trade and with the pro-active government policies, the Indian textile industry can have a dominant share in the world trade after China. We are also taking a long term view of the industry and hope to increase turnover and margins from the current position. Simultaneously the company is strengthening the quality of its products and reduces the conversion cost. These initiatives are expected to positively influence the working of the company. However rising energy prices and increase in labour costs due to hike in minimum wages will lead to increase in manufacturing costs.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
