MANAGEMENT DISCUSSION & ANALYSIS REPORT FY 2016-17

GLOBAL ECONOMY

Global output grew steadily in line with previous year. This stable average growth rate, however, masks divergent developments in different country groups. There has been a stronger-than-expected pickup in growth in advanced economies, due mostly to a reduced drag from inventories and some recovery in manufacturing output. In contrast, there was an unexpected slowdown in some emerging market economies. The picture for emerging market and developing economies (EMDEs) remains much more diverse. The growth rate in China was a bit stronger than expected, supported by continued policy stimulus while activity was weaker than expected in some Latin American countries facing recession.

Oil prices have slightly increased recently, reflecting an agreement among major producers to trim supply.

The U.S. Federal Reserve raised short-term interest rates in December, as expected, but in most other advanced economies, the monetary policy stance has remained broadly unchanged.

INDIAN PAPER INDUSTRY

India is set to emerge as the world's fastest-growing economy ahead of China, as per the World Bank's recent report.

India has 17% of the world's population yet accounts for only about 3% of the world's production of paper and paperboard providing ample opportunities to the Industry. Indian Paper Industry has been growing along with the rising level of literacy, growth in organized retail and surging aspiration levels. Paper usage has increased over the years. Yet, the per capita consumption in the country is estimated to be barely 11 kgs as compared to Global average of 57 kgs. We expect the growth in paper consumption to remain steady in the near future.

SWOT ANALYSIS

Strengths:

There is no denying of fact that the Indian Pulp & Paper industry has the potential to play an important role in meeting the national objectives of Education, Literacy, and Employment Generation—that too in the rural areas. There is large and growing domestic paper market.

Weaknesses:

India's wood resources suitable for paper production are inadequate. Cost of wood is therefore higher in comparison to the rest of the world. Since there is absence of enabling policies favoring corporate plantation, securing future wood supplies is Industry's biggest challenge.

It is also a capital-intensive Industry impacted by domestic interest rates. Further highly skilled and job specific manpower are not easily available.

Opportunities:

For Indian paper industry, the demand drivers and growth triggers come from a combination of factors such as:

- i) Growing per capita disposable income.
- ii) Improving aspiration levels of the people.
- iii) Expanding population.
- iv) Widening spread of education and literacy throughout the country.
- v) Increasing size of the service industry.
- vi) Higher level of industrial activity and rising corporate spending.

Threats:

Our country is not cost competitive in fiber and energy prices- two main factors of production.

In addition, countries like Indonesia with very competitive input prices are able to export into India at zero duty under the FTA, thus exposing domestic Industry to unfair competition.

SOCIAL FARM FORESTRY

The Company's social farm forestry program has become an economic driver for re-generation of green cover. The program is of immense importance to the growth of rural economy and facilitate sustained availability of raw material to the company. During the year, the company further stepped-up propagation and distribution of plants and the area coverage with the help of farming community.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph (f) under 'Report on Other Legal and Regulatory Requirements' of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Star Paper Mills Limited ("the Company") as of March 31, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

(e) Impairment of Fixed Assets

Fixed Assets are reviewed at each balance sheet date for impairment. In case events and circumstances indicate any impairment, recoverable amount of fixed assets is determined. An impairment loss is recognised, whenever the carrying amounts of assets exceeds recoverable amount. The recoverable amount is the greater of assets net selling price or its value in use. In assessing the value in use, the estimated future cash flows from the use of assets are discounted to their present value at appropriate rate.
