The after effects of the major fire accident that your company had faced towards the end of 2013-14 had serious implications in its performance in the financial year 2014-15 as well, since your company was able to carry on the manufacturing activity in only one of its manufacturing units. Your company is taking necessary measures to seek appropriate remedies in the matter. Based on expert legal advice, the Company believes that it has a good case and expects a favourable decision from the regulatory authorities.

Your company continues to perform well on the trading sector and the growth trajectory has been maintained on an upward trend with the increase in sales commission by 22% in the year 2014-15 as against 2013-14. With the impressive performance over the last 4 years, Indian Oil Corporation Limited (IOCL) has provided an opportunity to your company to expand the trading business geographically and to venture in the North

Indian markets in the states of Madhya Pradesh, Rajasthan and Chattisgarh. The Company is exploring the market at present and it is expected that growth in the northern region shall be at a slower pace than the southern region as the market in the South is well established.

INDEPENDENT AUDITORS' REPORT:

Clarification on Auditors observations is given below:

'Emphasis of Matter' of the Independent Auditors' Report:

Report: We draw attention to note no. 12 of Schedule 1 forming part of the financial statements in respect of the status of Insurance Claim which is self explanatory. Our opinion is not modified in respect of this matter.

Managements' Reply:

As mentioned in Note no. 12 of Schedule 1, the estimates of claim both with regard to loss of stock and capital goods have been prepared in consultation with experts and as per guidelines communicated by them. The estimates were also modified on the basis of discussions with the surveyors appointed by Insurance Company.

During the year, company had received a letter of repudiation from one of the insurance company against the claim made in the earlier year in respect of loss of stock. Based on the legal advice received the stand taken by the insurance company is not tenable and the company has already filed the objection/appeal against the said letter. The Company has made various representations to the insurance company to facilitate redressal of this claim through grievance mechanism laid down as per IRDA Guidelines. However, the insurance company has been denying an opportunity to present our case to them. Your company is taking all remedial measures and seeking expert legal advice to recover the claim amount.

The company has obtained legal advice on the matter and has approached the Honorable Court seeking appropriate directions to the Insurance Company for appointment of an Arbitrator to resolve this matter. The Company is confident that based on the facts available on record the process of arbitration will render justice to the Company's application. This has been appropriately dealt in the books of accounts.

Lakshmmi Subramanian & Associates, Practicing Company Secretaries to conduct the Secretarial Audit of your Company. The Secretarial Audit Report is annexed herewith as "Annexure - I" to this Report.

SECRETARIAL AUDIT REPORT:

Clarification on Secretarial Auditor's observation is given below:

We further report that during the audit period, no events have occurred during the year, which have a major bearing on the Company's affairs except the Order dated 09th December 2014 passed by SAT against BSE & SEBI condoning the delay in submitting the Audited Financial Results of the Company for the quarter ended 31.12.2013 and year ended 31.03.2014 due to the major fire accident, occurred during that period and application for delisting of equity shares from Madras Stock Exchange made during the year 2014-15 for which the delisting order was received by the company in May 2015.

Management's Reply:

The company had, in the month of November 2013 faced a major fire accident in one of its factories at Athipedu. The accident resulted in huge capital loss for the company. Since the loss amount was large and the insurance survey was under process, the company was not able to submit the unaudited financial results for the quarter ended 31st December, 2013 and the audited financial results for the year ended 31st March 2014.

The Stock Exchange had, in this regard issued a notice to the company for demanding compliance of Clause 41, non-compliance of which would lead to suspension. As the delays made for filing was due to an exceptional circumstance, the company had requested for exemptions well before the time of filing the above-said financials. However, the stock exchanges and SEBI did not consider our grievance and issued a notice for suspension of trading in shares of the company vide their letter dated 19th August 2014.

The company, aggrieved by the communication, filed an appeal with the SEBI Appellate Tribunal. The case was heard on 9th December, 2014 by SAT and without going into the merits of the matter, SAT disposed the appeal setting aside BSE's impugned order for suspension of trading in shares with the stock exchange and also set aside the penalty that was levied for non-filing of financial statement.

The company had, however, subsequently submitted the unaudited results for the quarter ended 31st December, 2013 and the audited financial results for the year ended 31st March, 2014 in its meeting held on 13th August, 2014.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT**WORLD ECONOMIC OUTLOOK:**

Global growth is forecast at 3.5 percent in 2015 and 3.8 percent in 2016, with uneven prospects across the main countries and regions. Growth in emerging market economies is softening, reflecting an adjustment to diminished medium-term growth expectations and lower revenues from commodity exports, as well as country-specific factors. The outlook for advanced economies is showing signs of improvement, owing to the boost to disposable incomes from lower oil prices, continued support from accommodative monetary policy stances, and more moderate fiscal adjustment. The distribution of risks to near-term global growth has become more balanced relative to the second half of the year 2014 but is still tilted to the downside. The decline in oil prices could boost activity more than expected. Geopolitical tensions continue to pose threats and risks of disruptive shifts in asset prices remain relevant. In some advanced economies, protracted low inflation or deflation also pose risks to activity.

China and India have both experienced broad improvements in macroeconomic conditions, especially as low energy prices eased inflationary pressures and import bills. Financial markets gained in China but remained volatile in India. Forecasts for both countries have been tempered slightly for 2015. Conditions in India appear to be improving and growth through 2016 is forecast at around 6.5 percent.

INDIAN ECONOMIC CONDITIONS:

2014-15 has been a year marked by excitement and its share of challenges. The decisive political mandate accorded in the general elections set the stage for surging hopes for a rapid economic turnaround of the Indian economy. While many macro-economic indicators have improved during the course of the year, the journey to realize the growth potential of the economy is slow and challenging.

On the macro front, the biggest comfort came from the sharp drop in crude prices. For a large net importer like India, the decline in crude prices has helped in controlling the trade deficit and easing inflation. While the headline indicators point towards steady improvement, the recovery on the ground has been rather slow. Lower inflation has not resulted in significant improvement in demand conditions. The demand conditions have been quite challenging across sectors as borne out by the slow improvement in industrial production. Some of the other key underlying drivers like credit growth and fixed capital formation also highlight a very sluggish environment.

The Government envisages GDP growth to accelerate to 8% in Financial Year 2016 driven by strengthening macroeconomic fundamentals and implementation of policy reforms recently announced. Reforms like e-auction of coal mines and telecom, FDI hike in insurance, speedier regulatory approvals etc will be critical growth enablers to de-bottleneck stalled projects, improve the investment outlook and ease of doing business in the country.

INDUSTRIAL TREND AND FIBC MARKET OUTLOOK:

The Indian packaging industry, growing at an annual rate of more than 15 per cent, is valued at \$ 15.6 billion (INR 85,000 crore). In the next five years, the sector is expected to triple to around \$ 60 billion. Not only is the industry growing rapidly but it is also creating lucrative jobs for those who find a career in it.

The INR 140 billion Flexible Bulk Packaging Industry that includes woven sacks, leno bags, wrapping fabric and Flexible Intermediate Bulk Container (FIBC) is growing at over 20% with FIBC containers expected to grow three fold in the next 5 years riding an increased industrial production and a shift toward higher-value containers offering enhanced performance and supply chain efficiency. In fact, the global slowdown has been an opportunity for the Indian FIBC manufacturers as the production cuts by the companies in Europe and USA has resulted in the sourcing shifting to India adding an important factor to the growth story.

World demand for bulk packaging is projected to increase 5.0 percent annually to \$59.2 billion in 2018. This will represent an improvement over the 2008-2013 period, when growth in demand was particularly sluggish in the world's most developed markets, especially Japan and Western Europe. Accelerating growth in global manufacturing activity will be the primary impetus for demand gains. Although the improved performance for bulk packaging in developed markets is notable, the fastest gains will be in developing regions such as the Africa/ Mideast region, the Asia/Pacific region and Central and South America. India and Indonesia will be among the fastest growing national markets.

Flexible bulk packaging will register slightly faster growth than rigid packaging. Gains in flexible bulk packaging will be led by film wrap and FIBCs. FIBCs will register strong advances due to the advantages they offer in terms of loading and unloading products, their ability to handle greater quantities of product per container and efficiency advantages in terms of their reuse in closed-loop distribution systems.

SWOT ANALYSIS:

STRENGTHS AND OPPORTUNITIES:

Your Company enjoys the benefit of experience of over two decades in the manufacture of FIBCs. The major strengths of the company are that it has a diverse market with customers in over 30 countries. The strength of the business lies in the supply of the manufactured FIBCs that reach the end users and not the traders in both for domestic and export sales. Your Company has maintained a steady growth in spite of intense competition and slowdowns in the global markets due to its ability to adapt new technologies, product innovation, identifying and meeting the customers' expectation in terms of high quality, prompt service & performance and development of new markets through retail distribution network. The management expertise and their association with the polymer processing industry have always been an added advantage to your Company.

The planned utilization of capacity will enable us to achieve growth and increase our geographical coverage.

WEAKNESSES AND THREATS:

Fluctuating prices of raw materials/ Raw Material shortages – The main raw material used in the manufacture of FIBC is polypropylene, which is a crude derivative and subject to price fluctuations. Shortage of raw materials further aggravates stiff competition for Raw materials. Raw materials account for 60-70% of costs in FIBC manufacturing and the end result of this would be rising pressure on prices. However, with proper planning we have managed to keep these uncertainties under control.

STRATEGIES:

Your Company is still on a recovery mode after the fire accident that happened during November 2013 at Unit – II situated at Athipedu. Your company has been able to manage with the alternative options available so far and the sustained efforts by the management has improved the performance of the company after the fall and it is expected that the capacity utilization shall continue to be optimal in the current financial year. Your company expects that the insurance claim issue shall be sorted out at the earliest and the claim money will be a huge boost for managing the funds and working capital of the company.

REVIEW OF OPERATIONS:

Your Company's top line performance has increased by 15% from Rs.83 crores to Rs.96 crores and your company has managed to improve the bottom line by 40% from a loss of Rs.2 Crores in the year 2013-14 majorly due to fire accident to Rs.1 Crore this year. The Company's production capacity had gradually picked up during the course of the year and the momentum continues and it is expected that the company will recover completely in a short span of time.

FINANCIAL ANALYSIS:

The volatility of dollar price in the year 2013-14 led to forex loss for the company. The management revised the forex policy in order to align with the recent market trend. This has resulted in a positive gap in terms of the dollar price at present and it is expected that it will remain the same way in the near future as well. Your company has recovered the forex losses made last year and it is keeping adequate coverage of its exports and imports.

SEGMENT WISE PERFORMANCE:

Manufacturing

Your Company is primarily engaged in the business of manufacturing of polymer-based woven bags. It also deals in trading of raw materials to further enhance its performance. The performance of your company in the manufacturing division has been encouraging in the last financial year as it has been able to garner optimal productivity with limited resources. During the Financial Year your company has been able to complete the orders and satisfied the customers with just one functional manufacturing unit and also with assistance from other satellite units where the machineries and equipments from closed Unit II has been shifted. The production performance has been encouraging for the company and it is expected that your company shall be in a position to make good the losses in the next financial year.

Trading

Your company had been appointed as the Del – Credere Associate cum Consignment Stockist (DCA/ CS) of Indian Oil Corporation Limited for Tamil Nadu, Pondicherry and Kerala in the year 2009. The performance of trading division continues to be encouraging and is on an upward trend. This division continues to contribute to the profitability of the company. As a rare opportunity, IOCL has given a chance to your company to venture

into the North Indian markets starting with 3 states viz. Madhya Pradesh, Rajasthan and Chhattisgarh. Though the trading in the new regions has just begun, the management has decided to venture slowly in order to analyse the sales trend in the region.

The profit from trading has enhanced this year also to an extent of 22% as against the previous year. The commission sales from trading earned in the current year amounts to Rs.125 Lakhs as against Rs.102 Lakhs in the previous year. Jumbo Bag Limited continues to hold the highest sales position among all agents in South India in 2014-15 consecutively for the last two years.

The company had, in the month of November 2013 faced a major fire accident in one of its factories at Athipedu. The accident resulted in huge capital loss for the company. Since the loss amount was large and the insurance survey was under process, the company was not able to submit the unaudited financial results for the quarter ended 31st December, 2013 and the audited financial results for the year ended 31st March 2014.

The Stock Exchange had, in this regard issued a notice to the company demanding compliance of Clause 41, non-compliance of which would lead to suspension.

As the delays made for filing was due to an exceptional circumstance, the company had requested for exemptions well before the time of filing the above-said financials. However, the stock exchanges and SEBI did not consider our grievance and issued a notice for suspension of trading in shares of the company vide their letter dated 19th August 2014.

The company, aggrieved by the communication, filed an appeal with the SEBI Appellate Tribunal. The case was heard on 9th December, 2014 by SAT and without going into the merits of the matter, SAT disposed the appeal setting aside BSE's impugned order for suspension of trading in shares with the stock exchange and also set aside the penalty that was levied for non-filing of financial statement.

The company had, however, subsequently submitted the unaudited and the audited financial results in its meeting held on 13th August, 2014.

Other than the above issue, there was no instance of non compliance by the Company on any matters relating to the capital markets; nor was there any penalty / strictures imposed by the stock exchanges or SEBI or any other statutory authority on such matters, during the last three years.

SCHEDULES FORMING PART OF ACCOUNTS

SCHEDULE 1

CORPORATE INFORMATION

As a part of the Rs.1,500 million **BLISS Group** of companies, Jumbo Bag Ltd. was established in the year 1990. Started with an initial capacity of 7,20,000 jumbo bags (FIBCs), we now have the capacity to manufacture over 3.6 million bags per annum and this has propelled us to the position of market leaders.

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

1.1 Basis of preparation of financial statements

The financial statements have been prepared on accrual basis under the historical cost convention and in accordance with generally accepted accounting principles in India and materially comply with the Mandatory Accounting Standards notified by the Central Government of India under the Companies (Accounting standards) Rules, 2006 and with the relevant provisions of the Companies Act, 2013.

1.2 Use of estimates

The preparation of financial statements in conformity with Indian Generally Accepted Accounting Policies (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure relating to contingent liabilities as at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

1.3 Fixed assets and depreciation

Fixed assets are carried at cost of acquisition less accumulated depreciation. The cost of fixed assets includes freight, duties, taxes and other incidental expenses relating to acquisition. Duties and taxes where MODVAT and VAT are applicable have been appropriately treated. Where fixed assets have been acquired from a country outside India, the cost of these fixed assets also includes exchange differences (favorable and unfavorable) arising in respect of foreign currency loans on other liabilities incurred specifically for the purpose of their acquisition. Borrowing costs related to the acquisition or construction of the qualifying fixed assets for the period up to the completion of their acquisition or constructions are capitalized. Losses arising from the retirement and the gains or losses arising from disposal of fixed assets which are carried at cost are recognized in the Statement of Profit and Loss.

Depreciation on the fixed assets is provided on a straight line method, over the estimated useful life of the assets. Effective 1st April 2014, the company depreciates its Fixed Assets over the useful life in the manner prescribed in Schedule II of the act, as against the earlier practice of depreciating the rates prescribed in Schedule XIV of the Companies Act, 1956.

Depreciation on additions to assets or on sale / disposal of assets, is calculated on pro rata basis from the month of such addition or upto the month of such sale / disposal as the case may be.

1.4 Impairment of assets

In accordance with Accounting Standard 28 (AS 28) on Impairment of assets, where there is an indication of Impairment of the Company's assets, the carrying amount of the Company's assets are reviewed at each balance sheet date to determine whether there is any impairment on the assets based on internal/external factors. Any impairment loss, if any, is recognized in the statement of Profit and Loss, wherever the carrying amount of an asset exceeds its estimated recoverable amount which is estimated at the higher of its net selling price and its value in use. In assessing the value in use, the estimated future cash flows are discounted to the present value at the weighted average cost of capital. After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful life. Previously recognized impairment loss is further provided or reversed depending on changes in circumstances.

1.5 Revenue recognition

Revenue from sale of manufactured goods, including scrap, is recognized on transfer of all significant risks and rewards of ownership to the buyer which is generally on dispatch of goods.

Domestic sales inclusive of sales tax, Excise duty, net of sales returns and quantity discounts is on accrual basis.

Export sales are accounted on the basis of dates of invoicing from the factory.

Job work and other service revenues is recognized as and when services are rendered.

Income from Investments/other income is recognized on accrual basis.

Interest on deployment of surplus funds is recognized using the time proportionate method based on underlying interest rates.

1.6 Inventories

Inventories are carried at the lower of cost and net realizable value. The comparison of cost and net realizable value is made on an item-by-item basis. Cost comprises purchase price and all incidental expenses incurred in bringing the inventory to its present location and condition.

The method of determination of cost is as follows:

- o Spares and Consumables are valued at cost.
- o Raw-Materials & Intermediates are valued at weighted cost – (net of MODVAT).
- o Work-in-Process is valued at material cost plus direct Manufacturing Expenses.
- o Finished Goods are valued at the lower of cost or net Realisable value. Cost includes cost of conversion and other expenses incurred in bringing the goods to their location and condition inclusive of Excise Duty.
- o Saleable / disposable stock of scrap is valued at estimated realizable value. Provision for inventory obsolescence is assessed annually and is provided as and when considered necessary.

1.7 Foreign exchange transactions

Foreign currency transactions are recorded at the rates of exchange prevailing on the dates of the respective transaction. Exchange differences arising on foreign exchange transactions settled during the year are recognized in the profit and loss statement of the year, except that exchange differences related to acquisition of fixed assets from a country outside India are adjusted in the carrying amount of the related fixed assets.

Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the closing exchange rates on that date; the resultant exchange differences are recognized in the statement of profit and loss except those related to acquisition of fixed assets from a country outside India which are adjusted in the carrying amount of the related fixed assets. Where an underlying import/ export is covered, it is recognized at the rate at which the exchange is covered. Where the transaction remains uncovered, it is recognized on mark to market basis as on 31st March 2015.

Net exchange fluctuation gain is accounted as other income and loss is accounted as other expenses.

1.8 Provisions and contingent liabilities

The Company recognizes a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognized when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event, based on a reliable estimate of such obligation.

1.9 Income tax

Income-tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income-tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year) provided in the books of accounts.
