Management Comments

Management View on Performance & Outlook

H1FY22 Actual Performance:

- A second wave of Covid-19 struck during 2021 summer; coupled with the extensive lockdown in the summer of 2020 – both, the peak season for air cooler customer sales.
- During Q2FY22, initiatives have been taken to reduce the inventory at channel levels.
- Despite increase in input and freight costs, we have maintained our Standalone gross margin at 48% in H1FY22 in line with 47% in H1FY21.
- Consolidated gross margin has improved to 44% in H1FY22 vs 42% in H1FY21 as various initiatives are being implemented.
- We have intensified our focus on Industrial & Commercial Air Cooler by grouping it into Large Space Venti-Cooling (“LSV”). The focus of Sales, Marketing & R&D is re-oriented towards the LSV. And also, product portfolio is increased to cater to varied market demands.
- Re-energised our focus to D2C by creating dedicated S&M vertical.
- We have witnessed good turnaround in the performance of CT – Australia and IMPCO – Mexico as evident in consolidated performance.
- Announced first Interim Dividend of ₹ 2/- (100%) per equity share having face value of ₹ 2/- each for the financial year 2021-22.

Management View on Performance & Outlook

Outlook:

- A good Diwali festive season in general aided by positive consumer sentiments stemmed from increased rate of vaccination and subsiding fear of Covid Wave -3 can lead to positive outlook of trade channels and faster clearance of inventory which will set the stage for good summer season.
- We have been penetrating deeper into the semi-urban and rural markets through various initiatives.
- We are confident to maintain Gross Profit Margin (%) on the consolidated as well as standalone basis in H2FY22.
- Domestic and International logistics continue to remain as a major constraint
- We foresee decent exports to US to pick-up from H2FY22.

Large Space Venti - Cooling

LSV – Large Space Venti - Cooling

- Symphony Large Space Venti-Cooling (formerly known as Industrial and Commercial Segment) is a unique concept of air-cooling plus ventilation. A combination not offered by any other cooling technology.
- Symphony intensified its focus on this category by re-orienting Sales, Marketing and R&D towards the idea that any large space which requires cooling and may also require ventilation can be catered by Symphony's LSV solutions.
- One does not have to close a space to employ this cooling. This is of even greater significance in the current times of the pandemic.
- It can be installed at large number of places, some of which are as below:
 - Factories
 - Educational Institutes
 - Warehouses
 - Religious Places
 - Hospitals
 - Banquet Halls
 - Showrooms
 - Restaurants
