MESSAGE FROM THE CHAIRMAN

Dear Shareholders,

It gives me immense pleasure to address you all as we have concluded a busy financial year 2015-16 (FY16) of your Company.

The last 12-15 months were that of economic stability but at slower pace across the globe. The World Economy recorded 3.1% growth rate for calendar year 2015 compared 3.4% for 2014 as per International Monetary Fund estimates. The forecast for the following year – 2016, is positive at about 3.4%. The vulnerability of geo-political environment, China's decelerating growth rate and overall slackness in Emerging Markets and Developing Economies are some developments bring watched with caution. The Indian economy, on the other hand grew impressively at 7.6% as per Central Statistical Office. Although, the sentiments are improving but there are still certain sectors which are yet to get counted in this growth. With present government's growth inducing policies and program implementation, we India can be expected to keep its growth momentum intact.

Roto Pumps is part of USD 47 billion global pumps industry as at the end of 2014. The industry is estimated to reach USD 56 billion by 2017 as per Indian Pumps and Valves report. Pumps industry serves a number of industries and few of these are critical part of economy's core infrastructure like Oil & Gas, Power, Mining, Paper & Pulp and Food & Food Processing to name a few. The Indian Pumps Industry is pegged at around ₹8,500 Crores as on 2014 and expected to reach ₹11,000 cores by 2017. India's export from Pumps industry are estimated to be ₹1,280 crores and is expected to reach ₹1,550 crores by 2017. These numbers indicate towards strong growth potential for the industry both in domestic as well as exports business.

For Roto Pumps, FY16 was not so encouraging in terms of performance. Our sales revenue were flat compared to previous year, growing from ₹94.97 crores in FY15 to ₹ 94.27 crores in FY16. Our Net Profits decreased from ₹7.42 Crores in FY15 to ₹4.28 Crores in FY16. We are of the view that we will be able to soon make a comeback in our topline in view of the growth projections for the economy and our industry. On the profitability front, we would like to take up the positive side of bottomline decrease. We have, in recent past, invested in various forward-looking avenues for the Company's growth wherein 'Engineering Excellence' summarizes the Company's thought-process. In the previous year, we had inaugurated our new state-of-the-art plant at Greater Noida resulting in definitive increase in capacities. In recent few years, we have developed a R&D Centre which as largest test-bed in its category. We have also one some new orders and are executing some prestigious client projects. We see impact of all forward-looking initiatives may have impacted our bottom line the short term but then these initiatives only help us increase our scale and gear up for a increasingly dynamic market tomorrow.

We believe that engineering and nurturing excellence across the Organization, is going to be our true differentiator to sustain and grow long-term stakeholder value.

I would like to thank our shareholders, investors, customers and suppliers for their trust and support. I would also like to thank our splendid team for keeping us in good stead.

Best regards,

Harish Chandra Gupta

ROTO PRODUCTS - ENGINEERED TO EXCEL

Roto Pumps' product range includes a vast range of highly engineered customized pumping solutions.

1. Progressive Cavity Pumps (PCP): PCPs have their application in pumping and metering of fluids and highly viscous, abrasive and shear sensitive materials.

PCPs work on positive movement of fluids through sealed cavities between a helical metallic rotor and a helical elastomeric stator. As cavities move between the stator and rotor, fluids move from suction point to delivery point.

Our PCP product capacity goes up to 500 M³/hour of flow and up to 48 Bar of pressure.

2. Twin Screw Pumps (TSP): TSPs are used to pump clean, lubricating, non-lubricating and aggressive liquids. In TSPs two screw spindles move within a pump casing.

Intermeshing rotating screws in the pump casing and liner form transfer chambers, that transfer the fluid axially from the extreme ends to the center of the casing or vice-versa

Our TSP product capacity range goes up to 1000 M³/hour of flow and pressure range up to 40 Bar.

MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMIC OVERVIEW

Global economy

The global economy, during Calendar Year 2015 (CY15), grew by 3.1% which is lower than the 3.4% growth registered in CY14. This sluggishness was on account of a number of factors. These factors included falling commodity prices, weak external demand, tighter financial conditions, low productivity growth, slower trade growth and sharp decline in crude oil prices, besides certain other factors. The advanced economies recorded a moderate increase in growth rate from 1.8% in CY14 to 1.9% in CY15. The emerging market and developing economies on the other hand grew at a weaker than expected rate of 4% in CY15 as compared to 4.6% in 2014.

Source: International Monetary Fund, April 2016

Going forward, the global economic scenario is estimated to be moderate but stable. The world economy is estimated to grow at 3.2% growth in CY16. This positive movement is likely to be supported by rising growth in the emerging market and developing economies. On the other hand, the advanced economies, in CY16 are expected to grow moderately compared to CY15. These positive movements are estimated to be driven by lower energy prices, higher domestic demand and accommodative monetary policies.

Indian economy

During Financial Year 2015-16 (FY16), Indian economy registered a robust gross GDP growth of 7.6%, fastest growth rate amongst the world's major growing economies. This positive momentum during FY16 was mainly driven by sharp rise in manufacturing sector's growth of 9.5%, compared to 5.5% FY15; consolidated services sector's growth of 8.8% during this period; decline in overall subsidy bill (supported by falling global crude oil prices); and decreasing CPI inflation at 4.83% which was owing to falling commodity prices.

The future outlook for Indian Economy seems stable and steady. The Indian economy is expected to grow at a rate between of 7-7.5% in FY17. This growth expected to be supported by better monsoon that will boost agriculture sector's incomes and expected implementation of the Seventh Pay Commission that will lead to increased

spending from higher wages and allowances of government workers. On the policy front, the present government has been taking initiatives and implementing the existing initiatives to boost growth and improve the investor sentiments. Some of these initiatives include ease of doing business, anticipated implementation of GST reforms and liberalization of foreign direct investment (FDI) in sectors including mining, defense, civil aviation, and broadcasting.

OPPORTUNITIES AND THREATS

Opportunities

US and South African subsidiaries which are identified to be the vehicle for market development are at the forefront of providing opportunities and would be growth engines in short to medium term going forward. A strong team/infrastructure has been put in place to tap the market in a significant way with clearly identified strategies to enhance the pace of market development. Global network continues to get strengthened providing new market openings and greater penetration.

Oil & gas and Marine sector continue to remain in focus and would contribute significantly in the medium term. Domestic market with continued high growth shall provide good opportunities across many industries.

Indian Navy and river cleaning programs are some of the major areas that your Company is focusing to derive benefit with Government's commitment and focus in these areas.

Your Company has also identified to make all its overseas branches/subsidiaries stronger by making them larger distribution companies. There are significant opportunities to be tapped with enhanced basket of products mainly by trading in them.

THREATS

Markets across the Board are seeing aggressive competition. Both domestic and global capacities out last the demand for various products and commodities. Many sectors

especially in domestic market are seeing increased competition. Your Company is prudently trying to deal with this.

RISK AND CONCERNS

There is going to be continued pressure on margins due to increase in input costs & Interest rates on the one hand and lower prices due to competition on the other. Majority of revenue of your Company comes from Export, exchange rate fluctuations are a major concern. Brexit has seen sterling pound falling by 10% so far. Your Company has significant cash inflows in this currency and also has major Sales revenue coming from UK. Any economic slowdown either in U.K. or in Europe due to Brexit will directly impact your company.

The Company has an adequate system of internal controls implemented by the management towards achieving higher efficiency in all areas of operations. These controls have been designed to provide a reasonable assurance with regard to maintenance of proper accounting controls, monitoring of operations, protecting assets from unauthorized use or losses, compliance with regulations and for ensuring reliability of financial reporting. The Audit Committee of the Board of Directors regularly reviews the adequacy of internal controls and takes necessary corrective actions wherever required.

Your Company's strength lies in its research & development capacities to bring new products and

having a committed & experienced manpower. By Commissioning of state of art manufacturing plants the Company would provide an edge in service to its customers. However, time ahead looks challenging particularly in Overseas Markets. Generally, the global economy is not very positive due to various political and economic reasons. Continued unrest in Middle East could have a spiral effect on other economies such as Europe who are currently battling the influx of immigrants from effected areas, etc. On the other hand commodity prices continue to remain low due to weak demand. Brexit would have adverse impact on Global business environment at least in short term. Silver lining is the positive indications in US. On Domestic front, Governments initiatives on ease of doing business and tax reforms especially Goods and Service Tax would create conducive business environment. Government's clean India drive, particularly cleaning of rivers and

improving waste water management would provide increased opportunities. Your Company's strategic presence in major Economies would provide ample growth opportunities.

“ANNEXURE B” TO THE INDEPENDENT AUDITOR’S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF ROTO PUMPS LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of

Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of Roto Pumps Limited (“the Company”) as of March 31, 2016 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s Board of Directors is responsible for establishing and maintaining internal financial controls. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance

Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016.
