Notes to consolidated financial statements

Note 1 - Significant accounting policies

A. Accounting assumptions

The financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles ("GAAP") under the historical cost convention on the accrual basis. GAAP comprises mandatory Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 in terms of provisions of the Companies Act, 2013 and guidelines issued by the Securities and Exchange Board of India (SEBI). These accounts have been prepared on the assumption that the Company is a going concern and have been consistently applied by the Company; and the accounting policies not referred to otherwise, are in conformity with Indian GAAP.

B. Use of estimates

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and disclosure of contingent liabilities on the date of financial statements. The recognition, measurement, classification or disclosure of an item or information in the financial statements has been made relying on these estimates. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from those estimated. Any revision to accounting estimates is recognised prospectively in the current and future periods.

C. Fixed assets, depreciation and impairment

Fixed assets are stated at cost, less accumulated depreciation and impairment losses, if any. Cost includes all expenditure necessary to bring the asset to its working condition for its intended use. Own developed assets are capitalized inclusive of all direct costs and attributable overheads. Capital work-in-progress comprises of the cost of fixed assets that are not yet ready for their intended use as at the balance sheet date.

Intangible assets are recorded at the consideration paid for their acquisition. Cost of an internally generated asset comprises all expenditure that can be directly attributed, or allocated on a reasonable and consistent basis, for creating, producing and making the asset ready for its intended use.

Depreciation on fixed assets is computed on the straight-line method over their useful lives prescribed under Schedule II of the Companies Act, 2013. In respect of intangible assets such as software, amortisation is provided over its license period ranging from two-six years. In case of vehicles purchased for the employees under employee car policy of the Company, the vehicles are transferred to the employees after three years and hence the useful life considered for such vehicles as three years.

Lease hold improvements are depreciated over the minimum lock in period of contract of lease.

Depreciation on fixed asset in respect of US subsidiary is provided on straight-line basis over the useful life as under:

Asset	Useful life
Office equipment	5 years
Furniture and fixtures	7 years
Computer hardware	5 years
Computer software	3 years

The management periodically assesses fixed assets, using external and internal sources whether there is an indication that an asset may be impaired. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the income statement for items of fixed assets carried at cost. The recoverable amount is the higher of an asset's net selling price and value in use. The net selling price is the amount obtained from the sale of an asset in an arm's length transaction while value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Recoverable amounts are estimated for individual assets or, if not possible, for the cash generating unit.

Notes to consolidated financial statements (Contd.)

Impairment loss recognised for an asset in earlier accounting periods is reversed, to the extent of its recoverable amount, if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised.

D. Foreign currency transactions

Transactions in foreign currencies are normally recorded at the average exchange rate prevailing on the date on which transaction occurred.

Outstanding balances of foreign currency monetary items are reported using the period end rates.

Non-monetary items carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rate that existed, when the values were determined.

Exchange differences arising as a result of the above are recognised as income or expense in the statement of profit and loss.

In pursuance to notification no G.S.R 225 (E) 31.03.2009 issued by the Ministry of Corporate Affairs for amending Accounting Standard 11 "The Effects of Changes in Foreign Exchange Rates", the Company has opted the option of capitalising foreign exchange gain/loss on long-term foreign currency monetary assets.

Translation of financial statements of the foreign subsidiaries from the local currency to the functional currency of the Company is performed for balance sheet accounts using the exchange rates in effect at balance sheet date and for revenue and expenses items using a monthly average exchange rates for the respective periods and the resulting difference is presented as foreign currency translation reserve included in reserves and surplus.

Foreign branches

Foreign currency transactions entered into by branches, which are integral foreign operations, are translated in the same manner as foreign currency transactions described above. Monetary assets and liabilities are translated at rates prevailing on the balance sheet date. Non-monetary assets and liabilities are translated at the rate prevailing on the date of the transaction. Depreciation on fixed assets is recognised as per the Company's policy. Net gain/loss on foreign currency translation is recognised in the statement of profit and loss.

Derivative instruments and hedge accounting

The Company uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to certain forecasted transactions. Effective April 1st 2012 the Company designates some of these as cash flow hedges applying the recognition and measurement principles set out in the Accounting Standard 30 "Financial Instruments: Recognition and Measurements" (AS 30).

The use of foreign currency forward contracts is governed by the Company's policies provide written principles on the use of such financial derivatives consistent with the Company's risk management strategy.

The counter party to the Company's foreign currency forward contracts is generally a bank.

The Company does not use derivative financial instruments for speculative purposes.

Foreign currency forward contract derivative instruments are initially measured at fair value and are re-measured at subsequent reporting dates.

Changes in the fair value of these derivatives that are designated and effective as hedges of future cash flows are recognised directly in hedging reserve and the ineffective portion is recognised immediately in statement of profit and loss.

Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in the statement of profit and loss as they arise.

Notes to consolidated financial statements (Contd.)

When hedge accounting is discontinued for a cash flow hedge, the net gain or loss will remain in reserves and be reclassified to statement of profit and loss in the same period or periods during which the formerly hedged transaction is reported in statement of profit and loss.

If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in reserves is transferred to statement of profit and loss.

E. Investments

Trade investments are the investments made to enhance the Company's business interests. Investments are either classified as current/short-term or long-term based on the management's intention at the time of purchase. Long-term investments are carried at cost less any permanent diminution in value (if any), determined separately for each individual investment. Current/short-term investments are carried at the lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investment. Cost for overseas investments comprises the Indian rupee value of the consideration paid for the investment.

F. Payments and benefits to employees**(a) Short-term employee benefits**

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages, and short-term compensated absences etc. and the expected cost of bonus, ex-gratia are recognized in the period in which the employee renders the related service.

(b) Post employment benefits

(i) Defined contribution plans: The Company's superannuation scheme, state governed provident fund scheme, employee state insurance scheme and employee pension scheme are defined contribution plans. The contribution paid/payable under the schemes is recognized during the period in which the employee renders the related service,

(ii) Defined benefit plans: The employees' gratuity fund schemes managed by trust are the Company's defined benefit plans. The present value of the obligation under such defined benefit plans is determined based on actuarial valuation using the Projected Unit Credit Method which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plans, is based on the market yields on government securities as at the balance sheet date having maturity periods approximating to the terms of related obligations.

Actuarial gain and losses are recognized immediately in the statement of profit and loss.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans, to recognize the obligation on net basis.

(c) Long-term employee benefits

The obligation for long-term employee benefits such as long-term compensated absences is recognized in the same manner as in the case of defined benefit plans as mentioned in (b) (ii) above.

G. Revenue recognition

Revenue comprises sale of user licence of software, professional services and consultancy, training, interest and dividend. Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company and that the revenue can be reliably measured. Revenue is disclosed exclusive of sales tax, service tax, VAT or other taxes, as applicable.

- iii) Income from notice pay recovery is recognised on receipt basis.

H. Principles of consolidation

The consolidated financial statements of the group are prepared in accordance with Accounting Standard 21 - 'Consolidated Financial Statements' as notified under section 133 of Companies act 2013, read with Rule 7 of the Companies (Accounts) Rules 2014.

The financial statements of the Company and its subsidiaries have been combined on a line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses, after eliminating intra group balances and intra group transactions. The unrealized profits or losses resulting from the intra group transactions and intra group balances have been eliminated.

The excess of the cost to the Company of its investment in the subsidiaries over the Company's portion of equity on the acquisition date is recognized in the financial statements as goodwill and is tested for impairment annually. The excess of Company's portion of equity of the subsidiary over the cost of investment therein is treated as capital reserve.

The consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances and in case of subsidiary companies incorporated outside India which does not maintain books of account under Indian GAAP has not been adjusted for deviations from accounting policy followed by holding Company and subsidiary Company while preparing consolidated financial statement as same are not material and does not affect consolidated financial statements.

I. Cash flow statement

Cash flows are reported using the indirect method, whereby net profit before tax is adjusted for the effects of transactions of a non cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, investing and financing activities of the Company are segregated.

J. Tax expense

Tax expense for a year comprises of current tax and deferred tax.

Current tax is measured after taking into consideration, the deductions and exemptions admissible under the provisions of the Income Tax Act, 1961. Whereas the difference between taxes assessed by the authorities and recorded earlier is accounted as previous year tax adjustment under statement of profit and loss.

Notes to consolidated financial statements (Contd.)

Deferred tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing difference of earlier years. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. If there is unabsorbed depreciation or carry forward of losses under tax laws, deferred tax assets are recognised only to the extent that there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax resulting from timing differences which originate during the tax holiday period but are expected to reverse after such tax holiday period is recognised in the year in which the timing differences originate using the tax rates and laws enacted or substantively enacted at the balance sheet date.

Minimum Alternative Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay income tax higher than that computed under MAT, during the period that MAT is permitted to be set off under the Income Tax Act, 1961 (specified period). In the year, in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in the guidance note issued by the Institute of Chartered Accountants of India (ICAI), the said asset is created by way of a credit to the statement of profit and loss and shown as MAT credit entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay income tax higher than MAT during the specified period.

K. Earning per share

Basic earnings per share are calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for any bonus shares issued during the year and also after the balance sheet date but before the date the financial statements are approved by the board of directors.

For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

The number of equity shares and potentially dilutive equity shares are adjusted for bonus shares as appropriate. The dilutive potential equity shares are adjusted for the proceeds receivable, had the shares been issued at fair value. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date.

L. Employee stock option scheme

In accordance with SEBI guidelines, the excess of the market price of shares, at the date of grant of options under the employee stock option schemes, over the exercise price, is treated as employee compensation expenses and amortised on a straight line basis over the vesting period of the options. In the case of graded vesting, the vesting period is determined separately for each portion of the option. The unamortised portion of the cost is shown under "Reserves and surplus".

M. Operating lease

Assets acquired on lease where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating lease. Lease rentals are charged off to the statement of profit and loss as incurred. Initial direct costs in respect of assets given on operating lease are expensed off in the year in which such costs are incurred.

N. Provisions and contingent liabilities

The Company recognizes a provision when there is a present obligation as a result of a past event that probably requires outflow of resources, which can be reliably estimated. Disclosures for a contingent liability is made, without a provision in books, when there is an obligation that may, but probably will not, require outflow of resources.

Notes to financial statements

Note 1 – Significant accounting policies:

A. Accounting assumptions

The financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles ("GAAP") under the historical cost convention on the accrual basis. GAAP comprises mandatory Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 in terms of provisions of the Companies Act, 2013 and guidelines issued by the Securities and Exchange Board of India (SEBI). These accounts have been prepared on the assumption that the Company is a going concern and have been consistently applied by the Company; and the accounting policies not referred to otherwise, are in conformity with Indian GAAP.

B. Use of estimates

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and disclosure of contingent liabilities on the date of financial statements. The recognition, measurement, classification or disclosure of an item or information in the financial statements has been made relying on these estimates. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from those estimated. Any revision to accounting estimates is recognised prospectively in the current and future periods.

C. Revenue recognition

Revenue comprises sale of user licence of software, professional services and consultancy, training, interest and dividend. Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company and that the revenue can be reliably measured. Revenue is disclosed exclusive of sales tax, service tax, VAT or other taxes, as applicable.

Income from software services and products

- i) Revenue from sale of products rendered through tele-communication network/courier are recognised on receiving confirmation of receipt from the customers.
- ii) In respect of income received from contracts dependent on time and material basis are recognised when related service are performed.
- iii) In case of fixed price contracts, revenue is recognised over the life of contract based on the mile stones achieved as agreed upon in the contract on proportionate completion basis.
- iv) Revenue through training, annual maintenance contracts and fixed price maintenance contracts are recognised proportionately over the period in which services are rendered/training is provided.
- v) Revenue from the sale of user licences for software applications is recognised on transfer of the title in the user licence.
- vi) Revenue on time and material contracts are recognised as and when the related services are rendered from the end of last billing up to the balance sheet date as unbilled revenue.
- vii) Revenue from services to overseas subsidiary companies are recognised in accordance with transfer pricing agreement entered with the subsidiary companies.

Other income

- i) Dividend income is recognised when the Company's right to receive dividend is established.
- ii) Interest is recognised on time proportionate basis taking into account the amount outstanding and the rate applicable.
- iii) Income from notice pay recovery is recognised on receipt basis.

Notes to financial statements (Contd.)

D. Fixed assets, depreciation and impairment

Fixed assets are stated at cost, less accumulated depreciation and impairment losses, if any. Cost includes all expenditure necessary to bring the asset to its working condition for its intended use. Own developed assets, if any, are capitalized inclusive of all direct costs and attributable overheads. Capital work-in-progress comprises of the cost of fixed assets that are not yet ready for their intended use as at the balance sheet date.

Intangible assets are recorded at the consideration paid for their acquisition. Cost of an internally generated asset, if any, comprises all expenditure that can be directly attributed, or allocated on a reasonable and consistent basis, to creating, producing and making the asset ready for its intended use.

Depreciation on fixed assets is computed on the straight-line method over their useful lives prescribed under Schedule II of the Companies Act, 2013. In respect of intangible assets such as software, depreciation is provided over its license period ranging from two-six years. In case of vehicles purchased for the employees under employee car policy of the Company, the vehicles are transferred to the employees after three years and hence the useful life considered for such vehicles as three years.

Lease hold improvements are depreciated over the minimum lock in period of contract of lease.

The management periodically assesses fixed assets, using external and internal sources whether there is an indication that an asset may be impaired. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognised in the income statement for items of fixed assets carried at cost. The recoverable amount is the higher of an asset's net selling price and value in use. The net selling price is the amount obtained from the sale of an asset in an arm's length transaction while value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Recoverable amounts are estimated for individual assets or, if not possible, for the cash generating unit.

Impairment loss recognised for an asset in earlier accounting periods is reversed, to the extent of its recoverable amount, if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised.

E. Foreign currency transactions

Transactions in foreign currencies are normally recorded at the average exchange rate prevailing on the date on which transaction occurred.

Outstanding balances of foreign currency monetary items are reported using the period end rates.

Non-monetary items carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rate that existed, when the values were determined.

Exchange differences arising as a result of the above are recognised as income or expense in the statement of profit and loss except the following.

In pursuance to notification no G.S.R 225 (E) 31.03.2009 issued by the Ministry of Corporate Affairs for amending Accounting Standard 11 "The Effects of Changes in Foreign Exchange Rates", the Company has opted the option of capitalising foreign exchange gain/loss on long-term foreign currency monetary assets.

Foreign branches

Foreign currency transactions entered into by branches, which are integral foreign operations, are translated in the same manner as foreign currency transactions described above. Monetary assets and liabilities are translated at rates prevailing on the balance sheet date. Non-monetary assets and liabilities are translated at the rate prevailing on the date of the transaction. Depreciation on fixed assets is recognised as per the Company's policy. Net gain/loss on foreign currency translation is recognised in the statement of profit and loss.

Notes to financial statements (Contd.)**Derivative instruments and hedge accounting**

The Company uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to certain forecasted transactions. Effective April 1st 2012 the Company designates some of these as cash flow hedges applying the recognition and measurement principles set out in the Accounting Standard 30 "Financial Instruments: Recognition and Measurements"(AS 30).

The use of foreign currency forward contracts is governed by the Company's policies provide written principles on the use of such financial derivatives consistent with the Company's risk management strategy.

The counter party to the Company's foreign currency forward contracts is generally a bank.

The Company does not use derivative financial instruments for speculative purposes.

Foreign currency forward contract derivative instruments are initially measured at fair value and are re-measured at subsequent reporting dates.

Changes in the fair value of these derivatives that are designated and effective as hedges of future cash flows are recognised directly in hedging reserve and the ineffective portion is recognised immediately in statement of profit and loss.

Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in the statement of profit and loss as they arise.

When hedge accounting is discontinued for a cash flow hedge, the net gain or loss will remain in reserves and be reclassified to statement of profit and loss in the same period or periods during which the formerly hedged transaction is reported in statement of profit and loss.

If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in reserves is transferred to statement of profit and loss.

F. Investments

Trade investments are the investments made to enhance the Company's business interests. Investments are either classified as current/short-term or long-term based on the management's intention at the time of purchase. Long-term investments are carried at cost less any permanent diminution in value (if any), determined separately for each individual investment. Current/short-term investments are carried at the lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investment. Cost for overseas investments comprises the Indian rupee value of the consideration paid for the investment.

G. Cash flow statement

Cash flows are reported using the indirect method, whereby net profit before tax is adjusted for the effects of transactions of a non cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, investing and financing activities of the Company are segregated.

H. Payments and benefits to employees**(a) Short-term employee benefits**

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages, and short-term compensated absences etc. and the expected cost of bonus, ex-gratia except for variable pay which is accounted on cash basis due to unavailability of estimation are recognised in the period in which the employee renders the related service.

Notes to financial statements (Contd.)

(b) Post employment benefits

- (i) Defined contribution plans: The Company's superannuation scheme, state governed provident fund scheme, employee state insurance scheme and employee pension scheme are defined contribution plans. The contribution paid/payable under the schemes is recognised during the period in which the employee renders the related service,
- (ii) Defined benefit plans: The employees' gratuity fund schemes managed by trust are the Company's defined benefit plans. The present value of the obligation under such defined benefit plans is determined based on actuarial valuation using the Projected Unit Credit Method which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plans, is based on the market yields on government securities as at the balance sheet date having maturity periods approximating to the terms of related obligations.

Actuarial gain and losses are recognised immediately in the statement of profit and loss.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans, to recognize the obligation on net basis.

(c) Long-term employee benefits

The obligation for long-term employee benefits such as long-term compensated absences is recognised in the same manner as in the case of defined benefit plans as mentioned in (b) (ii) above.

I. Operating lease

Assets acquired on lease where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating lease. Lease rentals are charged off to the statement of profit and loss as incurred. Initial direct costs in respect of assets given on operating lease are expensed off in the year in which such costs are incurred.

J. Earning per share

Basic earnings per share are calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for any bonus shares issued during the year and also after the balance sheet date but before the date the financial statements are approved by the management.

For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

The number of equity shares and potentially dilutive equity shares are adjusted for bonus shares as appropriate. The dilutive potential equity shares are adjusted for the proceeds receivable, had the shares been issued at fair value. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date.

K. Tax expense

Tax expense for the year comprises of current tax and deferred tax.

Current tax is measured after taking into consideration, the deductions and exemptions admissible under the provisions of the Income Tax Act, 1961. Whereas the difference between tax assessed by the authorities or self assessed tax and tax expenses recorded earlier is accounted as previous year tax adjustment under statement of profit and loss.

Notes to financial statements (Contd.)

Deferred tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing difference of earlier years. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. If there is unabsorbed depreciation or carry forward of losses under tax laws, deferred tax assets are recognised only to the extent that there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax resulting from timing differences which originate during the tax holiday period but are expected to reverse after such tax holiday period is recognised in the year in which the timing differences originate using the tax rates and laws enacted or substantively enacted at the balance sheet date.

Minimum Alternative Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay income tax higher than that computed under MAT, during the period that MAT is permitted to be set off under the Income Tax Act, 1961 (specified period). In the year, in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in the guidance note issued by the Institute of Chartered Accountants of India (ICAI), the said asset is created by way of a credit to the statement of profit and loss and shown as MAT credit entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay income tax higher than MAT during the specified period and shown under previous year tax adjustments.

L. Employee stock option scheme

In accordance with SEBI (ESOP and ESPS) Guidelines, 1999, the excess of the market price of shares, at the date of grant of options under the employee stock option schemes, over the exercise price, is treated as employee compensation expenses and amortised on a systematic basis over the vesting period of the options.

In the case of graded vesting, the vesting period is determined separately for each portion of the option. The unamortised portion of the cost is shown under "Deferred employee compensation expenses".

M. Provisions and contingent liabilities

The Company recognizes a provision when there is a present obligation as a result of a past event that probably requires outflow of resources, which can be reliably estimated. Disclosures for a contingent liability is made, without a provision in books, when there is an obligation that may, but probably will not, require outflow of resources.
