Review of business operations:

In the year 2018-19 the Global Automotive Industry was passing through one of the most challenging times, which turned out to be a double edged affect for the Domestic Industry. The Domestic Industry performed very well and achieved the

The operations of the Company on the whole have been satisfactory.

In pursuance of National Electric Mobility Machine Plan (NEMMP) and other initiatives and Government to achieve long term growth in industry and reduced emissions and oil dependents. To meet these stringent environmental regulations on pollution and carbon emissions have necessitated heavy investments in both automobile and also auto parts such as our industries. To meet with the challenges of these BS-VI norms and having achieved BS-IV norms in the years 2015-16, 2016-17 and 2017-18 during the second and third quarter of 2018 have been many challenges and settling down for an improved performance post general elections.

As the rural economy is growing, the demand for two wheelers and three wheelers complying BS-IV norms may give encouraging results and hopeful of maintaining growth this year also. Company is now focusing customer preferences and distributions channels and always exploring new avenues in the export market which will give encouraging results.

INHERENT LIMITATION OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING.

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also projection of any evaluations of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The nature effect of these changes as a result of adoption of these new standards are described below:

Other than the changes described below, the accounting policies adopted are consistent with those of the previous years.

It requires revenue to be recognized when or as control of the goods or service transfers to a customer at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

As per the Company's current revenue recognition practices transfer of control happens at the same point as transfer of risk and rewards thus not effecting the revenue recognition. The amount of revenue recognized reflects the consideration to which the company expects to be entitled in exchange of goods or services.

Revenues are measured at fair value of the consideration received or receivable, net of discounts, volume rebates, goods and service tax and other indirect taxes. Revenue from sale of by products are included in revenue.

The Standard permits two possible methods of transition:

1. Retrospective Approach:

Under this approach the standard will be applied retrospectively to each prior reporting period presented in accordance with Ind AS-8, Accounting policies, changes in accounting estimates and errors.

2. Cumulative catch up approach:

Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application

The company has adopted the cumulative catch up transition method and accordingly comparatives for the year ending 31st March, 2019 will not be retrospectively adjusted

The accounting changes required by the standard are not having material effect on the company's financial statements and no transitional adjustment is recognized in retained earning on 1st April, 2018.
