## Management Discussion and Analysis

The markets worldwide exhibited differing levels of recovery from the past economic slow down. While many of the key markets where the Company is present grew well, India continued to be a disappointment. While the Company performed well in these key markets it was sufficient to compensate for the steep fall in demand in India. Nevertheless, this is a good sign for the future of the Company as greater presence in key global markets will off set the volatility in India.

During the year, the Company's new foundry commenced commercial production. This backward integration was done primarily to improve the quality of our products. This has been achieved in significant measure besides the added benefit of having a lower cost source for castings.

### **COMPRESSORS**

The compressor business accounted for 87% of the total sales of the Company. It accounts for 89% of the profits of the Company and 86% of the capital employed. This business presently employs 1668 people and grew by 23%.

### **PERFORMANCE**

Domestic business remained static throughout the year due to uncertain market conditions. Prolonged delays in the execution of core sector projects significantly affected the business. While the Company has been able to retain its market share, it has pushed ahead in some segments. Continued focus on the after market segment resulted in greater revenue stability and secure profitability.

Growth in international business was encouraging. The Company's new range of products was well received in all markets and able to make a mark in a very short time. This has been particularly observed in the European and American markets. Besides North America, the Company's performance in South Americas has also been quite positive and stronger traction is being gained.

The performance in Asia has been disappointing. While markets have been positive, the Company faced significant challenges in creating a robust distribution channel. Some positive and strong channel partnerships have been established and the results will be more visible in coming years.

In spite of this, some significant milestones were achieved, the most important being the creation of multiple reference installations for oil free screw compressors. China continues to be a challenge. It is a large market but an extremely competitive one. Special products and programs are being developed to address this market.

Business in the Middle East was encouraging. New markets and new products have been launched in this region and the reception to the products has been positive. While certain countries in Africa have grown strongly, South Africa continues to be a challenge.

### **OPPORTUNITIES**

The change in the central government in India and the attendant promises of swift economic activity have buoyed the sentiments but actual results are yet to be seen in the market. However, it is expected to only improve and hence the demand in India should be positive in the coming years. Global economic indicators also show improvement due to the recovery in high-income economies as well as moderate growth in China. Well established presence in the strategic markets combined with competitive products is expected to contribute significantly to the revenue.

### **THREATS**

While the sentiments are positive in India, substantive action on the ground is yet to materialize. Hence, the time frame to realize the promises may be longer than expected and this could dampen growth. In spite of a slow down, India continues to be an attractive destination for many companies and therefore, we expect more competitive pressures from new players. Gaining significant market share in developed markets require substantial amount of effort to overcome the challenges of an unknown brand and the stigma associated with "made in India". These efforts would take time to produce results.

### **ATS - Elgi**

The automotive equipment business accounted for 9% of the total sales of the Company. This business accounts for 11% of the profits of the Company and 10% of the capital employed by the Company. The business employs 365 people. This year, the business has registered a negative growth of 9% over the previous year.

**PERFORMANCE**

The Company's performance is closely linked to the expansion of service facilities by automotive manufacturers and their dealers. Due to extreme sluggishness in the automotive sales, the expansion of service facilities was very minimal. Passenger car sales were down by 6% and commercial vehicle sales were down by 20% compared to the previous year. Not only were less service outlets activated by various vehicle manufacturers, the average value of investments in equipment per workshop was also lower. Though the business sustained its market share throughout the year, the above factors have resulted in considerable reduction in demand for new equipment. The Company continues its focus on new product launches in various segments and expand its after sales service related activities.

Exports business was down by 11% over the previous year. During the previous year, most major markets where the Company exports its products have been affected by political uncertainties or poor economic growth. While the situation is not expected to change much in the foreseeable future, business development activities will focus on introduction of new products to augment sales.

**OPPORTUNITIES**

Growth in the automotive industry is expected to be marginally higher in the year 2014-15. While there is optimism in the industry, it is expected that for this optimism to translate into meaningful and sustainable growth, it will take at least a year. The Company is well positioned to exploit business opportunities as and when demand for workshop equipment pickup.

**THREATS**

Fluctuating fuel prices combined with rise in inflation will have an adverse impact on the growth of the automobile industry in India. This will result in postponement of purchases and vehicle repairs, which in turn will affect the business prospects.

**OVERALL PERSPECTIVES**

The global economic performance and particularly the Indian economic situation for 2014-15 is expected to improve as the year progresses. Recoveries are anticipated in the world's advanced economies. The monetary policies adopted by the

central banks in these economies are expected to provide stimulus to support the consolidation.

Market expectations factor accelerated growth in India with stable Government in power. While the Company is optimistic, significant changes can be expected only in the latter half of the year.

The share of international business is expected to grow substantially in the next year as the products are well accepted across the markets with reference installations functioning extremely well.

Construction at the green field site for the modernized compressor plant is at the final stages and the shift to the new facility is likely to be completed in the second quarter of 2014-15.

**HUMAN RESOURCE DEVELOPMENT**

"ELGI Values" related work kept us busy through the year; communication workshops, recognition methods, discussion forums and the identification of 'behaviours' and 'non-behaviours'.

We successfully deployed our first batch of trained workmen at our newly built foundry, which went live during the year.

We have put in place a mechanism to identify internal talent, and grow them. This will be the theme for the future, gradually reducing lateral recruitments to the minimum.

## Notes to Financial Statements for the year ended 31st March, 2014.

### 1. Summary of Significant Accounting Policies to the Consolidated Balance Sheet and Statement of Profit and Loss

#### 1.1 Basis of Accounting

The Company maintains its accounts on accrual basis following the historical cost convention in accordance with Generally Accepted Accounting Principles ("GAAP") and in compliance with the provisions of the Companies Act, 1956 and the Accounting Standards specified in the Companies (Accounting standards) Rules, 2006, prescribed by the Central Government.

The accounts of the all Subsidiaries and Joint Venture have been prepared in compliance with the Accounting standards as specified in the Companies (Accounting standards) Rules, 2006, prescribed by the Central Government, and have been prepared in compliance with the local laws and applicable Accounting Standards.

#### 1.2 Principles of Consolidation

The Consolidated Financial Statements relate to Elgi Equipments Limited ("the Company") and its subsidiary companies. The Consolidated Financial Statements have been prepared on the following basis.

- i. The financial statement of the Company and its Subsidiary Companies are combined on line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses, after fully eliminating intra-group balances and intra-group transactions resulting in unrealized profit or losses in accordance with the Accounting Standard (AS) -21 "Consolidated Financial Statements" issued by the Institute of Chartered Accountants of India.
- ii. Investments in Joint Ventures are accounted for by using the proportionate consolidation method laid down in Accounting Standard (AS) - 27 on "Financial Reporting of interests in Joint ventures". Inter-Company transactions and balances are eliminated to the extent of the Company's interest in the joint venture. For the purpose of consolidation, financial statements of the subsidiaries are drawn up to and as on 31st March 2014.
- iii. As far as possible, the Consolidated Financial Statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented in the same manner as the Company's Separate financial Statements.

#### iv. Foreign Currency Translation

Indian Rupees is the reporting currency for the Group. However, the local currency of overseas Subsidiaries is different from the reporting currency of the Group. All the overseas subsidiaries have been classified as non-integral operations according to Accounting Standard 11. In respect of overseas subsidiaries, all the assets and liabilities are translated using exchange rate prevailing at the Balance sheet date. Revenue, cost and expense are translated using average exchange rates of the foreign currency and the resultant gain/loss have been disclosed as "Foreign Currency Translation Reserve".

#### v. Intangible assets and Amortisation

In case of parent and its Subsidiaries, expenditure towards intangible assets up to 31st March 2014 in the book of Subsidiaries are expensed out as revenue expenditure and are being amortized over a year of time (Maximum five Years) in the Consolidated Financial Statements depending upon the nature of the expenditure and evaluation of future benefits therefrom.

#### 1.3 Uniform Accounting Policies

The Consolidated Financial Statements of Elgi Equipments Limited and its subsidiaries and joint venture have been prepared using uniform accounting policies for like transactions and other events in similar circumstances.

#### 1.4 Investments other than in subsidiaries have been accounted as per Accounting Standard 13 on Accounting for Investments.

#### 1.5 Other Significant Accounting Policies

These are set out under "Notes on Accounts" as given in the Unconsolidated Financial Statements of Elgi Equipments and its Subsidiaries.

### Performance for the year

The company's performance is intertwined with the sales of automobiles in India, in particular the expansion of the service network by various auto companies. The automotive industry went through its worst year in a decade. Passenger car sales were down by 6% and commercial vehicle sales were down by 20% compared to the previous year. Not only the number of new workshops activated by various vehicle manufacturers were lower than the previous year but the average investments in equipments per workshop were also lower. Though the business built its market share through the year, the above factors have resulted in considerable reduction in demand for equipments and the sales revenue was down significantly. The company continue its focus on new product launches in various segments and expand its after sales service related activities.

### Future Plans

Growth in the automotive industry is expected to be marginally higher in the year 2014-15. While there is optimism in the industry, it is expected that for this optimism to translate into meaningful and sustainable growth, it will take at least a year. The company is well positioned to exploit business opportunities as and when demand for workshop equipment pick up.

### International

International business has gone down by 11% over the previous year. During the past year most major markets where the Company exports its products have been affected by political uncertainty or poor economic growth. While the situation is expected to continue into the future, international business development will focus on introduction of new products in various markets in the coming year to help augment sales.

### Dividend

For the financial year 2013-14 the Board of Director had recommended Dividend of ₹. 550 per share (5500%) on the paid up share capital of ₹. 9,00,000. Subject to the approval of share holders, an amount of ₹. 57.91 million will be paid as dividend including dividend distribution tax (Previous year ₹. Nil)

Mr. Harjeet Singh Wahan of your company retires by rotation at the ensuing Annual General Meeting and being eligible, seeks re-appointment

### Statutory Auditors

The Auditors M/s. RJC Associates, Chartered Accountants retire at the ensuing Annual General Meeting and are eligible for reappointment.
