MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE AND DEVELOPMENTS

The industry of Coding and Marking is driven by legal requirements to provide product information to customers, printing specifications, ISI logo and Company logo; inventory control by reduction in wastage of packaging material and printing on the production line; traceability of products by date of manufacture, batch numbers, shift numbers, and real time-date and ensuring quality control, counterfeit prevention, marketing promotion by printing variable information and logos.

Overall the industry growth is closely co-related to packaging industry growth and the manufacturing sector growth as a whole. Indian Coding Industry is estimated at ₹9,000 -10,000 Million as of FY2016. The Indian Coding & Marking industry has reached a level of maturity and acceptance across applications and is dominated value-wise by 4 players with your Company being amongst them. Industry has witnessed consistent growth of 15%+ over the last decade and is estimated to grow at similar rates approximately 10-15% revenue growth in the near future. This growth rate is expected to double in the next two years.

Your Company provides its customers the ability to code, mark, address, decorate or personalize their products:

- In-line in the manufacturing process and under all manufacturing conditions and
- Adding fully variable alpha numeric, graphics and machine readable codes to products or packaging in real time.

Your Company has modern production facilities located at Nalagarh and Guwahati. Your Company manufactures printers for printing variable information and thereafter also sells their consumables, preventive & breakdown services, filters, spare parts, etc. Your Company's product portfolio includes:

- Thermal Ink Coders
- High Resolution Piezo Drop-on-Demand Inkjet Printers (HR) and

Keeping in view the broad base and scope of Coding and Marking industry in the market with only few players chasing the vast opportunity and resources, Your Company is currently implementing growth plans to enhance its production in a phased manner.

OPPORTUNITIES AND THREATS

The marking and coding industry is growing rapidly in India almost at a Compound Annual Growth Rate (CAGR) of approximately 10%-15%. Being a manufacturer of majority of the items required for Coding and Marking industry and having a leadership edge in technological terms, your Company has an advantage over other players in the industry and can increase market share and installed base. The primary threat is the greater installed base of a few key competitors enabling them to get a higher number of repeat and reference sales. In addition in certain products & applications the competition is well entrenched and therefore establishing market share will be a lengthy and difficult exercise.

As the Indian Packaging Industry has developed and also with the further maturation of various Coding Technologies worldwide there is a consistent growth in overall market size. However, the growth is spread across all the various Coding technologies rather than around Continuous Inkjet Technology as was the case in the past. This is both an opportunity and a threat depending upon how successful your Company is in establishing market share in these other Coding Technologies. Your Company is working on providing a variety of strong products coupled with marketing & distribution muscle behind these products to be successful across the Entire Coding Technology Spectrum.

PERFORMANCE OVERVIEW & OUTLOOK

During the year 2015-16, your Company has total net sales of ₹13,452.14 Lakhs as against ₹11,292.33 Lakhs in the previous year, representing a growth of 19.13%.
