MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMIC SCENARIO

India's GDP growth has averaged 7.3 per cent for the period from 2014-15 to 2017-18, which is the highest among the major economies of the world. That this growth has been achieved in a milieu of lower inflation, improved current account balance and notable reduction in the fiscal deficit to GDP ratio makes it all the more creditable. In addition to the introduction of GST, the year also witnessed significant steps being undertaken towards resolution of problems associated with non-performing assets of the banks, further liberalization of FDI, etc., thus strengthening the momentum of reforms. After remaining in negative territory for a couple of years, growth of exports rebounded into positive growth during 2016-17 and strengthened further in 2017-18. The full potential of GST and other reforms initiated by the government will be expected to blossom during 2018-19 and being an Election year, the Government spending and push towards implementation of Policies will witness a high growth trajectory.

INDUSTRY STRUCTURE AND DEVELOPMENTS

Coding and marking is one of the most important part of logistics and manufacturing process of industrial and consumer goods. Coding and marking systems is the equipment that is used to print the product specific details such as lot size, expiry date, manufacturing date and other related details on the product as well as on its packaging in order to provide the authentic information to the consumer. Apart from this it helps manufacturers to secure their brand against counterfeits prevailing in the global coding and marking system market. During the logistics process, an authorized individual in the value chain can track the goods from manufacturing unit till the time it leaves the retail store with the end-user or customer. Apart from the usage of tracking the products, these codes or marks are the factors that indicate the manufacturers focus towards brand building, product traceability, increased safety issues and quality assurance of the product.

Overall the industry growth is closely co-related to packaging industry growth and the manufacturing sector growth as a whole. Indian Coding Industry is estimated at ₹ 11,000 -12,000 Million as of FY2018. The Indian Coding & Marking industry is acceptance across applications and is dominated value-wise by four players with our Company being amongst them.

Your Company is vertically integrated company, involved in the development, research, manufacturing, marketing, service and commercializing of printing machines, spare parts, consumables (fluids) and associated services. Your Company is one of India's leading manufacturer of Coding and Marking Machines and consumable thereof for printing variable information such as batch numbers, manufacturing and expiry dates, maximum retail prices, serial numbers, special markings, logos, company names and barcodes. Our product line includes Continuous Inkjet Printer (CIJ), Large Character Drop on Demand Printer (LCP), Thermal Ink Coders, Thermal Transfer Over Printer (TTO), Laser Coders, Thermal Inkjet Printer (TIJ), High Resolution Piezo Inkjet Printer, spare parts, consumables (fluids) and associated services. We provide our goods and services to a wide range of industries including Personal Care, Food & Beverages, Pharmaceuticals, Construction Materials, Cables, Wires & Pipes, Metals, Automotive & Electronics, Agro-chemicals, Chemicals & Petrochemicals amongst others. Within the equipment segment, coding and marking industry growing steadily. . However, increasing adoption of TIJ, HiRes, TTO, and LCP printers is expected to drive the industry growth higher. Industry has witnessed consistent growth of 15%+ over the last decade and is estimated to grow at similar rates approximately 10-15% revenue growth in the near future. This growth rate is expected to be double GDP growth in the few years.

Your Company provides its customers the ability to code, mark, address, decorate or personalize their products:

- In-line in the manufacturing process and under all manufacturing conditions and
- Addition of fully variable alpha numeric, graphics and machine readable codes to products or packaging in real time.

Your Company is looking to expand its global foot print by exploring other international markets, and will be launching the Control Print Brand of Coding and Marking in other countries with high growth potential. This will be a good growth opportunity for the Company in the coming few years.

PRODUCT LAUNCHES

We believe that our focus on product development significantly contributes to our ability to meet customer needs in an ever-evolving and competitive market. Further, we believe that our product development processes have been a catalyst for the growth of our business. Our focus on design and development has enabled us to develop a large and diversified portfolio of coding and marking products, new product launches for TIJ Printer and High Resolution Piezo Inkjet Printer, and most

importantly reduction in development time and cost savings to the customers. Further, our R&D capabilities have enabled us to develop and successfully test, coding and marking equipment.

Keeping in view the broad base and scope of Coding and Marking industry in the market with only few players chasing the vast opportunity and resources, Your Company is currently implementing growth plans to enhance its production in a phased manner.

OPPORTUNITIES AND THREATS

Risk is an integral part of the Company's business. Key risks that the Company is exposed to include credit, market, liquidity, operational, legal, compliance and reputation risks among others. The Company manages these risks by maintaining conservative financial profile and by following prudent business and risk management practices. Being a manufacturer of majority of the items required for Coding and Marking industry and having a leadership edge in technological terms, your Company has an advantage over other players in the industry and can increase market share and installed base. The primary threat is the greater installed base of a few key competitors enabling them to get a higher number of repeat and reference sales. In addition in certain products & applications the competition is well entrenched and therefore establishing market share will be a lengthy exercise.

OUTLOOK

There are renewed hopes that better monsoon and further reforms will expand the economy at even faster pace with a growth rate going upto 8 percent, thus keeping inflation under control. India is likely to gain momentum in the year to come as a result of various policies taken up by the government. With the introduction of the Eway Bill and the GST system getting stabilised in the current year, the unorganised sector will transform more towards the organised sector and the Coding and Marking industry will witness volume growth.

ANNEXURE- 'B' TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2 (f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-Section 3 of Section 143 of the Companies Act, 2013 ('the Act')

We have audited the internal financial controls over financial reporting of **Control Print Limited** ("the Company") as of March 31, 2018 in conjunction with our audit of the Standalone Ind AS Financial Statements of the Company for the year ended on that date.

Management's Responsibility for the Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

1. Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
2. Provide reasonable assurance that the transactions are recorded as necessary to permit preparation of Financial Statements in accordance with the generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
3. Provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial control over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material aspects, an adequate internal financial control system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

All assets and liabilities have been classified as current or non-current based on normal operating cycle of business activities of the Company, which is 12 months.

(iii) Use of estimates

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

(iv) Property, Plant and Equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses, if any. Freehold land is not depreciated. The cost of an item of property, plant and equipment comprises its cost of purchase and any attributable cost of bringing the asset to its working condition for its intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the profit or loss.

(v) Capital Work-in-Progress

Property, Plant and Equipment under construction are disclosed as capital work in progress.

On transition to Ind AS, the Company has elected to continue with the carrying value of all its Capital-Work-in-Progress recognized as at April 1, 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of the work-in-progress.

(vi) Intangible Assets

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Estimated useful lives of the Intangible assets are as follows:

Computer Software 6 Years

Technical Know How 6 Years

There are no intangible assets having indefinite useful life.

An intangible asset is derecognised upon disposal or when no future economic benefits are expected to arise. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

(vii) Leases

As a lessee

Lease of Property, plant and equipment are classified as finance leases where the Company has substantial risks and rewards of ownership. In any other case the same is classified as operating lease. Finance leases are capitalised at the lease's inception period at the fair value of the leased property or, if lower, the present value of the minimum lease payments.

Payments made under operating leases are charged to profit or loss on a straight-line basis over the period of the lease unless the payments are structured in accordance with lease agreements.

As a lessor

Lease income from operating leases where the Company is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured in accordance with lease agreement.

(viii) Depreciation and Amortization

Property, plant and equipment

Depreciation is calculated using the straight line method to allocate their cost, net of their residual values, over their estimated useful lives.

The useful lives have been taken as specified by Schedule II to the Companies Act, 2013 except for coding and marking machines where useful lives have been determined as seven years based on technical evaluation done by the management.

Pro-rata depreciation is charged on property, plant and equipment from/up to the date on which such assets are ready to put to use/are deleted or discarded.

Pro-rata amortization is charged on intangible assets from/up to the date on which such assets are acquired for use/are deleted or discarded.

(ix) Impairment of Assets

A tangible or intangible asset is treated as impaired when the carrying amount of the asset exceeds its estimated recoverable value. Carrying amounts of tangible or intangible assets are reviewed at each balance sheet date to determine indications of impairment, if any, of those assets. If any such indication exists, the recoverable amount of the asset is estimated and an impairment loss equal to the excess of the carrying amount over its recoverable value is recognised as an impairment loss and the same is charged to profit and loss account. The impairment loss, if any, recognised in prior accounting period is reversed if there is a change in estimate of recoverable amount.

(x) Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provision of the instrument. All the financial assets and financial liabilities are initially measured at fair value. All the financial assets are initially measured at fair value. Transaction costs that are directly attributable to the financial asset (other than financial assets covered at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset.

Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments as the same has been recognised in other comprehensive income.
- (c) Financial assets at fair value through profit or loss (FVTPL):** Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Derecognition of financial assets

A financial asset is derecognised when the contractual right to receive cash flows from the asset has expired; the company has transferred the financial asset along with all the risks and rewards or has assumed an obligation to pay the received cash flows in full to a third party under a pass-through arrangement.

On derecognition of a financial asset in its entirety, the difference between the carrying amount measured at the date of derecognition and the consideration received is recognised in profit or loss.

The sensitivity analysis have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

The sensitivity analysis presented above may not be representative of the actual change in the projected benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

(viii) Characteristics of defined benefit plans and associated risks:

The Company has an unfunded Defined benefit gratuity plan. Gratuity is paid from company as and when it becomes due and is paid as per company scheme for Gratuity. During the year, the company has changed the benefit scheme in line with Payment of Gratuity Act, 1972 by increasing monetary ceiling from ₹ 10 Lakhs to ₹ 20 Lakhs. Change in liability (if any) due to this scheme change is recognised as past service cost.

Gratuity is a defined benefit plan and company is exposed to following Risks:

- **Salary Risk-** The Present value of the defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than assumed level will increase the plan's liability.
- **Interest Rate Risk-** A falls in the discount rate which is linked to the Government securities. Rate will increase the present value of the liability requiring higher provision.
- **Asset Liability Matching Risk-** The plan faces the ALM risk as to the matching cash flow. Company has to manage payout based on pay as you go basis from own funds.
- **Mortality Risk-** Since the benefits under the plan is not payable for life time and payable till retirement age only, plan does not have any longevity risk.

Equity Investment at FVTPL

Under previous GAAP, investments were measured at cost less diminution in value which is other than temporary. Under Ind AS, Company has designated these Investments at Fair Value Through Profit or Loss (FVTPL), accordingly these investments are required to be measured at fair value. At the date of transition to Ind AS, difference between the fair value of the instruments and its Previous GAAP carrying amount has been recognised in retained earnings.

Investment in subsidiaries, joint venture and associates

The Company has carried its investment in subsidiary at cost (as appearing in previous GAAP).

Proposed Dividend

Under the previous GAAP, dividends proposed by the Board of Directors after the balance sheet date but before the approval of the financial statements were considered as adjusting events and accordingly, provision for proposed dividend was recognised as a liability. Under Ind AS, such dividends are recognised when the same is declared by the shareholders in the general meeting."

Other Comprehensive Income

Under Ind AS, remeasurements gains or losses (i.e. actuarial gains and losses, excluding interest expense on the net defined benefit liability) are recognised in other comprehensive income instead of profit and loss. Under the previous GAAP, these remeasurements were forming part of the profit and loss for the year.

Retained Earnings

Any difference on account of transition from previous GAAP to Ind As while preparing opening Ind AS Balance Sheet as on April 01, 2016 is adjusted under the head retained earnings.

Deferred Tax

Under Previous GAAP, deferred taxes were recognised for the tax effect of timing differences between accounting profit and taxable profit for the year using the income statement approach. Under Ind AS, deferred taxes are recognised using the balance sheet approach for future tax consequences of temporary differences between the carrying value of assets and liabilities and their respective tax bases. The above difference, together with the consequential tax impact of the other Ind AS transitional adjustments lead to temporary differences and deferred tax has been recognised on the same.

Gratuity

Under the previous GAAP, cost relating to post employment benefit obligations including actuarial gain/losses were recognised in Profit & Loss. Under Ind AS, actuarial gain/losses on the net defined benefit liability are recognised in other comprehensive income instead of profit & loss.

48 Previous year figures have been regrouped, reclassified wherever necessary.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Holding Company and its subsidiary company.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

1. Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
2. Provide reasonable assurance that the transactions are recorded as necessary to permit preparation of consolidated Ind AS financial statements in accordance with the generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and
3. Provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the consolidated Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial control over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Holding Company and its subsidiary company, which are incorporated in India have, in all material aspects, an adequate internal financial control system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

(viii) Characteristics of defined benefit plans and associated risks:

The Company has an unfunded Defined benefit gratuity plan. Gratuity is paid from company as and when it becomes due and is paid as per company scheme for Gratuity. During the year, the company has changed the benefit scheme in line with Payment of Gratuity Act, 1972 by increasing monetary ceiling from 10 Lakhs to 20 Lakhs. Change in liability (if any) due to this scheme change is recognised as past service cost.

Gratuity is a defined benefit plan and company is exposed to following Risks:

- **Salary Risk-** The Present value of the defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than assumed level will increase the plan's liability.
- **Interest Rate Risk-** A falls in the discount rate which is linked to the Government securities. Rate will increase the present value of the liability requiring higher provision.
- **Asset Liability Matching Risk-** The plan faces the ALM risk as to the matching cash flow. Company has to manage payout based on pay as you go basis from own funds.
- **Mortality Risk-** Since the benefits under the plan is not payable for life time and payable till retirement age only, plan does not have any longevity risk.

Equity Investment at FVTPL

Under previous GAAP, investments were measured at cost less diminution in value which is other than temporary. Under Ind AS, Company has designated these Investments at Fair Value Through Profit or Loss (FVTPL), accordingly these investments are required to be measured at fair value.

At the date of transition to Ind AS, difference between the fair value of the instruments and its Previous GAAP carrying amount has been recognised in retained earnings.

Investment in subsidiaries, joint venture and associates

The Company has carried its investment in subsidiary at cost (as appearing in previous GAAP).

Proposed Dividend

Under the previous GAAP, dividends proposed by the Board of Directors after the balance sheet date but before the approval of the financial statements were considered as adjusting events and accordingly, provision for proposed dividend was recognised as a liability. Under Ind AS, such dividends are recognised when the same is declared by the shareholders in the general meeting.

Other Comprehensive Income

Under Ind AS, remeasurements gains or losses (i.e. actuarial gains and losses, excluding interest expense on the net defined benefit liability) are recognised in other comprehensive income instead of profit and loss. Under the previous GAAP, these remeasurements were forming part of the profit and loss for the year.

Retained Earnings

Any difference on account of transition from previous GAAP to Ind As while preparing opening Ind AS Balance Sheet as on April 01, 2016 is adjusted under the head retained earnings.

Deferred Tax

Under Previous GAAP, deferred taxes were recognised for the tax effect of timing differences between accounting profit and taxable profit for the year using the income statement approach. Under Ind AS, deferred taxes are recognised using the balance sheet approach for future tax consequences of temporary differences between the carrying value of assets and liabilities and their respective tax bases. The above difference, together with the consequential tax impact of the other Ind AS transitional adjustments lead to temporary differences and deferred tax has been recognised on the same.

Gratuity

Under the previous GAAP, cost relating to post employment benefit obligations including actuarial gain/losses were recognised in Profit & Loss. Under Ind AS, actuarial gain/losses on the net defined benefit liability are recognised in other comprehensive income instead of profit & loss.

Goodwill

Goodwill arising on an acquisition of a business is initially recognized at cost at the date of acquisition. After initial recognition, goodwill is measured at cost less accumulated impairment losses, if any.

48 Previous year figures have been regrouped, reclassified wherever necessary.
