Key Highlights – Q4 & FY25 Results

The company reported a decrease in revenue and EBITDA compared to the previous year. This downturn was primarily driven by reduced volumes and realization in both domestic and export markets. The domestic market faced significant pressure due to the dumping of low-priced soft ferrite cores from China, while the export market was impacted by the prevailing economic climate in Europe following recent geopolitical events.

In the face of these challenges, the company successfully reduced its fixed overhead costs from ₹33 crore in previous year to ₹27. crore during the period, demonstrating its commitment to operational efficiency.

In a significant positive development, the company welcomes the recent announcement by the Central Government, through Gazette Notification no. 04/2025-CUSTOM(ADD) dated March 18, 2025, imposing an anti-dumping duty of up to 35% on imports of soft ferrite cores originating from China. This duty, effective for five years, follows Cosmo Ferrites' proactive request for an investigation into the unfair trade practice of dumping
