Note: Wherever we have referred to the global PET operations (including that of subsidiaries) in the document we have used 'Dhunseri Group' and for Company operations (standalone) we have used 'the Company'.

During a challenging 2014-15, most people began to question whether PET has a future.

Our answer: of course it does.

PET is the fastest-growing alternative to glass merely passing through a temporary overcapacity.

PET is one of the most versatile packaging-based plastics weathering a brief industry cyclicality.

PET is synonymous with modern lifestyles experiencing structural industry adjustments.

Dhunseri Petrochem continues to be an attractive proxy of the Indian PET consumption growth story.

Chairman's
communication
to shareholders

Dear Shareholders

The year 2014-15 proved
to be challenging for the
global and Indian
economies.

THE YEAR 2014 STARTED WITH AN EXPECTATION OF APPROXIMATELY 3.7% GLOBAL GDP GROWTH BUT THIS WAS SUBSEQUENTLY REVISED TO 3.4% FOLLOWING THE SHARP DECLINE IN CRUDE OIL PRICES THAT LED TO A SLOWDOWN IN OIL-EXPORTING COUNTRIES LIKE RUSSIA AND BRAZIL, AS WELL AS THE ECONOMIES OF THE EUROZONE.

GROWTH IN INDIA REVIVED FOLLOWING THE REVIVAL OF BUSINESS SENTIMENT ON INSTALLATION OF A NEW CENTRAL GOVERNMENT WITH A STRONG MAJORITY. THIS WAS AIDED BY A DECLINE IN INTERNATIONAL CRUDE PRICES AND LED TO REDUCED ENERGY IMPORT COSTS THAT REINED IN INFLATION.

DURING THE YEAR UNDER REPORT, DHUNSERI PETROCHEM (FOLLOWING THE DEMERGER OF ITS TEA BUSINESS) ACHIEVED A NET TURNOVER OF ₹2,718 CRORES (₹3,749 CRORES IN 2013-14). EBITDA WAS ₹163 CRORES AGAINST ₹185 CRORES IN 2013-14. PROFIT AFTER TAX WAS ₹38 CRORES AS AGAINST ₹61 CRORES IN THE PREVIOUS YEAR. CASH PROFIT STOOD AT ₹89 CRORES IN 2014-15 AS AGAINST ₹118 CRORES IN 2013-14. OUR EARNINGS PER SHARE WAS ₹10.77 DURING 2014-15.

PET resin challenges

The PET resin industry faced challenges on multiple fronts during the year under review. The industry was affected by volatility in feedstock prices, declining finished product realisations, anti-dumping duties on PET resin by euro-zone countries and adverse foreign currency fluctuations.

First, the prices of Purified Terephthalic Acid (PTA) and MonoEthylene Glycol (MEG) fluctuated significantly during the year under review. Since PTA and MEG are crude oil derivatives, they were exposed to crude oil price volatility. Crude oil prices declined from a high of nearly \$110 per barrel to a low of around \$46 per barrel in just five months, one of the sharpest declines seen in our living memory. There was corresponding erosion in the prices of PTA and MEG

by around 36% and 27% respectively, which was followed by a corresponding decline in PET resin realisations by 33%.

Besides, in the beginning of 2014, the Indian Government had imposed an anti-dumping duty on PTA imports that led to a spurt in domestic PTA prices. This initial rise in PTA prices was followed by a sharp drop, mirroring the decline in the price of crude towards the latter part of 2014, resulting in huge inventory losses. The result of this volatility was a situation where PET resin manufacturers were compelled to liquidate their production at a steep discount.

Second, the anti-dumping duties imposed by the European Union (EU) on PET resin imports extended into the year under review. Due to this, the Company could not access the EU markets.

Operations at Haldia, West Bengal, India

The PET resin plant at Haldia operated at a capacity utilisation of approximately 85% during 2014-15. The severe decline in PET resin prices in the international markets during the year and an overhang from a global demand-supply imbalance caused our operating margins to decline. This resulted in a temporary shut down of Line-I at Haldia until the demand-supply scenario improved.

Operations at Ain-El-Sokhna, Egypt

The Company's subsidiary Egyptian Indian Polyester Company S.A.E (EIPET) owns a majority stake in the PET resin plant in Egypt that commenced operations in the year 2014. This plant had begun ramping up capacity and was in the pre-

The robust quality of our assets and the inherent strengths of our business model should enable us to tide over a difficult operating scenario.

stabilisation stage of production when it was exposed to a significant volatility in the prices of feedstocks (PTA and MEG) on the one hand and a sharp decline in PET resin realisations on the other.

These unforeseen reversals caused significant inventory losses and the unit's operational margins came under severe pressure. It was decided by the management to temporarily discontinue operations at this plant until the operating scenario improved. Currently, negotiations are in progress with lenders to restructure the debt of this unit. The unit is expected to soon recommence production and address the growing demand for PET resin from Europe and Africa.

Looking forward

The Company envisages a flat demand in the market for PET resin in 2015-16 with challenges in the form of imbalance in demand and supply in the PET resin markets persisting. Moreover the US anti-dumping duty on exports from India is expected to be levied.

However, I remain optimistic about the Company's prospects for a number of reasons:

- The fall in prices of feedstock will reduce our working capital needs and financing costs and add to the Company's bottomline.

- Lower PET price resulting from the recent decline in PET resin prices will eventually drive the usage of PET as there is no comparable low-cost packaging medium.

- The Company recognises the importance of secured feedstock availability and is proactively working with suppliers to ensure continuous availability.

- The Company is seeking newer customers and has made further inroads into the India's neighbouring markets, among others, during 2014-15.

- The Company is exploring opportunities arising from the new-found PET applications like the packaging of alcoholic and dairy products.

Our organisational restructuring

I am happy to inform that we successfully demerged the tea plantation business of the Company during 2014-15 and it now operates as Dhunseri Tea & Industries Limited (DTIL) while the IT SEZ business has been re-organised in a wholly-owned subsidiary christened Dhunseri Infrastructure Limited (DIL). The shares of DTIL has been listed on the major stock exchanges in India and issued to shareholders of DPTL.

The original entity, Dhunseri Petrochem & Tea Limited was renamed Dhunseri Petrochem Limited to highlight its core

focus on PET resin manufacture.

Following this restructuring, two entities have emerged under the 'Dhunseri' banner, each focused on their individual areas of operations – petrochem and tea plantations. Going forward, this will allow each business entity to be evaluated on its own merit and enable the respective managements to take a long-term view in capitalising on opportunities.

I remain confident that each of these companies will continue to operate profitably and create enduring value for shareholders.

Conclusion

The robust quality of our assets and the inherent strengths of our business model should enable us to tide over a difficult operating scenario. I expect that the PET resin overcapacity should be substantially absorbed in three or four years, driven by a sustained spending increase on FMCG products, rising disposable incomes and favourable demographics.

With a cumulative installed capacity of 8,30,000 tonnes per annum of PET resin and technologically-advanced plants, Dhunseri Petrochem will certainly be able to weather this temporary slowdown and ride the next sectoral rebound.

The Company sells PET resin under the brand

Overview

Polyethylene terephthalate is a widely-used packaging material because of its resistance to micro organisms and fungi, ability to retain freshness, inertness to food and beverage content. Moreover, its shatter-resistant, cost-effective, lightweight and as transparent as glass.

The Company produces various PET resin grades used in the packaging of drinking water, carbonated and alcoholic beverages, edible oils, pharmaceuticals, dairy products and others.

The advantages offered by PET comprise:

- 💧 PET is a cost-effective packaging medium which ensures lower transportation costs

- 💧 PET is lighter compared to glass and aluminium; this weight has been progressively reduced without a corresponding reduction in strength

- 💧 PET enjoys superior barrier properties compared with other polymers in the polymeric value chain (polyvinyl chloride, polypropylene and polystyrene), making it a preferred medium for packing carbonated beverages and mineral water

- 💧 PET packaging enjoys approvals and

clearances from the USFDA, EC, ITRC, Japanese and Canadian food and health regulatory agencies

- 💧 PET can be recycled several times, making it an environmentally-friendly packaging medium

- 💧 PET enjoys the lowest lifecycle energy costs compared with alternative packaging materials (glass and aluminium)

- 💧 PET manufacturing is environmentally safer than glass and aluminium

We continued to strengthen the Company

in a challenging year by making enduring investments in our business.

The benefits of these will be manifested across the long-term.

Locational advantage

Our PET resin manufacturing facility is located in the port-based town of Haldia. We consider this location to be an advantage in a business that is sensitive to logistical costs. The location makes it possible to optimise the cost of raw material import and guarantee the timely export of finished products.

Enduring relationships

Over the years, the Company has developed enduring relationships with its major raw material supplier located in Haldia and a number of domestic customers. These customers produce

downstream products that address the food-sensitive requirements of their customers (packaged food brands).

Large scale

The Company is among the largest global manufacturers of PET resin. This scale provides the Company with visibility among global customers that in turn translates into an anytime availability of material. In turn, the scale ensure the cost competitive procurement of raw material which has helped strengthen the Company's competitiveness. With a capacity of 4,10,000 tonnes per annum, the Company enjoys a significant operating leverage.

Competence

The Company has demonstrated the competence to graduate beyond the commodity-end of the market and produce customised varieties suited to specific downstream applications. Over the years, this competence has helped the Company broad-base its risk across a number of varieties, reducing its excessive dependence on one or few varieties. The Company addresses the requirements of the following downstream industries – drinking water, carbonated and alcoholic beverages, edible oils, pharmaceuticals, dairy products and others.

Marketing base

The Company's customers are based in 50 countries across five continents. The Company serves its customers through a well knit marketing network consisting of qualified sales personnel.

Experience

The Company has an experience of more than a decade in the business. It is the second-largest PET resin manufacturer in India.

Quality-focused brand

The Company's ASPET brand is respected for qualitative consistency. The Company manufactures customised high-quality food grade resin benchmarked with international safety and health guidelines.

Logistics: The Company benefits from the logistical advantages of having its PET resin manufacturing facility located in a port-based town. The facility at Haldia not only can import raw material with relative ease but also effect quicker export turnarounds. Further, the facility is located proximate to its principal raw material supplier who is also based in Haldia, reducing inventory lead time and transportation costs. The Company has commissioned MEG pipeline to transport imported MEG from the port to the factory, thereby reducing logistic costs.

Power: The Company has coal-based captive power plants to address its captive requirement and thereby reduce energy costs.

Experience: The Company has been manufacturing PET resin for more than a decade. It expanded capacity and marketed its output to quality-conscious customers. The Company possesses a deep knowledge of the business; its ASPET brand is perceived as a hallmark of quality.

Environment-friendly: The Company's manufacturing processes are clean, green and compliant with stringent global norms. During the year under review, the Company commenced the construction of a treated water effluent plant at Haldia to recycle and reuse waste water, significantly reducing liquid effluent discharge. A solid waste recycle plant continues to remain in operation at the Haldia plant.

Technology: The Company has consistently remained ahead of the PET resin manufacturing technology curve. The Company's facility at Haldia leverages top-of-the-line German technology to reduce production costs, optimise energy consumption and enhance product quality.

Quality: The production units continue to be accorded quality approvals from domestic and international agencies. The plant at Haldia was assigned the ISO 9001:2008 certification by TUVNORD. The PET resin products manufactured by the Company continue to enjoy approvals from national and international regulatory bodies (USFDA, EC, ITRC, Japanese and Canadian food and health bodies).

Dominance: As of March 31, 2015, the Company enjoyed an Indian market share of approximately 26%.

Highlights, 2014-15

Financial

In the year 2014-15, the global PET resin industry witnessed an overcapacity with declining demand and volatile raw material prices. This led to a temporary shutdown in one of the lines at Haldia, India and impacted the Company's performance. The Company reported a turnover of ₹2,717.87 crores in 2014-15 as compared to ₹3,748.93 crores in

2013-14. The reduction was on account of volume as well as lower PET resin realisations.

Operational

💧 The Company continued operating the Haldia facility despite several challenges (unprecedented volatility in PET resin realisations, raw material prices and unabating import costs.)

💧 The captive power plants at Haldia continued to be operational, allowing the Company to leverage the benefit of lower energy costs.

Marketing

💧 The domestic offtake from the Haldia plant was 1,93,983 MT in 2014-15 as against a domestic offtake of 1,72,732 MT in 2013-14.

💧 The marketing team was strengthened to expand customer reach.

💧 The Company continued to focus on the domestic market and achieved significant volume increases; it carved out incremental market shares in Bangladesh, Nepal and Bhutan.

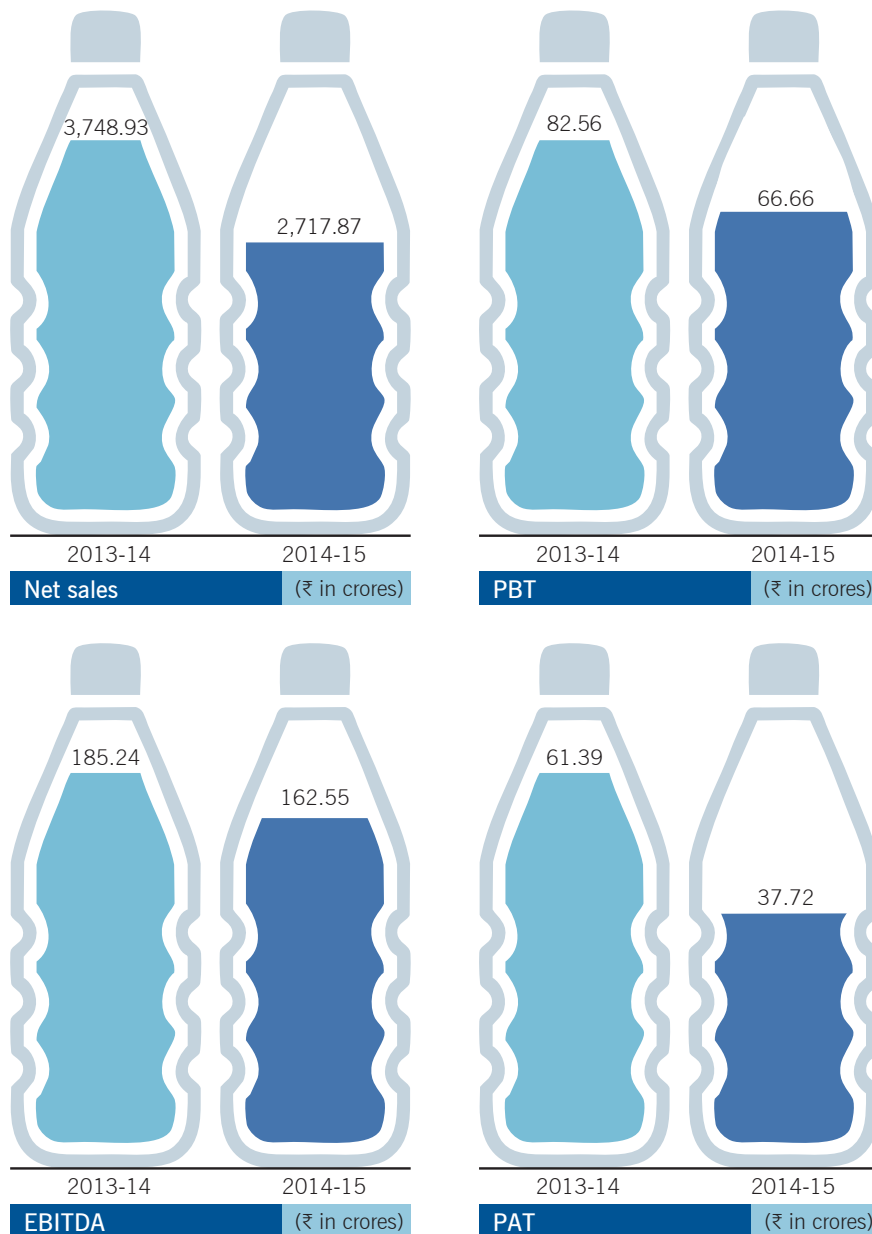

💧 The Company's ASPET brand was marketed in over 50 countries covering five continents.

Outlook, 2015-16

The Company aims to increase capacity utilisation in its manufacturing unit in Haldia in 2015-16. Following factors are key enablers for the year 2015-16.

- 💧 A stabilising rupee
- 💧 Availability of energy fuel
- 💧 Availability of raw materials
- 💧 Stabilising crude oil prices
- 💧 General upswing in market sentiment
- 💧 Signs of slowdown in the Chinese economy

Financial highlights, 2014-15

Note: In view of the restructuring of DPTL during 2014-15, the financial figures shown above for the year 2013-14 have been recast to reflect only the continuing business of petrochem and facilitate a fair comparison with the 2014-15 numbers.

Management Discussion and Analysis

Global economy and outlook

The year 2014-15 was witness to a slowdown in the global economy. The emerging economies of China and India experienced moderated economic growth while the advanced economies of the US and the eurozone witnessed an improving recovery from the recession that started in 2010. The year remained fraught with crude oil price volatility, slowdown in the Chinese economy, trade protection among others.

The advanced nations of the US and the UK improved their economic outlook aided by accommodative monetary policies and significantly lower energy costs. Chinese GDP growth was 7.4% during 2014 and is expected to slow significantly in 2015 to around 7%. The Chinese Government aims to reduce the impact from this slowdown by reducing focus on exports and growing domestic consumption.

As per World Bank estimate, it is expected that global growth should increase at around 2.80% in 2015 and accelerate to touch around 3.20% by 2017.

Indian economy and outlook

The macroeconomic scenario in India witnessed an improvement in the year 2014-15 as compared to the previous year. There was a decline in both wholesale and retail inflation, rising domestic demand, increased capital expenditure, stable exchange rates and sharply reduced outflows on account of oil imports. The previous few years were marked by sharply rising inflation, widening fiscal deficit, stagnating demand, current account imbalances and fluctuations in the value of the rupee against the dollar.

The decline in inflation was further aided by the sharp fall in prices of crude oil to

the extent of over 40% and also declines in major industrial commodities towards the end of 2014.

The latest estimates of national income (Source: Central Statistics Office) indicate that growth revival, which had commenced in 2013-14, continued into 2014-15.

As per the Economic Survey 2015, India grew by an estimated 7.4% in 2014-15 as against 6.9% in 2013-14. The forecasts of the World Bank and IMF expect the Indian GDP growth rate to remain approximately 7.5% during 2015-16 and reach approximately 8% in 2017-18. Possibilities abound for the Indian GDP growth to sharply accelerate in the next five years by capitalising on investment-led growth, economic reforms and favourable demographics.

PET resin industry

Sectoral overview

PET resin is a thermoplastic polyester produced by reacting two raw materials, PTA and MEG, is used in manufacture of PET bottles and packaging film. PET bottles represent preferred packaging material for a range of beverages and

edibles because of durability, high clarity, low permeability and freshness retention.

The global PET packaging consumption is expected to grow at a CAGR of 5.4% between 2014 and 2019 driven by the burgeoning demand from emerging and transitional economies in the Asia Pacific,

South America as well as Central and Eastern Europe.

Benefits of PET over other packaging media

PET has several advantages over other forms of packaging. Packaging made of PET is strong as well as lightweight, flexible

yet near-unbreakable. PET packaging is normally inert in atmospheric conditions and does not react with its contents and is also resistant to microorganisms. The energy intensity of PET is also considered to be considerably lower than other forms of packaging such as glass and aluminium for bottling.

Factors driving demand for the use of PET resin

Expanding middle class; rise in disposable incomes: For the first time in history, a global middle class is expected to emerge. By 2030, the global middle class could double from 2 billion people today to 4.9 billion. This expansion is expected to be led primarily by the rapid growth of China, India, Indonesia, Thailand, Vietnam and Malaysia. Asia's share of the new global middle class could double from the present 30%. Brookings Institution predicts that by 2030, Asia could host over 60% of the global middle class and account for over 40% of the global middle class consumption. This phenomenon could cause a substantial increase in disposable incomes and a consequential rise in purchasing power. The PET resin industry is expected to emerge as a major beneficiary of this phenomenon.

Durable: Bottles made from PET are more durable and lighter. PET packaging provides a better barrier properties when

compared with other media with a lower tendency to allow odourous elements through the bottle walls. These properties have expanded the market for PET packaging and PET is now being used for the packaging of dairy and alcoholic beverages (beer and liquor).

Hygienic: PET-based packaging provides high resistance to attacks from microorganisms; it does not react with foods and beverages. PET bottles and packaging are easy to clean, break-resistant, shatter-proof under extreme impact punishment, heat-resistant and odourless. It is for these reasons that PET packaging is preferred over other media (glass and aluminium packaging) for foods and beverages.

Cost-effective: PET-based packaging is one of the most economical media for packaging and transportation of food and beverages. PET-based packaging is light while at the same time durable and robust that prevents loss from transit damage and breakage. This property has prompted food and beverage manufacturers to shift from other forms of packaging to PET.

Transparent: PET-based packaging has high transparency similar to glass, thereby allowing its contents to be clearly visible. This property is driving the demand for PET based packaging as it provides visual appeal to buyers and allows them to see the condition of packaged items.

Rapidly expanding FMCG and packaging market: A population of 1.25 billion Indians is rapidly expanding and driving the Indian FMCG market growth to an estimated \$49 billion in 2016 (*Source: Nielsen*). The growth of the packaging industry rides the growth of the FMCG sector. The FMCG markets in India's neighbouring countries (Bangladesh, Nepal and Bhutan) also continue to grow rapidly, riding the increasing number of people graduating out of poverty.

Indian PET resin industry

The Indian PET resin industry derives its growth from the rapidly expanding FMCG packaging industry. The annual growth of the Indian packaging sector is estimated at about 15%. McKinsey has predicted that there could be a ten fold increase in India's middle-class population by 2025 leading to a sharp increase in disposable incomes, the Indian FMCG packaging market size and therefore PET consumption.

The Indian PET resin market is estimated to be around \$1billion and is expected to grow at a CAGR of approximately 8.6% between 2014 and 2019. The market witnessed robust growth over five years on account of increasing demand from downstream packaging and bottling industries.

International PET resin industry

It is expected that the Asia-Pacific region will be the major consumer of PET resin from 2015 leading to 2019. The Asia Pacific continues to be the largest market for PET resin (value and volume). The emerging markets of China and the Indian subcontinent are expected to drive PET resin demand in the bottling and food packaging segments. The Asia Pacific PET packaging consumption is expected to report a CAGR of approximately 6.3% upto 2019. The major players in the global PET resin market are Indorama Ventures Public Company (Thailand), M&G Chemicals (Luxembourg), Jiangsu Sanfangxiang Group (China), Far Eastern New Century Corporation (Taiwan), Alpex (Mexico) and DAK Americas, the US.

Global outlook for the PET resin industry

The global PET packaging consumption is expected to grow at a CAGR of 5.4% between 2014 and 2019 due to the advantages that PET offers as a packaging material over alternatives such as glass, paper and metal. Globally, the end-use of PET resin is dominated by the bottle, food and container packaging segments, which account for approximately 65% of the market share.

Outlook

The growth rate of the Indian packaging sector is projected to be close to 15% over the next 10 years and is expected to mirror the rise in the FMCG sector in India. India's current demographic profile shows that half of the Indian population is currently under the age of 25 years and an increasing number of Indians are joining the workforce with rising disposable incomes. The sharp rise in disposable incomes along with the increased propensity to consume will trigger a sharp rise in the Indian FMCG markets and PET

packaging is expected to be a significant beneficiary of this trend.

Segment-wise and product-wise performance

The Company's revenues from sale of PET resin declined by 28% to ₹2,718 crores. The production during the year declined by 15% compared to the previous year. The Company enjoyed a 26% market share in the domestic market with sales quantity from the domestic market growing at 12%. Export sales quantity decreased by 36% during the year and accounted for 44% of the Company's revenues.

Management of business risks

The management of the Company is cognisant of the numerous risks that the business is susceptible to and the industry that it operates in. The Company reviews threats to its operating model and takes adequate measures to prevent their occurrence. Adequate recovery systems are in place to deal with threats materialising into risks to prevent any extended period of disruption with a view to enabling the timely resumption of normal business conditions.

The Company's Board of Directors and management appraise various risks that it is exposed to. They take decisions following a careful consideration of all relevant factors. The Company has in place a Risk Management Committee, comprising members of the Board of Directors and Senior executives of the Company, to evaluate the critical processes of the Company and identify risks to these processes. Following a careful analysis, the Committee discusses options to mitigate such risks and monitors their implementation. These have been discussed in detail in the risk management section of this Annual Report.

Internal control systems and their adequacy

The Company has instituted a system of checks and balances to ensure that all assets are safeguarded and adequately protected against the chances of occurrences of any loss or damage whether foreseen or unforeseen. The internal control system is working satisfactorily and is commensurate with the size and nature of the organisation. The Company regularly carries out checks to ensure that the internal controls are working satisfactorily.

The internal control systems are monitored and reviewed on a regular basis by the Executive Chairman, Vice Chairman & Managing Director, Managing Director & CEO, Executive Director (Finance), and the CFO. A seamless system has been put in place to ensure that any major discrepancies or lapse in controls are reported to the Audit Committee and Board of Directors of the Company and action is taken to control any breach.

Discussion on financial performance with respect to operational performance

This section is covered in the Board's Report under the section of financial results and performance. The financial review for the year has been covered specifically in a different section of this Annual Report.

Human resources

The Company has over the years strived to build competent human capital by retaining employees within the organisation and recruiting high-performing individuals from across the industry. The Company has successfully maintained harmonious industrial relations across its various operating locations and with its employees. The total employee strength as on March 31, 2015 was 350.

Financial review, 2014-15

Analysis of Profit & Loss Account

💧 The Company's revenue from operations (net) decreased by 28.5% from ₹3,881.53 crores in 2013-14 to ₹2,774.10 crores in 2014-15. This was majorly due to two reasons viz. (a) during the year, the prices of raw materials and finished product which are linked to crude oil price have fallen sharply; and (b) the Company had taken shut down of one of its two Plants for part of the year thus reducing the production. Other income increased by 28% from ₹30.24 crores in the previous year to ₹38.66 crores in the current year.

💧 Owing to lesser production and fall in crude oil price, the raw material expenditure decreased by 30% from ₹3,248.77 crores in 2013-14 to ₹2,264.13 crores in 2014-15.

💧 Employee cost increased by 16% to stand at ₹27.96 crores in 2014-15.

💧 Depreciation and amortisation expenses stood at ₹36.44 crores in 2014-15, a fall of 15% as compared to previous year on account of changes in the depreciation schedule in the new Companies Act, 2013.

💧 Other expenses for 2014-15 decreased nearly by 30% standing at ₹298.57 crores, owing to decrease in power and fuel

expenses on account of commissioning of Company's second captive power plant, reduction in cost of stores and spare parts including packing material expenses, freight, delivery and shipping charges, brokerage and commission expenses and foreign currency fluctuation loss.

Analysis of Balance Sheet Capital employed

The total employed capital decreased by 25% in 2014-15 majorly on account of decrease of net working capital by 29% as compared to previous year. The return on capital employed (ROCE) increased from 6.4% in 2013-14 to 6.8% in 2014-15.

The long term debt-equity ratio was 0.88 in 2014-15 compared to 0.51 in 2013-14.

Application of funds Fixed assets and Non-current Investments

The decrease in tangible fixed assets and non-current investments in the current year was majorly on account of transfer of assets in accordance with the Scheme of Arrangement as approved by Hon'ble Calcutta High Court for demerger of tea division and IT SEZ division into separate companies.

Working capital management

💧 Current assets as on March 31, 2015 stood at ₹1,229.55 crores against

₹1,623.84 crores as on March 31, 2014, a decrease of 24% on account of reduction in level of inventory and trade receivables. Current ratio improved substantially to 1.17 as on March 31, 2015 against 1.05 as on March 31, 2014.

Risk analysis and mitigation

IT IS ESSENTIAL FOR AN ORGANISATION TO ASSESS AND IDENTIFY THE VARIOUS RISKS IT IS EXPOSED TO. A PROPER UNDERSTANDING OF THE RISKS ENSURES PROPER MITIGATION MEASURES TO BE TAKEN. THE COMPANY'S RISK MANAGEMENT FRAMEWORK IS IN LINE WITH THE INDUSTRY BEST PRACTICES.

The significant risks identified by the Company and the mitigation measures adopted include:

1

Sector concentration risks

A SINGULAR EMPHASIS ON THE PET RESIN SECTOR MAY EXPOSE THE COMPANY TO SLOWDOWNS OR CYCLICAL DOWNTURNS IN THE INDUSTRY.

Mitigation

💧 PET bottles and containers find favour as a packaging medium for being hygienic, strong, lightweight, shatterproof and their ability to retain content freshness.

💧 The global PET packaging consumption is expected to grow at a CAGR of 5.4% between 2014 and 2019.

💧 PET is the only ideal alternative to conventional glass packaging.

💧 The packaging industry will slowly move to environmentally-friendly manufacturing media like PET as opposed to glass and aluminium.

2

Foreign exchange risks

VOLATILITY IN FOREX RATES COULD PROVE DETRIMENTAL.

Mitigation

The Company enjoys a natural foreign currency hedge that largely insulates it from oscillations in foreign currency

rates as a result of the Company being an importer of raw materials and exporter of finished products. The Company also

hedges its foreign currency position periodically to protect itself from foreign currency fluctuation risks.

3

Technology risks

OBSOLESCENCE ON THE TECHNOLOGICAL FRONT MAY AFFECT THE QUALITY OF THE COMPANY'S PRODUCTS AND DISRUPT ITS BUSINESS.

Mitigation

💧 The Company's PET resin manufacturing plants have been built using cutting-edge German technology.

💧 The Company has progressively invested in keeping itself abreast of the latest technologies in its line of business.

💧 The Company has also favoured steady automation of its business processes to enable better operational monitoring.

4

Marketing and quality risks

AN INABILITY OF THE COMPANY TO PRODUCE MARKETABLE PRODUCTS MAY IMPACT SALES AND LEAD TO LOWER CAPACITY UTILISATION.

Mitigation

- The Company leverages its extensive marketing reach to make its ASPET brand available across more than 50 countries worldwide.
- This has been supported by setting up a branch office in Dubai.

- The reputation and goodwill enjoyed by 'ASPET' brand of PET resin over the last 12 years is a testimony to its quality.
- Adequate quality and assurance checks have been put in place to ensure adherence to technical parameters.

- The Company also has an extensive dealer and distributor network located across India.

5

Operational risks

INEFFICIENT OPERATIONAL MANAGEMENT MAY ESCALATE PRODUCTION COSTS AND AN INABILITY TO INTEGRATE OPERATIONS ACROSS THE FUNCTIONS OF THE COMPANY MAY HAMPER PROFITABILITY.

Mitigation

- The Group has been in the business of manufacturing PET resin since 2003. This entails close to 12 years of engagement in the business of PET resin manufacture during which the Company has demonstrated an incipient ability

- to manage operations efficiently and profitably.
- Further, in order to lower dependency on external power sources as well as to save on its energy costs, the Company has been running its captive power plant.

- The Company has made operational improvements by commissioning MEG pipeline to transport the imported resource from the port to its storage tanks located in the factory premises, thereby reducing logistic costs.

6

Health-related risks

CONCERNS REGARDING THE HEALTH AND SAFETY ASPECTS OF PET-BASED PACKAGING MAY NEGATIVELY IMPACT THE ENTIRE INDUSTRY AND DIMINISH THE COMPANY'S OFFTAKE.

Mitigation

- The use of PET packaging has been tested and cleared by multiple health and regulatory agencies worldwide such as the USFDA, EC, ITRC, Japanese and Canadian food and health regulatory bodies.
- PET is widely used and accepted as a

- safe packaging material by reputed food and beverage majors. Confidence arises from the fact that the PET polymer is a stable and inert packaging form and helps maintain freshness over extended periods of time.
- The Company plays an active part in

- supporting industry bodies and trade associations to educate consumers on the benefits of PET.
- Routine checks and measures are carried out to ensure that the PET resin remains free of potentially harmful chemicals.

7

Raw material risks

INABILITY TO PROCURE RAW MATERIALS OF REQUISITE QUALITY AND AT SATISFACTORY PRICES MAY HINDER THE COMPANY'S COMPETITIVENESS.

Mitigation

- The Company works closely with its suppliers to ensure cost-effective and timely availability of raw materials.

- PTA is sourced from the Haldia-based MNC supplier which is proximate to the Company's facility.

- The Company imports MEG from internationally-reputed suppliers.

Operations

The production of PET resin decreased from 4,12,038 MT in 2013-14 to 3,49,263 MT in 2014-15 partially due to shutdown of Plant I as decided by your Board after considering demand & supply situation. Production was also affected due to irregular availability of the main raw material (PTA).

The domestic sales volume increased from 1,72,732 MT in 2013-14 to 1,93,983 MT in 2014-15 i.e. an increase by 12%.

The export sales volume decreased from 2,41,454 MT in 2013-14 to 1,54,422 MT in 2014-15 i.e. a decrease by 36%.

As was informed in the last year's report, in view of EC's review of Anti-dumping and subsequent withdrawal of Anti-dumping duty on PET resin, exports from your Company stopped in the end of FY 2013-14. Hence there were no exports to European Union in the FY 2014-15. This also added to lower offtake.

The bottom line of your Company was impacted due to the provisional Anti-dumping duty imposed on PTA which resulted in a higher raw material procurement cost for the Company and sudden crash in crude oil prices resulted in reduced margin.

Your Directors wish to inform you that your Company has invested ₹ 379.25 crores in Fixed Deposits (FDs) with Banks and ₹ 38.06 crores in Mutual Fund schemes as at March 31, 2015. These investments are classified as current assets. These two together constitute 18.70% of the total assets of the Company as on the said date. The Company earned an interest of ₹ 23.55 crores on the FDs and profit on sale of current investments of ₹ 1.82 crores during the FY 2014-15. These two nature of treasury investments have grown over the period and become a major component of the business operations of the Company. The risks and returns in the said treasury investment operations are different from the Company's Polyester chips manufacturing business activity. Hence, your Company intends to show the said treasury investment operations as a separate primary business segment with effect from April 1, 2015.

No material changes and commitments have occurred after the close of the financial year till the date of this Report, which affect the financial position of the Company.

Prospects

We are having pressure on margins in both domestic and international fronts. In the international front the capacity increase in certain countries has resulted in price pressure. Imports of PET

resin into India has also resulted in pressure on margins in the domestic market.

Your Board informs that Department of Commerce of United States (DOC) having initiated an Anti-dumping (ADD) and countervailing duty (CVD) investigation of PET resin from India, the market appears to be dull. Exports will be hit as a very small market is left.

Going forward the FY 2015-16 will be a challenging year in view of the increase in the market competition and price realisation.

Dividend

Your Directors recommended a dividend @ ₹ 4.00/- (Previous Year @ ₹ 4.50/-) per equity share of ₹ 10/- each for the year ended March 31, 2015 subject to the approval of the shareholders at the ensuing Annual General Meeting.

Pursuant to Section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules 2014, till the standards of accounting or any addendum thereto are prescribed by Central Government in consultation and recommendation of the National Financial Reporting Authority, the existing Accounting Standards notified under the Companies Act, 1956 shall continue to apply. Consequently, these financial statements have been prepared to comply in all material aspects with accounting standards notified under Section 211(3C) [Companies (Accounting Standards) Rules 2006, as amended] and other relevant provisions of the Companies Act, 2013 (the Act).

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013.

Preoperative expenses where appropriate are capitalised till commercial use of the assets.

(ii) Intangible Assets

Intangible assets are stated at cost net of accumulated amortisation and net of accumulated impairment losses if any.

Intangible asset is recognised if it is probable that future economic benefits will flow to the Company. Such asset is initially recognised at cost. Subsequent expenditure on such asset is recognised as expense when incurred unless it is probable that the expenditure will enhance its future economic benefits.

(c) Depreciation and Amortisation

Depreciation is provided on prorata basis on straight line method at the rates determined based on estimated useful lives of assets, where applicable, prescribed under Schedule II to the Act with the exception of the following categories of the assets where estimated useful lives have been determined to be shorter than the lives specified in Schedule II based on usage experience of the Company:

(g) Employee Benefits

(i) Short-term Employee Benefits:

The undiscounted amount of Short-term Employee Benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service.

(ii) Post Employment Benefits Plans:

Contributions under Defined Contribution Plans payable in keeping with the related schemes are recognised as expenses for the year.

For Defined Benefit Plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each Balance Sheet date. Actuarial gains and losses are recognised in full in the Statement of Profit and Loss for the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested, and otherwise is amortised on straight line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of any economic benefit available in the form of refunds from the plan or reductions in future contributions to the plan.

(iii) Other Long-term Employee Benefits (unfunded):

The cost of providing Long-term Employee Benefits is determined using Projected Unit Credit Method with actuarial valuation being carried out at each Balance Sheet date. Monetary items denominated in foreign currency are reinstated at the year-end at the exchange rate prevailing on the Balance Sheet date. Foreign currency non monetary items carried in terms of historical cost are reported using the exchange rate on the date of transactions. Exchange differences arising on reinstatement or settlement are recognised in the Statement of Profit and Loss except for exchange difference arising on reinstatement/settlement of long term foreign currency monetary items relating to acquisition of depreciable assets which are adjusted to the cost of the depreciable assets to be depreciated over the balance life of the assets and in other cases such differences are accumulated in a Foreign Currency Monetary Item Translation Difference Account, and amortised over the balance period of such long term asset/liability with effect from 1st April, 2011.

Deferred tax assets are reviewed at each Balance Sheet date to re-assess realisation. Current tax assets and current tax liabilities are offset when there is legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is legally enforceable right to set off assets and liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or reliable estimate of the amount cannot be made.

(p) Derivative Instruments

The Company uses derivative financial instruments such as forward exchange contracts, interest rate swaps, etc. to hedge its risks associated with foreign currency fluctuations relating to the underlying transactions, highly probable forecast transactions and firm commitments.

In respect of forward exchange contracts entered into to hedge an existing asset/liability, the premium or discount arising at the inception of such contracts is amortised as expense or income over the life of the contract. Exchange differences on such a contract are recognised in the Statement of Profit and Loss in the reporting period in which the exchange rates change.

Derivative contracts (other than forward exchange contracts covered under Accounting Standard 11 on 'The Effects of Changes in Foreign Exchange Rates'), outstanding as at the Balance Sheet date are marked to market and losses, if any, are recognised in the Statement of Profit and Loss and gains are ignored in accordance with the announcement of the Institute of Chartered Accountants of India on "Accounting of Derivatives" issued in March, 2008.

Any profit or loss arising on cancellation or renewal of derivative instruments are recognised as income or as expense in the Statement of Profit and Loss for the period.

(q) Use of Estimates

The preparation of financial statements requires use of estimates and assumptions to be made that affect the reported amounts of assets, liabilities and disclosure of contingent liabilities on the date of financial statements and the reported amounts of revenue and expenses during the period. Difference between actual amount and estimates are recognised in the period in which the results are known / materialized.

Consequently, these financial statements have been prepared to comply in all material aspects with accounting standards notified under Section 211(3C) [Companies (Accounting Standards) Rules 2006, as amended] and other relevant provisions of the Companies Act, 2013 (the Act).

All assets and liabilities have been classified as current or non-current as per the Group's normal operating cycle and other criteria set out in Schedule III to the Act.

(b) Fixed Assets

(i) Tangible Assets

Tangible assets are stated at cost net of accumulated depreciation/amortisation and impairment loss, if any. (c) Depreciation and Amortisation

Depreciation is provided prorata basis on straight line method at the rates determined based on estimated useful lives of assets where applicable, prescribed under Schedule II to the Act with the exception of the following category of the assets where estimated useful life has been determined to be shorter than the lives specified in Schedule II based on the usage experience of the Parent Company.

Long-term investments are carried at cost and provision is recorded to recognise, any decline, other than temporary, in the carrying value of such investment. Investment acquired in exchange of another is carried at a cost determined with reference to the fair value of investment given up.

(f) Inventories

Inventories are valued at the lower of cost, computed on a weighted average basis and estimated net realisable value. Provision is made for obsolescence wherever considered necessary. Cost comprises all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

(g) Employee Benefits

(i) Short-term Employee Benefits:

The undiscounted amount of Short-term Employee Benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service.

(ii) Post Employment Benefit Plans:

Contributions under Defined Contributions Plans payable in keeping with the related schemes are recognised as expenses for the year.

For Defined Benefit Plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each Balance Sheet date. Actuarial gains and losses are recognised in full in the Statement of Profit and Loss for the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested, and otherwise is amortised on straight line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of any economic benefit available in the form of refunds from the plan or reductions in future contributions to the plan.

(iii) Other Long-term Employee Benefits (unfunded):

The cost of providing Long Term Employee Benefits is determined using Projected Unit Credit Method with actuarial valuation being carried out at each Balance Sheet date. Actuarial gains and losses and past service cost are recognised immediately in the Statement of Profit and Loss for the period in which they occur. Other long term employee benefit obligation recognised in the Balance Sheet represents the present value of related obligation.

(h) Foreign Currency Transactions

Transactions in foreign currency are recorded at daily exchange rates prevailing on the date of the transaction. Monetary items denominated in foreign currency are restated at the year-end at the exchange rate prevailing on the Balance Sheet date. Foreign currency non monetary items carried in terms of historical cost are reported using the exchange rate on the date of transactions. Exchange differences arising on restatement or settlement are recognised in the Statement of Profit and Loss except for exchange difference arising on reinstatement/ settlement of long term foreign currency monetary items in the Parent Company relating to acquisition of depreciable assets which are

Notes to the Consolidated Financial Statements (contd...)

Note : 1 Group Structure and Significant Accounting Policies (contd...)

adjusted to the cost of the depreciable assets to be depreciated over the balance life of the assets and in other cases such differences are accumulated in a Foreign Currency Monetary Item Translation Difference Account, and amortised over the balance period of such long term asset/liability with effect from 1st April, 2011 onwards.

(i) Revenue Recognition

Sales are recognised upon transfer of substantial risk and rewards of ownership in the goods to the buyers as per the terms of the Contract and net of trade discounts, sales tax and excise duties, where applicable.

Other items of the revenue are accounted for on accrual basis.

(j) Other Income

Interest income is recognised on time proportion basis taken into account the amount outstanding and the rate applicable.

Dividend income is recognised when the right to receive dividend is established.

Other items are accounted for on accrual basis.

(k) Borrowing Costs

Borrowing costs attributable to the acquisition, construction or production of qualifying assets (i.e assets that necessarily take substantial period of time to get ready for their intended use or sale) are added to the cost of those assets. All other borrowing costs are recognised in Statement of Profit and Loss in the period in which they are incurred.

(l) Taxes on Income

Current tax in respect of taxable income for the year is recognised based on applicable tax rate and laws.

Deferred tax is recognised, subject to the consideration of prudence, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods and is measured using tax rates and laws that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets in respect of carried forward losses and/or unabsorbed depreciation are recognised only when it is virtually certain and in other cases where there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets are reviewed at each Balance Sheet date to re-assess realisation. Current tax assets and current tax liabilities are offset when there is legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is legally enforceable right to set off assets and liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

(m) Leases

Lease payments under operating lease are recognised as an expense in the Statement of Profit and Loss.

(n) Government Grants

(i) Government grants of the nature of promoters' contribution are credited to Capital Reserve.

(ii) Government grants related to specific fixed assets are deducted from gross values of related assets in arriving at their book values.

(iii) Government grants related to revenue are recognized on a systematic basis in the Statement of Profit and Loss over the periods necessary to match them with their related costs.

(o) Provisions and Contingent Liabilities

Provisions are recognised when there is a present obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation and in respect of which reliable estimate can be made.

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or reliable estimate of the amount cannot be made.

(p) Derivative Instruments

The Group uses derivative financial instruments such as forward exchange contracts, interest rate swaps, etc. to hedge its risks associated with foreign currency fluctuations relating to the underlying transactions, highly probable forecast transactions and firm commitments.

In respect of Forward Exchange Contracts entered into to hedge an existing asset/liability the premium or discount arising at the inception of such contracts is amortised as expense or income over the life of the contract. Exchange differences on such a contract are recognised in the Statement of Profit and Loss in the reporting period in which the exchange rates change.

Derivative contracts (other than Forward Exchange contracts covered under Accounting Standard 11 on "The Effects of changes in Foreign Exchange Rates") outstanding as at the Balance Sheet date are marked to market and the losses, if any, are recognised in the Statement of Profit and Loss and gains are ignored in accordance with the Announcement of the Institute of Chartered Accountants of India on 'Accounting for Derivatives' issued in March, 2008.

Notes to the Consolidated Financial Statements (contd...)

Note : 1 Group Structure and Significant Accounting Policies (contd...)

Any profit or loss arising on cancellation or renewal of derivative instruments are recognised as income or as expense in the Statement of Profit and Loss for the period.

(q) Use of Estimates

The preparation of financial statements requires use of estimates and assumptions to be made that affect the reported amounts of assets, liabilities and disclosure of contingent liabilities on the date of financial statements and the reported amounts of revenue and expenses during the period. Difference between actual amount and estimates are recognised in the period in which the results are known / materialized.

(r) Consolidation

The financial statements of the Parent Company and its subsidiaries have been combined on a line-by-line basis by adding together the book value of like items of assets, liabilities, income and expenses, after adjustments / elimination of inter-company balances, transactions including unrealised profits on inventories etc, if any.

The consolidated financial statements are prepared by adopting uniform accounting policies for like transactions and other events in similar circumstances in all material respect and are presented to the extent possible, in the same manner as the Parent Company's separate financial statements.

The translation of the functional currencies into Indian Rupees (reporting currency) of foreign subsidiaries (non integral foreign operations) is performed for assets and liabilities using closing exchange rates at the Balance Sheet date and for revenues, costs, and expenses using average rates prevailing during the period. The resultant exchange difference arising out of such transactions is recognised as part of equity (Foreign Currency Translation Reserve) by the Parent Company until the disposal of Investment.

The excess of cost to the Parent Company of its investment in the subsidiaries over the Parent's portion of equity of the subsidiaries at the dates they became subsidiaries is recognised in the financial statements as Goodwill.

Minority interest in the consolidated financial statements is identified and recognised in the consolidated balance sheet separate from liabilities and the equity of the Parent Company's Shareholders after taking into consideration:

- The amount of equity attributable to minorities at the date on which investments in a subsidiary is made.
- The minorities' share of movement in equity since the date parent-subsidiary relationship came into existence.
- Adjustment of the losses attributable to the minorities against the minority interest in the equity of the subsidiaries and thereafter adjustment of the excess of loss, if any, over the minority interest in the equity against the majority interest.
