Management Discussion and Analysis

Quarter Ended June 30, 2024, Compared to Quarter Ended June 30, 2023

- Net Revenue of ₹40.56 billion during Q2 CY24 was a decrease of ~12.2% as compared to ₹46.21 billion during Q2 CY23.
 - O Carbon segment sales volumes during Q2 2024 were 615 thousand metric tonnes, an increase of 9.8% as compared to 560 thousand metric tonnes in Q2 2023. The increase in volumes was primarily driven by higher CPC volumes due to restocking by Asian and Middle Eastern customers during current quarter after destocking in Q1 2024 and the preponing of certain CTP shipments from Q3 into current quarter. During Q2 2024, the average blended realisation decreased by ~24.1% on account of lower market quotations across all regions. There was an appreciation of the Euro against the Indian Rupee by ~0.4% and an appreciation of US Dollar against the Indian Rupee by ~1.5%. Overall, due to the aforesaid reasons, revenue from the Carbon segment decreased by ~16.6% in Q2 2024, as compared to Q2 2023.
 - Advanced Materials segment sales volumes during Q2 2024 were 79 thousand metric tonnes, an increase of 25.4% as compared to 63 thousand metric tonnes in Q2 2023. The increase in volumes was primarily driven by BTX sales, in-line with the quarterly trend, and higher HHCR volumes due to the Red Sea crisis impacting Asian supplies. During Q2 of 2024, realisations decreased by 16.1%, due to fall in commodity prices offset by an appreciation of the Euro against the Indian Rupee by ~0.4%. Due to the aforesaid reasons, revenue from the Advanced Materials segment increased by ~5.2% during Q2 2024, as compared to Q2 2023.
 - Cement segment revenue decreased by 14.3% during Q2 2024 as compared to Q2 2023 due to decrease in realisations by 8.0% and decrease in volumes by 6.8%.
- During Q2 2024, Adjusted EBITDA was ₹4,903 million, as compared to ₹6,750 million achieved during Q2 2023, a decrease of ₹1,847 million.
 - Carbon segment Adjusted EBITDA decreased by ₹1,779 million, as compared to Q2 2023, primarily due to delay in raw material cost resets in-line with fall in finished goods prices, which was partially offset by increased volumes and appreciation of the US Dollar and Euro against the Indian Rupee.
 - Advanced Materials segment Adjusted EBITDA decreased by ₹9 million as compared to Q2 2023 due to decreased realisations offset by increased volumes and appreciation of the Euro against the Indian Rupee.
 - Cement segment Adjusted EBITDA decreased by ₹59 million due to decreased realisations coupled with increase in operating costs.

Reconciliation of Reported EBITDA and Adjusted EBITDA for Q2 CY24 is as follows:

(₹ in Millions)

	(* 111 11111111111111111111111111111111
Particulars	Q2 2024
A. Reported EBITDA	4,011
B. Adjustments/exceptional items:	
Provision for severance payments in Germany	716
Expenses towards non-recurring items	309
Foreign Exchange Loss / (Gain) on inter-company Debt Note	(133)
C. Adjusted EBITDA (A + B)	4,903

- Finance costs were ₹2.45 billion during Q2 2024 as compared to ₹1.69 billion in Q2 2023. The increase
 was primarily on account of increased interest rates due to refinancing of long term-debt during Q3
 2023, market rate increases and appreciation of the US Dollar and Euro against the Indian Rupee
 compared to Q2 2023.
- The Company recorded an income tax expense of ₹0.43 billion for Q2 2024 as compared to ₹1.07 billion for Q2 2023. The effective tax rate ("ETR") was higher than normal range due to non-recognition of deferred tax assets in Germany and US on tax attributes.
- The Adjusted Profit After Tax during Q2 2024 was ₹ 0.07 billion as compared to Adjusted Profit After Tax of ₹1.91 billion during Q2 2023.
- The Company achieved an Adjusted Earnings per Share of ₹ 0.21 during Q2 2024 as compared to Adjusted Earnings per Share of ₹5.67 during Q2 2023.

About RAIN:

RAIN is a leading vertically integrated global producer of a diversified portfolio of products that are essential raw materials for staples of everyday life. We operate in three business segments: Carbon, Advanced Materials and Cement. Our Carbon business segment converts the by-products of oil refining and steel production into high-value carbon-based products that are critical raw materials for the aluminium, graphite, carbon black, wood preservation, titanium dioxide, refractory, and several other global industries. Our Advanced Materials business segment extends the value chain of our carbon processing through the downstream refining of a portion of this output into high-value advanced material products that are critical raw materials for the specialty chemicals, coatings, construction, petroleum, and several other global industries. Our Cement segment consists of two integrated cement plants that operate in the South Indian market, producing two primary grades of cement: ordinary Portland cement ("OPC") and Portland pozzolana cement ("PPC"). We have longstanding relationships with most of our major customers, including several of the largest companies in the global aluminium, graphite, and specialty chemicals industries, and with most of our major raw material suppliers, including several of the world's largest oil refiners and steel producers. Our scale and process sophistication provide us the flexibility to capitalise on market opportunities by selecting from a wide range of raw materials, adjusting the composition of our product mix, and producing products that meet exacting customer specifications. including several specialty products. Our production facility locations and integrated global logistics network also strategically position us to capitalise on market opportunities by addressing raw material supply and product demand on a global basis in both established and emerging markets.
