We have audited the internal financial controls over financial reporting of **Vinyl Chemicals (India) Limited** (“the Company”) as of March 31, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial

controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial control system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial control system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of Management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of information and explanations given to us, the Company has, in all materials respects, an adequate internal financial control system over financial reporting and such financial controls over financial reporting are operating effectively as at March 31, 2017 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The financial statements have been prepared on the historical cost basis except for certain Financial Assets/Liabilities (including derivative instruments) which have been measured at fair values.

2.2 Property, plant and equipment acquired separately & depreciation

Freehold land is stated at cost and not depreciated.

Plant and equipments and furniture are stated at cost less accumulated depreciation and accumulated impairment losses.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and capital work in progress) less their residual values over their useful lives, using the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Impairment of tangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

Recoverable amount is the higher of fair value less costs of disposal and value in use.

If the recoverable amount of the asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised in profit or loss.

2.3 Inventories

Inventories are valued at lower of cost and net realisable value. Cost of inventories is determined on FIFO basis.

Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and estimated costs necessary to make the sale.

Obsolete, defective and slow/non-moving stocks are duly provided for.

2.4 Provisions (other than employee benefits)

A provision is recognised when as a result of past event, the Company has a present legal or constructive obligation which can be reliably estimated and it is probable that an outflow of economic benefit will be required to settle the obligation.

Provisions (excluding retirement benefits) are determined based on the best estimate required to settle the obligation at the balance sheet date taking into account the risks and uncertainties surrounding the obligation. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Contingent liabilities are not recognised but disclosed in the Notes to the Financial Statements.

Contingent assets are not recognised but disclosed in the Notes to the Financial Statements where an inflow of economic benefits is probable.

2.5 Financial instruments

2.5.1 Initial recognition & measurement

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

At initial recognition, financial assets and financial liabilities are initially measured at fair value, except for trade receivables and payables which are measured at their transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised in profit or loss.

2.5.2 Subsequent measurement of financial assets

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Interest income is recognised in profit or loss and is included in the "Other income" line item.

2.5.3 Impairment of financial assets

For Trade receivables, the Company measures loss allowance at an amount equal to lifetime expected credit losses. The Company computes expected credit loss allowance based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

2.5.4 Financial Liabilities

All financial liabilities (other than derivative financial instruments) are classified as subsequently measured at amortised cost using effective interest method where applicable. Interest expense is included in the "Finance costs" line item.

2.5.5 Derecognition of financial assets and liabilities

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or when the Company transfers the contractual rights to receive the cash flows of the financial asset in which substantially all the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and does not retain control of the financial asset.

The Company derecognises a financial liability (or a part of financial liability) when the contractual obligation is discharged, cancelled or expires.

2.5.6 Derivative financial instruments

The Company holds derivative financial instruments such as currency options or foreign exchange forward contracts to hedge its exposure to foreign currency exchange rate risks.

Derivatives are initially recognised at fair value at the date the contracts are entered into. Subsequent to initial recognition, these contracts are measured at fair value and changes are recognised in profit or loss.

2.6 Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/loss before extraordinary items and tax for the period is adjusted for the effects of transactions of non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments. Cash flows from operating, investing and financing activities of the Company are segregated.

Cash and cash equivalents for the purpose of cash flow statement comprise of cash at bank and cash in hand, as reduced by bank overdrafts (if any).

2.7 Employee benefits

Employee benefits include Provident Fund, Superannuation Fund, Employee State Insurance Scheme, Gratuity Fund, Compensated Absences, Anniversary Awards, Premature Death Pension Scheme and Total Disability Pension Scheme.

2.7.1 Defined contribution plans

The Company's contribution to Provident Fund, Superannuation Fund and Employee State Insurance Scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

2.7.2 Defined benefit plans

For Defined Benefit Plans in the form of Gratuity Fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Remeasurement, comprising actuarial gains and losses and the return on plan assets (excluding net interest) is reflected immediately in the Balance Sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised immediately for both vested and the non-vested portion. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited taking into account the present value of available refunds and reductions in future contributions to the schemes.

2.7.3 Short term and other long term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period in which the related service is rendered, at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

2.8 Taxation

- i. **Current tax:** The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using applicable tax rates that have been enacted or substantively enacted by the end of the reporting period and the provisions of the Income Tax Act, 1961 and other tax laws, as applicable.
- ii. **Deferred tax:** Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

- iii. **Current & Deferred tax for the year:** Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.9 Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government, except otherwise mentioned.

Sale of goods & other income

- i. Revenue from sale of goods is recognised upon transfer of significant risks and rewards of ownership of the goods to the customer which generally coincides with despatch of goods to customer. Sales exclude Sales Tax/VAT. It is measured at fair value of consideration received or receivable, net of returns, rebates and discounts.
- ii. Claims which are not of material nature/insurance claims etc. are accounted for when no significant uncertainties are attached to their eventual receipt.
- iii. Negotiated price reduction obtained from supplier is accounted for as a part of 'other operating revenue'.

2.10 Foreign currency

At the end of each reporting period, monetary items (including financial assets and liabilities) denominated in foreign currencies are re-translated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Gains or losses arising from these translations are recognised in the Statement of Profit and Loss.

2.11 Earnings Per Share

In determining the earnings per share, the Company considers the net profit after tax and post tax effect of any extra-ordinary/exceptional item is shown separately. The number of shares considered in computing basic earnings per share is the number of shares outstanding at the end of the year.

2.12 First-time adoption – mandatory exceptions, optional exemptions

2.12.1 Overall principle

The Company has prepared the opening balance sheet as per Ind AS as of April 1, 2015 (the transition date) by recognising all assets and liabilities whose recognition is required by Ind AS, not recognising items of assets or liabilities which are not permitted by Ind AS, by reclassifying items from previous GAAP to Ind AS as required under Ind AS, and applying Ind AS in measurement of recognised assets and liabilities.

2.12.2 Critical accounting judgements and key sources of estimation of uncertainty

The preparation of the Company's financial statements requires Management i.e. the directors of the Company to make judgements, estimates and assumptions that affect the application of accounting policies, reported amounts of assets, liabilities, income and expenses and accompanying disclosures and the disclosure of contingent liabilities. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Actuarial gains and losses in respect of defined benefit plans are recognised in the financial statements through Other Comprehensive Income.

Through its defined benefit plans, the Company is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility

The plan liabilities are calculated using a discount rate set with references to government bond yields; if plan assets under perform compared to the government bonds discount rate, this will create or increase a deficit.

As the plans mature, the Company intends to reduce the level of investment risk by investing more in assets that better match the liabilities.

Changes in bond yields

A decrease in government bond yields will increase plan liabilities, although this is expected to be partially offset by an increase in the value of the plan's bond holdings.

Life expectancy

The majority of the plan's obligations are to provide benefits for the service life of the member, so increases in service life expectancy will result in an increase in the plan's liabilities. This is particularly significant in the Company's defined benefit plans, where inflationary increases result in higher sensitivity to changes in service life expectancy.

	55,84,62,090	78,24,92,409	64,09,88,404

iii. Financial risk management objectives

The Company's Corporate Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Company through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk, credit risk and liquidity risk.

The Company seeks to minimise the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Company's policies approved by the board of directors, which provide written principles on foreign exchange risk, credit risk, the use of financial derivatives and non-derivative financial instruments and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Company does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

iv. Market risk

The Company's activities expose it primarily to the financial risk of changes in foreign currency exchange rates (see note below). The Company enters into vanilla currency options or forward foreign exchange contracts to manage its exposure to foreign currency risk of imports.

v. Foreign currency sensitivity analysis

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

	Currency option contract value in Foreign Currency			Value (₹)		
	31 st March, 2017	31 st March, 2016	1 st April, 2015	31 st March, 2017	31 st March, 2016	1 st April, 2015
Amounts payable / (advance) in foreign currency on account of the following:						
USD	83,84,340	1,03,36,577	83,09,698	54,33,89,055	69,83,68,623	51,79,22,296
Average Exchange rate USD - Buy (₹ per USD)				64.81	67.56	62.33

The Company is mainly exposed to the USD

The following table details the Company's sensitivity to a 2% increase and decrease in the Rupees against the relevant foreign currency. 2% is the sensitivity rate used when reporting foreign currency risk internally to Key Management Personnel and represents Management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period-end for a 2% change in foreign currency rates.

A negative number below indicates a decrease in profit or equity where the Rupee weakens 2% against USD. For a 2% strengthening of the Rupee against USD, there would be a comparable impact on the profit or equity and the balances below would be positive.

	USD IMPACT	
	2016-2017	2015-2016
	₹	₹
Impact on profit or loss for the year	(1,08,99,642)	(1,39,54,379)

This is mainly attributable to the exposure outstanding on USD payables towards imports.

In Management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

The line-items in the balance sheet that include the above hedging instruments are "other current assets" and "other financial liabilities". As at March 31, 2017, the aggregate amount of MTM loss/(gain) under options/forward foreign exchange contracts recognised in profit or loss is ₹ 1,11,40,545 (₹ 40,61,082) as at March 31, 2016).

Aggregate amount of MTM loss in reserves is ₹ 27,50,201 as at 1st April, 2015.

vi Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company.

Trade receivables consist of customers spread across diverse industries and geographical areas.

Apart from Pidilite Industries Ltd., the largest customer of the Company, the Company does not have significant credit risk exposure to any single counterparty.

The credit risk on liquid plus funds and derivative financial instruments is limited because the counterparties are fund houses and banks with high credit ratings assigned by international credit rating agencies.

In addition, the Company is exposed to credit risk in relation to guarantees given by banks on behalf of the Company. The Company's maximum exposure in this respect is the maximum amount the Company could have to pay if the guarantee is called on and the bank recovers the amount from the Company [see note 30(2)].

These financial guarantees have been issued by banks on behalf of the Company to Sales Tax Department.

vii Liquidity risk management

As the Company is engaged in trading of chemicals, it enjoys a higher credit period from its suppliers as compared to the credit period extended to its customers. Consequently, the Company's liquidity position is normally strong thereby substantially reducing the requirement of obtaining external finances.

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-term, medium-term and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities by continuously monitoring forecast and actual cash flows and by matching the maturity profiles of financial assets and liabilities. Note below sets out details of additional undrawn facilities that the Company has at its disposal to further reduce liquidity risk.

Financing facilities

	As at 31 st March, 2017 ₹	As at 31 st March, 2016 ₹	As at 1 st April, 2015 ₹
Secured Bank Overdraft / WCDL facility / Term Loan			
- amount used	—	—	—
- amount unused	9,00,00,000	9,00,00,000	9,00,00,000
	<u>9,00,00,000</u>	<u>9,00,00,000</u>	<u>9,00,00,000</u>

As regards the Company's remaining contractual maturity for its non-derivative and derivative financial liabilities with agreed repayment periods, the remaining maturity period of all such liabilities of the Company is less than one year.

viii Fair value measurements

Some of the Company's financial assets and financial liabilities are measured at fair value at the end of each reporting period.

This note provides information about how the Company determines fair values of various financial assets and financial liabilities.

Value (₹)

Financial assets / financial liabilities	Fair value as at			Fair value heirarchy	Valuation technique(s) and key input(s)
	31 st March, 2017	31 st March, 2016	1 st April, 2015		
1) Foreign currency option/forward contracts	98,29,664 (Liability)	13,10,881 (Asset)	27,50,201 (Liability)	Level 2	Mark to market values acquired from banks, with whom the Company contracts
2) Investment in Mutual Funds	38,54,74,866	45,00,68,583	8,94,21,943	Level 1	Quoted bid prices in active market

Financial instruments measured at amortized cost

The carrying amount of financial assets and financial liabilities measured at amortized cost in the financial statements are a reasonable approximation of their fair values since the Company does not anticipate that the carrying amounts would be significantly different from the values that would eventually be received or settled.

Notes to the reconciliation:

1 Investments

Under previous GAAP, investments in mutual funds were measured at lower of cost or fair value. Under Ind AS, these financial assets have been classified as FVTPL on the date of transition. Changes in fair value of these investments are recognised in profit or loss. On transition to Ind AS, these financial assets have been measured at their fair values which is higher than cost as per previous GAAP, resulting in net increase in carrying amount as at March 31, 2016 by ₹ 73,40,710 and as at April 1, 2015 by ₹ 2,80,089. During the year 2015-2016, increase in mark to market gain on account of fair valuation of investments amounted to ₹ 70,60,621 leading to increase in other income.

2 Premium on Forward contracts/currency options

Under previous GAAP, the notional loss due to cancellation of currency options as at year-end was not required to be charged to Statement of Profit and Loss. Under Ind AS, the same is required to be charged to Statement of Profit and Loss. This amount works out to ₹ 18,85,062 as at 31st March, 2016. Under previous GAAP, deferred premium on forward contracts was recognised under Other Current Assets. Under Ind AS, forward contracts are recognised as financial assets/liabilities and measured at FVTPL on the date of transition. Changes in fair value of forward contracts are recognised in profit or loss. As a result, premium amounting to ₹ 31,95,943 as at 31st March, 2016 is derecognised. The net impact of the above amounts (i.e. ₹ 18,85,062 and ₹ 31,95,943) works out to ₹ 13,10,881 (increase in the current assets).

The increase in financial liabilities due to accounting of notional loss on cancellation of currency options as at 1st April, 2015 amounted to ₹ 27,50,201.

The reversal of this notional loss of ₹ 27,50,201 in the year ended March 31, 2016, together with ₹ 13,10,881 resulted in increase in other income by ₹ 40,61,082.

3 Short term provisions - Reversal of equity dividend provided

Under previous GAAP, dividend on equity shares, which was recommended by the Board of Directors after the end of reporting period but before the financial statements were approved for issue, were recognised in the financial statements as a liability. Under Ind AS, such dividends are recognised when declared by the members in a general meeting. The effect of this change is an increase in total equity as at March 31, 2016 of ₹ 3,31,05,270 (₹ 3,31,05,270 as at April 1, 2015), but does not affect profit before tax and total profit for the year ended March 31st, 2016. This increase of ₹ 3,31,05,270 alongwith increase in profit after tax due to Ind As impact (₹ 57,10,050 in the year ended March 31, 2016 and (₹ 16,30,274) as at 1st April, 2015) resulted into increase in Other Equity by ₹ 3,88,15,320 as at March 31, 2016 and by ₹ 3,14,74,996 as at 1st April, 2015.

4 Provision for tax (Net of Advance Tax)

Under previous GAAP, provision for tax was grouped under Current Liabilities - Provisions. Under Ind AS, this is regrouped to be presented as a separate line item on the face of Balance Sheet.

5 Actuarial gains and losses

Under previous GAAP, actuarial gains and losses were recognised in profit and loss. Under Ind AS, the actuarial gains and losses forming part of remeasurement of the net defined benefit liability/asset, are recognised in the other comprehensive income under Ind AS instead of profit or loss. The actuarial losses for the year ended March 31, 2016 were ₹ 7,25,366. This change does not affect total equity, but there is an increase in profit before tax of ₹ 7,25,366 and in total profit of ₹ 4,74,386 (net of tax ₹ 2,50,980) for the year ended March 31, 2016.

6 Deferred Tax impact

Deferred tax impacts for the above adjustments, are a net increase in Deferred Tax Liabilities as at March 31, 2016 by ₹ 29,41,541 and reduction in Deferred Tax Liability as at April 1, 2015 by ₹ 8,39,838. During the year 2015-2016, increase in provision for Deferred Tax Liability is ₹ 37,81,379.

7 Bifurcation into financial & non-financial liabilities

Under previous GAAP, it was not necessary to bifurcate long term & short term assets and liabilities further into financial and non-financial assets and liabilities. But, under Ind AS it is mandatory and hence the disclosure as at 31st March, 2016 & 1st April, 2015 is done accordingly.
