- The Company has done stock split/ sub-division of its existing equity shares having face value of Rs. 10 each to equity shares having face value of Rs 5 each

Commenting on the Results, Mr. K.K.Sardana, Managing Director said,

"We are pleased to share our financial and business performance for Q3 and 9M FY25. In the quarter ended December 2024, our company has demonstrated a reasonable performance, given the present demand situation in the FMCG sector. The demand for processed foods is gradually increasing, which in turn is driving the need for starch as a binding agent, thickener, and stabilizer. Similarly, the expansion of the packaged food sector, along with the rising popularity of snacks and ready-to-eat meals has further supported the demand. Moreover, as a renewable resource, starch is playing a pivotal role in the production of bioplastics and biodegradable packaging. With growing environmental awareness, the demand for starch-based eco-friendly solutions is poised for significant growth, in the near future.

Margins have been impacted due to rising and fluctuating raw material prices, driven by changes in demand for maize from ethanol producers. This pressure is expected to persist through Q4 FY25 but may ease in Q1FY26 as the Rabi crop and spring maize from certain states top up the supplies of maize, stabilizing the current price volatility. Furthermore, the large quantity of rice recently allotted by the Central Government to the Ethanol producers may mitigate rising maize prices with increased supplies. Our proactive raw material procurement strategies have ensured that production remains uninterrupted across all company units.

The expansion of our manufacturing facility is on track and as we progress ahead we are optimistic about further emerging opportunities and sustainable growth. Our commitment to creating long-term value for our stakeholders coupled with focus on customer engagement and strategic initiatives will be instrumental in sustaining our growth in coming years."
