At the same time higher literacy rate and urban growth are increasing the need for papers. The industry is investing in new technologies to improve efficiency and reduce pollution. India's overall economic growth is a key factor influencing the paper industry's expansion. With low per-person paper use compared to global levels, India has a lot of room to grow. # MANAGEMENT DISCUSSION AND ANALYSIS REPORT

## INDUSTRY STRUCTURE AND DEVELOPMENTS

India continued to be one of the world's fastest-growing large economies supported by resilient domestic demand, sustained government-led infrastructure investment and ongoing structural reforms. Several constructive developments throughout the year have strengthened the foundation for India's medium to long-term economic growth. The paper industry is one of the oldest industries in India and since the first mill was set up in the country, the number of paper mills has increased substantially and particularly in the recent past, the number of mills and volume of production have also gone up. The pulp and paper industry in India plays a key role in supporting education, packaging and hygiene needs. It relies on wood, agro residues and recycled paper. Though challenged by resource constraints and environmental concerns, the industry is steadily moving towards more sustainable and efficient practices. The Indian paper industry is expected to grow and evolve in the coming years.

## OPPORTUNITIES AND THREATS

The Indian pulp and paper industry is ripe with opportunities for growth and innovation. The rising demand for paper products in India presents substantial growth potential for the Company. This surge is fuelled by factors such as population growth, greater awareness of environmental sustainability and the ongoing expansion of the Indian economy. These dynamics collectively create a favourable environment for the Company to expand its operations and capture new market opportunities. Rising literacy, expansion of education, growth in organised retail, e-commerce packaging demand and sustainability-driven substitution of plastic have reshaped the industry's demand profile.The future is resilient, with investments shifting towards technological advancements, capacity expansion and energy-efficient operations to meet the rising demand.

The industry is expected to face margin pressures due to increasing input costs, cheaper imports, and new capacity additions. However, long-term prospects remain positive supported by increased demand for paper in various sectors and a shift towards sustainable, paper-based solutions.

## OUTLOOK

The outlook for India's paper industry remains highly promising supported by a growing population, rapid urbanisation and rising income. India's pulp and paper market is growing fast, driven by the shift to eco-friendly products and rising demand for paper based packaging. Government bans on single-use plastics have boosted the use of paper in packaging for food, retail and e-commerce. At the same time, higher literacy rates and urban growth are increasing the need for papers. The industry is investing in new technologies to improve efficiency and reduce pollution. India's overall economic growth is a key factor influencing the paper industry's expansion. With low per-person paper use compared to global levels, India has a lot of room to grow. The market is set to expand further, becoming more modern, sustainable and competitive globally.

**Information other than the Financial Statements and Auditor's Report thereon**

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the annual report particularly with respect to the Management Discussion & Analysis Report and Corporate Governance Report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

**Management's and Board of Directors' Responsibilities for the Financial Statements**

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance (including Other Comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Ind AS specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

**Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**Report on Other Legal and Regulatory Requirements**

# NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

## 1. CORPORATE INFORMATION

Shree Krishna Paper Mills & Industries Ltd. (hereinafter referred to as 'the Company') is a public limited company domiciled in India and is incorporated in 1972 under the provisions of the Companies Act applicable in India. The Company's equity shares are listed on the Bombay Stock Exchange. The Company is engaged in the manufacturing and selling of various quality of paper and paper products. The Company's Registered Office is at 4830/24, Prahlad Street, Ansari Road, Darya Ganj, New Delhi - 110002. The Company has its manufacturing plant in Rajasthan. The Corporate Identification Number (CIN) of the Company is L21012DL1972PLC279773.

The financial statements were approved for issue in accordance with a resolution of the Board of Directors of the Company on May 29, 2026.

## 2. CHANGES IN ACCOUNTING STANDARDS AND OTHER RECENT ACCOUNTING PRONOUNCEMENTS

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. MCA has issued below amendments:

Ind AS 1 - Classification of liabilities as current or non-current and non-current liabilities with covenants; Ind AS 7 and Ind AS 107 - Disclosures for supplier finance arrangements; and Ind AS 12 - Global implementation of OCED Pillar Two model rules.

The Company has reviewed the amendments and based on its evaluation, has determined that these amendments do not have any significant impact in its financial statements.

## 3. CRITICAL ACCOUNTING JUDGEMENTS & KEY SOURCES OF ESTIMATION UNCERTAINTY

The preparation of the Company's financial statements in conformity with the Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of revenues, expenses, assets and liabilities, the accompanying disclosures and the disclosure of contingent liabilities. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below:

**Defined Benefit Plans**

The cost of the defined benefit plans and other post-employment benefits and the present value of such obligations are determined using actuarial valuations. The classification of the Company's net obligation into current and non-current is also as per actuarial valuation. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and attrition rate. Due to the complexities involved in the valuation and its long-term nature, a defined benefit plan is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

**Contingencies & Commitments**

In the normal course of business, contingent liabilities may arise from litigations and other claims against the Company. Where the potential liabilities have a low probability of crystallizing or are very difficult to quantify reliably, we treat them

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

as contingent liabilities. Such liabilities are disclosed in the notes but are not provided for in the financial statements. Although there can be no assurance regarding the final outcome of the legal proceedings, the Company does not expect them to have a materially adverse impact on our financial position or profitability.

Contingent assets are neither recognised nor disclosed in the financial statements unless when an inflow of economic benefits is probable.

**Depreciation / amortisation and useful lives of property, plant and equipment / intangible assets**

Property, plant and equipment / intangible assets are depreciated / amortised over their estimated useful lives, after taking into account estimated residual value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation / amortisation to be recorded during any reporting period. The useful lives and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological changes.

**Allowances for doubtful debts**

The Company makes allowances for doubtful debts based on an assessment of the recoverability of trade and other receivables. The identification of doubtful debts requires use of judgement and estimates. Where the expectation is different from the original estimate, such difference will impact the carrying value of the trade and other receivables and doubtful debts expenses in the period in which such estimate has been changed.

**Impairment of Financial Assets**

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

The Company measures the expected credit loss associated with its assets based on historical trend, industry practices and the business environment in which the entity operates or any other appropriate basis.

**Impairment of Non-Financial Assets**

The carrying values of assets / cash generating units ('CGU') at each balance sheet date are reviewed to determine whether there is any indication that an asset may be impaired. If any indication of such impairment exists, the recoverable amount of such assets / CGU is estimated and in case the carrying amount of these assets exceeds their recoverable amount, an impairment loss is recognised in the Statement of Profit and Loss. The recoverable amount is the higher of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. Assessment is also done at each balance sheet date as to whether there is indication that an impairment loss recognised for an asset in prior accounting periods no longer exists or may have decreased, consequent to which such reversal of impairment loss is recognised in the Statement of Profit and Loss.

**Measurement of fair values**

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including Discounted Cash Flow Model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing the fair values. Judgements include consideration of inputs such as liquidity risks, credit risks and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Further details are set out in note no. 50 of financial statements.

**Recognition of deferred tax assets and liabilities**

Deferred tax assets and liabilities are recognised for deductible temporary differences and unused tax losses, as well as Minimum Alternate Tax (MAT) credit, to the extent that it is probable that they can be utilised against future taxable profits.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

The recognition of deferred tax assets/MAT credit is based on management's judgement and assessment of the timing and level of future taxable profits and business developments, as well as other relevant factors supporting recoverability.

### 4. SUMMARY OF MATERIAL ACCOUNTING POLICIES

#### A. STATEMENT OF COMPLIANCE

The financial statements are prepared in accordance with and in compliance, in all material aspects, with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the "Act") read along with Companies (Indian Accounting Standards) Rules 2015, as amended and other provisions of the Act. The presentation of the financial statements is based on Division II of Schedule III of the Act.

#### B. BASIS OF PREPARATION AND PRESENTATION

The financial statements have been prepared on the historical cost basis except for (i) certain financial instruments which have been measured at their fair values (ii) non-current assets classified as held for sale measured at the lower of carrying amount and fair value less costs to sell, at the end of each reporting period in accordance with the relevant Ind AS. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. The accounting policies have been applied consistently over all the periods presented in these Financial Statements.

Company's financial statements have been presented in Indian Rupee (₹) which is also its functional currency and all values are rounded to the nearest Lakhs, except where otherwise indicated.

#### C. CURRENT VERSUS NON-CURRENT CLASSIFICATION

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities. The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

The Company has ascertained its operating cycle as twelve months for the purpose of current or non-current classification of assets and liabilities.

### D. FAIR VALUE MEASUREMENT

The Company measures financial instruments, such as derivatives and investment, at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3 — Inputs are unobservable inputs for the asset or liability.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to fair value measurement as a whole) at end of each reporting period.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

### E. PROPERTY, PLANT AND EQUIPMENT

The tangible items of property, plant and equipment are carried at cost less accumulated depreciation and accumulated impairment losses, if any. Cost of an item of property, plant and equipment comprises its purchase price including non-refundable duties and taxes, net of rebate and discounts and borrowing costs for qualifying assets, including other costs that are directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

be measured reliably. All other repairs and maintenance are charged to statement of profit and loss during the reporting period in which they are incurred.

Advances paid towards the acquisition of Property, Plant and Equipment outstanding at each Balance Sheet date is classified as capital advances under other non-current assets.

The carrying values of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. An item of property, plant and equipment is de-recognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal or retirement of an item of property, plant and equipment is determined as the difference between sales proceeds and the carrying amount of the asset and is recognised in statement of profit and loss. Fully depreciated assets still in use are retained in financial statements.

The cost of property, plant and equipment as at April 1, 2016, the Company's date of transition to Ind AS, was determined with reference to its carrying value recognised as per the previous GAAP (deemed cost), as at the date of transition to Ind AS.

Property, plant and equipment which are not ready for intended use as on the date of Balance Sheet are disclosed as 'Capital work-in-progress'. Capital work-in-progress is stated at cost. Cost includes purchase price, net of taxes where applicable and all direct costs and borrowing costs attributable to qualifying assets till they are ready for their intended use.

### F. INTANGIBLE ASSETS

Intangible assets are carried at cost less accumulated amortisation and impairment losses, if any. The cost of an intangible asset comprises of its purchase price, including any import duties and other taxes (other than those subsequently recoverable from the taxing authorities), and any directly attributable expenditure on making the asset ready for its intended use. The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortized on a straight-line basis over the estimated useful economic life. The estimated useful lives for computer software is 5 years.

An intangible asset is de-recognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss, when the asset is de-recognised.

### G. DEPRECIATION & AMORTIZATION

Depreciation on the property, plant and equipment (except for leasehold land) is provided on straight- line method ("SLM") over the useful lives of the assets as specified in Schedule II to the Act. On property, plant and equipment which are added / disposed off during the year, depreciation is provided on pro-rata basis with reference to the month of addition / deletion.

Depreciation method is reviewed at each financial year end to reflect the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life and residual values are also reviewed at each financial year end and the effect of any change in the estimates of useful life/residual value is accounted for on prospective basis.

Leasehold land is amortized on a straight-line basis over the period of lease. Leasehold improvements are depreciated on a straight-line basis over the period of the lease or useful life whichever is lower.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

### H. BORROWING COST

Borrowing costs are interest and ancillary costs incurred in connection with the arrangement of borrowings. General and specific borrowing costs attributable to acquisition and construction of any qualifying asset are capitalised until such time as the assets are substantially ready for their intended use or sale, and included as part of the cost of that asset. Income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

All other borrowing costs are recognised in the Statement of Profit and Loss in the period in which they are incurred.

### I. INVENTORIES

Inventories are valued at the lower of cost and net realisable value. Cost is computed on a FIFO basis. The comparison of cost and net realisable value is made on an item-by-item basis. Cost of raw materials and stores and spares includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. The aforesaid items are valued at net realisable value if the finished products in which they are to be incorporated are expected to be sold at a loss. Cost of finished goods, traded goods and work-in-progress include all costs of purchases, conversion costs, appropriate share of fixed production overheads and costs incurred in bringing the inventories to their present location and condition. The net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and estimated costs necessary to make the sale.

### J. REVENUE RECOGNITION

Revenue from contracts with customers is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and net of returns, Goods and Service Tax (GST), collected on behalf of the government, and applicable trade discounts, allowances and chargeback.

The specific recognition criteria described below must also be met before revenue is recognized:

i) Revenue from sale of all types of goods is recognised at the point in time when control of the asset is transferred to the customer, based on delivery terms. In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing components and consideration payable to the customer (if any). The Company estimates variable consideration at contract inception until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

   There is no significant financing components involved on contract with customers. Invoices are usually payable within the credit period as agreed with respective customers.

   Contract asset is the right to consideration in exchange for goods or services transferred to the customer. Contract liabilities are on account of the advance payment received from customer for which performance obligation has not yet been completed.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

ii) Income from services rendered is recognised based on agreements/arrangements with the customers as the service is performed and there are no unfulfilled obligations.

iii) Interest income for financial assets measured at amortized cost is recorded using the Effective Interest Rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument to the gross carrying amount of the financial asset or to the amortized cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example- prepayment, extension, call and similar options) but does not consider the expected credit losses.

iv) Dividend Income is recognised when the Company's right to receive the amount has been established.

v) All other Income is recognised when it is probable that economic benefits will flow to the Company and amount of income can be measured reliably.

### K. FOREIGN CURRENCY TRANSACTIONS AND TRANSLATION

Financial statements are presented in Indian Rupee, which is also the Company's functional currency. Foreign currency transactions are recorded on initial recognition in the functional currency, using the exchange rate at the date of the transaction. At each balance sheet date, foreign currency monetary assets or liabilities are translated at exchange rate prevailing on the balance sheet date and the exchange gains or losses are recognised in the statement of profit & loss. Financial instruments designated as Hedge Instruments are mark to market at the valuation existing on the reporting date. Exchange differences arising on settlement of monetary items on actual payments / realisations and year end translations including on forward contracts are dealt with in Statement of Profit and Loss in the period in which they arise.

Non monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transaction.

The Company uses forward exchange contracts to hedge its exposure to the extent considered appropriate and premium or discount arising on such forward exchange contract is amortised as expense or income over the life of the contract. Further, the Company also uses natural hedge to mitigate the risk. The unhedged forward contracts remaining unsettled at the year end are translated at the exchange rates prevailing on that date and the resulting gains or losses are recognized in the Statement of Profit and Loss.

### L. EMPLOYEE BENEFITS EXPENSE

**i) Short term employee benefits**

Short-term employee benefits include employee benefits (other than termination benefits) which are expected to be settled wholly within twelve months after the end of the period in which the employees render the related service and are recognized as expense in the period in which the related service is rendered.

**ii) Post-employment benefits**

a) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which the Company pays specified contributions to a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The Company makes specified monthly contributions towards Provident Fund, Superannuation Fund and Pension Scheme. The Company's contributions to defined contribution plans are charged to the Statement of Profit and Loss as and when incurred.

# NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

b) Defined benefit plans

Funded plan: The Company has a defined benefit plan for post employment benefit in the form of gratuity, which is administered through Life Insurance Corporation of India (LIC), liability for which is provided on the basis of valuation, as at the balance sheet date, carried out by an independent actuary. The liability in respect of gratuity and other post-employment benefits is calculated using the Projected Unit Credit Method and spread over the period during which the benefit is expected to be derived from employees' services.

Re-measurement of defined benefit plans in respect of post-employment are charged to the Other Comprehensive Income.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognized immediately in profit or loss. The Company recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

**iii) Other long term employee benefits**

Liability for compensated absences is provided on the basis of valuation as at the balance sheet date carried out by an independent actuary. The actuarial valuation method used for measuring the liability is the Projected Unit Credit (PUC) method.

**iv)** Termination benefits are recognized as an expense as and when incurred.

**v)** The actuarial gains and losses on defined benefit plans arising during the year are charged to the Other Comprehensive Income.

## M. TAX EXPENSES

Tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred taxes are recognised in Statement of Profit and Loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity, respectively.

**Current Tax**

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 and rules thereunder. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current tax assets and current tax liabilities are off set when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle the asset and the liability on a net basis.

**Deferred Tax**

Deferred tax assets are recognised only to the extent that it is probable that either future taxable profits or reversal of deferred tax liabilities will be available, against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax relating to items recognized outside Statement of Profit and Loss is recognized outside Statement of Profit and Loss (either in other comprehensive income or in equity).

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax (MAT) is calculated as per Section 115 JB of the Income Tax Act, 1961 and is payable when tax as per it is higher than tax as per the normal provisions of the Act. Minimum Alternate Tax credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

### N. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit/(loss) for the period attributable to the equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit/(loss) for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

### O. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made.

Where a provision is measured using the cash flows estimates to settle the present obligation, its carrying amount is the present value of those cash flows. Where the effect is material, the provision is discounted to net present value using an appropriate current market-based pre-tax discount rate and the unwinding of the discount is included in finance costs.

Contingent liabilities are recognised only when there is a possible obligation arising from past events, due to occurrence or non-occurrence of one or more uncertain future events, not wholly within the control of the Company, or where any present obligation cannot be measured in terms of future outflow of resources, or where a reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

Contingent assets are not disclosed in the financial statements unless an inflow of economic benefits is probable.

### P. LEASES

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. The Company, as a lessee, recognises a right-of-use asset and a lease liability for its leasing arrangements, if the contract conveys the right to control the use of an identified asset. To assess whether a contract conveys the right to control the use of an identified asset, the Company assess whether it involves the use of an identified asset and the Company has substantially all of the economic benefits from use of the asset and has right to direct the use of the identified asset. The cost of the right-of-use asset shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

the commencement date plus any initial direct costs incurred. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any re-measurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset.

The Company has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

### Q. IMPAIRMENT OF ASSETS

**Impairment of non-financial assets**

The Company assesses at each reporting date as to whether there is any indication that any property, plant and equipment and intangible assets or group of assets, called Cash Generating Units (CGU) may be impaired. If any such indication exists, the recoverable amount of an asset or CGU is estimated to determine the extent of impairment, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the CGU to which the asset belongs. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the statement of profit and loss.

**Impairment of financial assets**

The Company applies the simplified approach permitted under Ind AS 109 for trade receivables and recognises lifetime expected credit losses from initial recognition. The Company uses a provision matrix based on historical credit-loss experience, adjusted for current conditions and reasonable and supportable forward-looking information, wherever applicable.

For other financial assets, loss allowance is measured at an amount equal to 12-month ECL, unless there has been a significant increase in credit risk since initial recognition, in which case lifetime ECL is recognised.

Expected credit losses, including any subsequent reversals, are recognised as an impairment loss or gain in the Statement of Profit and Loss.

### R. FINANCIAL INSTRUMENTS

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability. Purchase and sale of financial assets are recognized using trade date accounting.

**Cash and cash equivalents**

Cash and cash equivalents comprise cash at banks and on hand and demand deposits with an original maturity of three months or less and short-term highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value. Cash and cash equivalents include balances with banks which are unrestricted for withdrawal and usage.

# NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

**(i) Financial Assets**

**Initial Recognition and Measurement**

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under Ind AS 115.

**Subsequent Measurement**

Financial Assets at Amortised Cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial Assets At Fair Value Through Other Comprehensive Income (FVTOCI)

Financial assets are measured at fair value through other comprehensive income if such financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows or to sell such financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial Assets At Fair Value Through Profit or Loss (FVTPL)

Financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

All equity investments are measured at fair value in the balance sheet, with value changes recognized in the statement of profit and loss, except for those equity investments for which the Company has elected an irrevocable option to present value changes in OCI.

**(ii) Financial Liabilities**

Initial recognition and measurement financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans & borrowings and payables net of directly attributable transaction costs or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Company's financial liabilities include trade and other payables, loans & borrowings including bank overdrafts.

Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at fair value through profit or loss
- Financial liabilities at amortised cost (loans and borrowings)

**(iii) Derivative Financial Instruments**

The Company uses derivative financial instruments, such as forward currency contracts to hedge its foreign currency risks. Derivative financial instruments are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value at the end of each period. The method of recognizing the resulting

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, on the nature of the item being hedged. Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss.

**De-recognition of Financial Instruments:**

A financial asset is primarily de-recognised when the rights to receive cash flows from the asset have expired or the Company has transferred its rights to receive cash flows from the asset and has substantially transferred all the risks and rewards of ownership of the financial assets.

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

**Offsetting of Financial Instruments:**

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

### S. NON-CURRENT ASSETS HELD FOR SALE

Non-current assets or disposal comprising of assets and liabilities are classified as 'held for sale' when all of the following criteria's are met (i) decision has been made to sell (ii) the assets are available for immediate sale in its present condition (iii) the assets are being actively marketed and (iv) sale has been agreed or is expected to be conducted within twelve months of the Balance Sheet date. Subsequently, such non-current assets and disposal groups classified as held for sale are measured at lower of its carrying value and fair value less costs to sell. Non-current assets held for sale are not depreciated or amortised.

Non-current assets classified as held for sale are presented separately in the balance sheet.

### T. GOVERNMENT GRANTS

Government grants are recognised when there is a reasonable assurance that the Company will comply with the relevant conditions and the grant will be received. Government grants are recognised in the statement of profit and loss, either on a systematic basis when the Company recognises, as expenses, the related costs that the grants are intended to compensate or, immediately if the costs have already been incurred. Government grants related to assets are deferred and amortised over the useful life of the asset. Government grants related to income are presented as an offset against the related expenditure and government grants that are awarded as incentives with no ongoing performance obligations to the Company are recognised as income in the period in which the grant is received.

### U. OPERATING SEGMENTS

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker ('CODM') of the Company. The CODM is responsible for allocating resources and assessing performance of the operating segments of the Company.

### V. EXCEPTIONAL ITEMS

When items of income and expense within statement of profit and loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the Company for the period, the nature and amount of such material items are disclosed separately as exceptional items.

**Risk Exposure**

Through its defined benefit plans, the Company is exposed to a number of risks, the most significant of which are detailed below:

(i) Investment risk - The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to the market yields on government bonds denominated in Indian Rupees. If the actual return on plan asset is below this rate, it will create a plan deficit. However, the risk is partially mitigated by investment in LIC managed fund.

(ii) Interest rate risk - A decrease in the bond interest rate will increase the plan liability. However, this will be partially offset by an increase in the return on the plan's debt investments.

(iii) Longevity risk - The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

(iv) Salary risk - The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

The Government of India has consolidated 29 existing labour legislations into a unified framework comprising four labour codes viz the Code on Wages, 2019, the Code on Social Security, 2020, the Industrial Relations Code, 2020 and the Occupational Safety, Health and Working Conditions Code, 2020 (collectively referred to as the "New Labour Codes"). The Codes have been made effective from November 21, 2025. The Ministry of Labour & Employment published draft Central Rules and FAQs to enable assessment of the financial impact due to changes in regulations. Based on internal management assessment, on the basis of information available and in line with ICAI guidance, the Company has recognized an incremental impact of gratuity and long term compensated absences of ₹ 22.33 lakhs, mainly due to the revised wage definition and the same has been disclosed under "Employee Benefit Expense". The Company continues to monitor the developments pertaining to Labour Codes and will evaluate impact if any on the measurement of liability pertaining to employee benefits.

Level 1- Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3- inputs are unobservable inputs for the asset or liability.

**51. FINANCIAL RISK MANAGEMENT**

The Company's principal financial liabilities, other than derivatives, comprise borrowings, trade and other payables. The Company's principal financial assets include, trade and other receivables and cash and cash equivalents that derive directly from its operations. The Company also holds FVTOCI investments and enters into derivative transactions.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's management monitors these risks and provides assurance that the financial risk activities are governed by appropriate policies and procedures. The financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. All derivative activities for risk management purposes are carried out by teams that have the appropriate skills, experience and supervision. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

**Credit Risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers, loans and investments. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of counterparty to which the Company grants credit terms in the normal course of business.

**Trade receivables**

The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets. The creditworthiness are monitored at periodical intervals. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets.

The Company has used Expected Credit Loss (ECL) model for assessing the impairment loss. For the purpose, the Company uses a provision matrix to compute the expected credit loss amount. The provision matrix takes into account external and internal risk factors and historical data of credit losses from various customers.

Liquidity risk is the risk that the Company will face in meeting its obligations associated with its financial liabilities. The Company's approach in managing liquidity is to ensure that it will have sufficient funds to meet its liabilities when due without incurring unacceptable losses. In doing this, management considers both normal and stressed conditions. The Company regularly monitors the rolling forecasts to ensure it has sufficient cash on an on-going basis to meet operational needs. Any short term surplus cash generated, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in interest bearing term deposits with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet its liabilities.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2026

**Foreign Currency Risk Sensitivity**

A change of 5% in Foreign currency would have following Impact on profit/(loss) before tax:

(₹ in lakhs)

| Particulars | **Impact on profit/(loss) before tax March 31, 2026** | | Impact on profit/(loss) before tax March 31, 2025 | |
|---|---|---|---|---|
| USD – Increase/ Decrease by 5% | **(7.78)** | **7.78** | (16.97) | 16.97 |
| EUR – Increase/ Decrease by 5% | **3.37** | **(3.37)** | - | - |
| GBP – Increase/ Decrease by 5% | **-** | **-** | (1.94) | 1.94 |
| Total | **(4.41)** | **(4.41)** | (18.91) | 18.91 |

**(b) Interest Rate Risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk because funds are borrowed at floating interest rates. Interest rate risk is measured by using the cash flow sensitivity for changes in variable interest rate.

For the year ended March 31, 2026 and March 31, 2025, every 50 basis point decrease in the floating interest rate component applicable to its loans and borrowings would increase the Company's profit before tax by approximately ₹ 12.31 Lakhs and ₹ 8.07 Lakhs respectively. A 50 basis point increase in floating interest rate would have led to an equal but opposite effect.

**(c) Price Risk Exposure**

Equity Price Risk is related to the change in market reference price of the investments in equity securities. The Company is not an active investor in equity markets. It continues to hold certain investments in equity for long term value accretion which are accordingly measured at fair value through profit or loss.

**Sensitivity**

The table below summarizes the impact of increases/decreases of the BSE index on the Company's equity and Gain/Loss for the period. The analysis is based on the assumption that the index has increased by 5% or decreased by 5% with all other variables held constant, and that all the Company's equity instruments moved in line with the index:

Impact on Profit/(loss) before tax:

(₹ in lakhs)

| **Particulars** | **As at March 31, 2026** | As at March 31, 2025 |
|---|---|---|
| BSE Sensex 30- Increase 5% | **0.04** | 0.02 |
| BSE Sensex 30- Decrease 5% | **(0.04)** | (0.02) |

Above referred sensitivity pertains to quoted equity investment. Profit/(loss) for the year would change as a result of gains/ losses on equity securities as at fair value through profit or loss.

**Commodity Price Risk**

Exposure to market risk with respect to commodity prices primarily arises from the Company's purchases of waste paper including the raw material components and sale of various types of papers. These are commodity products, whose prices may fluctuate significantly over short periods of time. The prices of the Company's some of the raw materials generally fluctuate in line with commodity cycles, although the prices of raw materials used in the Company's business are generally more volatile. Commodity price risk exposure is evaluated and managed through operating procedures and sourcing policies. As of March 31, 2026, the Company had not entered into any material derivative contracts to hedge exposure to fluctuations in commodity prices.
