Significant Young Store Network

Many of our stores are relatively new, still in the early stages of their lifecycle.

While currently modest in revenue, expected to grow multiple folds as they mature.

- Ongoing Expansion: Our strategy includes continuous addition of new stores, further expanding our reach to newer markets. This will result in an expanded customer base.
- Increased Footfall: As young stores mature and new ones are added, we anticipate an increase in footfall. This will inevitably contribute to higher revenue generation.
- Anticipated Exponential Growth: As young stores mature and build out their customer bases, the income is forecasted to multiply. This implies that our revenues are on a trajectory of exponential growth.
