CHAIRMAN'S MESSAGE

Dear Fellow Shareholders,

It is my pleasure to extend a very warm welcome to all of you at your company's 20th Annual General Meeting. I thank you for having spared your valuable time to make it convenient to attend.

On behalf of the Board of Directors of Optiemus, I am pleased to present you our financial performance and significant milestones for the financial year ended March 31, 2013.

Global Telecom Market

In 2012-13, the global telecom market grew marginally, by approximately 3% year-on-year, to USD 2.207 trillion. Telecom mobile devices accounted for 16% of the Total Market. The low single-digit growth rate of the past fiscal year is expected to continue over the next four years as well, with the total telecom market expected to grow at a compounded annual growth rate (CAGR) of only 4%, largely due to on-going economic concerns. During 2012-13, the Company's addressable market in mobile devices witnessed a excellent growth because the mobile market showed a healthy growth. In the future, we expect the Company's addressable market to continue to grow at an attractive pace.

Indian Telecom Industry

Indian telecommunication industry is one of the fastest growing industries in the world. It is estimated that India will have more than 1.3 billion mobile subscribers by 2014 exceeding even the total subscriber count in China. India's Handset Market grew by 14.7% to Rs. 35,946 Crore during the fiscal year 2012-13.

Within the space of Mobile Devices, international brands have played a significant role to bring the power of communication within the hands of the consumers by focusing on Product and Cost Innovation - bringing rightly priced and correctly engineered devices to the Indian Consumer. International brands have been successful in capturing over 85 % of the market share. Amidst such a dynamic scenario, your company with its unique integrated business model has created a leading space for itself.

Samsung has become the Number 1 player in the Mobile devices space in India by cornering 31.5% market share with the revenues of Rs. 11,328 Crores achieving a growth of 42.6%. Samsung is focused on Product Innovation in line with the changing requirements and has been very successful in bringing state of the art devices to the Indian market which has been well received by the Indian Consumers. Samsung has captured the hearts and minds of mobile consumers with leading-edge smart phones and a range of applications that are based on proprietary technology and well-designed platforms. A wide range of handset prices and availability in varied screen sizes has helped Samsung to grab customer's besides the product quality and new features. At OPTIEMUS we have continuously focused on providing the best experience to the mobility retail chain providing it a greater choice and more informed purchase experience.

Diversification

At another level, your Company is planning to expand its business from distribution to manufacturing. The strength of the Company is rich and vast experience of promoters. With their continued efforts and the support of all the employees, Company will surely achieve success.

The Year in Review

Domestic retailers have faced a challenging economic environment in the last financial year. Despite this, with comfortable leverage positioning and fight inventory control, your Company has delivered the excellent results by way of turnover of more than Rs. 2,800 Crore and Net Profit Before Tax of more than of Rs. 47 crore during the FY 2012-13. Our business has delivered industry leading performances. This is a reflection of the collective hard work and the strong commitment of employees of the Company. The company has put in place a concrete roadmap for putting the company on a fast trajectory of growth.

OPTIENUS

OPTIEMUS INFRACOM LIMITED

Further, we are moving towards multidimensional expansion, which would result in growth in our sales and operating profits.

A relentless focus on our customers and in-market execution helped the business deliver these strong numbers. We are driving bigger, better and faster innovations with almost 60% of our portfolio touched by innovations during the year. We continue to drive superiority of our products in the core categories as we invest to build the categories of tomorrow.

Future Roadmap

As a Company, Optiemus is positioned at an interesting juncture and looking towards a great future. We are following different models towards this. We are working with various agencies, companies, institutions in order to get the solution fastest. I am sharing that consumption/use of Mobile handsets is increasing day by day in India and abroad.

Corporate Governance

I would like to re-iterate our strong commitment to good corporate governance. We are continuously striving to improve the quality of our disclosures. Members would have observed that the contents of our Annual Reports over the past few years contain more information about the company and its working. Our attempt is to be as transparent as we can within the limits prescribed by law.

During the year I have, on several occasions, interacted with groups of business analysts to reaffirm about our future course of action. We have found these interactions useful in communicating effectively with the external environment and in helping them to gain a better understanding about our company's goals, priorities and working.

A Word of Appreciation

We could not have weathered the challenging economic environment and survived the competitive business environment to move forward with renewed vigour without the contribution, commitment and support of our management team and staff, business associates and shareholders. We appreciate your continued support, and steadfast belief in our mission and vision.

Conclusion

While concluding, I convey my personal gratitude for your continued support in our journey of delivering consistent, competitive, profitable and responsible growth and the confidence that you have reposed in your company's Board of Directors. I sincerely hope that you will continue to extend your whole-hearted support to us so that we, along with the management team, and all employees will further accelerate the growth and progress of the company.

Thank You,

Ashok Gupta

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1. INDUSTRY STRUCTURE AND DEVELOPMENTS

Macro Economic Situation

2012-13 was a challenging year for the Indian economy, which experienced its worst slowdown in nearly a decade on the back of global stagnation and domestic macroeconomic fiscal imbalances. The year started with news that the expansion in the previous year's fourth quarter GDP had dropped to 5.5%. That, coupled with low growth, a high fiscal and current account deficit, persistent high inflation, ballooning subsidies and pessimistic business sentiment added to the slowdown. Sources of funding continued to be scarce and borrowing costs remained high during the year.

During last year, the global economy had recovered slightly from the crisis of the earlier year. Nevertheless, the International Monetary fund (IMF), in the update of its World Economic Outlook, lowered the world GDP growth projections for 2013 and 2014, given renewed setbacks in the Eurozone and the risk of excessive fiscal consolidation in the United States.

Indian Economy

India's GDP growth in FY 2012-13 moderated to 5% from 6.2% in FY 2011-12, primarily due to global economic contraction, domestic infrastructural bottlenecks, policy uncertainty and regulatory obstacles. Consumption demand and consumer related sectors were impacted by inflation and high interest rates. However, the moderation in core inflation and some progress on fiscal consolidation have provided enough headroom to reduce interest rates and spur economic activity.

The Government is also initiating measures to limit the fiscal deficit for FY 2013-14 to 4.8% of GDP and drive infrastructure investments under the 12th Five Year Plan. Such measures will restore confidence in India's macroeconomic policy and drive big-ticket investment. The IMF's growth forecast for India is 5.7% in 2013, which can touch 6.2% in 2014, helped by growing domestic demand and enabling policy initiatives. Neighbouring Bangladesh and Sri Lanka are also expected to grow by 6% and 6.3%, respectively, in 2013.

Global Telecom Market

In 2012-13, the global telecom market grew marginally, by approximately 3% year-on-year, to USD 2.207 trillion. Telecom mobile devices accounted for 16% of the Total Market. The low single-digit growth rate of the past fiscal year is expected to continue over the next four years as well, with the total telecom market expected to grow at a compounded annual growth rate (CAGR) of only 4%, largely due to on-going economic concerns. During 2012-13, the Company's addressable market in mobile devices witnessed a excellent growth because the mobile market showed a healthy growth. In the future, we expect the Company's addressable market to continue to grow at an attractive pace.

Telecom Industry Situation

Indian telecommunication industry is one of the fastest growing industries in the world. The Indian telecom sector and subscriber base have witnessed tremendous growth over the past decade, catalysed by increasing mobile handsets demand. India's Handset Market grew by 14.7% to Rs. 35,946 Crore during the fiscal year 2012-13.

India's total customer base stood at 898.02 Mn, second only to China, with a teledensity of 73.32%, as in March 2013. The urban teledensity stood at 149.55%, whereas the rural teledensity stood at 39.90%, as in December 2012. Low cost and increasing competition ensured that the share of private sector in the total telecom space stood at 85.51%, as in December 2012. The announcement of the National Telecom Policy 2012 will also stand the Company in good stead with the primary objective of making affordable, reliable and secure telecommunication services across India. The industry also witnessed consolidation, especially among business-to-business (B2B) players.

2. OPPORTUNITIES

TELECOM PRODUCTS

The telecom industry is going through another round of structural changes from 'hyper competition' to 'perfect competition'. Taking advantage of these changes, we, at Optiemus, are focusing on regaining back pricing that was lost due to hyper competition. Mobile is a vibrant and evolving industry at the heart of everyday life for a growing proportion of the world's population. Given this dynamism, it is no surprise that the mobile industry makes a substantial economic contribution. The telecommunications industry as a whole offers a number of attractive opportunities.

Telecommunications is a necessary utility

The need for telecom in both rural and urban areas, and its role in the infrastructure of both developed and developing markets, continues to grow. The National Telecom Policy-2012 (NTP - 2012) rolled out by the Government this year will also help in socio-economic development.

Massive growth of smartphones

The past year has seen massive growth in the smartphone market, along with proliferation of tablets. This primarily reflects a shift in consumer preference toward feature-enhanced smart devices from ordinary feature phones used primarily for voice telephony. This opportunity provides scope for the Company to retain new users and grow revenue going forward.

Passive Infrastructure

Nation-wide presence, long term contracts with all Retail Chain Suppliers and strategic location makes Optiemus one of the leading Passive distributor in India.

INFRASTRUCTURE

India is one of the fastest growing economies of the world. However the fast growth of the economy in recent years has placed increasing stress on physical infrastructure such as electricity, roads and highways, railways, ports, airports, urban and rural water supply etc. Infrastructure investment requires huge capital outlay which was considered to be big hurdle in the past due to prohibition or lesser private participation. Consequently, the Government is encouraging more private sector participation through Public Private Partnership (PPPs) concept, which is fast evolving in all the aspects of infrastructure development. Such private investments not only help in meeting the funding requirement of projects but it has also other advantage. The gross capital formation in infrastructure should touch ~7.6 per cent

OPTIEMUS INFRACOM LIMITED

during the 11th five year plan compared to only 5.1 per cent in 10th five year plan which constitutes a significant shift in favour of investment in the infrastructure sector. According to the 11th five year plan, investment in infrastructure will be ₹ 20,540 billion which is expected to increase to ₹ 40,990 billion in the 12th five year plan. Out of the total outlay on infrastructure sector during 11th five year plan, ~30 per cent of total investment is expected to come from private participation which is expected to increase to 50 per cent in the 12th five year plan.

3. THREATS

TELECOM PRODUCTS

Regulatory and Economic Environment

The FY 2012-13 was no different from the previous year. The industry looks forward to a reasonable spectrum reserve pricing policy from the authorities in the light of the Government's own articulated policy directions on affordability and rural penetration.

Competitive Environment

Apart from the above, increasing competition in India continue to remain a challenge for the Company. The Company continues to Endeavour to built up strong distribution network to counter aggression by all the competitors.

Challenges

Our well planned capital investments, backed by a world class network, put us in a competitive position to meet the challenges in the telecom space. The other challenges that influence the business performance are:

- i. The telecommunication services industry is capital intensive. Capital Expenditure (CAPEX) on adaptation to latest technology may put pressures on deliverables. However, the Company is constantly assessing such technological challenges and taking immediate remedial steps through timely CAPEX plans.
- ii. The Company faces significant and intense competition in its markets, which could aggravate with the entry of new licensees that may result in decreases in current and potential customers, revenues and profitability. But we remain confident that our competitively priced tariff will continue to attract large volumes of traffic, resulting in better utilization of network, operating efficiencies and cost benefits.
- iii. We are subject to market risks from changes in interest and foreign currency exchange rates. In managing exposure to these fluctuations, we may engage in various hedging transactions that have been authorized according to documented internal policies and procedures.
- iv. 3G Handset ecosystem stability is a key requirement to enable adoption of 3G services.

INFRASTRUCTURE

Infrastructure projects are highly capital intensive, and as such run the risks of

- (i) longer development period than planned due to delay in statutory clearances, delayed supply of equipment or non-availability of land, non-availability of skilled manpower, etc.,
- (ii) financial and infrastructural bottlenecks,
- (iii) execution delay and performance risk and
- (iv) cost over-run.

4. SEGMENT WISE PERFORMANCE

Business Segment-Telecommunication Products

The Indian telecom sector has witnessed tremendous growth over the past decade. Today, the Indian telecom network is the second largest in the world after China. A liberal policy regime and involvement of the private sector have played an important role in transforming this sector, the total number of mobile subscribers globally was at 3.2 billion by end of 2012, growing to 4 billion within the next five years.

Your company operates in International branded devices (Samsung Brand) and is having a strong distribution network across the country. The market for mobile devices can be broadly divided into 2 categories (a) Feature Phones (b) Smart Phones. While the feature phone market is expected to grow at an average of 3% per annum in volume terms, smart phone is expected to witness over 100% year on year growth in 2013.

The organized Retail of Mobile Handsets is growing rapidly in line with the increase in market share of smart phones as customers prefer to buy smart phones from organized retail stores which offer better buying experience and understanding the functions of a smart phone. Organized retail currently holds close to 13% of the value share of total hand set market and it is expected to increase to 35% to 40% over a period of next 3 years. Optiemus is one of the largest player in the industry and has been investing in distribution network heavily over the past 5 years and having an excellent track record of cash profits. We are one of the few companies in this space and size to make cash profits.

Business Segment - Infrastructure

India's growing economy is placing huge demands on critical infrastructure – power, roads, railways, ports, transportation systems, and water supply and sanitation. India has the second largest road network in the world with a road length of 4.24 million km. Also, India's road density is among the highest in the world with 1.29 km of roads per sq. km of area. India's national highways and expressways constitute about 1.67 per cent of the road length, and the percentage of paved roads is 49.3 per cent. Moreover, India's road freight volumes are increasing at a compounded annual growth rate (CAGR) of 9.08 per cent coupled with the boost in the population of vehicles (all types) at a CAGR of 10.76 per cent. In order to cater to such burgeoning needs, road length is increasing at a CAGR of 4.01 per cent.

Also, owing to rapid increase in motorisation and urbanisation, the Indian Government is leaving no stone unturned to enhance the road network. As a result of the initiatives taken, the total road length in India has increased eight times over the past four decades.

5. BUSINESS OUTLOOK

Telecom Sector - Pivotal for future growth

Telecom Sector is pivotal to the socioeconomic development. The global telecommunication industry is witnessing a fundamental change. The new Mobile Handsets aims at faster data connectivity, video streaming with high resolution, and rich multimedia applications.

We at Optiemus are vibrant to this shift.

Telecom Sector as a Catalyst

The telecom Sector is one of the main catalysts of the accelerated growth and progress of different segments of the economy by narrowing access gaps and removing barriers to information. Our enhanced network capabilities and national footprint makes us preferred carrier choice amongst other players.

Consolidation

At the consolidated level the company achieved a revenue of Rs. 283,157 Lacs for the year ended March, 2013 as against Rs. 185,455 Lacs for the year ended March 2012. The Profit before tax for the year ended March, 2013 is Rs. 4,725 Lacs as against profit before tax for the year ended March, 2012 of Rs. 4,047 Lacs. The reason for significant growth in margins is due to Continued Focus to supply feature phones at competitive prices in India;

6. RISKS AND CONCERNS

organizational resources such as financial capital, talent and infrastructure.

• Operations: Risks inherent to business operations including those relating to client

acquisition, service delivery to clients, business support activities, information security, IP, physical security and business activity disruptions. Operational risks are assessed primarily on three dimensions, business process effectiveness, compliance to policies and procedures and strength of underlying controls.

Regulatory

environment: Risks due to adverse developments in regulatory environment that could

potentially impact our business objectives and lead to loss of reputation.

Key Risk Management Practices

The key risk management practices include those relating to identifying key risks to our business objectives, impact assessment, risk monitoring, mitigation actions, reporting and integration with strategy and business planning.

Risk identification and impact assessment: Mechanisms for identification and prioritization of risks include risk survey, business risk environment scanning and focused discussions in Risk Council and Risk Management Committee. Risk register and internal audit findings also provide inputs for risk identification and assessment. Risk survey of executives across units, functions and subsidiaries is conducted on an annual basis to seek inputs on key risks. Further, periodic assessment of business risk environment is carried out to identify significant risks to the achievement of business objectives and prioritizing the risks for action. Scenario-based risk assessments are also carried out. Operational risks are assessed primarily on three dimensions, namely, strength of underlying controls, compliance to policies and procedures and business process effectiveness.

Risk monitoring and mitigation: For identified top risks, dash boards are created that track external and internal indicators relevant for risks, so as to indicate the risk level and its likelihood of occurrence. The trend line assessment of top risks, analysis of exposure and potential impact are carried out. Mitigation plans are finalized, owners are identified and progress of mitigation actions are monitored and reviewed. Further, for those business objectives, whose achievement is at risk, periodic reviews are conducted to deploy actions.

Risk reporting: Risks to the achievement of key business objectives, trend line of risk level, impact and mitigation actions are reported and discussed in Risk Council and Risk Management Committee on a periodic basis. Key external and internal incidents with potential impact are reported and reviewed at appropriate forums such as Information Security Council. Risks relating to client project execution and client account level risks are reported to and discussed at appropriate levels within the Company. Periodic update is provided to the Board highlighting key risks, their impact and mitigation actions. Key risk factors are disclosed in regulatory filings.

Integration with strategy and business planning: Identified risks to the business objectives in the near term, medium term and long term are used as one of the key inputs for the development of strategy and annual business plan. Key strategic initiatives are identified to mitigate specific risks.

Risk Management Framework

Company has a defined self governed risk policy and risk management frame work for all units, functional departments and project sites. This helps in identifying, assessing and mitigating the risk that could impact the Company's performance and achievement of its business objectives. The risks are reviewed on ongoing basis by various process owners across the organization. The risk assessment is carried out by the Management Audit and Risk Assessment Department and a risk note is prepared and presented to the Audit Committee and a risk assessment procedure is presented to the Board of Directors annually.

7. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has documented a robust and comprehensive internal control framework for all the major processes to ensure reliability of financial reporting, timely feedback on achievement of operational and strategic goals, compliance with policies, procedures, laws and regulations, safeguarding of assets and economical and efficient use of resources. OPTIEMUS INFRACOM LIMITED

Notes Forming part of the financial statement

NOTE:1

Significant Accounting Policies

1. Nature of Operations

The Company is primarily engaged in the trading of mobile handset and mobile accessories and construction of road and highways business etc.

2. Basis of accounting and preparation of financial statement

The financial statements of the company have been prepared in accordance with the Generally Accepted accounting principles in India (Indian GAAP) to comply with the accounting standard notified under the Companies (Accounting Standard) Rules, 2006 (As amended) and the relevant provisions of the Companies Act , 1956. The financial statements have been prepared on accrual basis under the historical costs convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

3. Use of Estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (Including Contingent liabilities) and the reported income and expenses during the year. The management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the difference between the actual results and the estimates are recognised the periods in which the results are materialise.

4. Inventories

Inventories are valued at the lower of cost (On FIFO basis) and the net realisable value after providing for obsolescence and other losses, where considered necessary. Costs included all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges.

5. Cash and Cash equivalents (For purposes of cash Flow Statements)

Cash comprises cash on hand and fixed deposits with banks. Cash equivalents are short-term (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risks of changes in value.

6. Cash flow Statement

Cash flows are reported using the indirect method, whereby Profit before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accrual of past or future cash receipts or payments. The cash flows from operating, investing and financial activities of the company are segregated based on the available information.

7. Depreciation

Depreciation has been provided on the written down value method at the rates prescribed in schedule XIV to the Companies Act 1956.

Depreciation on additions to Fixed Assets if provided from the date of acquisition of the Asset. Depreciation on Assets sold/scrapped during the period is provided for up to date of sale/scrap as the case may be

8. Revenue Recognition

Sale of Goods

Sales are recognised, net of returns , on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers. Sales exclude sales tax and value added tax.

Income from services

Revenue from service contracts are recognised pro-rata over the period of the contract as and when services are rendered.

Other Income

Interest Income is accounted on accrual basis. Dividend income is accounted for when the right to receive is established.

9. Tangible Fixed Assets

Fixed assets are stated at cost, less accumulated depreciation/amortisation and impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. However the expenses incurred on Fixed Assets which takes substantial time to bring the assets for its intended use are capitalised in Capital Work in Progress. Fixed Assets not exceeding Rs.5,000/- is charged to the profit and loss account.

Borrowing costs relating to acquisition and fit outs of fixed assets which takes substantial period of time to get ready for its intended use are also included to the extent they relate to the period till such assets are ready for its intended use.

Fixed Assets retired from active use and held for sale are stated at the lower of their net book value and net realisable value and are disclosed separately in the Balance sheet

10. Intangible Assets

Intangible assets are carried at cost less accumulated amortisation and impairments losses, if any. The cost of intangible assets comprises its purchase price, including any imports duties and other taxes and any directly attributable expenditure on making the assets ready for its intended use and net of any trade discounts and rebates.

11. Foreign currency transactions

Income and expenses in foreign currencies are recorded at the exchange rates prevailing on the date of transaction.

Monetary current assets and current liabilities are reinstated at period-end exchange rates and the profit/loss so determined and also the realized exchange gains/losses are recognized in the Profit & Loss Account.

Initial recognition

Transactions in foreign currencies entered into by the Company and its integral foreign operations are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement of foreign currency monetary items at the Balance Sheet date

Foreign currency monetary items (other than derivatives contracts) of the Company and its net investment in non-integral foreign operations outstanding at the Balance sheet date are restated at the year-end rates.

In the case of integral operations, assets and liabilities (Other Than Monetary items), are translated at the exchange rate prevailing on the Balance Sheet date. Non-monetary items are carried at historical cost. Revenue and expenses are translated at the average exchange rates prevailing during the year. Exchange differences arising out of these translations are charged to the statement of profit and loss.

Treatment of Exchange differences

Exchange differences arising on settlement/restatement of short term foreign currency monetary assets and liabilities of the Company and its integral foreign operations are recognised as income or expenses in the statement of profit and loss. The Exchange differences on restatement/settlement of loans to non-integral foreign operations that are considered as net investment in such operations are accumulated in a Foreign Currency monetary item translation difference account

Accounting of forward contracts

Premium or discount on forward exchange contracts, which are not intended for trading or speculation purposes, are amortised over the period of the contracts if such contracts relate to monetary items as at the Balance sheet date.

12. Investments

Investments are classified into current investments and long term investments.

Current investments are carried at market value. Any reduction/increase in carrying amount are charged or credited to the Profit & Loss Account.

Long Term Investments are carried individually at cost less provision for diminution, other than temporary, in the value of such investments.

Cost of investments include acquisition charges such as brokerage, fees and duties

13. Retirement and other Employee benefits

Provident Fund and Superannuation

The eligible employees of the Company are entitled to receive benefits under the provident fund, a defined contribution plan, in which both employees and the company make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary). The provident fund contributions, as specified under the law, are paid to Employees State Insurance Fund (Defined Contribution Schemes), administrated by the Central Government of India. The contributions paid during the year are charged to Profit and Loss account.

Gratuity

The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment. Vesting occurs upon completion of five years of service. The Company makes annual contribution to Life Insurance Corporation of India through Group Gratuity Trust established by it. The Copmpany accounts for the liability for gratuity benefits payable in future based on actuarial valuation provided by LIC of India.

14. Borrowing Costs

Borrowing costs including processing fee that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. Borrowing costs are capitalized as part of the cost of a qualifying asset when it is probable that they will result in future economic benefits to the enterprise and the costs can be measured reliably. Other borrowing costs are recognized as an expense in the period in which they are incurred.

15. Segment reporting

The Company identifies primary segments based on the dominant sources, nature of risks and returns and the internal organisation and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit and loss amounts are evaluated regularly by the executive Management.

The accounting policies adopted for segment reporting are in line with the accounting of the company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segment on the basis of their relationship to the operating activities of the segments.

Revenue, expenses, assets and liabilities which relate to the company as a whole and are not allocable to segment on reasonable basis have been included under "Unallocated revenue/ expenses/assets/liabilities.

16. Earning per share

Basic Earning per share is computed by dividing the profit after tax (including the post tax effect of extraordinary items if any) by the weighted average number of equity shares outstanding during the year.

Diluted earning per share is computed by dividing the profit after tax (Including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expenses or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earning per share and the weighted average number of equity share which could have been issued on the conversion of all dilutive potential equity shares.

17. Taxes on Income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Deferred tax is recognised on timing differences, being the difference, between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent period. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there in virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

18. Provisions and Contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provision (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate require to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimation. Contingent liabilities are disclosed in Notes.

19. Provision for warranty

The estimated liability for product warranties is recorded when products are sold. Notes Forming part of the financial statement

NOTE:1

Significant Accounting Policies

1. Nature of Operations

The Company is primarily engaged in the trading of mobile handset and mobile accessories and construction of road and highways business etc.

2. Basis of accounting and preparation of financial statement

The financial statements of the company have been prepared in accordance with the Generally Accepted accounting principles in India (Indian GAAP) to comply with the accounting standard notified under the Companies (Accounting Standard) Rules, 2006 (As amended) and the relevant provisions of the Companies Act , 1956. The financial statements have been prepared on accrual basis under the historical costs convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

3. Use of Estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (Including Contingent liabilities) and the reported income and expenses during the year. The management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the difference between the actual results and the estimates are recognised the periods in which the results are materialise.

4. Inventories

Inventories are valued at the lower of cost (On FIFO basis) and the net realisable value after providing for obsolescence and other losses, where considered necessary. Costs included all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges.

5. Cash and Cash equivalents (For purposes of cash Flow Statements)

Cash comprises cash on hand and fixed deposits with banks. Cash equivalents are short-term (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risks of changes in value.

6. Cash flow Statement

Cash flows are reported using the indirect method, whereby Profit before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accrual of past or future cash receipts or payments. The cash flows from operating, investing and financial activities of the company are segregated based on the available information.

7. Depreciation

Depreciation has been provided on the written down value method at the rates prescribed in schedule XIV to the Companies Act 1956.

Depreciation on additions to Fixed Assets if provided from the date of acquisition of the Asset. Depreciation on Assets sold/scrapped during the period is provided for up to date of sale/scrap as the case may be

8. Revenue Recognition

Sale of Goods

Sales are recognised, net of returns, on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers. Sales exclude sales tax and value added tax.

Income from services

Revenue from service contracts are recognised pro-rata over the period of the contract as and when services are rendered.

Other Income

Interest Income is accounted on accrual basis. Dividend income is accounted for when the right to receive is established.

9. Tangible Fixed Assets

Fixed assets are stated at cost, less accumulated depreciation/amortisation and impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. However the expenses incurred on Fixed Assets which takes substantial time to bring the assets for its intended use are capitalised in Capital Work in Progress. Fixed Assets not exceeding Rs.5,000/- is charged to the profit and loss account.

Borrowing costs relating to acquisition and fit outs of fixed assets which takes substantial period of time to get ready for its intended use are also included to the extent they relate to the period till such assets are ready for its intended use.

Fixed Assets retired from active use and held for sale are stated at the lower of their net book value and net realisable value and are disclosed separately in the Balance sheet

10. Intangible Assets

Intangible assets are carried at cost less accumulated amortisation and impairments losses, if any. The cost of intangible assets comprises its purchase price, including any imports duties and other taxes and any directly attributable expenditure on making the assets ready for its intended use and net of any trade discounts and rebates.

11. Foreign currency transactions

Income and expenses in foreign currencies are recorded at the exchange rates prevailing on the date of transaction.

Monetary current assets and current liabilities are reinstated at period-end exchange rates and the profit/loss so determined and also the realized exchange gains/losses are recognized in the Profit & Loss Account.

Initial recognition

Transactions in foreign currencies entered into by the Company and its integral foreign operations are accounted at the exchange rates prevailing on the date of the transaction or at rates that closely approximate the rate at the date of the transaction.

Measurement of foreign currency monetary items at the Balance Sheet date

Foreign currency monetary items (other than derivatives contracts) of the Company and its net investment in non-integral foreign operations outstanding at the Balance sheet date are restated at the year-end rates.

In the case of integral operations, assets and liabilities (Other Than Monetary items), are translated at the exchange rate prevailing on the Balance Sheet date. Non-monetary items are carried at historical cost. Revenue and expenses are translated at the average exchange rates prevailing during the year. Exchange differences arising out of these translations are charged to the statement of profit and loss.

Treatment of Exchange differences

Exchange differences arising on settlement/restatement of short term foreign currency monetary assets and liabilities of the Company and its integral foreign operations are recognised as income or expenses in the statement of profit and loss. The Exchange differences on restatement/settlement of loans to non-integral foreign operations that are considered as net investment in such operations are accumulated in a Foreign Currency monetary item translation difference account

Accounting of forward contracts

Premium or discount on forward exchange contracts, which are not intended for trading or speculation purposes, are amortised over the period of the contracts if such contracts relate to monetary items as at the Balance sheet date.

12. Investments

Investments are classified into current investments and long term investments.

Current investments are carried at market value. Any reduction/increase in carrying amount are charged or credited to the Profit & Loss Account.

Long Term Investments are carried individually at cost less provision for diminution, other than temporary, in the value of such investments.

Cost of investments include acquisition charges such as brokerage, fees and duties

13. Retirement and other Employee benefits

Provident Fund and Superannuation

The eligible employees of the Company are entitled to receive benefits under the provident fund, a defined contribution plan, in which both employees and the company make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary). The provident fund contributions, as specified under the law, are paid to Employees State Insurance Fund (Defined Contribution Schemes), administrated by the Central Government of India. The contributions paid during the year are charged to Profit and Loss account.

Gratuity

The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment. Vesting occurs upon completion of five years of service. The Company makes annual contribution to Life Insurance Corporation of India through Group Gratuity Trust established by it. The Copmpany accounts for the liability for gratuity benefits payable in future based on actuarial valuation provided by LIC of India.

14. Borrowing Costs

Borrowing costs including processing fee that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. Borrowing costs are capitalized as part of the cost of a qualifying asset when it is probable that they will result in future economic benefits to the enterprise and the costs can be measured reliably. Other borrowing costs are recognized as an expense in the period in which they are incurred.

15. Segment reporting

The Company identifies primary segments based on the dominant sources, nature of risks and returns and the internal organisation and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit and loss amounts are evaluated regularly by the executive Management.

The accounting policies adopted for segment reporting are in line with the accounting of the company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segment on the basis of their relationship to the operating activities of the segments.

Revenue, expenses, assets and liabilities which relate to the company as a whole and are not allocable to segment on reasonable basis have been included under "Unallocated revenue/ expenses/assets/liabilities.

16. Earning per share

Basic Earning per share is computed by dividing the profit after tax (including the post tax effect of extraordinary items if any) by the weighted average number of equity shares outstanding during the year.

Diluted earning per share is computed by dividing the profit after tax (Including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expenses or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earning per share and the weighted average number of equity share which could have been issued on the conversion of all dilutive potential equity shares.

17. Taxes on Income

OPTIEMUS INFRACOM LIMITED

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Deferred tax is recognised on timing differences, being the difference, between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent period. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there in virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

18. Provisions and Contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provision (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate require to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimation. Contingent liabilities are disclosed in Notes.

19. Provision for warranty

The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates possible future incident based on corrective actions on product failures. The timing of outflow will vary as and when warranty claim will arise-being typically upto three years.

As per the terms of the contract, the Company provides post-contract services / warranty support to some of its customer. The Company accounts for the post-contract support / provision for warranty on the basis of the information available with the Management duly taking into account the current and past technical estimation.

20. Insurance claims
