MANAGEMENT DISCUSSION AND ANALYSIS REPORT

MACRO-ECONOMIC & BOND MARKET DEVELOPMENT

The financial year 2014-15 has been a year of recovery for India after facing headwinds during FY 2013-14. India achieved the targeted GDP growth rate of 7.3% during FY 2014-15 surpassing the growth rate of 6.6% in FY 2013-14. India industrial production (IIP) though modest at 2.8% in FY 2014-15, was higher than the -0.1% growth in FY 2013-14. India's economic growth is expected to remain high, supported by a revival in investment. The FY 2015-16 fiscal consolidation targets has been relaxed to allow for increased infrastructure investment while structural reforms to improve the ease of doing business and the Make in India initiative should boost corporate investment. Despite poor economic activity in the world's two largest economies - the US and China in the first quarter of 2015, the overall global economy seems to be recovering at slower pace.

While other economies are facing serious challenges, India is once again poised to catch up a faster growth trajectory. The International Monetary Fund ("IMF") has downgraded its earlier forecast of global economic growth by 0.3%, and the World Trade Organization ("WTO") has revised its forecast of world trade growth from 5.3% to 4%. Forecasts for India, however, have either been upgraded, or remained the same, without downgrades.

The Balance of Payments (BoP) data also showed significant improvement over the previous year. Lower Current Account Deficit (CAD), on the back of contraction in trade deficit and marginal improvement in the net invisible earnings, along with a sizable increase in net financial flows enabled a large build-up of reserves. CAD decreased to 27.5 billion USD in FY 2014-15 from 32.4 billion USD in FY 2013-14. BoP situation is expected to remain favorable to India in FY16 on account of lower fuel import cost and high foreign inflows.

In addition to BoP situation, India has made considerable progress on inflation front too. The Consumer Price Index (CPI) stood at 5.40% in June'15, which is quite acceptable in Indian context. Combination of high growth rate and controlled inflation led to a healthy fiscal consolidation. Consumer Inflation is expected to remain stable in 4-6% range though we believe the CPI to hover at the higher end of the range between 5.5-6%. Assuming normal monsoon, reasonable food management and low crude oil prices, the inflation is expected to be pulled down by base effects till August but to start rising thereafter to about 6.0% by January 2016 – slightly higher than the projections in April.

The latest wholesale price inflation is negative; the current account deficit for this year is expected to be below 1.3% of GDP; based on the new series, real GDP growth is expected to accelerate to 7.4%, making India the fastest growing large economy in the world; foreign inflows since April 2014 have been about \$55 billion, so that India's foreign exchange reserves have increased to a record \$340 billion; the rupee has become stronger by 6.4% against a broad basket of currencies; and India was the second-best performing stock market amongst the major economies. In short, India has turned around the economy dramatically, restoring macro-economic stability and creating the conditions for sustainable poverty elimination, job creation and durable double-digit economic growth. Domestic and international investors are now watching India with renewed interest and hope.

While being mindful of the challenges, this gives us a reason to feel optimistic and the opportunities have arisen because the proactive approach of the Government. Moreover the actions of the Government have not been confined to the core or macro-economic areas alone. For e.g. action has been taken with regard to allocation of natural resources; financial inclusion; health and hygiene of the common man; girls and their education; employment for the youth; improved and non-adversarial tax administration; effective delivery of benefits; investment and job creation; welfare of labour; agricultural productivity and increasing farm incomes; power; digital connectivity; skilling our youth; efficient and better work culture in Government; ease of doing business; mainstreaming North Eastern States; and reviving pride in the nation and its culture. Several initiatives of the Government have yielded remarkable success eg. (i) Jan DhanYojana; (ii) coal auctions; (iii) Swachh Bharat yojna; (iv) construction of 50 lakh toilets; and (v) preventive health care and awareness.

Capturing inflation represents a structural shift and going forward, the Government expects CPI inflation to remain close to 5% by the end of the FY 2015-16, which may provide room to the central bank for further easing of key interest rates. According to the estimates of the Central Statistics Office, based on the new series, the GDP is likely to grow between 8.0% to 8.5% during FY 2015-16 and has a potential for double-digit growth in the near future.

The key development in the debt market include proposal to increase foreign investment limit in debt market and issuance of tax-free bonds worth ₹ 30,000 crore in FY 2015-16. RBI is formulating a scheme for market making by primary dealers in semi-liquid and illiquid government securities. Further credit default swaps (CDS) could be re-launched. RBI also announced steps to boost retail participation in government securities. These include a web-based solution for all mid-segment and retail investors who have gilt accounts to participate in the G-Sec market bond market which though volatile has seen a secular decline in interest rates over the year during FY 2014-15.

A major challenge to our economy is to increase investment in infrastructure with private participation via public private partnership ("PPP") model. Yet another challenge is to arrest the fall in share of manufacturing from 18% to 17% of GDP as per new GDP data and almost static exports at about 10% of GDP. The "Make in India" initiative of the Government aims at meeting this challenge, besides generating mass job opportunities. There is a pressing need to increase public investment in infrastructure. The Government has therefore, increased outlays on both the roads and the gross budgetary support to the railways, by ₹ 14,031 crore, and ₹ 10,050 crore respectively. Besides, capital expenditure by the public sector undertakings is likely to be scaled up to ₹ 3,17,889 crore whereby investment in infrastructure is likely to grow by ₹ 70,000 crores in the year 2015-16.

To rebound our journey to a real growth trajectory, the Government needs to (a) initiate steps for increasing public investment. The total additional public investment over and above the revised estimate is planned at ₹ 1.25 lakh crore out of which ₹ 70,000 crore may be in form of budgetary outlay for capital expenditure; (b) implementation of GST with likely burden as per estimates of the 7th Pay Commission; (c) contain/curtain fiscal deficit to 3% over next 3 years i.e. (i) 3.9% for 2015-16; (ii) 3.5% for 2016-17; and 3.0% for 2017-18.

After adopting a static interest rate regime for one year (Jan-2014 to Jan-2015), the RBI synced its policy decisions with the macro perspective of the ruling Government and announced series of three rate cuts in Jan-2015, Mar-2015 and June-2015:

Movement in Repo Rate

The first bi-monthly monetary policy statement for FY 2015-16 issued by the RBI on April 07, 2015, pointed out that the global recovery was still slow and getting increasingly differentiated across regions. The US economy shrunk in Q1 primarily due to harsh weather conditions, strength of the US dollar weighing on exports and decline in non-residential fixed investment. In the euro area, financial conditions had eased due to the European Central Bank's quantitative easing and a depreciating euro. There has, however, been some moderation in composite purchasing managers' indices, economic sentiment and consumer confidence in April. For most emerging market economies, macroeconomic conditions remain challenging due to domestic fragilities, exacerbated by bouts of financial market turbulence. China continued to decelerate in spite of monetary easing. Firming up of crude prices has reduced headwinds to growth for some energy exporters, while increasing them for importers.

The Central Statistics Office revised its estimate of India's gross value added downwards at basic prices for FY 2014-15 by 30 basis points from the advance estimates. Domestic economic activity remained moderate in Q1 of FY 2015-16. Agricultural output was adversely affected by unseasonal rains and hailstorms in north India during March 2015, impinging on an estimated 94 lakh hectares of area sown under the rabi crop. Reflecting this, the third advance estimates of the Ministry of Agriculture depicted contraction in food-grains production by over 5% in relation to the levels of previous year. The outlook for the kharif season was also uncertain as per the first estimates of India Meteorological Department, predicting that the southwest monsoon should be 7.0% or lower and the view was reinforced by the confirmation of the onset of El Nino by the Australian Bureau of Meteorology.

Assuming reasonable food supply, inflation was estimated to be pulled down by the base effect till August and restore the rising trend thereafter to about 6.0% by January 2016.

The Indian bond market witnessed several initiatives from the Reserve Bank of India (RBI) which could directly or indirectly help in the further strengthening of the bond market. Many announcements such as launch of inflation indexed bonds linked to wholesale inflation and later similar instrument linked to retail inflation was aimed at broad basing the participants in the market. Measures to allow banks to offer partial credit enhancements to corporate bonds by way of providing credit facilities and liquidity facilities to the corporate rather than providing just the guarantee was another initiative by the central bank. The launch of dedicated debt trading platform on the exchange was aimed at improving liquidity and transparency to the participants. Also launch of Cash Settled 10-year Interest Rate Futures Contracts will go a long way in deepening the bond markets.

iii. Employee leave entitlement

The employees of the Company are entitled to leave as per the leave policy of the Company. The liability in respect of unutilized leave balances is provided as at the year end and charged to the statement of profit and loss.

I Accounting for taxes on income:

- i) Provision for income tax is made on the basis of the estimated taxable income for the accounting year in accordance with the Income-tax Act, 1961.
- ii) The deferred tax for timing differences between the book profits and tax profits for the year is accounted for using the tax rates and laws that have been enacted or substantively enacted as of the balance sheet date. Deferred tax assets arising from timing differences are recognised to the extent there is a virtual / reasonable certainty that these would be realised in future and are reviewed for the appropriateness of their respective carrying values at each balance sheet date.

j) Lease:

i. As a Lessee:

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased assets are classified as operating leases. Operating lease payments are recognised as an expense in the statement of profit and loss on straight-line basis over the lease term.

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the management estimates the recoverable amount of the asset. If such recoverable amount of the asset is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the statement of profit and loss. If at the balance sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost.

m) Provisions and contingent liabilities:

The Company creates a provision when there is a present obligation as result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, requires an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

n) Earnings per share:

The basic earnings per share ("EPS") is computed by dividing the net profit/ (loss) after tax for the year available for the equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, net profit/(loss) after tax for the year available for equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

The consolidated financial statements have been prepared on the following basis:

- i) The financial statements of the parent company and the subsidiaries have been combined on a line by line basis by adding together the book values of like items of assets, liabilities, income and expenses after eliminating intra-group balances / transactions and resulting unrealised profits in full. Unrealised losses resulting from intra-group transactions have also been eliminated except to the extent that recoverable value of related assets is lower than their cost to the Group. The amounts shown in respect of reserves comprise the amount of the relevant reserves as per the balance sheet of the parent company and its share in the post acquisition increase in the relevant reserves of the subsidiaries.
 - ii) Transactions relating to statement of profit and loss of the acquired subsidiaries have been included in the consolidated statement of profit and loss from the effective date of acquisition.

The excess of acquired portion of equity in subsidiaries over the cost of acquisition of investments in the subsidiaries is recognised in the financial statements as 'capital reserve'.
- c) Minority interest in the net assets of consolidated subsidiaries consists of:
- the amount of equity attributable to minorities at the date on which investment in subsidiary is made; and
 - the minorities' share of movements in equity since the date the parent and subsidiary relationship came into existence.
- d) The consolidated financial statements are presented, to the extent possible, in the same format as that adopted by the parent company for its separate financial statements.
- e) The consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances to the extent possible.
