MANAGEMENT DISCUSSION AND ANALYSIS REPORT

MACRO-ECONOMIC

The year gone by has been eventful with many ups & downs from concerns of slowdown in China economy to Brexit event to rise in negative yield assets in some economies to astounding demonetization in India to victory of Trump as US President.

Considering Indian Macro Economic Scenario, FY 2017 was marked by two major domestic policy developments, demonetization of Specified Bank Notes (SBNs) i.e. ₹ 500 and ₹ 1,000 bank notes prevailing as on 8th November 2016 and the passage of the Constitutional amendment and follow-up legislation, paving way for GST implementation. On external sector front, current account deficit remains within comfortable limits. Fiscal consolidation at Central Government level has continued with an improvement in spending quality by shifting expenditures away from current to capital expenditures. However, State Government finances appeared to be under stress in FY 2017. Inflation eased further, which helped RBI ease 50 bps in FY 2017.

The growth environment

On growth front, real GDP seems to have slowed in FY 2017 from FY2016. As per CSO, the second advance estimate of growth for FY 2017 stood at 7.1% as against the upwardly revised 7.9% in FY 2016. On value added basis, real GVA (gross value added) growth estimate for FY 2017 has been revised down to 6.7% from 7.8%. On the positive side, the economy was buoyed by government consumption, as the 7th Pay Commission salary recommendations were implemented. Besides, a good monsoon helped keep agricultural production buoyant. However, private investment has remained anemic.

Overall, the economic fundamentals have fared reasonably well in FY 2017. The economy aims to achieve growth momentum through a) low inflation, b) revival of investment (both public- through budget schemes and private- through GST roll-out, Insolvency & Bankruptcy Code and Abolition of Foreign Investment Promotion Board), and c) pick-up in rural demand.

Industry Structure and Bond Market Development

Credit growth has remained subdued in FY 2017. February 2017 witnessed a mere 3% YoY growth in credit, mainly led by personal loans (12% YoY) and agriculture and allied activities (9% YoY). Services (8% YoY) registered stable growth while industry suffered de-growth in credit uptake by 5% YoY. The RBI starved the economy for expected rate cuts in FY 2017; repo rate was cut only twice totaling 50bps in fear of rising inflation due to global spill overs. As on March 31, 2017, CRR was at 4%, SLR at 20.50%, repo rate at 6.25%, reverse repo at 5.75% and MSF/bank rate at 6.50%. The Indian rupee remained fairly resilient versus other emerging market peers, on account of strong capital inflows and reserve build-up by the RBI followed by demonetisation. The exchange rate during FY 2017 averaged ₹ 67.1 per US\$ after touching an all-time high of ₹ 68.8 per US\$. Foreign exchange reserves were at US\$ 367.93bn as on April 1, 2017.

The bond yields started the year with a marginal downward bias, helped by rate cut in April policy and RBI's accommodative stance. However, the bond market dynamics changed dramatically since mid-June. The Bond rally was initially triggered by news of former RBI Governor Raghuram Rajan's exit on June 18, with the market seeming to interpret the change of guard as a shift towards potentially more dovish RBI regime. The domestic bond rally continued with global rally till around October. However, global yields started hardening post October. November onwards, India rates market saw very divergent dynamics from rest of the world. Even as the global bond sell-off was triggered post the surprise US election outcome, Indian bonds rallied sharply owing to demonetisation of high denomination currency notes. Demonetisation led to consequent increase in banks' deposit base which boosted SLR demand, while strengthening rate cut hopes are amid slow growth and inflation, further helped bonds. The benchmark 10-yr paper yield saw the lows of 6.16% by ~end-November. Mid December onwards, yields started hardening as the demonetisation impact peaked for bonds, while global yields started hardening on Fed's relatively hawkish stance. Bonds further lost momentum after RBI sounded hawkish in December and eventually changed its stance to neutral from accommodative in February – signaling an end to the easing cycle. This unexpected move led to sharp sell-off in bonds. However, due to sudden short squeeze and year-end valuation buying helped bonds ease marginally in March. The benchmark 10-yr paper eased to 6.68% to end the fiscal year, easing around 79bps from end-March FY 2016. The yield spread with repo rate narrowed to 43 bps by end-March 2017.

World Bank has forecasted world growth to be 2.7% in 2017 further strengthening to 2.9% in 2018. India's growth projection is estimated at 7.2% for 2017-18 and 7.5% for 2018-19. Currently all the indicators such as inflation, economic growth, strengthening rupee support the growth of bond markets, in view of the of the listed factors fixed income market is expected to remain positive.

India's total debt outstanding is ₹ 1,03,922 billion comprising 77% of sovereign securities and 23% of corporate bonds. Currently, Government bonds dominate the debt market with an advantage of being more liquid and risk free vis-à-vis corporate bonds. Also, 93% of corporate bonds are privately placed to institutional investors restricting development of healthy secondary markets.

Over 90% of the total amount of corporate bonds raised in H1 of FY 2017 of ₹ 3.2 lakh crores was issued through the private placement route. The popularity may be attributed to the operational flexibility and ease the route offers at the same time it restricts the investor audience. Most of the corporate bonds issued through private placement mode carry a face value of ₹ 10 Lacs which is much higher than the average annual income of citizens of the country. Issuers, regulators and intermediaries need to put their acts together to ensure reach of debt financial products to the larger section of society through public offerings.

The business environment is set to improve with structural reforms; SEBI has released the much awaited guidelines and framework for Real Estate Investment Trusts (REIT) and Infrastructure Investment Trusts (InvIT). The move will provide a positive push to the Indian capital markets; introduce a different asset class, GST, the Insolvency and Bankruptcy Code, and the abolition of the Foreign Investment Promotion Board is also set to support the system.

Outlook and Strategy

Over the period, AK Capital, along with its subsidiary companies, has emerged as a specialized boutique in domestic corporate bond market encompassing almost all spheres such as investment banking, private placement and public issue of debt, underwriting, market making, financial advisory, retirement trust solutions, retail distribution, portfolio management, financing against debt securities, hybrid debt structuring and syndication, G-Sec trading and broking, venture capital, project financing etc. In its journey of over two decades, AK Capital has pioneered and introduced numerous debt and hybrid debt instruments including perpetual bonds, optionally convertible debentures,

We intend to capitalize on the potential of debt market and act as a catalyst towards building a vibrant and robust corporate bond market. Globally, debt market comprises of large portion of the financial markets. With an outstanding of \$40,000 billion, debt market size is almost 1.6 times the size of the equity market in the US. India contributes 2.99% towards the total global GDP, while its share of debt market capital is less than that of 2.00% of the global outstanding debt (Source: IMF) and with an approximate 90% of the total share, equity markets dominate the Indian capital market.

India's total debt outstanding is ₹ 1,03,922 billion (Source: RBI & SEBI), comprising 77% of sovereign securities and 23% of corporate bonds. Currently, Government bonds dominate the debt market with an advantage of being more liquid and risk free vis-à-vis corporate bonds. Also, 93% of corporate bonds are privately placed to institutional investors restricting development of healthy secondary markets. Crowding out by government bonds is one of the potential obstacles to healthy corporate bond markets. A high level of public debt crowds out corporate borrowing by reducing the appetite of financial institutions.

Around 80-90% of debt in India is in form of bank loans. Oversized banking system has led to limited growth of corporate bond market. Mounting NPAs and increased capital requirements under Basel III are expected to limit banks' lending to corporates. In such a situation, bond markets can play a pivotal role in supporting diverse financing requirements of the growing Indian economy. Bond market rates reflect changes in key interest rates by the RBI more efficiently than the bank lending rates. Thus, there is a need for economical capital at interest rates that better reflect monetary policy through tradable bonds.

Currently all the micro and macro-economic factors such as benign inflation, promising economic growth, strengthening rupee, sliding bond yields, industrial recovery etc. support the growth of corporate bond markets.

OPPORTUNITIES AND CHALLENGES:

Opportunities

- Over past few years, the regulatory authorities have initiated major structural reforms towards building a robust, transparent and vibrant corporate bond markets in India:
 - Allowing FPIs to transact in corporate bonds directly without involving brokers;
 - Allowing FPIs to invest in unlisted corporate bonds;
 - Increase in FPI limits;
 - Electronic bidding mechanism in private placement for transparent price discovery;
 - Simplification and rationalization of disclosure requirements for debt public issues;
 - Re-issuance of debt securities;
 - Market making in debt securities;
 - Repo in corporate bonds;
 - Regulatory framework for issue of Municipal Bonds;
 - Norms for issuance and listing of Green Bonds;
 - Government guarantee / Government servicing mechanism to enhance credit rating of PSU bonds;
 - Fiscal discipline initiatives by cash starved state power utilities through issuance of state government guaranteed UDAY Bonds;
 - Framework for providing partial credit enhancement by banks to bonds floated by infrastructure companies;
 - Setting up of dedicated Infrastructure Debt Funds to serve as intermediate vehicle for raising bonds from long terms investors such as provident funds and insurance companies and lending the same to key infrastructure sectors;

- o. Framework for credit default swaps (CDS) for corporate bonds;
- p. Guidelines on issue of long term bonds by banks for financing of infrastructure and affordable housing;
- q. Introduction of delivery versus payment (DvP) system to nullify the risk of settlement in debt securities;
- r. Framework for issuance of rupee-denominated Masala bonds by domestic companies from global markets without assuming currency risk;
- s. Setting up of dedicated debt trading segment on the exchanges.

Such measures along with growing awareness and acceptability of fixed income securities across investor class are likely to provide impetus to growth of domestic corporate bond markets.

Challenges

- Like any other market:
 - (a) corporate bond markets are vulnerable to market risks originating from volatility in interest rates;
 - (b) operations in corporate bond markets may be vulnerable to competition thereby affecting margins;
 - (c) besides market risks, increased supply of corporate bonds may be vulnerable to credit risk;
 - (d) Growth and performance of domestic corporate bond markets is dependent upon a host of macro-economic factors. India offers high-risk, high-yielding debt investment opportunities to offshore investors. However any significant tightening of monetary policy rates by the global central banks may lead to flight of capital and pose competition to Indian markets.

ANNEXURE 'B' TO THE INDEPENDENT AUDITORS' REPORT

(Referred to in paragraph 2(f) under the heading 'Report on Other Legal and Regulatory Requirements' of our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of A. K. Capital Services Limited ("the Company") as of 31 March 2017 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The reduction is treated as an impairment loss and is recognized in the statement of profit and loss. If at the balance sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost.

ANNEXURE – ‘A’ TO THE INDEPENDENT AUDITORS’ REPORT

(Referred to in paragraph 1 under the heading ‘Report on Other Legal and Regulatory Requirements’ of our report of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended 31 March 2017, we have audited the internal financial controls over financial reporting of A. K. Capital Services Limited (“the Holding Company”) and its subsidiary companies which are companies incorporated in India, as of that date.

Management’s Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding Company and its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (‘ICAI’). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective companies policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) issued by the ICAI and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters Paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the respective Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its subsidiary companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

Other Matters

Our aforesaid report under Section 143(3) (If the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it related to three subsidiary companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such companies incorporated in India.

iii. Employee leave entitlement

The employees of the Company are entitled to leave as per the leave policy of the Company. The liability in respect of unutilized leave balances is provided as at the year end and charged to the statement of profit and loss.

10) Accounting for taxes on income:

- i) Provision for income tax is made on the basis of the estimated taxable income for the accounting year in accordance with the Income-tax Act, 1961.
- ii) The deferred tax for timing differences between the book profits and tax profits for the year is accounted for using the tax rates and laws that have been enacted or substantively enacted as of the balance sheet date. Deferred tax assets arising from timing differences are recognised to the extent there is a virtual certainty that these would be realised in future and are reviewed for the appropriateness of their respective carrying values at each balance sheet date.

11) Lease:**i) As a Lessee:**

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased assets are classified as operating leases. Operating lease payments are recognised as an expense in the statement of profit and loss on straight-line basis over the lease term.

ii) As a Lessor:

Assets subject to operating lease are included in fixed assets. Lease income is recognised in the statement of profit and loss on a straight-line basis over the lease term. Costs, including depreciation are recognised as an expense in the statement of profit and loss. Initial direct costs such as legal costs, brokerage costs, etc. are recognised immediately in the statement of profit and loss.

12) Borrowing costs:

Borrowing costs attributable to the acquisition and construction of qualifying assets upto the date of such acquisition or construction are capitalised as part of the cost of respective assets. Other borrowing costs are charged to statement of profit and loss in the period in which they are incurred.

13) Impairment of assets:

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the management estimates the recoverable amount of the asset. If such recoverable amount of the asset is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the statement of profit and loss. If at the balance sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost.

14) Provisions and contingent liabilities:

The Company creates a provision when there is a present obligation as result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, requires an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

In case of a subsidiary company, i.e. A. K. Capital Finance Private Limited, the General Provision @ 0.35% (previous year 0.30%) on Standard Assets is made as per RBI notification.

15) Earnings per share:

The basic earnings per share ("EPS") is computed by dividing the net profit/ (loss) after tax for the year available for the equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, net profit/(loss) after tax for the year available for equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.
