Chairman's Letter

Dear Shareholders,

It gives me immense pleasure to write to you at the end of an exciting year – a year that had its share of opportunities and challenges. The year began with sky-high expectations of economic recovery resulting from the decisive political mandate but as the year progressed, it was increasingly evident that the pace of recovery would be much more gradual. Many domestic growth indicators improved during the year helped by the Government's intent to push reforms and promote investments. The lower crude oil and commodity prices also

“The year began with sky-high expectations of economic recovery resulting from the decisive political mandate but as the year progressed, it was increasingly evident that the pace of recovery would be much more gradual”

helped reigning in inflation and set the stage for easing of monetary policy. While the headline indicators improved during the year, ground realities have been challenging and growth slow to come by.

The overall weak sentiments impacted the demand conditions in the domestic market for decorative paints. Factors like a short Diwali festival season, unseasonal rains and prolonged winter in Northern India added to the pressures on the demand. However, despite the challenging environment, your Company did well to manage and grow its business in most parts of the country. Though the growth was not as good as expected, your Company benefited from the benign raw material prices, especially brought about by the drop in crude oil prices.

Your Company launched a number of new and innovative products which helped support the growth in these challenging times. In the premium segment, your Company launched 'Royale Matt' with excellent washability and burnish resistance. A complete range of products to offer full solution in the tile segment was also introduced.

In our bid to expand our offerings beyond the traditional paint products, your Company launched a full range of wall coverings under the brand name 'Nilaya – by Royale Play'. Your Company now offers one of the largest variety of wall coverings in partnership with leading manufacturers around the world and the range inspires to provide cutting edge inspirational décor to consumers.

At the same time, your Company continues to invest in capabilities to enhance customer experience and fulfil customer expectations. Innovative services like 'Express Painting Service' and 'Ezycolour Consultancy at Home' and enhanced customer reach-outs through the 'Colour' and 'Colour Ideas' stores would go a long way in not only meeting these expectations but also in comprehending changing aspirations ahead of competition.

Demand for the industrial products, serviced through your Company's two joint ventures with PPG Industries Inc, USA, saw improvement over the previous year.

In the international markets where your Company operates, the business environment was challenging for varied reasons in many of the key markets. While the situation in Egypt improved after three successive years of instability, declining crude oil prices impacted growth in markets of Oman, Bahrain and Trinidad. Political instability continued to pose challenges in Bangladesh. Against the backdrop of less than ideal market conditions, the international operations have delivered good performance driven by continued focus on improving operational efficiencies and prudent fiscal management.

During the year, your Company took steps to expand its international footprint. Kadisco, a leading paint company in Ethiopia, was acquired by Berger International Ltd, Singapore; an indirect wholly-owned subsidiary of your Company. Your Company also initiated steps for setting up a paint manufacturing facility and operations as part of the greenfield foray into Indonesia. Both these steps, further reconfirm your Company's intent to be a significant coatings player in the high growth, emerging markets.

Going forward, the recent forecasts for below normal monsoon coupled with the slow pick-up in industrial activity, could lead to challenging demand conditions in the domestic market. However, over the long term, your Company is confident of the growth prospects of the paint industry, both in the domestic and the international markets. It's a sign of this confidence that your Company is looking for setting up new manufacturing facilities in the states of Karnataka and Andhra Pradesh. At the same time, your Company is augmenting capacities in some of the existing plants in the domestic and international markets.

During the year, the Government changed the governance landscape by notifying majority of the provisions of the Companies Act, 2013 and Rules thereunder. Some of the concepts like evaluation of the performance of Directors and the Board, rotation of auditors, increased responsibility of the Nomination and Remuneration Committee and the Audit Committee ensure higher standards of transparency and accountability and seek to align the corporate governance practices in India with global best practices. Your Company's governance standards have only strengthened over the period of years and your Company will continue to imbibe best practices to enhance stakeholders' value.

Your Company continued to focus on its Corporate Social Responsibility agenda and undertook various initiatives to touch and improve lives by contributing to communities that your Company operates in. There is a conscious endeavour around various manufacturing facilities to invest in areas of Education, Health & Hygiene and Water Management to create measurable and lasting value for neighboring communities. Vocational training programs conducted across cities was a major focus area and has benefited thousands of painters and contractors. Your Company has also made investments in the area of renewable energy. A rooftop solar power plant was commissioned at the Sriperumbudur factory which has led to substantial reduction in energy consumption from traditional fossil sources. Similar projects would be commissioned in the other manufacturing plants as well.

At Asian Paints, we truly believe that if there's one thing that's certain in business, it's uncertainty. And the only way to handle this uncertainty is to be on a continual journey of transformation. Few years back, your Company embarked on a new journey to transform itself from a paint company to a home décor company by expanding its offerings to cater to the changing perspectives of home aesthetics and help customers create their dream home. This quest for transformation led to your Company's acquisition of Sleek group in 2013 which caters to the organized modern kitchen space. The year gone by saw another step being taken in this journey with foray in the Bath space by acquiring the front end business of Ess Ess, a quality player in the bath fittings segment. During the year, your Company took several initiatives to streamline the operations at these acquired businesses and improve the scale of respective businesses.

As we look ahead to this journey of transformation, I look forward to your continued support. I am sure that with your unwavering support, guidance from the Board members and the passion and commitment of the entire team, your Company would take great strides in making Asian Paints the most preferred Home Décor partner.

Yours truly,

Ashwin Choksi

Management Discussion and Analysis

OVERVIEW OF THE ECONOMIC ENVIRONMENT

2014-15 has been a year marked by excitement and its share of challenges. The decisive political mandate accorded in the general elections set the stage for surging hopes for a rapid economic turnaround of the Indian economy. While many macro-economic indicators have improved during the course of the year, the journey to realize the growth potential of the economy is slow and challenging.

On the macro front, the biggest comfort came from the sharp drop in crude prices. For a large net importer like India, the decline in crude prices has helped in controlling the trade deficit and easing inflation. Headline inflation as measured by CPI has eased by almost 360 bps to 5.9% in 2014-15. Even the trade deficit is largely unchanged from 2013-14 despite weak export growth, helped by the soft commodity prices, especially crude and contained gold demand. Improving

macro indicators and sentiment driven pick-up in reform momentum have resulted in renewed portfolio investment interest in the economy. The consistent portfolio inflows coupled with prudent management by the Central Bank has resulted in a relatively stable exchange rate environment. The improving macro factors have resulted in improvement in the overall growth with GDP growth in 2014-15 estimated at 7.4% against 6.9% in 2013-14.

While the headline indicators point towards steady improvement, the recovery on the ground has been rather slow. Lower inflation has not resulted in significant improvement in demand conditions. The demand conditions have been quite challenging across sectors as borne out by the slow improvement in industrial production. Some of the other key underlying drivers like credit growth and fixed capital formation also highlight a very sluggish environment. Similarly,

Brand 'asianpaints' stands for inspiring décor and partnering with consumers in creating their beautiful homes

numbers related to the housing and real estate sector do not indicate a very positive trend either.

DECORATIVE INDIA BUSINESS

Environment

The overall weak demand environment in the economy was also reflected in the decorative paints demand in the domestic market. Demand conditions have been challenging across most of the markets – more severely so in states of Punjab, Delhi, Tamil Nadu and Kerala. A short Diwali festival season, unseasonal rains and prolonged winter in Northern India have also added to the woes of the paint industry. The Institutional sales business (referred to as the Project Sales business in your Company) also faced a slowdown of demand. Notwithstanding the trying circumstances, your Company did well to manage and grow its business in most parts of the country. And while this growth was lower than expected, profitability improved on account of reduction in key raw material prices, specifically in the second half of the year, on the back of significant drop in crude

prices. Your Company has undertaken a price reduction in the last quarter of 2014-15 to pass on this benefit to the consumers.

Emulsions

At a product category level, the growth in interior emulsions continues to be led by 'Tractor Emulsion' with advertising and field initiatives focused on the proposition of 'smart choice'. The growth in top end 'Royale Emulsion' has been on a lower side. However, the top end variant 'Royale Aspira', which had a nationwide launch in the previous year, has done well across markets.

In the exterior emulsion category, the top end brand 'Ultima' continues to grow well. 'Ultima Protek', that offers best in class benefits, has grown rapidly across retail and projects segments. The economy segment in exterior emulsions has witnessed slowdown in growth. With sustained efforts in educating the customers and painters on the use of correct painting system, the growth of exterior undercoats has been good.

Wood Finishes

In the wood finishes category, the high end finishes like Polyester and Polyurethane (PU) launched in collaboration with Renner Italia of Italy have performed well across markets. 'Aquadur', water-based PU, has been well accepted in the market. The Company has extended the concept of 'inspiration décor' even in the wood finishes category by launching full range of clear and opaque colours across different products and exclusive special effects in wood and glass coatings.

Wall Coverings

Brand 'asianpaints' stands for inspiring décor and partnering with consumers in creating their beautiful homes. Manufacturing

Your Company has been continuously investing in expanding its manufacturing footprint to serve customer demand.

In its second year of operations, the Khandala plant in Maharashtra significantly ramped up production. This

significant ramp up and maximization of output from Rohtak plant in Haryana has allowed your Company to meet the shortfall in production from the Sriperumbudur plant in Tamil Nadu, which continues to struggle with a challenged industrial relations scenario.

As reported in the last Annual Report, your Company undertook a comprehensive review of its manufacturing capacities and has initiated a project to double the capacity at Rohtak plant in Haryana from the existing 2,00,000 KL per annum to 4,00,000 KL per annum. The work for this expansion project is expected to be completed by March 2016.

The comprehensive modernization program currently underway at your Company's older manufacturing facilities at Ankleshwar in Gujarat and Kasna in Uttar Pradesh will improve the ergonomics and level of automation in these plants leading to greater reliability, scalability and efficiency.

Your Company discontinued manufacturing activities at its Bhandup plant, Mumbai on

5th May, 2014. A “Voluntary Retirement/ Separation Scheme” along with an alternate option of relocation to other factories/establishments of the Company was offered to all the workmen at the plant. All workmen had accepted either the Voluntary Retirement/Separation Scheme or relocation to another factory/ establishment of the Company.

In order to meet the demand in the Southern and Eastern parts of the country, your Company is looking to set up paint manufacturing facilities in the states of Karnataka and Andhra Pradesh. Your Company signed a Memorandum of Understanding with the Government of Andhra Pradesh for setting up a manufacturing facility for manufacture of paints and intermediates in Visakhapatnam district. An amount of approximately ₹ 1,750 crores would be invested by the Company in phases over a period of twelve years. Your Company is in the process of acquiring land for this manufacturing facility, subject to due diligence and obtaining necessary regulatory approval. The maximum capacity of the proposed manufacturing facility at Visakhapatnam, Andhra Pradesh would be 4,00,000 KL per annum.

Distribution and Sourcing

Your Company continues to make investments in physical infrastructure, processes and information technology tools to maintain its service leadership.

In order to remain at the cutting edge, your Company has made significant progress on increasing the diversity of its sourcing initiatives which has led to the discovery of newer raw materials as well as newer suppliers. This has led to an improvement in sourcing efficiencies resulting in lower cost and better supplies.

INTERNATIONAL OPERATIONS

The overall business conditions for your Company's International operations were challenging with many key markets feeling the impact of subdued growth. The political turmoil in Egypt, your Company's largest overseas subsidiary, stabilized during the year after three years of instability. However, the depreciation of the Egyptian Pound in excess of 8% and shortage of dollars affected operations. The decline in crude prices in the second half of the year impacted economic growth in units in Oman, Bahrain and Trinidad. The Bangladesh unit witnessed political unrest beginning January 2015 after being fairly stable for the first three quarters of the year. After enjoying a fairly stable political environment and economy for most part of the year, the Nepal unit witnessed disturbances arising out of a political deadlock in promulgation of the new constitution starting January 2015. The devastation brought out by the recent earthquake in Nepal would have an impact on your Company's operations in Nepal and would require sustained efforts to pull through. The business sentiments in the Caribbean region were subdued due to the impact of widespread chikungunya disease and also on account of drought in Jamaica.

Steps taken for setting up paint manufacturing facility and operations as part of greenfield foray into Indonesia

Your Company expanded its international footprint by acquiring a 51% controlling stake in Kadisco Paint & Adhesive Industry Share Company (Kadisco), Ethiopia through its wholly owned subsidiary Berger International Limited, Singapore in the month of February 2015. Kadisco is one of the leading paint companies in Ethiopia, engaged in manufacturing and selling of decorative paints, industrial paints, automotive paints, other coatings and adhesives in Ethiopia.

During 2014-15, your Company took steps for setting up paint manufacturing facility and operations as part of a greenfield foray into Indonesia. Your Company has received approval for setting up the said manufacturing facility with a capacity of 24,550 MT per annum. PT Asian Paints Indonesia was incorporated as a wholly owned subsidiary of Berger International Ltd., Singapore for the said purpose. Land for the manufacturing facility is identified and the process of acquisition of land is in progress.

During the year, Berger International Limited, Singapore became a wholly owned subsidiary of Asian Paints (International) Limited, Mauritius effective 31st July 2014 on completion of the selective capital reduction.

Your Company has worked to strengthen its position in the international subsidiaries by focusing on key business enablers such as increasing the reach in both the general trade network and Colour World activations, plugging product portfolio gaps, improving service levels to the network, driving expansion in the existing export territories and ensuring that the Company continues to drive the culture of customer centricity through various initiatives.

The new brand ambassador for Asian Paints in Sri Lanka has helped create a positive impact in the market. Water proofing and Wood finish range of products were launched in Nepal. Intumescent coating under the brand 'APCOCHAR' was successfully launched in the Gulf region.

Manufacturing

During the year, expansion of manufacturing capacity in Bangladesh to 24,000 KL was completed. In Oman, project of setting up of new manufacturing facility with annual capacity of 21,000 KL in Sohar is in the advanced stage of completion and product trials are being taken. It is expected to be commissioned fully by May 2015.

All units continued to focus on reducing the environmental impact of their operations through various initiatives to minimise waste generation and energy usage by emphasizing on 3R's (Reduce, Reuse and Recycle) strategy.

Against the backdrop of difficult market conditions, the international operations have delivered a good performance

HOME IMPROVEMENT BUSINESS

Your Company's vision is to move from being only a paints company to being a provider of complete décor solutions to help customers create their dream homes.

Your Company embarked on this journey in 2013-14 with the acquisition of 51% stake in the Sleek group which caters to the organized modern kitchen space. Your Company is taking several initiatives to streamline the acquired businesses, bring in operational efficiencies and improve the scale of business.

The vision moved a step further, with a foray in the Bath space with the acquisition of the front end sales business of Ess Ess Bathroom Products Private Limited, a quality player in the bath fittings segment, in June 2014, along with its brands, network and sales infrastructure.

Kitchen Business

At Sleek, the two models of business, providing full kitchen solutions to consumers and providing storage accessories and components to carpenters/contractors for setting up consumer kitchens, are being taken forward.

Your Company has added a new range of hardware to complete the product portfolio and has expanded the dealer network for full kitchens and for storage components, accessories and hardware in several states. This expansion of network has tried to leverage the existing dealer network for paints with several paint dealers opening stores for kitchens and components. While this

A Sleek stand at Index Exhibition 2014 in Mumbai

mode of expansion has been slower than expected, each step has been a learning for your Company in getting a better understanding of the market dynamics in this business.

Sleek also runs twenty six (26) of its own modular kitchen stores across Mumbai and other metros. During the year, it focused on improving the operational efficiencies at these stores. Few unprofitable stores were closed down and new stores opened. In the year gone by, this segment of the business was adversely impacted by the weak consumer sentiments and lower discretionary spends.

At the same time, Sleek's Projects division registered a healthy sales growth during the year with supplies to some renowned builders in and around the Mumbai region. Your Company sees projects as an important and exciting segment in the coming years with many builders across the country keen to provide improved amenities to their customers, including modular kitchens, in which Sleek enjoys a good brand presence.

Sleek also optimized the capacity available at its subsidiary company, Kitchen Grace (India) Private Limited (KGIPL), for shutters and carcasses to ensure availability and faster turnarounds. During the year, Sleek acquired the balance 13.99% stake in KGIPL from the minority shareholder, thus making KGIPL a 100% subsidiary of Sleek from January 2015. Sleek continues to modernize its wire accessories manufacturing unit at Vasai near Mumbai.

Bath Business

The bath business was acquired in June 2014. The primary thrust in that business in 2014-15 has been to integrate the team and operations into your Company.

The manufacturing operations, which continue to be operated by the erstwhile owner of the business as a toll manufacturer for your Company's bath business, have been streamlined to deliver faster turnaround and greater reliability. With the infusion of working capital into the business, the availability of raw materials and manpower has been improved leading to better service for existing customers.

Branding in Home Improvement

The kitchen and bath businesses have been co-branded with Asian Paints, with the visual representation as below:

The “Sleek by Asian Paints” and “Ess Ess by Asian Paints” approach has been received very positively by the existing network and consumers, as this brings the expertise of the individual businesses together with the credibility and trust of the “asianpaints” brand.

INDUSTRIAL BUSINESS

Automotive Coatings: PPG Asian Paints Private Limited (PPG-AP)

PPG-AP, the first 50:50 Joint Venture of your Company with PPG Industries Inc., USA for manufacturing Automotive, OEM, Refinish, Marine, Packaging and certain Industrial Coatings is the second largest automotive coatings supplier in the country and one of the largest auto-refinish coatings company.

All the vehicle segments showed positive growth as compared to the previous year. The Passenger and the Commercial vehicle segment grew by 4.3% and 21.2% respectively while the two-wheeler segment grew by 9.6%. This in turn had a positive impact on the automotive coatings market and led to top line growth for PPG-AP. The profitability of the business also improved on the back of benign raw material prices and stable Rupee.

Non-Auto Industrial Coatings: Asian Paints PPG Private Limited (AP-PPG)

The industrial production which had slowed down since 2011-12, reversed the trend in 2014-15, though marginally. This slight improvement led by growth in infrastructure investment, capital goods and new projects, led to good double digit growth in sales for AP-PPG, the second 50:50 Joint Venture of your Company with PPG Industries Inc., USA. Its Protective Coatings business grew at a faster clip than the Powder Coatings business. Both the businesses were successful in securing good market presence in their respective segments. AP-PPG also did well to protect its margins and grow despite supply constraints, especially in the second half of the financial year. The positive trend in the second half of the financial year helped the business to reduce the negative impact faced in the first half from provisions for receivables and obsolete inventory.

Cost reduction, better working capital management, effective technical service and technology support remained the major focus areas during the year.

The “Sleek by Asian Paints” and “Ess Ess by Asian Paints” approach has been received very positively by the existing network and consumers

Capability building in specific segments in both the Protective Coatings and Powder Coatings businesses as well as focus on conventional range of products were key strategies for topline growth.

OTHERS

The profits from your Company's manufacturing operations for intermediates - Phthalic Anhydride and Pentaerythritol, were in line with expectations. These operations were set up as backward integration initiatives, primarily to cater to the in-house demand for these materials. During the financial year 2014-15, 69% of Phthalic Anhydride and 51% of Pentaerythritol produced was transferred for internal consumption.

During the year, the capacity at the Pentaerythritol facility at Cuddalore, Tamil Nadu was increased by 22% to 6720 MT per annum. Energy efficiency improvement programs implemented at the Phthalic Anhydride facility earned the plant recognition from the Indian Chemical Council (1st prize), Bureau of Energy Efficiency, Ministry of Power, New Delhi (Certificate of Merit) and Gujarat

Cleaner Production Center (1st prize) during the year.

The Chemicals business has been under pressure during the year gone by, faced with tough demand conditions and lower realizations in the Phthalic Anhydride business. Your Company is keeping a close watch on the business environment impacting both these businesses.

HUMAN RESOURCES

One of the principal anchors of your Company's ability to cope with challenging business environment is its strong culture of customer centricity, innovation and people focus. Your Company has embarked on several initiatives to strengthen its Employee Relations. Your Company has a long-standing practice of developing talent from within by providing on-the-job-learning opportunities and career development platforms to all including front line employees of the organization. Your Company's commitment to the development of employees is best reflected in how individual development conversations and the People Review Programs are being institutionalized

in the organization. There is a constant endeavour to identify individual capability development needs and provide structured support and intervention to hone these capabilities.

All the manufacturing locations are working on an ambitious Employee Relations agenda through various initiatives like "Continuous Education Scheme", providing vertical growth plans from operator to staff level and create an environment of inclusive participation by involving operators in decision-making process through Quality Circles and Total Preventive Maintenance programs.

Throughout the year, your Company has worked on integrating employees of the businesses acquired during the year, namely Ess Ess in India and Kadisco in Ethiopia.

To strengthen employee experience, your Company has launched an Employee Help Desk named 'SAMPARK'. Your Company has started a Diversity focused initiative called 'SWARA', to promote inclusivity and enable employees from different backgrounds, cultures and life

stages to perform to the best of their potential.

ENVIRONMENT, HEALTH & SAFETY

Environment, Health and Safety (EHS) is one of the primary focus areas for your Company. Your Company's EHS policy is to consider compliance to statutory EHS requirements as the minimum performance standard and is committed to go beyond and adopt stricter standards wherever appropriate.

Your Company's paint manufacturing facilities and the two intermediates manufacturing facilities have the ISO 14001 environmental certification. In the 2014-15, the six decorative paint factories have undertaken extremely challenging initiatives in the following areas of environmental sustainability –

- a. reducing non-process water consumption
- b. improving water-neutrality
- c. reducing trade-effluent generation
- d. reducing hazardous waste generation
- e. reducing electricity consumption
- f. improving the contribution of renewable energy

Your Company has made substantial investments in the past year to generate more Renewable Energy in our manufacturing facilities. A Rooftop Solar Power plant was commissioned at the Sriperumbudur factory in the middle of 2014-15 and a substantial portion of energy consumption is now generated from this source. Similar rooftop solar power plants are being commissioned at Rohtak, Khandala & Kasna plants and will be operational in 2015-16.

Another company-wide initiative that was worked upon was about reducing the usage of virgin-paper consumption

as also its wastage whilst improving the recycling of waste paper. The factories and corporate office have run awareness campaigns to sensitize and educate employees on judicious use of paper and to avoid its wastage.

Your Company also gives priority and attention to the health and safety of its employees and trains all the employees to work as per prescribed procedures designed to meet all EHS requirements of the Company. Your Company is implementing a pilot project on Behaviour Based Safety program at one of the factories. Put together, the three facets of – a sensitized safety culture, high quality safety infrastructure and strong management practices – will help us produce consistent results in safety performance.

INFORMATION TECHNOLOGY

Digital technology is a major disruptor for businesses everywhere and has the potential to alter the way businesses are being run. Your Company continues to leverage right digital technology to help create and refine business models including our services and home improvement businesses.

In 2014-15, investments were made in Next Generation CRM systems and Customer Experience Management platforms which will help to analyze customer interaction patterns across both physical and digital touchpoints in real time to offer personalized campaigns and offers to the right customer segments on our website, contact centre and physical touchpoints (Colour Ideas stores, Signature Colour stores).

With large investments in assets at our manufacturing facilities, your Company has embarked on a multi-year asset care program to invest in a state-of-the-art enterprise asset management platform

that will simplify, automate and improve processes around managing health of the equipment. This will provide early visibility into possible breakdowns thereby preventing unplanned downtimes in the factory. A comprehensive disaster recovery plan for the IT systems has also been made operational.

Your Company is revamping its investments in information technology tools and processes to better manage the demand of an expanding product portfolio. The Supply Chain Visibility solution has won the Global Innovation Award in Business Process Simplification category.

For a vibrant company, it is essential to have good processes in Human Resources (HR). Your Company has changed its information technology tools and implemented a state-of-the-art

A Diversity focused initiative called 'SWARA', has been launched to promote inclusivity and enable employees from different backgrounds, cultures and life stages to perform to the best of their potential

cloud-based HR platform to cover all aspects about people management like employee life cycle, career development and succession planning, learning management, performance management and employee collaboration across your Company in India and abroad.

Information Technology has been a key ingredient in helping your Company not only integrate but in supporting the newly acquired Home Improvement businesses.

RESEARCH AND DEVELOPMENT

Your Company has laid special emphasis on R&D and initiated various programs to accelerate innovation in order to build a robust new product pipeline for sustained growth and profitability. Accordingly, the entire project portfolio of R&D has been restructured around four technology horizons to ensure that appropriate focus and priorities are allocated to defend and extend existing business as well as create new business for future growth.

Your Company has formed a seven member "Technology Council" comprising of the MD & CEO, President-Technology, Vice President-Technology and four external members, two each from India and USA. Three external members are eminent scientists and Professors of high repute from academia/university and the fourth member is an industry professional and a management consultant. The Technology Council acts as a 'think tank' for your Company in matters related to technology and will help the company management to refine its technology plans, help identifying new business opportunities based on disruptive technologies, provide guidance in formulating strategies for innovation and intellectual property management, establishing

connections with academia and external partners for collaborative projects, talent scouting and many others.

The outcome of all these initiatives have resulted in accelerated new product delivery. During 2014-15, your Company has launched sixteen (16) new products in the decorative segments and seven (7) in the industrial segment. A complete range of products to offer full solution to tile segment has been introduced. The entire 'Royale Play' segment has been made green as per the requirements of the Green Seal Standard GS-11. In the industrial product portfolio, your Company has successfully launched cellulosic intumescent coatings in the UAE and Bahrain market.

Recently, the prestigious high end premium interior product 'Royale Aspira' has been approved for GS-11 certification by US Green Building Council (USGBC) after an extensive audit of formulation and manufacturing processes at plant carried by a team of auditors from USGBC.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

Your Company has adequate systems and processes of internal controls which are commensurate with its size and nature of operations. They have been designed to provide reasonable

assurance with regard to recording and providing reliable financial information, complying with applicable statutes, safeguarding of assets, authorization of transactions and adherence to the Company's policies and practices.

The internal controls and governance process are duly reviewed for their adequacy and effectiveness through periodic audits by independent internal audit function. The internal audits are carried out as per risk-based internal audit plan, which is reviewed and approved by the Audit Committee. Your Company's Audit Committee periodically reviews the findings and suggestions for improvement and is periodically apprised on the implementation status in respect of the actionable items.

Effective steps are taken by the Management to enable continuous monitoring of lead control indicators and action taken towards correcting identified gaps. Respective functions have been trained and equipped to enable continuous monitoring of exceptions by themselves to reduce surprises and enable corrective action on timely and regular basis.

Your Company has initiated steps to benchmark its control systems against the principles and components prescribed in "COSO's Internal Control – Integrated Framework" issued by The Committee of Sponsoring Organization (COSO) of the Treadway Commission. Your Company is taking steps to ensure that all the components of internal control as mentioned in the framework are present and operating effectively.

OUTLOOK AND RISKS

The recent trend in macro indicators clearly point towards improving

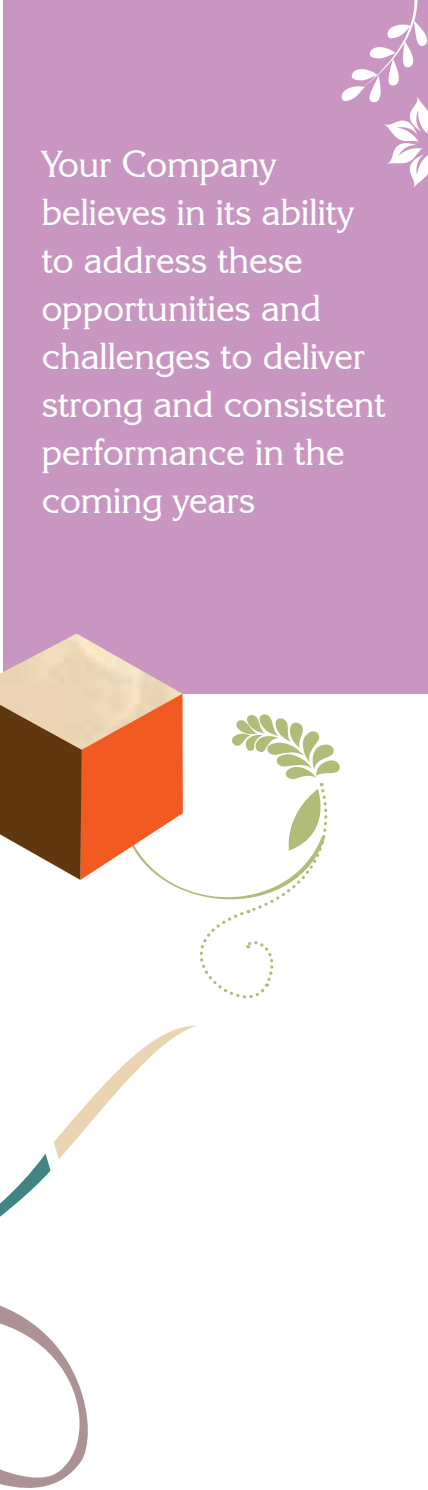

fundamentals of the domestic economy. The Central Government has also shown its intent in furthering the reform momentum to revive investments and improve governance. The global commodity cycle is expected to be benign with consumption demand from the Chinese economy slowing down. Taking cues from the inflationary trend, the Reserve Bank of India has already eased the monetary cycle and is expected to bring out more interest rate cuts going forward. All this favorable factors coupled with some of the important developmental reforms that are being pursued by the Central Government like the tax, reform and push for infrastructure spending will set the stage for further pick-up in economic activity in 2015-16. This should augur well for your Company's business across decorative paints, industrial coatings and home improvement. The extended Diwali festival season and expected benign raw material prices should also support growth. A cause of concern is the forecast for below average monsoon released by the Indian Meteorological Department (IMD) which could impact the inflation expectations and hurt the economic recovery. This could have a potential adverse impact on the demand conditions for your Company's products. Another potential risk factor to the optimistic outlook could be any significant flare-up in crude prices which have bounced back strongly over the last month. Recent weeks have also highlighted the interlinkage of the global financial markets with data releases from US and Europe leading to increased volatility in the domestic exchange rate. Such volatile environment could have an adverse impact on the optimistic outlook.

On the International front, the Eurozone continues to face challenges, specifically on the debt front in Greece. There are also increasing expectations

During 2014-15, your Company has launched sixteen (16) new products in the decorative segments and seven (7) in the industrial segment

that the US Fed would start raising rates during the course of the year. Both these factors can dictate capital flow across markets, including India and could have significant impact on the global currency markets. China, the largest global growth engine, is also slowing down and this could

Your Company believes in its ability to address these opportunities and challenges to deliver strong and consistent performance in the coming years

put further pressure on the global commodities. Some of the markets, where your Company operates, are under economic slowdown and growth is not expected to pick up in a marked manner across your Company's international operations in the near future. A lot would also depend on the political environment in some of the key markets like Egypt, Nepal and Bangladesh.

The foray in the home improvement business is in its initial stages and your Company is constantly learning and navigating its path as it takes steps to scale up the business. And like any new course, it will have its share of hits and misses. Your Company would continue to leverage on its distribution strengths to make this business a meaningful contributor over the coming years.

Over the long term, India continues to offer lot of opportunities that would continue to fuel the growth in the domestic paint industry for both, decoratives as well as industrial products. The current lower per capita consumption of paints in the

country coupled with rising aspirations of the large, younger generation offer tremendous growth opportunities for the decoratives products. These rising aspirations of the well-informed younger generation would also spur the Home Improvement category. At the same time, with continued focus on infrastructure development and with the Government's push for the "Make-in-India" play, even the industrial products could see a sustained growth phase in future. A large and growing market like India is bound to draw competition interest and your Company believes in its ability to address these opportunities and challenges to deliver strong and consistent performance in the coming years.

E. Explanation on the relationship between average increase in remuneration and Company Performance:

The increase in average remuneration of all employees in the financial year 2014-15 as compared to the financial year 2013-14 was 14%.

The key indices of Company's performance are:

	2014-15	2013-14	Growth (%)
Net Revenue from operations	11,649	10,419	12
Profit Before Tax and Exceptional Items	1,947	1,713	14
Profit After Tax	1,327	1,169	14

Your Company is committed in ensuring fair pay and a healthy work environment for all its employees. Your Company offers competitive compensation to its employees. The pay also incorporates external factors like cost of living to maintain concurrence with the environment. Your Company maintains a simple compensation structure which allows the employees to have flexibility in the way in which they realize their salaries. Internal equity is ensured by appropriate fitment at the time of the employee joining a particular cadre and grade. The fixed pay for an employee depends on his/her performance against the objectives set for the year. The variable pay is paid out to the employee on the basis of the performance of your Company and the corresponding business unit or function. Regular communication on methods adopted by your Company is made and published throughout the year to ensure transparency and a better understanding of the applicable compensation policy and practices.

Thus, there will be a positive correlation in the increase in remuneration of employees and your Company's performance, however, a perfect correlation will not be visible given the dependency on the other factors stated above.

F. Comparison of the remuneration of the Key Managerial Personnel against the performance of your Company:

The remuneration of Key Managerial Personnel increased by around 17% in 2014-15, compared to 2013-14, whereas the Profit Before Tax and exceptional items increased by 14% in 2014-15, compared to 2013-14.

Market Capitalisation (₹ Cr)	77,820	52,559	48

Comparison of share price at the time of first public offer and market price of the share of 31st March, 2015:

Market Price as on 31 st March, 2015	₹ 811.30
Price at the time of initial public offer in 1983 (converted to price of each share for face value of ₹ 1 each)	₹ 2.30
% increase of Market price over the price at the time of initial public offer	35174

Note:

CONSERVATION OF ENERGY, TECHNOLOGY ABSORPTION AND FOREIGN EXCHANGE EARNINGS AND OUTGO

Section 134 of the Companies Act, 2013 read with Companies (Accounts) Rules, 2014

A) The steps taken or impact on conservation of energy:

All the manufacturing facilities continued their efforts to reduce the specific energy consumption. Specific and total energy consumption is tracked on daily basis at individual factory/block level and also at consolidated manufacturing level. Energy audits are conducted at all the manufacturing units at regular intervals and findings of the audit are implemented. Apart from regular practices and measures for energy conservation, many new initiatives were driven across the units. The measures taken at all your Company's manufacturing units are briefly enumerated as below:

1. Process optimization and automation:

Efforts have been put consistently year on year to optimise the use of energy consumption in production processes and operation of utilities. A few notable measures taken last year include:

- Reduction of agitator cowl disc speed during powder addition and grinding in the twin shaft dispersers and also optimization of mixing time in the twin shaft dispersers.
- Modifications in powder conveying sequence based on the properties of powders resulted in savings.
- Use of cooling water during certain periods instead of chilling water in the water based paint twin shaft disperser.
- Timer based operations of forced draft ventilation systems.
- Timer based interlock provision for the agitator of mixer vessels.
- Air booster installation for packing machines to avoid running of air compressors consistently at high pressures.
- Temperature based control for cooling tower fan and pumps.
- Reduction of compressed air leakages resulting in reduction in running hours of air compressors by using ultrasonic detection of compressed air leakages.

2. Optimisation of Electrical Equipment:

The modifications/additions to some of the electrical equipment being done are:

- Timer based operations for air conditioner units across the manufacturing units.
- Variable Frequency Drive (VFD's) based operations for cooling and chilling pumps in case of variable loads based on pressure feedback.
- Energy efficient pumps for utilities and replacement of capacitor panels.
- Optimisation of distribution transformer operation during Sundays, public holidays and plant shutdown periods.
- VFD provided for Effluent Treatment Plant (ETP) blowers.

3. Lighting :

All the manufacturing units continue to put in efforts to reduce the lighting power consumption. Some key initiatives taken in this area include:

- Lighting load optimization by rewiring of lighting circuits.
- Provision of timer for lighting load reduction in offices and canteen.
- Installation of astronomical timers for street lights.
- Replacement of conventional vessel view lamps with LED lamps.
- Stage wise replacement of conventional light fittings to LED light fittings is under progress across the manufacturing units.
- Solar based day light system is under trial at Rohtak plant. This has resulted in reduction of lighting load during day time.

4. Other key initiatives for Energy conservation:

With the view of reduction of specific energy consumption across the manufacturing units, following initiatives were driven by the plant teams.

- Monitoring and analysis of energy consumption on daily basis with respect to energy model.
- Share and implement best practices across all plants.
- Make guidelines for purchase of energy efficient equipment like chiller, air compressor, motors, Air conditioner, Cooling tower, pumps, transformers etc.
- Sharing of latest updates in field of Energy Conservation.

The metric "specific power consumption" tracked as a measure of performance of Energy Management for the whole manufacturing setup has decreased over the past year. This was possible by the improvements and above steps taken by the manufacturing units in the field of energy conservation. With lot of efforts and initiatives planned in the coming year, the specific power consumption for whole manufacturing setup is expected to come down further.

B) The steps taken by the company for utilizing alternate sources of energy:

Solar energy:

Rooftop solar photovoltaic (PV) project of 800 KWp capacity was installed and commissioned in Sriperumbudur plant in October 2014.

The solar plant has the capacity to generate approx. 11 lac units annually. It has generated 359564 units in the year 2014-15.

Following are the major rooftop solar projects planned for utilizing solar energy across the plants which will be commissioned in the first quarter of FY 2015-16:

- 2 MWp- At Khandala plant
- 1.25 MWp- At Rohtak plant
- 0.4 MWp- At Kasna Plant

With the commissioning of the above solar projects, total installed solar energy capacity will be 4.45 MWp and contribute to around 6-7% of electricity consumption across all decorative paint plants.

Evaluation of other sources of energy such as wind energy is also in progress.

All the manufacturing units will continue to put in effort to reduce specific energy consumption. Some major initiatives include:

- Replacement of conventional light fittings with LED fittings across the manufacturing units.
- VFD for pumps and blowers in utilities.
- Replacement of reciprocating air compressor with VFD based screw compressor.
- Procurement of energy efficient Twin shaft disperser for Rohtak Plant expansion project.
- Energy efficient transformers with minimum losses for distribution of power.
- Replacement of old motors with energy efficient IE3 and IE2 motors.
- Paint manufacturing process improvements to reduce energy consumption.
- Trials in progress on alternative dispersion technology for paint processing.
- Induction of static mixers & cowl disc instead of stator/rotor setup in the manufacturing process.

C) The capital investment on energy conservation equipment:

The Company has spent ₹ 10.24 crores as capital investment on energy conservation equipment during the financial year 2014-15.

- Asian Paints has a high level of sensitivity towards the environment. As a minimum, your Company adheres to all statutory environmental requirements and regularly strives for further improvement. This ethos is enshrined in your Company's EHS Policy which is also displayed and implemented at the manufacturing locations.
- The EHS Policy (signed by the MD & CEO) is available on the Company's website and can be accessed at <https://www.asianpaints.com/pro/EHSPolicy.aspx>
- Our EHS Policy covers all employees including contract labour and service providers. The emissions/waste generated by your Company is within the permissible limits given by Central or State Pollution Control Bodies (CPCB/SPCB) for the financial year being reported. There are no show cause/legal notices from CPCB/SPCB which are pending as at the end of financial year.
- The paint manufacturing facilities have established ISO systems (ISO 9001 and ISO 14001). As part of the ISO 14001 Environment Management system, every factory monitors the state of the environment inside the factory.
- Further, every manufacturing facility conducts Aspect Impact study of various activities and identifies controllable/uncontrollable and normal/abnormal/emergency scenarios of the operations. Any deviations from laid down policies and procedures are tracked and reviewed by effective procedures of Corrective Action and Preventive Action (CAPA).
- Your Company has setup systems and processes whereby Environment Management Review meetings are conducted every six months which are chaired by the Vice President-Supply Chain and attended by General Works Managers

of all the manufacturing facilities. The discussions in the meetings are centered on the topics of natural resource conservation, effluent reduction, water conservation, air emissions, waste generation and disposal. The representatives of each manufacturing facility present the status of the environmental targets and management plans for their respective facilities.

- Over the last two decades, your Company's efforts on conservation of water, energy and water resources has yielded positive results. At the six decorative paint manufacturing facilities of your Company, an environmental strategy has been adopted covering other key elements. As part of Project 'NEW', eight theme areas have been identified for action over next 3-10 years which include water neutrality, reduction in specific non-process water consumption, reduction in specific industrial effluent generation, reduction in electricity consumption, increase in energy from renewable sources, reduction in specific hazardous waste generation, reduction in paper usage etc.
- Your company is focused on operationalizing all aspects mentioned in the EHS Policy. Multiple cross-departmental and cross-factory teams have worked on different initiatives in this regards. A brief on some of those aspects is given below:
 - The team working in the area of reduction in 'water consumed for non-paint production' is evaluating different strategies by engaging with technology-providers and tweaking some of the process-parameters. Also interacting with local bodies to implement rain water harvesting & recharging structures, has enabled your Company to move on the road of becoming Water Neutral over the next few years.
 - Similar teams have worked on reducing the quantum of trade effluent generation achieving significant success. The manufacturing facilities have proactively worked towards installation of Reverse-Osmosis-Plants along with Multi-Effect-Evaporator-Plants to enable capability to recycle the entire treated-industrial-effluent for paint-production.
 - In line with your Company's commitment to progressively explore and adopt new technologies, the waste-management teams have engaged with different technology-providers. Your Company has implemented environment-friendly options for hazardous waste disposal; started sending hazardous waste from two of its paint manufacturing facilities to nearby cement kilns, for co-processing. Co-processing uses hazardous waste as AFR (Alternate

Fuel and Refuse) material; which for the Company, would lead to better energy savings and lower hazardous waste generation on account of reduced ash from incineration.

- Reduction in emission of VOC in the manufacturing blocks in factories is a new area of work that your Company has taken up. This is with a view to further reduce exposure of employees to VOCs and also its effects on the environment.
- Your Company is exploring various alternatives to improve the contribution of renewable energy in our total energy consumption. A roof-top solar power plant has been commissioned at the Sripurumbudur factory during the financial year 2014-15. Furthermore, the Company has also initiated installation of solar power plants at the Khandala, Rohtak and Kasna manufacturing facilities respectively. Commissioning of these projects is expected to be completed during the first half of the financial year 2015-16.
- Details of the measures taken to conserve energy forms part of Board's Report in the Annual Report.
- Your Company has continuously invested in Research & Technology and has a dedicated team of scientists at the R&T Centre at Turbhe near Mumbai. In keeping with the trends world over, environment sustainability, renewability and freedom from toxicity are considered as the central tenets of the new formulation design philosophy for decorative products. It supports your Company's strategy around technology development, development of substantially new products, productivity improvement and cost reduction. In order to protect environmental emission during application, most of the protective coating products have been made high solid or solvent free.

Company Background

Asian Paints Limited (the 'Company') is a public limited company incorporated under the Indian Companies Act, 1913. The Company is engaged in the business of manufacturing, selling and distribution of paints, coatings, products related to home décor, bath fittings and providing related services.

NOTE 1 : SIGNIFICANT ACCOUNTING POLICIES

1.1. Basis of preparation of financial statements

(a) Basis of Accounting:

The financial statements have been prepared and presented under the historical cost convention, on the accrual basis of accounting in accordance with the accounting principles generally accepted in India ('Indian GAAP') and comply with the Accounting standards prescribed in the Companies (Accounting Standards) Rules, 2006 which continue to apply under Section 133 of the Companies Act, 2013, ('the Act') read with Rule 7 of the Companies (Accounts) Rules, 2014 and other relevant provisions of the Companies Act, 1956, to the extent applicable.

(b) Use of Estimates:

The preparation of financial statements in conformity with Indian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent liabilities on the date of financial statements and reported amounts of income and expenses during the period.

(c) Current/Non Current Classification:

Any asset or liability is classified as current if it satisfies any of the following conditions:

- i. it is expected to be realized or settled or is intended for sale or consumption in the Company's normal operating cycle;
- ii. it is expected to be realized or settled within twelve months from the reporting date;
- iii. in the case of an asset,
 - it is held primarily for the purpose of being traded; or
 - it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date;

- iv. in the case of a liability, the Company does not have an unconditional right to defer settlement of the liability for at least twelve months from the reporting date.

All other assets and liabilities are classified as non-current.

For the purpose of current/non-current classification of assets and liabilities, the Company has ascertained its normal operating cycle as twelve months. This is based on the nature of services and the time between the acquisition of assets or inventories for processing and their realization in cash and cash equivalents.

1.2. Tangible and Intangible Assets

(a) Tangible Fixed Assets

Tangible fixed assets are carried at the cost of acquisition or construction, less accumulated depreciation/accumulated impairment. The cost of fixed assets comprises of its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use. Expenses directly attributable to new manufacturing facility during its construction period are capitalized. Know-how related to plans, designs and drawings of buildings or plant and machinery is capitalized under relevant tangible asset heads. Profit or Loss on disposal of tangible assets is recognised in the Statement of Profit and Loss.

Tangible Fixed assets held for disposal are stated at the lower of their net book value and net realisable value and are disclosed separately under 'Other Current Assets'. Any expected loss is recognized immediately in the Statement of Profit and Loss.

(b) Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Intangible assets arising on acquisition of business are measured at fair value as at date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment loss, if any. Profit or Loss on disposal of intangible assets is recognised in the Statement of Profit and Loss.

(c) Capital Work in Progress & Capital Advances

Cost of Assets not ready for intended use, as on the balance sheet date, is shown as capital work in progress. Advances given towards acquisition of fixed assets outstanding at each balance sheet date are disclosed as Long Term Loans & Advances.

Notes to Financial Statements

(d) Depreciation and Amortisation

Depreciation on tangible fixed assets is provided using the Straight Line Method based on the useful life of the assets as estimated by the management and is charged to the Statement of Profit and Loss as per the requirement of Schedule II of the Companies Act, 2013. The estimate of the useful life of the assets has been assessed based on technical advice which considered the nature of the asset, the usage of the asset, expected physical wear and tear, the operating conditions of the asset, anticipated technological changes, manufacturers warranties and maintenance support, etc.

The estimated useful life of Tangible Fixed Assets is mentioned below:

	Years
Factory Buildings	30
Buildings (other than factory buildings)	60
Plant and Equipment (including continuous process plants)	10-20
Furniture and Fixtures	8
Office Equipment and Vehicles	5
Information Technology Hardware	4
Scientific research equipment	8

Depreciation on tinting systems leased to dealers, is provided under Straight Line Method over the estimated useful life of nine years as per technical evaluation.

Leasehold land and Leasehold improvements are amortized over the primary period of lease.

Intangible Assets are amortised on a Straight Line basis over the estimated useful economic life. Purchase cost, user license fees and consultancy fees for major software are amortized over a period of four years. Acquired Trademark is amortised over a period of five years. Acquired Goodwill is amortised over a period of ten years.

Estimated useful life of each acquired Brand is assessed separately for the purpose of amortisation. Brand acquired pursuant to acquisition of bath fittings business is amortised over a period of two years.

(e) Impairment

At Balance Sheet date, an assessment is done to determine whether there is any indication of impairment in the carrying amount of the Company's assets. If any such indication exists, the asset's

recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount.

An assessment is also done at each Balance Sheet date whether there is any indication that an impairment loss recognised for an asset in prior accounting periods may no longer exist or may have decreased. If any such indication exists, the asset's recoverable amount is estimated. The carrying amount of the fixed asset is increased to the revised estimate of its recoverable amount but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of impairment loss is recognised in the Statement of Profit and Loss for the year.

After recognition of impairment loss or reversal of impairment loss as applicable, the depreciation charge for the fixed asset is adjusted in future periods to allocate the asset's revised carrying amount, less its residual value (if any), on straight line basis over its remaining useful life.

1.3. Revenue Recognition

Revenue from sale of goods is recognised on transfer of all significant risks and rewards of ownership to the buyer. The amount recognised as sale is exclusive of sales tax/VAT and is net of returns and discounts. Sales are stated gross of excise duty as well as net of excise duty (on goods manufactured and outsourced), excise duty being the amount included in the amount of gross turnover. The excise duty related to the difference between the closing stock and opening stock is recognised separately as part of changes in inventories of finished goods, work-in-progress and stock-in-trade.

Revenue from service is recognized as per the completed service contract method.

Processing income is recognized on accrual basis as per the contractual arrangements.

Dividend income is recognised when the right to receive payment is established.

Interest income is recognised on the time proportion basis.

1.4. Lease Accounting

Assets taken on operating lease:

Lease rentals on assets taken on operating lease are recognised as expense in the Statement of Profit and Loss on straight line basis.

Notes to Financial Statements

Assets given on operating lease:

The Company has provided tinting systems to dealers on an operating lease basis. Lease rentals are accounted on accrual basis in accordance with the respective lease agreements.

1.5. Inventory

- (a) Raw materials, work-in-progress, finished goods, packing materials, stores, spares, components, consumables and stock-in-trade are carried at the lower of cost and net realisable value. The comparison of cost and net realisable value is made on an item-by-item basis. Damaged, unserviceable and inert stocks are valued at net realizable value.
- (b) In determining the cost of raw materials, packing materials, stock-in-trade, stores, spares, components and consumables, weighted average cost method is used. Cost of inventory comprises all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition.
- (c) Cost of finished goods and work-in-progress includes the cost of raw materials, packing materials, an appropriate share of fixed and variable production overheads, excise duty as applicable and other costs incurred in bringing the inventories to their present location and condition. Fixed production overheads are allocated on the basis of normal capacity of production facilities.

1.6. Investments

Investments are classified into current and long-term investments. Investments that are readily realizable and intended to be held for not more than a year from the date of acquisition are classified as current investments. All other investments are classified as long-term investments. However, that part of long term investments which are expected to be realized within twelve months from Balance Sheet date is also presented under "Current Investments" under "Current portion of long term investments" in consonance with the current / non-current classification of Schedule III of the Act.

Current investments are stated at the lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investments.

Long-term investments are stated at cost. A provision for diminution in the value of long-term investments is

made only if such a decline is other than temporary in the opinion of the management. Reversal of such provision for diminution is made when there is a rise in the value of long-term investments, or if the reasons for the decline no longer exist.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is recognized in the Statement of Profit and Loss.

1.7. Transactions in Foreign Currency

(a) Initial recognition:

Transactions in foreign currencies entered into by the Company are accounted at the exchange rates prevailing on the date of the transaction. Exchange differences arising on foreign exchange transactions settled during the year are recognized in the Statement of Profit and Loss.

(b) Measurement of foreign currency items at the Balance Sheet date:

Foreign currency monetary items of the Company are restated at the closing exchange rates. Non-monetary items are recorded at the exchange rate prevailing on the date of the transaction. Exchange differences arising out of these translations are recognized in the Statement of Profit and Loss.

(c) Forward exchange contracts:

The Company enters into forward exchange contracts to hedge against its foreign currency exposures relating to the underlying transactions and firm commitments. The Company does not enter into any derivative instruments for trading or speculative purposes.

The premium or discount arising at the inception of forward exchange contract is amortized and recognized as an expense/income over the life of the contract. Exchange differences on such contracts are recognized in the Statement of Profit and Loss in the period in which the exchange rates change. Any Profit or Loss arising on cancellation or renewal of such forward exchange contract is also recognized as income or expense for the period.

1.8. Trade receivables

Trade receivables are stated after writing off debts considered as bad. Adequate provision is made for debts considered doubtful. Discounts due, yet to be quantified at the customer level are included under Other Current Liabilities.

Notes to Financial Statements

1.9. Employee Benefits

A. Short Term Employee Benefits:

All employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits and they are recognized in the period in which the employee renders the related service. The Company recognizes the undiscounted amount of short term employee benefits expected to be paid in exchange for services rendered as a liability (accrued expense) after deducting any amount already paid.

B. Post-employment benefits:

(a) Defined contribution plans

Defined contribution plans are employee state insurance scheme and Government administered pension fund scheme for all applicable employees and superannuation scheme for eligible employees. The Company's contribution to defined contribution plans are recognised in the Statement of Profit and Loss in the financial year to which they relate.

(b) Defined benefit plans

(i) Provident fund scheme

The Company makes specified monthly contributions towards Employee Provident Fund scheme to a separate trust administered by the Company. The minimum interest payable by the trust to the beneficiaries is being notified by the Government every year. The Company has an obligation to make good the shortfall, if any, between the return on investments of the trust and the notified interest rate.

(ii) Gratuity scheme

The Company operates a defined benefit gratuity plan for employees. The Company contributes to a separate entity (a fund), towards meeting the Gratuity obligation.

(iii) Pension scheme

The Company operates a defined benefit pension plan for certain specified employees and is payable upon the employee satisfying certain conditions, as approved by the Board of Directors.

(iv) Post Retirement Medical benefit plan

The Company operates a defined post retirement medical benefit plan for certain specified employees and payable upon the employee satisfying certain conditions.

The cost of providing defined benefits is determined using the Projected Unit Credit method with actuarial valuations being carried out at each Balance Sheet date. Past service cost is recognized immediately to the extent that the benefits are already vested, else is amortised on a straight-line basis over the average period until the amended benefits become vested. Actuarial gains and losses in respect of the defined benefit plans are recognized in the Statement of Profit and Loss in the year in which they arise.

The defined benefit obligations recognized in the Balance Sheet represent the present value of the defined benefit obligations as reduced by the fair value of plan assets, if applicable. Any defined benefit asset (negative defined benefit obligations resulting from this calculation) is recognized representing the present value of available refunds and reductions in future contributions to the plan.

The Company presents the above liabilities as current and non-current in the balance sheet as per actuarial valuation by the independent actuary; however, the entire liability towards gratuity is considered as current as the Company will contribute this amount to the gratuity fund within the next twelve months.

(c) Other long term employee benefits

Entitlements to annual leave and sick leave are recognized when they accrue to employees. Sick leave can only be availed while annual leave can either be availed or encashed subject to a restriction on the maximum number of accumulation of leave. The Company determines the liability for such accumulated leaves using the Projected Accrued Benefit method with actuarial valuations being carried out at each Balance Sheet date.

Notes to Financial Statements

The Company presents this liability as current and non-current in the balance sheet as per actuarial valuation by the independent actuary.

1.10. Research and Development

Research and Development expenditure of a revenue nature is expensed out under the respective heads of account in the year in which it is incurred.

Fixed assets utilized for research and development are capitalized and depreciated in accordance with the policies stated for Tangible Fixed Assets and Intangible Assets.

Tax expense comprises of current tax (i.e. amount of tax for the period determined in accordance with the Income Tax Act, 1961) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date.

Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carry forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each Balance Sheet date to reassess realisation.

1.12. Provisions and Contingencies

The Company creates a provision when there exists a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not require an outflow of resources. When there is a possible obligation or a present obligation in respect of which likelihood of outflow of resources is remote, no provision or disclosure is made.

- Grants in the nature of subsidy which are refundable are shown as Liabilities in the Balance Sheet.

1.18. Measurement of EBITDA

The Company has opted to present earnings before interest (finance cost), tax, depreciation and amortization (EBITDA) as a separate line item on the face of the Statement of Profit and Loss for the year. The Company measures EBITDA on the basis of profit/(loss) from continuing operations.

1.19. Segment Reporting

Annexure I to the Independent Auditors' Report

(Referred to in our report of even date)

As stated in Para 1 of 'Report on Other Legal and Regulatory Requirements' in our Auditors' Report of even date, the following statement is based on the comments in the auditors' reports on the standalone financial statements of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India.

- (i) (a) The Holding Company, its subsidiary companies and jointly controlled companies incorporated in India have maintained proper records showing full particulars including quantitative details and situation of fixed assets.
- (b) The Holding Company, its subsidiary companies and jointly controlled companies incorporated in India have a regular programme of physical verification of its fixed assets by which all fixed assets are verified in a phased manner largely over a period of three years. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India and the nature of its assets. In accordance with this programme, a portion of the fixed assets has been physically verified by the management during the year and no material discrepancies have been noticed on such verification.
- (ii) (a) The inventory, except goods-in-transit, has been physically verified by the respective management of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India during the year. In our opinion, the frequency of such verification is reasonable. In respect of inventory lying with third parties of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India, written confirmations have been obtained wherever applicable. However two of its subsidiary companies do not hold any inventories; therefore paragraph 3(ii) of the order is not applicable to these subsidiary companies.
- (b) The procedures for the physical verification of inventories followed by the management as referred to above are reasonable and adequate in relation to the size of the Holding Company, its subsidiary companies and its jointly controlled companies incorporated in India and the nature of its business.
- (c) The Holding Company, its subsidiary companies and jointly controlled companies incorporated in India are maintaining proper records of inventory. The discrepancies noticed on verification between the physical stocks and the book records were not material.
- (iii) The Holding Company, its subsidiary companies and jointly controlled companies incorporated in India have not granted any loans, secured or unsecured, to companies, firms or other parties covered in the register maintained by these companies under Section 189 of the Act. Accordingly, paragraph 3 (iii) of the order is not applicable.
- (iv) In our opinion and according to the information and explanations obtained by the statutory auditors of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India, and having regard to the explanation, that purchases of certain items of inventories and fixed assets are for specialised requirements and similarly certain goods sold are for the specialised requirements of the buyers and suitable alternative sources are not available to obtain comparable quotations, these companies have an adequate internal control system commensurate with the respective size of each company and the nature of its business with regard to purchase of inventories and fixed assets and with regard to the sale of goods and services. There are no major weaknesses in the internal control system in any of these companies.
- (v) The Holding Company, its subsidiary companies and its jointly controlled companies incorporated in India have not accepted any deposits in accordance with the provisions of sections 73 to 76 of the Act and the rules framed there under.
- (vi) The statutory auditors of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India have broadly reviewed the books of account maintained by each company pursuant to the rules prescribed by the Central Government for maintenance of cost records under sub-section 1 of Section 148 of the Act wherever applicable and are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. However in case of four subsidiary companies and one jointly controlled company, the Central Government has not prescribed the maintenance of cost records under sub-section 1 of Section 148 of the Companies Act, 2013, for the products and services of these companies.

- (vii) (a) According to the information and explanations given to the statutory auditors and on the basis of our examination of the records of the Holding Company, its subsidiary companies and jointly controlled companies, amounts deducted/accrued in the books of account in respect of undisputed statutory dues including Provident Fund, Employees' State Insurance, Income Tax, Sales Tax/ Value Added Tax, Wealth Tax, Service Tax, Customs Duty, Excise Duty, Cess, Professional tax and other material statutory dues, as applicable, have been generally regularly deposited during the year by these companies with appropriate authorities to the extent applicable to these companies.

According to the information and explanations given to the statutory auditors of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India, no undisputed dues in respect of Provident Fund, Employees' State Insurance, Income-tax, Sales tax, Wealth tax, Service tax, Customs duty, Excise duty, Value added tax, Cess, Professional tax and other material statutory dues were in arrears as at 31 March 2015 for a period of more than six months from the date they became payable.

- (b) According to the information and explanations given to the statutory auditors of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India, there are no dues of Wealth tax, Entry tax and Cess which have not been deposited with the appropriate authorities on account of any dispute other than those mentioned in Annexure II to this report.
- (c) According to the information and explanations given to and on the basis of the examination by the statutory auditors of the records of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India, the amounts required to be transferred by the Holding Company to Investor Education and Protection Fund in accordance with the relevant provisions of the Companies Act, 1956 (1 of 1956) and rules made there under has been transferred to such fund within time. The subsidiary companies and the jointly controlled companies incorporated in India did not have any dues on account of Investor Education and Protection Fund.
- (viii) On a consolidated basis, the Holding Company, its subsidiaries and jointly controlled companies, incorporated in India do not have any accumulated losses at the end of

the financial year and have not incurred cash losses in the financial year and in the immediately preceding financial year.

The Holding Company, its subsidiary companies and jointly controlled companies incorporated in India did not have any outstanding debentures during the year.
- (x) According to the information and explanations given to the respective statutory auditors, the Holding Company, its subsidiary companies and jointly control companies incorporated in India have not given any guarantee for loan taken by others from bank or financial institution.
- (xi) In our opinion and according to the information and explanations obtained by the respective statutory auditors, the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India have not raised any term loan during the year other than, a term loan taken by one subsidiary company which has been applied for the purpose for which it was obtained.
- (xii) According to the information and explanations given to the respective statutory auditors of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India no instances of material fraud on or by each company have been noticed or reported during the course of audit by the statutory auditors of the Holding Company, its subsidiary companies and jointly controlled companies incorporated in India.

Notes to Consolidated Financial Statements

NOTE 1: SIGNIFICANT ACCOUNTING POLICIES

1.1 Basis of preparation of Consolidated Financial Statements

(a) Basis of Accounting

The financial statements have been prepared and presented under the historical cost convention, on the accrual basis of accounting in accordance with the accounting principles generally accepted in India ('Indian GAAP') and comply with the Accounting standards prescribed in the Companies (Accounting Standards) Rules, 2006 which continue to apply under Section 133 of the Companies Act, 2013 ('the Act') read with Rule 7 of the Companies (Accounts) Rules, 2014 and other relevant provisions of the Companies Act, 1956, to the extent applicable.

(b) Use of Estimates

The preparation of consolidated financial statements in conformity with Generally Accepted Accounting Principles (GAAP) in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent liabilities on the date of financial statements and reported amounts of income and expenses during the period.

(c) Current/Non-Current Classification

Any asset or liability is classified as current if it satisfies any of the following conditions:

- i. it is expected to be realized or settled or is intended for sale or consumption in the Group's normal operating cycle;
- ii. it is expected to be realized or settled within twelve months from the reporting date;
- iii. in the case of an asset,
 - it is held primarily for the purpose of being traded; or
 - it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date
- iv. in the case of a liability, the Group does not have an unconditional right to defer settlement of the liability for at least twelve months from the reporting date.

All other assets and liabilities are classified as non-current.

For the purpose of current/non-current classification of assets and liabilities, all the Group companies have ascertained their normal operating cycle as 12 months. This is based on the nature of services and the time between the acquisition of assets or inventories for processing and their realization in cash and cash equivalents.

1.2 Tangible and Intangible Assets

(a) Tangible Fixed Assets

Tangible fixed assets are carried at the cost of acquisition or construction, less accumulated depreciation and impairment. The cost of fixed assets comprises of its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use. Expenses directly attributable to new manufacturing facility during its construction period are capitalized. Know-how related to plans, designs and drawings of buildings or plant and machinery is capitalized under relevant tangible asset heads. Profit or loss on disposal of tangible assets is recognised in the Statement of Profit and Loss.

Tangible Fixed assets held for disposal are stated at the lower of their net book value and net realizable value and are disclosed separately under 'Other Current Assets'. Any expected loss is recognised immediately in the Statement of Profit and Loss.

(b) Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Intangible assets arising on acquisition of business are measured at fair value as at date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment loss, if any. Profit or loss on disposal of intangible assets is recognised in the Statement of Profit and Loss.

Goodwill

Goodwill arising on the acquisition of a business represents the excess of the cost of acquisition over the Group's interest in the net fair value of the identifiable assets and liabilities of the business recognised at the date of acquisition. Goodwill is initially recognised as an asset at cost and is subsequently measured at cost less accumulated amortisation and any accumulated impairment losses.

The unamortized carrying value of goodwill is tested for impairment as at each balance sheet date. For the

Notes to Consolidated Financial Statements

purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units that are expected to benefit from the synergies of the business combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised in goodwill is not reversed in a subsequent period.

On disposal of a cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

(c) Capital Work in Progress & Capital Advances

Cost of Assets not ready for intended use, as on the balance sheet date, is shown as capital work in progress. Advances given towards acquisition of fixed assets outstanding at each balance sheet date are disclosed as Long Term Loans & Advances.

(d) Depreciation and Amortization

Depreciation on tangible fixed assets is provided using the Straight Line Method based on the useful lives of the assets as estimated by the management and is charged to the Statement of Profit and Loss. The estimate of the useful life of the assets has been assessed based on technical advice which considered the nature of the asset, the usage of the asset, expected physical wear and tear, the operating conditions of the asset, anticipated technological changes, manufacturers warranties and maintenance support, etc.

Depreciation on tinting systems leased to dealers, is provided under Straight Line Method over the estimated useful life of nine years as per technical evaluation.

Leasehold land and Leasehold improvements are amortized over the primary period of lease.

Intangible Assets are amortised on a Straight Line basis over the estimated useful economic life. Purchase cost, user license fees and consultancy fees for major software are amortized over a period of four years. Acquired Goodwill is amortised over a period of ten years.

Estimated useful life of each acquired Brand is assessed separately for the purpose of amortisation.

Brand acquired pursuant to acquisition of bath fittings business is amortised over a period of two years.

(e) Impairment

At Balance Sheet date, an assessment is done to determine whether there is any indication of impairment of the carrying amount of the Group's fixed assets. If any such indication exists, an asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of asset exceeds its recoverable amount.

An assessment is also done at each Balance Sheet date whether there is any indication that an impairment loss recognised for an asset in prior accounting periods may no longer exist or may have decreased. If any such indication exists, the asset's recoverable amount is estimated. The carrying amount of the fixed asset is increased to the revised estimate of its recoverable amount upto an extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of impairment loss is recognised in the Statement of Profit and Loss for the year.

After recognition of an impairment loss or reversal of an impairment loss, as applicable, the depreciation charge for the asset is adjusted in future periods to allocate the asset's revised carrying amount, less its residual value (if any), over its remaining useful life.

1.3 Revenue Recognition

Revenue from sale of goods is recognised on transfer of all significant risks and rewards of ownership to the buyer. The amount recognised as sale is exclusive of sales tax / VAT and net of returns and discount. Sales are stated gross of excise duty as well as net of excise duty (on goods manufactured and outsourced); excise duty being the amount included in the amount of gross turnover. The excise duty related to the difference between the closing stock and opening stock is recognised separately as part of 'changes in inventories of finished goods, work-in-progress and stock-in-trade'.

Revenue from painting and related service is recognised by reference to the stage of completion of the transaction at the Balance Sheet date determined by services performed to date as a percentage of total services.

Revenue from other sale of services is recognized as per the completed service contract method.

Processing income is recognised on accrual basis as per contractual arrangements.

Notes to Consolidated Financial Statements

Dividend income is recognised when the right to receive payment is established.

Interest income is recognised on the time proportion basis.

1.4 Lease Accounting

Assets taken on lease:

In respect of operating leases, lease rentals are recognised as an expense in the Statement of Profit and Loss on straight line basis over the lease term.

In respect of assets obtained on finance leases, assets are recognised at lower of the fair value at the date of acquisition and present value of the minimum lease payments. The corresponding liability to the lessor is included in the Balance Sheet as a finance lease obligation. The excess of lease payments over the recorded lease obligations are treated as 'finance charges' which are allocated to each lease term so as to produce a constant rate of charge on the remaining balance of the obligations.

Assets given on lease:

In respect of assets provided on finance leases, amounts due from lessees are recorded as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

In respect of assets given on operating lease, lease rentals are accounted on accrual basis in accordance with the respective lease agreements.

1.5 Inventory

- (a) Raw materials, work-in-progress, finished goods, packing materials, stores, spares, components, consumables and stock-in-trade are carried at the lower of cost and net realisable value. The comparison of cost and net realisable value is made on an item-by-item basis. Damaged, unserviceable and inert stocks are valued at net realizable value.
- (b) In determining cost of raw materials, packing materials, stock-in-trade, stores, spares, components and consumables, weighted average cost method is used. Cost of inventory comprises all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition.
- (c) Cost of finished goods and work-in-progress includes the cost of raw materials, packing materials, an

appropriate share of fixed and variable production overheads, excise duty as applicable and other cost incurred in bringing the inventories to their present location and condition. Fixed production overheads are allocated on the basis of normal capacity of production facilities.

1.6 Investments

Investments are classified into current and long-term investments. Investments that are readily realizable and intended to be held for not more than a year from the date of acquisition are classified as current investments. All other investments are classified as long-term investments. However, that part of long term investments which are expected to be realized within 12 months from Balance Sheet date is also presented under "Current Investments" under "Current portion of long term investments" in consonance with the current / non-current classification of Schedule III of the Act.

Current investments are stated at the lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investments.

Long-term investments are stated at cost. A provision for diminution in the value of long-term investments is made only if such a decline is other than temporary, in the opinion of the management. Reversal of such provision for diminution is made when there is a rise in the value of long-term investments, or if the reasons for the decline no longer exist.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is recognised in the Statement of Profit and Loss.

1.7 Transactions and translations in foreign currency

Initial recognition

Transactions in foreign currency are recorded at the exchange rate prevailing on the date of the transaction. Exchange differences arising on foreign exchange transactions settled during the year are recognised in the Statement of Profit and loss of the year.

Measurement of foreign currency items at the Balance Sheet date

Foreign currency monetary items are restated at the closing exchange rates. Non-monetary items are recorded at the exchange rate prevailing on the date of the transaction. Exchange differences arising out of these translations are recognised in the Statement of Profit and Loss.

Notes to Consolidated Financial Statements

Forward exchange contracts

The Group enters into forward exchange contracts to hedge against its foreign currency exposures relating to the underlying transactions and firm commitments. The Group does not enter into any derivative instruments for trading or speculative purposes.

The premium or discount arising at the inception of forward exchange contract is amortized and recognised as an expense/income over the life of the contract. Exchange differences on such contracts are recognised in the Statement of Profit and Loss in the period in which the exchange rates change. Any profit or loss arising on cancellation or renewal of such forward exchange contract is also recognised as income or expense for the period.

Translation of financial statements of foreign entities

In case of foreign subsidiaries, being Non-Integral Foreign Operations, income and expense items are consolidated at the average rate prevailing during the year. All assets and liabilities are converted at the rate prevailing at the end of the year. The resultant translation gains and losses are disclosed as 'Foreign Currency Translation Reserve' under 'Reserves and Surplus'.

1.8 Trade Receivables

Trade receivables are stated after writing off debts considered as bad. Adequate provision is made for debts considered doubtful. Discounts due, yet to be quantified at the customer level are included under Other Current Liabilities.

1.9 Employee Benefits

(A) Short Term Employee Benefits:

All employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits and they are recognised in the period in which the employee renders the related service. The Group recognises the undiscounted amount of short term employee benefits expected to be paid in exchange for services rendered as a liability (accrued expense) after deducting any amount already paid.

(B) Post-employment benefits:

(a) Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the Group pays fixed contributions into state managed retirement benefit schemes and will have no

legal or constructive obligation to pay further contributions, if any of the state managed funds do not hold sufficient assets to pay all employee benefits relating to employee services in the current and preceding financial years. The Group's contributions to defined contribution plans are recognised in the Statement of Profit and Loss in the financial year to which they relate.

The Parent Company and its Indian subsidiaries/ Joint Ventures operate defined contribution plans pertaining to Employee State Insurance Scheme and Government administered Pension Fund Scheme for all applicable employees and the Parent Company operates a Superannuation scheme for eligible employees. Few Indian Subsidiaries and one of the Joint Ventures also operate Defined Contribution Plans pertaining to Provident Fund Scheme.

(b) Defined benefit plans

(i) Provident Fund Scheme (Funded)

The Parent Company and one of its Joint Venture operate a provident fund scheme by paying contribution into separate entities (funds). The minimum interest payable by the trust to the beneficiaries is being notified by the Government every year. These entities have an obligation to make good the shortfall, if any, between the return on investments of the trust and the notified interest rate.

(ii) Gratuity Scheme (Funded)

The Parent Company, its Indian subsidiaries/ Joint Ventures and some of its foreign subsidiaries operate a gratuity scheme for employees. The contribution is paid to a separate entity (a fund) or to a financial institution, towards meeting the Gratuity obligations.

(iii) Pension and Leaving Indemnity Scheme (Unfunded)

The Parent Company and some of its foreign subsidiaries operate a pension and leaving indemnity plan for certain specified employees and is payable upon the employee satisfying certain conditions.

Notes to Consolidated Financial Statements

(iv) Post Retirement Medical benefit plan (Unfunded)

The Parent Company and some of its foreign subsidiaries operate a post retirement medical benefit plan for certain specified employees and is payable upon the employee satisfying certain conditions.

The cost of providing defined benefits is determined using the Projected Unit Credit Method with actuarial valuations being carried out at each Balance Sheet date. Past service cost is recognised immediately to the extent that the benefits are already vested, else is amortised on a straight-line basis over the average period until the amended benefits become vested. In case of certain foreign subsidiaries, liabilities have been provided on an estimated basis. Actuarial gains and losses in respect of the defined benefit plans are recognised in the Statement of Profit and Loss in the year in which they arise.

The defined benefit obligations recognised in the Balance Sheet represent the present value of the defined benefit obligation reduced by the fair value of plan assets, if applicable. Any defined benefit asset (negative defined benefit obligations resulting from this calculation) is recognised representing the present value of available refunds and reductions in future contributions to the plan.

The Group presents the above liabilities as current and non-current in the Balance Sheet as per actuarial valuations by the independent actuary.

(c) Other long term employee benefits (unfunded)

Entitlements to annual leave and sick leave are recognised when they accrue to employees. Sick leave can only be availed while annual leave can either be availed or encashed subject to a restriction on the maximum number of accumulation of leaves. The Parent Company and its Indian subsidiaries and Joint Ventures determine the liability for such accumulated leave using the Projected Accrued Benefit Method with actuarial valuations being carried out at each Balance Sheet date.

The Group presents this liability as current and non-current in the balance sheet as per actuarial valuations by the independent actuary.

1.10 Research and Development

Research and Development expenditure of a revenue nature is expensed out under the respective heads of account in the year in which it is incurred.

Fixed assets utilized for research and development are capitalized and depreciated in accordance with the policies stated for Tangible Fixed Assets and Intangible Assets.

1.11 Provision for Taxation

Tax expense comprises of current tax (i.e. amount of tax for the period determined in accordance with applicable taxation laws), and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date.

Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carry forward loss under applicable taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each Balance Sheet date to reassess realisation.

The deferred tax assets (net) and deferred tax liabilities (net) are determined separately for the Parent and each subsidiary/joint venture company, as per their applicable laws and then aggregated.

1.12 Provisions and Contingencies

The Group creates a provision when there exists a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not require an outflow of resources. When there is a possible obligation or a present obligation in respect of which likelihood of outflow of resources is remote, no provision or disclosure is made.

Notes to Consolidated Financial Statements

1.13 Earnings Per Share

1.15 Borrowing Cost

Borrowing costs, if any, directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized, if any. All other borrowing costs are expensed in the period they occur.

1.16 Cash and Cash Equivalents

Cash and Cash Equivalents for the purpose of Cash flow statement comprise of cash and cheques in hand, bank balances, demand deposits with banks and other short-term highly liquid investments where the original maturity is three months or less.

The geographical segments are Domestic and International operations. Domestic segment includes operations of the Parent Company and its Indian subsidiaries and Joint Ventures.

Revenues and expenses have been identified to the segment based on their relationship to the business activity of the segment. 1.18 Government Grants and Subsidies

The results of subsidiaries acquired or disposed off during the year are included in the consolidated profit and loss account from the effective date of acquisition or up to the effective date of disposal, as appropriate. All significant intra group balances and transactions have been eliminated on consolidation. The amounts shown in respect of reserves comprise the amount of the relevant reserves as per the balance sheet of the Parent Company and its share in the post – acquisition increase in the relevant reserves of the subsidiaries/ joint ventures.
- The consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances

Notes to Consolidated Financial Statements

and are presented to the extent possible, in the same manner as the Parent Company's financial statements.

- (v) Minority interest in the net income and net assets of the consolidated financial statements are computed and shown separately. Losses applicable to minority in excess of the minority's interest in the subsidiary's equity are allocated against the interests of the group.
- (vi) The unamortized carrying value of goodwill is tested for impairment as at each balance sheet date.
- (vii) The excess of cost to the company of its investments in subsidiaries/joint ventures over its share of the equity of the subsidiaries at the date on which the investment in the subsidiaries/joint ventures are made, is recognized as "Goodwill on Consolidation" being an asset in the Consolidated Financial Statements. Alternatively, where the share of equity in the subsidiary companies/joint ventures as on the date of the investment is in excess of cost of investment of the Company, it is recognized as "Capital Reserve" and shown under the head "Reserves and Surplus", in the consolidated financial statements. Impact of Currency Translation

on such "Goodwill" and "Capital Reserve" is adjusted in the respective carrying amounts.

The unamortized carrying value of goodwill is tested for impairment as at each balance sheet date. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units that are expected to benefit from the synergies of the business combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised in goodwill is not reversed in a subsequent period.

On disposal of cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.
