MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Pursuant to Regulation 34(2)(e) and Schedule V of SEBI (LODR) 2015

Your Directors have pleasure in presenting the management discussion and analysis report for the Financial Year ended on 31st March, 2016.

A. INDUSTRIAL STRUCTURE AND DEVELOPMENT:

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. The Textile Industry represent rich and diverse spectrum of activities with the hand-woven sector on one end and the capital intensive mill on the other. The spectrum includes activities in decentralized power looms, hosiery and knitting sectors, the handicraft segments and also covers a wide range of fibres which includes man-made fibre, cotton, silk, jute and wool. The industry contributes 10% of manufacturing production, 2% of India's GDP and 13% of country's export earnings. With over 45 million people employed directly, textile industry is one of the largest sources of employment generation in the country.

The Indian textiles industry, currently estimated at around US\$ 108 billion, is expected to reach US\$ 223 billion by 2021. The textiles industry has made a major contribution to the national economy in terms of direct and indirect employment generation and net foreign exchange earnings. The sector contributes 27 per cent to the country's foreign exchange inflows. Thus, growth and all round development of this industry has a direct bearing on the improvement of the India's economy.

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 1.77 billion during April 2000 to September 2015.

The textile industry remains one of the mainstays of the national economy, and a significant contributor to Indian exports. The Woollen and worsted textiles industry, however, increasingly faces challenges in the market from changing consumption patterns driven by cheaper synthetic fabrics and increased availability of cottons at lower prices.

The global denim jeans market has been forecast to hit a market value of US\$56 billion by 2018, primarily driven by a rapid rise in the number of customers purchasing denim jeans that offer better fit, superior style, durable quality, and an affordable price tag. Additionally, lifestyle factors, fashion trends, celebrity endorsements, and employment conditions also will contribute to the market growth.

The denim market in India was pegged at USD 1.2 Billion in 2011. This is projected to grow at the CAGR of 15-18% and has the potential of almost doubling its size by 2016. In terms of volumes the denim market is estimated at 300 Mn pairs of jeans which is projected to grow to 550 – 600 Million pairs by 2016. The Denim story in India started as the youth story, which found denim wear to be fashionable, comfortable to wear to most occasions and gave the necessary style quotient.

73% of India's population is young with a median age of 26. Even after 10 years, the median age will only get to 29 years. The target population of Denim wear has been 14 to 39 years, which will be the majority of the population in the next 10 years.

Gujarat is set to further strengthen its position as the denim hub of India by adding approx 150 million meters per annum (mmpa) new manufacturing capacity by 2020. This will be in addition to existing capacity of 500 mmpa for denim fabric.

According to industry estimates, denim production capacity is set to cross 1.5 billion meters per annum in the country. Taking into account projects which are being expanded and new projects that are coming up, around 300 mmpa of denim capacity is likely to be added during the next four years in the Country. Out of this, around 50% will take place in Gujarat alone.

Jindal is known as one of the largest denim fabric manufactures and suppliers in India. Evolving the working pattern and adapting to the modern fashion practices, Jindal Worldwide Ltd has become one of the eminent denim mills that stands as the top manufacturer of finely detailed denim cloth designs that are different and unique. Proudly ruling over the global denim market, Jindal Industries has a capacity of manufacturing 74 million meters of denim fabric on an annual basis. The Gross Revenue of the Company including major share of Denim segment for Financial Year 2015- 2016 stood at ₹ 1009.05 crores (Previous Year: ₹ 840 crores)

Home textile segment has become one of the most attractive segments in the textile industry in last few years and has evolved as one of the most fashion sensitive segment in the textile industry. Retail value of Home textiles segment is estimated to be around \$ 110,508.00 million in 2015 and is expected to reach \$131,499.9 million by 2020 growing at a CAGR of 3.5% during the period. Asia-Pacific which accounted for 43.2% of the market share in 2014 is expected to remain the fastest growing regional segment with CAGR of 5.4% between 2015 and 2020. India is expected to remain fastest growing nation and a potential destination for home textile industry which is expected to grow at a CAGR of 7.2% between 2015 and 2020.

Our business expertise is on manufacturing rich collection of Home fabrics and home furnishing Items which basically includes Living Room Products, Bed Linen Products, Table Linen products, Kitchen Linen Products and our customized products as how our clients require and we deliver what they need.

The Textiles Vision Document formulated by the National Manufacturing Competitiveness Council (NMCC) has projected that textiles exports from India will touch US\$ 300 billion by the year 2024-2025.

B. OPPORTUNITY AND THREATS:

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route. The Government of India has started promotion of its 'India Handloom' initiative on social media like Facebook, Twitter and Instagram with a view to connect with customers, especially youth, in order to promote high quality handloom products.

The Ministry of Textiles launched Technology Mission on Technical Textiles (TMTT) with two mini-missions for a period of five years (from 2010-11 to 2011-12 in the 11th five year plan and 2012-13 to 2014-15 in 12th five year plan) with a total fund outlay of ₹ 200 crore (US\$ 30 million). The objective of TMTT is to promote technical textiles by helping to develop world class testing facilities at eight Centres of Excellence across India, promoting indigenous development of prototypes, providing support for domestic and export market development and encouraging contract research.

The Union Cabinet has given approval for ₹ 6,000 crore special package for employment generation and promotion of exports in Textile and Apparel sector.

The move comes in the backdrop of the package of reforms announced by the Government for generation of one crore jobs in the textile and apparel industry over next 3 years. The package includes a slew of measures which are labour friendly and would promote employment generation, economies of scale and boost exports. The steps will lead to a cumulative increase of US\$ 30 bn. in exports and investment of ₹ 74,000 crores over next 3 years. This package would help in social transformation through women empowerment.

In spite of immense factors fuelling the growth of the Indian Textile Industry, there are certain challenges faced by the country in terms of scarcity of trained manpower, escalating energy, costs, high transportation costs, obsolete labor laws, low level of technology and lack of economies of scale.

Competition from low cost countries like Bangladesh, Vietnam, Indonesia and Pakistan is the biggest challenge for the Indian textile industry. In the last few years, these countries have given a special impetus to their textile industry and been able to build new capacities with latest technology.

OUTLOOK:

The outlook for the Indian textile industry looks 'positive' for medium to long term, buoyed by both strong domestic consumption as well as export demand. With massive economic development and subsequent rising labour costs coupled with appreciating Yuan, energy costs and domestic focus, China is slowly moving out of driver's seat vacating a textile trade space of more than \$100 billion over next 5-6 years.

This is expected to perfectly match with Government of India's new focus to revive manufacturing industry with textile as key segment in its 'Make in India' program. Besides, the growth in Indian middle class, which remain to be target consumers for many companies, provides a great market opportunity for textiles. So, in the medium to long-term perspective, the Indian textile industry is expected to not just benefit from exports but also from huge domestic market.

Nevertheless, to fully tap the growth opportunities, the industry needs to focus on consolidation and modernization of weaving, processing and garmenting capacities to ensure optimum productivity and improved quality. On part of the government, labor laws reforms should be implemented at the earliest to encourage new investments.

In that view, many manufacturing companies in India are rushing towards expansion and modernization options. Manufacturers are having recourse to fund raising programmes pushing EPS to higher growth, dissolving equity on its way. Business collaborations with foreign players, creation of buying offices and Government's effort to enhance quality production and export are many visible signs of Indians coming into force on the global market.

C. RISK AND CONCERNS:

No industry is free from normal business risk and concerns. Indian Textile Industry continues to face stiff competition from China, Bangladesh, Taiwan Sri Lanka and other emerging economies. The relative competitiveness of Industry is dependent upon the raw cotton prices, exchange rates and prevalent interest rates regime. The primary raw material for the manufacturing of yarn is cotton with share of around 60% of total cost. Cotton being an agriculture produce, its supply and quality are subject to forces of nature i.e. Monsoon. Any increase in the prices of raw cotton will make the things difficult for the Textile Industry resulting weak demand and thin margins. Thus availability of raw cotton at the reasonable prices is crucial for the spinning industry. Any significant change in the raw cotton prices can affect the performance of the Industry.

The favorable exchange rate has provided a short term relief to the exporters but the situation is not likely to continue in future. The Reserve Bank of India as a Central Bank has started taking steps to stablises the rupee as stable currency is not only good for the industry but for the country as well.

The high rate of interest and tight monetary policy are affecting the financial performance of the textile industry. Though RBI has taken some remedial measures in this regard but still a lot more is required as the Textile Industry is a capital intensive industry.

Further to give boost to the industrialization of the state, some Governments through their industrial policies have announced certain incentives for the New Industrial units in their state. Though it is advantageous to the new industrial units as they will have differential benefits in view of the different policies of the state nevertheless existing industrial units needs some compensatory benefits like freight equalization policy for having equilibrium for Textile Industry at large. This will enable them to become globally competitive and contribute towards the growth of the state as well as country.

D. INTERNAL CONTROL SYSTEM:

Your Company has adequate system of internal controls to ensure that all the assets are safeguarded and are productive. Necessary checks and controls are in place to ensure that transactions are properly verified, adequately authorized, correctly recorded and properly reported. The Internal Auditors of the Company conduct Audit of various departments to ensure that internal controls are in place and submit monthly and yearly Reports to the Audit Committee. The Audit Committee regularly reviews these Reports and the Company when needed takes corrective actions.

CORPORATE GOVERNANCE REPORT

“Pursuant to Clause 49 of Listing Agreement” and “Chapter IV read with Schedule V of SEBI (LODR)2015”

1. Company’s Philosophy on Corporate Governance:

“JINDAL WORLDWIDE LIMITED” (JWL) is committed to conduct its business based on the highest standards of corporate governance. At JWL, Corporate Governance has been an integral part of the way we have been doing our business since inception. We believe that good Corporate Governance emerges from the application of best and sound management practices and compliance with the law coupled with adherence to the highest standard of transparency and business ethics.

Recently, the Securities and Exchange Board of India (SEBI) sought to amend the listing agreement to bring in additional corporate governance norms for listed entities aligned with the provisions of Companies Act, 2013. These norms provide for more strict disclosures and protection of investor rights and aimed to encourage companies to adopt best practices on corporate governance.

Corporate Governance is not merely compliance and not simply a matter of creating checks & balances. It is an ongoing measure of superior delivery of Company’s objects with a view to translate opportunities in reality. The Company places great emphasis on value such as empowerment and integrity of its employees, safety of the employees & communities surrounding the plant, transparency in the decision making process, fair and ethical dealing with all, pollution free environment and last but not least, accountability to all the stakeholders.

The Board considers itself as a trustee of its shareholders and acknowledges its responsibilities towards them for creation and safeguarding their wealth on sustainable basis. Our corporate governance framework ensures that we make timely disclosures and share accurate information regarding our financials and performance, as well as the leadership and governance of the Company. Our corporate governance philosophy is based on the following principles:

- Attainment of the highest levels of transparency, accountability and equity, in all facets of its operation, and in all its interaction with its stakeholders, including shareholders, employees and the government.
- Corporate Governance standards should go beyond the law and satisfy the spirit of law, not just the letter of the law;
- Appropriate composition and size of the Board, with each member having expertise in their respective areas;
- Systems and processes are in place for internal control; and
- Have a simple and transparent corporate structure driven solely by business needs.

We firmly believe that Board independence is essential to bring objectivity and transparency in the management and in the dealings of the Company. As on 31st March, 2016, half of our Board members are independent. Company’s activities are carried out in accordance with good corporate practices and the Company is constantly striving to improve upon them and adopt the best practices. Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Act

We have audited the internal financial controls over financial reporting of Jindal Worldwide Ltd. ("the Company") as of 31st March, 2016 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under Section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that-

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the Financial Statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Opinion**

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE ("A") TO INDEPENDENT AUDITORS' REPORT

Referred to in paragraph 2(f) of the Independent Auditors' Report of even date to the members of "Jindal Worldwide Ltd." on the Consolidated Financial Statements for the year ended 31st March, 2016.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Act

1. We have audited the internal financial controls over financial reporting of Jindal Worldwide Ltd. ("the Company") as of 31st March, 2016 in conjunction with our audit of the Consolidated Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under Section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that-
 - (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
 - (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and
 - (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use or disposition of the Company's assets that could have a material effect on the Financial Statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
