Present Market Overview/Outlook

- Sales has an increase of 16% as compared to 9 months ended in Dec 2018 which is mainly because of further supplies to various municipal corporations of New Delhi under existing rate contract with HLL Life Care Ltd, U.P.S tate Warehousing Corporation and there is also a marginal increase in exports.
- This year should end similar to last year, as agrochemical sales are mostly flat due to less pest infestation in Rabi crops.

Technology Focus

Molecular Diagnostics

- The process of identifying a disease by studying molecules, such as proteins, DNA, and RNA, in a tissue or fluid.
- Molecular diagnostics is a technique used to analyze biological markers in the genome and proteome—the individual's genetic code and how their cells express their genes as proteins—by applying molecular biology to medical testing. The technique is typically used to diagnose and monitor disease, detect risk, and decide which therapies will work best for the individual.
