Commenting on the successful results, Mr. Manish Dabkara, Managing Director, EKI Energy Services Limited, said:

"We are extremely delighted to have commenced the year on an encouraging note, with tremendous growth in the revenues and PAT. Globally, we see a strong demand for carbon offsets, given the growing emphasis on global warming and climate change impact. F.Y. 2020-21 was a big year for climate action, with domestic and multinational companies pledging climate action and even governments stepping up to the plate. While the pandemic is far from over, markets are normalizing and economies are reopening. All these factors bode well for EKI as we continue to provide our clients with an ever-increasing array of climate change, carbon offsets and sustainability solutions."
