Digital technologies have profoundly changed the way we do business. These technologies are impacting virtually all business functions and customer interactions; and organizations are realizing the importance of becoming a digital enterprise.

Being a part of digital ecosystem presents tremendous opportunities for innovation whilst also lending a competitive edge. Dear Shareholders,

It is always a pleasure and privilege to share with you the review of your Company's performance as well as an overview of its future direction & course.

Let me commence by heartily congratulating everyone for a successful year completed by your Company with significant all around progress during the year 2014-15. The Indian IT Industry comprising exports and the domestic market grew from \$118 billion to \$130 billion i.e. a modest 10%. It had to face several challenges related to the international environment. Despite this, your Company has managed a commendable growth which I am sure you all would applaud. The revenues of Datamatics Global Services Ltd. (excluding CIGNEX Datamatics & Lumina Datamatics) grew by about 20% and consolidated by about 13%.

The objective of most businesses worldwide is to respect their customers' sentiments, make life simpler for them and provide them easy access to both products and services. Customers now expect response from businesses on a real time basis. Your Company is enabling this objective of its customers.

In our last Annual Report, I had mentioned some emerging technologies viz. Social Media, Mobility, Analytics and Cloud. To this we can add Open Source, the IOT & Apps in mobile phones. Your Company is well positioned to grasp these opportunities.

Another thrust area for your Company is Healthcare and Health Insurance. Worldwide investments and expenses

Vice-Chairman & CEO's Message

Our future growth strategy is to continue to help our customers in their 'Data-to-Intelligence' journey. With the Digital revolution, the amount of data that is being generated per day requires a new approach to get better business insights. Datamatics has the experience and expertise to help its customers take a Leap forward to Lead in this Digital World.

Dear Shareholders,

I am pleased to present a review of the progress we made in the financial year 2014-15. This has been a year of balanced growth. A few of our business lines witnessed continued growth in revenue, while some were impacted by the changing market conditions.

We have continued to grow across our focused vertical sectors, geographies and business lines. Also, our emphasis on strategic account mining showed positive movement.

This year our consolidated revenue rose to ₹8,347 million, up by 13% from 2013-14. Major growth continued to come from the North America, contributing 74% to the revenue, Europe was at 21% and ROW contributed 5%.

We will continue to focus on providing integrated IT & BPO solutions to our customers and at the same time capitalize on the enormous opportunities that are emerging from the growing shift of enterprises and customers towards the digital business.

Today, almost all companies across the globe and across all industries are striving to evolve into a digital enterprise. Most companies now recognize that they need to embrace digital technologies for enhanced customer experience and gain competitive edge. Though abundant opportunities are available with the emergence of new digital technologies,

the path to reach there is not so clear. Enterprises are struggling to translate opportunities that are being generated by the digital revolution into new revenue streams. We understand that embracing digital technology is a new strategic imperative for enterprises and they need to accelerate these initiatives, but they need a strategic technology partner to help them achieve tangible business results.

Over the years, Datamatics has managed to carve a special space for itself based on its focus on helping clients in their 'Data to Intelligence' journey by leveraging latest technology to provide business insights. The core of Datamatics lies in its ability to manage any kind of data; be it structured, semi-structured or unstructured data; and how we can make data intensive processes more efficient using smart platforms. Our future growth strategy is two-fold, which is to continue to help our customers in their 'Data to Intelligence' journey and also help them take a Leap forward to Lead in this Digital World.

Recently, Datamatics acquired the award winning 1KEY suite of BI solutions from MAIA Intelligence, which has been rechristened as nSights. nSights suite of products provides on-line as well as off-line BI, along with mobile dashboards for smart devices. The addition of nSights suite of products to the other BI solutions that we support, fortifies our position in the BI & Analytics space. This acquisition also complements our growth strategy in the 'Data to Intelligence' space. With this acquisition, we will be able to provide support to our global clients through the entire lifecycle of 'Data to Intelligence'.

Datamatics has the experience to manage large & complex IT & BPO engagements. Over the last few

To propel our growth, we will continue to help our customers in their 'Data to Intelligence' journey and also help them take a Leap forward to Lead in this Digital World.

decades, the Company has been delivering value through increased efficiencies and service performance. Some of our clients have achieved productivity gains and cost savings of up to 200%. At the same time to remain relevant to the enterprises of tomorrow, Datamatics has invested in developing capabilities in the space of digital technology including social media, mobility, analytics and business process management.

At Datamatics, we are convinced that in the short and near term, both the global and domestic markets will open up many more growth avenues. With the right mix of experience and expertise, people and products, services and solutions, Datamatics is well placed to be a strategic partner to its enterprise customers, helping them evolve into truly digital and data driven enterprises.

Looking at the business opportunities that the digital wave is creating for enterprises and IT companies, I see incredible growth opportunities for us as a Company and as an industry.

I thank you for your faith and confidence in Datamatics, and assure you that we will continue to progress and create new milestones as we scale the next frontier in this Digital World.

CFO's Message

This year again our credit rating of A1+ was re-affirmed by CRISIL. This rating signifies a strong degree of safety regarding timely payment of financial obligations and low risk profile of the Company.

Dear Shareholders,

There is a marked change in both investor sentiments and confidence in the Indian economy that has now surpassed China to become the fastest growing economy in the world. Growth in major economies of the world is reviving, albeit at a slower than desirable pace. In the world of digital technology, there are unmissable and unmistakeable signs of a transformational shift happening: the explosion of e-commerce and m-commerce are the most visible and conspicuous indications that we are indeed moving over to a new world order. From booking a cab to buying a phone, the world of internet and smart devices is changing the very tenets of consumer behaviour.

At Datamatics, we believe that this digital transformation has placed us at the cusp of an interesting and exciting phase where even embracing and adapting the digital transformation is no longer an option, but an imperative. And this, we are confident, will unfold new opportunities for growth and expansion at Datamatics.

Today, Datamatics is looking to capitalise on the new opportunities as more companies, both traditional and new, race to take the digital lead. Datamatics is the ideal partner with a range of integrated solutions that can enable these companies to gear for the digital leap. Datamatics has the expertise to develop and implement the digital strategy for clients, ensuring they get customized digital solution that

is best suited to their unique business requirement.

Let me elaborate on some of the financial aspects from this year.

1. Our consolidated revenues registered a growth of 13%, touching ₹ 8,347 million, in FY2015 from ₹ 7,411 million in FY2014 due to balanced organic and inorganic growth in core businesses this year. During this year, we also had the full twelve month impact of Premedia Global's acquisition, where last year, the impact was only for part of the year.
2. The operating margins came under pressure this year due to increase in costs, mainly on account of sales and marketing investments, finance cost of borrowing ECB and change in depreciation rates under the new Companies Act, 2013. The weakening Euro due to the looming crisis in Greece further aggravated the situation. A combination of all these factors resulted in a decrease in consolidated PAT from ₹ 582 million in FY2014 to ₹ 485 in FY2015.
3. As far as the two acquisitions made in the recent past are concerned, namely, Lumina Datamatics and CIGNEX Datamatics, both these companies are undergoing a phase of consolidation and transformation. The focus is to re-organise and set the stage for larger growth in the near and the mid-term.

13%

This year our consolidated revenue rose to ₹ 8,347 million, up by 13% from 2013-14.

4. This year again our credit rating of A1+ was re-affirmed by CRISIL. This rating signifies a strong degree of safety regarding timely payment of financial obligations and low risk profile of the Company.

The fundamentals of our business remains strong and we are confident that we will continue to outpace the industry in the years ahead.

Yours sincerely,

DATAMATICS' DELIVERY CENTRES IN TIER II CITIES

Tier II cities are the most favored destination of highly cost-sensitive BPO service providers. As a business strategy, major BPO players have been moving to and expanding their operations in Tier II cities. Datamatics was early to realize this business imperativeness and set up its first Tier II delivery centre at Nashik during July 2007 followed by the Puducherry site in October 2011. These initiatives have helped the Company leverage on the vast untapped talent pool at these locations as compared with Tier I cities while simultaneously keeping the attrition within manageable limits.

Puducherry

After its successful foray into the publishing business at Puducherry, the site is now home for one more BPO service line viz. Document Management Solutions. From a value creation perspective, the site is a cost-effective location. Our headcount at the Centre is more than 448 staff members.

Nashik

After successfully executing all our BPO service lines, the site is currently gearing up to tap the IT talent potential of Nashik. Datamatics is among the top 10 Employers at Nashik. The Company has been set up to employ locals in IT & BPO sector. The 55,000 sq. ft. state-of-the-art-facility is the single largest

facility which accommodates 1,232 employees. The guest house is located in close proximity to the office.

The Company owns approximately 12 acres of land situated on the Bombay-Agra Highway (NH-3), about 10 kms away from our existing office. The Company intends to build a campus in the future.

In addition to its primary role as the Delivery Centre of Excellence, both these sites are also functioning as Business Continuity Centre to support all other delivery units of the Company. The success of business operations at the above two Tier II sites enables the Company to stay ahead of competition and provides impetus to the Company's focus on such strategic initiatives.

Underlying every business insight is data and this data is growing exponentially. This is forcing enterprises to integrate new technologies and find new ways to use data and insights as a competitive advantage. Datamatics team has the expertise and experience to walk its clients through their Data-to-Intelligence journey; from Data Capture & Collation to Data Management, Data Cleansing & Migration to Analytics and extracting Intelligence from Enterprise Data, including analysing of unstructured data. And this would differentiate us from other IT service providers.

QUALITY

It would not be an exaggeration to claim that Quality is a way of life in our Company. Our Company believes in the very philosophy that quality encompasses and permeates every action and thought process. This year our strategic theme has been Delivery as per Commitment and Quality of Solutions. In this wake, several initiatives have been rolled out to transform the way we look at our customer and execute our projects. Winning accolades and awards for the quality of our deliverables has almost become a habit. We have been continuously winning best quality and service awards at events organized by our various prestigious Fortune 500 customers. This year too we won several such awards.

Your Company is the first and the only I.T. Company to have won the **"International Asia Pacific Award"** for Quality in Services sector. The Award was won against competition from hundreds of companies from 38 countries spread across the world, including the US, Japan, Australia, New Zealand, Russia, Canada, China, Israel, South Korea, Peru and Mexico. Your Company also won the prestigious **"IMC IT Award for Quality"** in January, 2014. Further significant initiatives of your Company towards quality are:

1) Lean Six Sigma Initiative

Leveraging the proven, effective and recognized Lean Six Sigma continues to be one of the key strategies to bring in exponential improvements in efficiencies, productivity and customer delight. This initiative continues to deliver significant benefits to the Company with improvements in Productivity, Efficiency, Quality and Customer Satisfaction. Over 320 Lean Six Sigma Projects and 1600 Kaizen Projects have been completed since the launch of this initiative in 2007. For the past consecutive four years, our improvement projects have been ranked within the top 5 projects out of around 80 projects from multiple industries and organizations in QIMPRO Conventions.

In the last financial year, an overall benefit that includes tangible and intangible benefits, of ₹ 15 million with an ROI of more than 200% was achieved through these performance improvement methodologies.

The Company has about 18 Six Sigma Green Belt and 25 Six Sigma White Belt certified professionals along with 3 Six Sigma Black Belt and 1 Six Sigma Master Black Belt certified professionals. The Company spent over 4500 person hours of training around continuous improvement in the last financial year.

2) Certifications

Your Company, keeping true to its commitment of designing and implementing its Quality Management Systems as per the global standards and benchmarks has been assessed and certified on standards such as ISO 9001:2008, SEI - CMMI Version 1.3, and ITIL. New centers that we added last year have also been assessed and certified for compliance to these standards. This year we are also in the process of upgrading the SEI-CMMi certification to level 5.

As you are aware, the thrust and demands on information security is increasingly becoming stricter. In line with the demands as well as our own analysis of the information security landscape, we continue to lay great emphasis on the Information Security Management Systems (ISMS). Last year, we not only retained the ISO 27001:2005 certification for our ISMS, but also brought all our centers under the purview of the information security management. We have further strengthened our ISMS by incorporating the guidelines of and getting assessed and certified for international standards such as SSAE 16 and HIPAA.

3) Customer Satisfaction Tracking

Last year, we conducted a comprehensive branding survey among our customers as to assess their priorities and their perceptions about the Company against these priorities. We are happy to share with you that there is no jarring incongruence between the two. However, as an organizational improvement initiative, we have identified, as shared earlier, delivery as per commitment and quality of solutions.

The Customer Satisfaction and Loyalty index measuring process continues to provide invaluable insights into our customer's expectations and our performance vis-à-vis these expectations. This is done once every six months and captures customer's feedback on a wide range of parameters that encompass each aspect of service excellence. We feel proud to share with you that overall our Customer Satisfaction Index has been 4.73 on a scale of 1-6 (1 being the lowest and 6 being the highest) with a significant number of customers rating us a perfect 6/6 on all the parameters. Over 25 key customers have rated perfect 6/6 on the organization improvement theme of Delivery as per commitment and quality of solutions. In addition to this formal mechanism, we also have systems that capture customer feedback received through other formal and informal channels. The results of these also show an improving trend.

4) Metrics and Process Compliance Index

We use a Delivery Index to measure and compare the performance for each Line of Business (LOB). It incorporates the three key indicators of performance of any project viz Quality, Effort and Schedule adherence and a stop light (red-amber-green) dashboard is used to display the performance.

In addition, regular process compliance checkups and speedy follow-ups on the corrective and preventive actions have helped us significantly to keep non-compliances in check and thereby reduce rework and defects at the source. Process Compliance Index (PCI) measures and compares the compliance levels for the different LOBs. The PCI are well above the defined targets.

The defined quality gates ensure that we are adhering to process requirements and deliverables at each of the critical stages of the project. A regular review of this with Senior Management ensures that the processes are on track.

In order to create processes at par with global best practices, we have also tied up with a number of global forums such as ISBSG, CSI and PMI to understand and benchmark ourselves against key metrics.

We have also introduced advanced statistical tools and analysis and simulation techniques to improve our ability to predict the performance of the projects and thereby take proactive steps and measures to improve the performance.

6. In case the Company has failed to spend the two per cent of the average net profit of the last three financial years or any part thereof, the Company shall provide the reasons for not spending the amount in its Board report:

The global economic competition has induced the need for corporates to become cost conscious. The net profit of the Company dropped by 39% in the current year. During the financial year, the margins of the Company have reduced on account of increase in various costs such as employee cost, sales and marketing cost, financing cost of External Commercial Borrowings and also change in depreciation rates under the Companies Act, 2013.

Further, the Company operates in IT & ITeS Sector, which is very sensitive to technological changes which keep occurring at a very rapid pace vis-à-vis other business sectors. Therefore, in order to continue having foothold in the competitive market, the Company is required to conserve its resources to the best possible extent.

Also, the Board of Directors of the Company have thought it prudent to conserve the resources of the Company so that they can be deployed for various future growth initiatives and expansion plans by targeting new customer segments and markets across different regions. Considering the above business exigencies, the Board decided to spend ₹ 1,786,050/- on CSR activities in the financial year 2014-15.

The CSR Committee confirms that the implementation and monitoring of the CSR activities of the Company are in compliance with the CSR objectives and CSR Policy of the Company.

MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW OF THE INDUSTRY

India is the world's largest sourcing destination for the information technology (IT) industry, accounting for approximately 52% of the cross border software services. The industry employs over 3 million Indians and continues to contribute significantly to the social and economic transformation of the country.

The Indian Information Technology (IT) & IT-enabled Services (ITeS) industry is divided into three segments, IT services, Business Process Management, (BPM) and Software Products and Engineering Services. I. T. and ITeS are the single largest contributor to India's Services exports. India continues to consolidate its position as the global hub for the IT & ITeS industry, by developing capabilities around traditional and emerging markets, expanding delivery capabilities and increasing focus on high value services for product development and technology incubation. The new government's focus on technology-enabled growth through the 'Digital India' and 'Make in India' campaigns has significantly boosted overall market prospects and investor sentiment. Recognizing the need for greater penetration of IT Services domestically, the Survey notes that the Government's "Make in India" mission include IT and BPM among the 25 focus sectors.

The Economic Survey 2014-15 says the IT and ITeS sector continues to be one of the largest employers in the country, directly employing nearly 35 lakh people. IT-ITeS sector has generated revenues of US dollar 130 billion in 2014-15. This sector now contributes about 6.5% of India's GDP.

In the coming years, emerging technologies including SMAC and digitization will continue to fuel growth in the IT sector. The need to collaborate and connect will create further business opportunities for the IT industry. To achieve higher growth, the IT industry leaders will need to focus on innovation, developing industry specific solutions, flexible global delivery models and a focus on increased operational excellence. Inorganic growth is one component in our strategy. We shall continue to build partnerships with companies that can complement Datamatics' core offerings to offer better value to the customers. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatements.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation and presentation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Company has an adequate internal financial controls system over financial reporting and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in sub-paragraph (a) of the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

x Derivative Instruments and Hedge Accounting:

The Parent Company uses foreign currency forward contracts to hedge its risks associated with foreign currency fluctuations relating to certain firm commitments and forecasted transactions. Such forward contracts are utilised against the inflow of funds under firm commitments. The Company does not use the forward contract for speculative purposes. The Company designates these hedging instruments as cash flow hedge. The use of hedging instruments is governed by the Company's policies approved by the Board of Directors, which provide written principles on the use of such financial derivatives consistent with the Company's risk management strategy.

Hedging instruments are initially measured at fair value, and are remeasured at subsequent reporting dates. Changes in the fair value of these derivatives that are designated and effective as hedges of future cash flows are recognised directly in shareholders' funds and the ineffective portion is recognised immediately in the statement of profit and loss.

Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in the statement of profit and loss as they arise.

The fair value of derivative financial instruments is determined based on observable market inputs including currency spot and forward rates, yield curves, currency volatility etc.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. At that time for forecasted transactions, any cumulative gain or loss on the hedging instrument recognised in shareholders' funds is retained there until the forecasted transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in shareholders' funds is transferred to the statement of profit and loss for the period.

xi Investments:

Investments classified as long term investments are stated at cost. Provision is made to recognise any diminution, other than temporary, in the carrying value of each investment. Current investments are carried at lower of cost and fair value of each investment.

Deferred income taxes reflect the impact of the current period timing difference between taxable income and accounting income for the period and reversal of timing difference of earlier years / period. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available except that deferred tax asset arising on account of unabsorbed depreciation and losses are recognised if there is virtual certainty that sufficient future taxable income will be available to realise the same.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors are responsible for the matters stated in Section 134(5) of Companies Act, 2013 ("the Act") with respect to preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting Standards specified under section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone financial statements based on our audit. We conducted our audit in accordance with the provisions of the Act, the Accounting and Auditing standards and the matters which are required to be included in the audit report under the provisions of the Act and the Rules made there under.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view, in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial controls system over financial reporting and the operating effectiveness of such controls. X. Derivative Instruments and Hedge Accounting:

The Company uses foreign currency forward contracts to hedge it's risks associated with foreign currency fluctuations relating to certain firm commitments and forecasted transactions. Such forward contracts are utilised against the inflow of funds under firm commitments. The Company does not use the forward contract for speculative purposes. The Company designates these hedging instruments as cash flow hedge. The use of hedging instruments is governed by the Company's policies approved by the Board of Directors, which provide written principles on the use of such financial derivatives consistent with the Company's risk management strategy.

Hedging instruments are initially measured at fair value, and are remeasured at subsequent reporting dates. Changes in the fair value of these derivatives that are designated and effective as hedges of future cash flows are recognised directly in shareholders' funds and the ineffective portion is recognised immediately in the statement of profit and loss.

Changes in the fair value of derivative financial instruments that do not qualify for hedge accounting are recognised in the statement of profit and loss as they arise.

The fair value of derivative financial instruments is determined based on observable market inputs including currency spot and forward rates, yield curves, currency volatility etc.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. At that time for forecasted transactions, any cumulative gain or loss on the hedging instrument

The difference that result between the profit considered for income taxes and the profit as per the financial statement are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the difference that originate in one accounting period and reverse in another based on the tax effect of the aggregate amount being considered. The tax effect is calculated on the accumulated timing differences at the end of accounting period based on prevailing enacted or substantially enacted regulations. Deferred tax assets are recognised only if there is reasonable certainty that they will be realised and are reviewed for the appropriateness of their respective carrying values at each balance sheet date.
