SAFE HARBOUR STATEMENT
In this Annual Report, we have disclosed forward-looking information to enable investors to comprehend our prospects and make informed investment decisions. This report and other statements - written and oral - that we periodically make, contain forward-looking statements that set out anticipated results based on the management’s plans and assumptions. We have tried wherever possible to identify such statements by using words such as ‘anticipate’, ‘estimate’, ‘expects’, ‘projects’, ‘intends’, ‘plans’, ‘believes’, and words of similar substance in connection with any discussion of future performance. We cannot guarantee that these forward-looking statements will be realised, although we believe we have been prudent in assumptions. The achievement of results is subject to risks, uncertainties and even inaccurate assumptions. Should known or unknown risks or uncertainties materialise or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected. Readers should bear this in mind. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

Sustainability is not just dry rules and regulations that one needs to follow, it is a state of mind. When one truly wishes to be sustainable, their daily actions emulate this mindset. At Kotyark, we enable the action of becoming sustainable by providing alternate and sustainable solutions to traditional fossil fuels, an obvious choice for a better tomorrow.

We are proud to be the first and only pure-play listed biodiesel company in India that is changing the way the country imagines fuel. Kotyark’s inclination to prepare for the future, combined with its skills and core competencies, has not only helped the Company deliver proactive solutions ahead of its time but has also allowed it to orchestrate behavioural changes in many Indians. The Company firmly believes that this will prove to be a pivotal step in the right direction - for the country and for the earth. In a time when sustainability is the need of the hour, Kotyark is one of the few companies in India that is at the

vanguard of working towards safeguarding the environment, and that too in a very strong way. It believes that these actions that it has taken today will have a cascading effect in the years to come.

While this is an exciting new space, it comes with its own challenges - of acceptance and of awareness. In this regard, the Company is blessed to have received significant government support that adds strong winds to its sails. Kotyark aims to leverage these opportunities to remain at the head of the sustainability-driven industries in India.

Company Overview

Kotyark Industries: At a glance

Kotyark Industries Limited (Kotyark) is revolutionising the fuel industry by providing sustainable alternatives to fossil fuels. Incorporated in 2016, Kotyark is the only listed Indian Company that exclusively manufactures biodiesel and its by-products. The Company focuses on green energy and sustainable development of renewable resources (biofuel) through the adoption of environment-friendly technology, which is ultimately aimed at facilitating a net reduction of greenhouse gas emissions.

With its manufacturing unit at Swaroopgunj, District Sirohi, RICCO, Rajasthan, Kotyark is one of the key players in the state of Rajasthan in India. Its manufactured products find application in any and all industries that use diesel, primarily commercial vehicles and diesel generators. At present, the Company is capable of producing 500KL of biodiesel per day from multi feedstock.

Even though Kotyark is a fairly new company, it has its eyes set on establishing its name in the biofuels domain. The Company's rapid success in its six years of existence is a true embodiment of its capabilities, enthusiasm and its passion to make a difference. Moreover, governmental impetus and a general shift towards a sustainable outlook adds fuel to its deep desires of contributing to the sustainable development of the country and the world at large.

Sustainable products for a better tomorrow

Transport is one such sector that contributes massively to environmental degradation. In fact, it accounts for one-fifth of the total global CO2 emissions and is one of the major causes of concern when it comes to achieving sustainability.

In a highly consumer and technology-driven world, the need for fuel and energy never ceases to exist. While measures are being taken in all aspects to reduce emissions, when it comes to transportation, widespread adoption of biofuel is the only true solution to the problem.

Kotyark's excellent quality biodiesel not only satiates the need for a sustainable alternative but also provides an enhanced experience to its customers. Biodiesel's merits are plenty, and it is Kotyark's mission to make it common knowledge.

Biodiesel is an alternative fuel that has similar characteristics to conventional or fossil diesel. It is a liquid fuel, often referred to as B100 or neat biodiesel, in its pure and unblended form. It can be produced from vegetable oil, animal oil/fats, tallow and waste cooking oil, and the process used to convert these oils to biodiesel is called transesterification.

Further, it meets both the biomass-based diesel and overall advanced biofuel requirement of the Renewable Fuel Standard.

Who can use biodiesel?

Any vehicle that has a diesel engine can be powered by biodiesel easily, without any modifications. It is just like petroleum diesel, which can be used to fuel compression-ignition engines. Apart from transportation, it can also be used to power diesel-run generators.

How does it benefit the environment?

The most essential characteristic of biodiesel is its carbon neutrality, which essentially means that this type of fuel

produces no net output of carbon in the form of CO2. This effect primarily occurs because oil crops while growing absorb the same amount of CO2 that is released when the fuel is combusted. Being biodegradable and completely non-toxic, biodiesel also doesn't pose any significant risks when it comes to spillage. Further, its higher flash point than that of fossil diesel makes it reasonably safe in the event of any transport accident. Since the benefits outweigh the risks quite remarkably, biodiesel is certainly becoming the fuel of choice for the future.

Biodiesel

Crude glycerine is a product obtained in a biodiesel production plant by processing the glycerine phase formed in the transesterification reactor. This product is used mainly as a feedstock to obtain high-purity glycerine in a refining unit.

For every 100 litres of biodiesel produced, approximately 14 litres of crude glycerin is produced as a by-product on average.

Crude glycerin, upon further processing, finds application in the food, pharmaceutical, cosmetic and carpet industries. Kotyark's crude glycerol is sold to large refineries that upgrade and supply the refined rendition to other end-use sectors.

Crude Glycerin

Biodiesel is Kotyark's core product, and in the process of manufacturing the same, the Company also produces Crude Glycerin.

Core Competencies

Excelling in its domain

In just six years, Kotyark Industries has uniquely positioned itself in the Indian biofuel industry through its strengths and capabilities. What makes Kotyark a success is its razor-sharp focus towards innovation and consistent value creation.

Raw Material Sourcing

Raw materials are the crucial driving force for any business, and for biodiesel, it is all the more important given the scarcity of non-edible and used vegetable oil in India. The availability of raw materials such as non-edible vegetable oil at feasible prices is critical to the biodiesel manufacturing process. To that extent, the Company sources cost-effective quality raw materials from across the country, which enables it to manufacture world-class biodiesel at competitive prices.

What comes in handy in this process is the vast inter-generational experience of the Company’s promoters, who have a strong know-how of the vegetable oil trading industry. This experience becomes critical for Kotyark’s raw material sourcing, which in turn, pegs the Company high when it comes to manufacturing quality products.

Indigenously Designed Manufacturing Facility

Kotyark is a unique company in many aspects - its products, its purpose and most importantly, its manufacturing infrastructure. The Company set up its own manufacturing unit at Swaroopgunj, Rajasthan, on a plot measuring 10,000 sq. mt., in the year 2019.

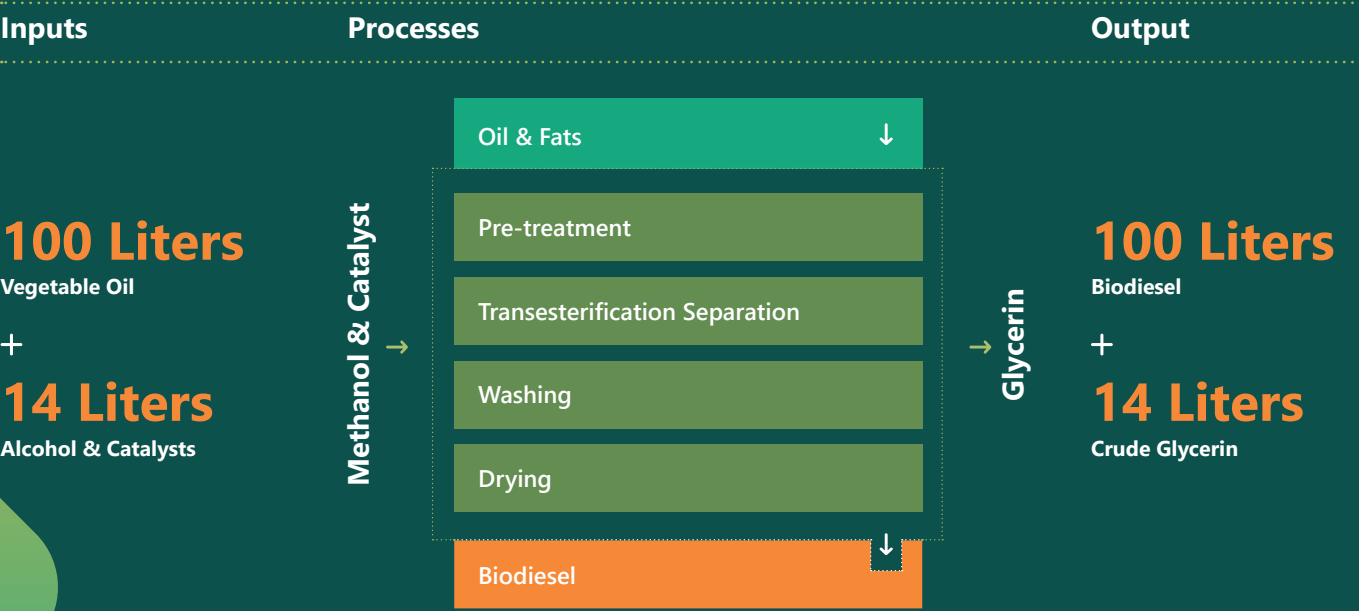

This indigenously designed manufacturing facility features one of the highest asset turns and output productivity across the industry.

With an annual production capacity of 1,82,500 KL, Kotyark’s state-of-the-art and fully integrated facility is equipped to handle end-to-end

manufacturing processes of biodiesel, including - feedstock pre-treatment, transesterification & separation, washing and drying. At present, the facility is operating at ~13% capacity, thereby leaving significant headroom to grow from the existing plant without any further CAPEX.

Diverse Clientele

Oil Marketing Companies (OMC)
OMCs procure biodiesel to blend it with their diesel and premium category speed-diesel. At present, less than 1% of OMCs blend biodiesel in diesel. However, with the Indian Government setting a goal to take this level to 5% by 2030, this will prove to be a significant revenue stream for Kotyark in the near future.

Tender based business, requiring government approval to participate.

Receivable cycle is ~45 days

Bulk Buyers
In India, biodiesel trades cheaper than diesel, therefore presenting bulk buyers with an opportunity to optimise their fuel costs. Further, since biodiesel falls under The GST Act, 2017, input credit of 12% can also be availed by commercial buyers including transport contractors, mining companies and industries.

Company supplies biodiesel to bulk buyers in its vicinity, such as the mining industry and industrial units.

Receivable cycle is ~15 days

Mobile Retail Outlets (MRO)
The Company operates mobile retail outlets (MRO) of biodiesel under its brand ‘Green N Green’. At present, it is operating 25 such outlets through a dealership model, which are primarily located on highways in Rajasthan.

This model enables the Company to remain asset-light, while growing its business.

The Company has approvals to operate 25 outlets, and plans to apply for 50 additional licences.

Mr. Gaurang Rameshchandra Shah
Chairman and Managing Director

Mr. Gaurang Shah holds a Bachelor of Commerce degree from the Maharaja Sayajirao University, Baroda. With over 24 years of experience in vegetable-oil trading and biofuels industry, he has been instrumental to the Company's journey in the last five years. He is responsible for the operations of the Company and has made notable contributions to it. His expertise lies in absorbing new concepts and implementing them in the running of the Company. Mr. Shah's dynamism and a zeal for innovation is a driving force for the Company.

Mrs. Dhruti Shah
Whole Time Director

Mrs. Dhruti Shah is a recipient of a Masters' Degree in Commerce from Maharaja Sayajirao University as well as an MBA from Indira Gandhi National Open University. With over 8 years of experience, she has been a part of the Company's journey since its inception, having played a significant role even at the stage of conceptualization and planning. Her experience and expertise lies not only in her deep understanding of the operations of the Company but also in the biofuels industry and ecosystem as a whole. Her competence with respect to these technical aspects is magnified manifold by her acuity in business, which makes her invaluable to the Company.

Mrs. Bhaviniben Gaurang Shah
Non Executive Director

Mrs. Bhaviniben Gaurang Shah holds a Diploma in Mechanical Engineering degree from Sardar Patel University. She has a rich experience of about seven years in the biofuels industry. At Kotyark, her contributions in have been of significant importance.

Mr. Akshay Jayrajbhai Shah
Non Executive & Independent Director

Mr. Akshay Jayrajbhai Shah holds a Bachelors' Degree in Science and has a long experience of twelve years in this industry. He has contributed to Kotyark meaningfully in just a short period of time.

Mr. Harsh Mukeshbhai Parikh
Non Executive & Independent Director

Mr. Harsh Mukeshbhai Parikh holds an MBA degree from Sikkim Manipal University. He has a strong experience of eighteen years in the Insurance industry. Ever since his joining, he has added reasonably to the Company's growth.

The future of biodiesel in India

Asia-Pacific is projected to be the fastest-growing market for biodiesel in the coming decade, and India is expected to be at the helm of this growth. Further, the Indian biodiesel industry is at a nascent stage, with a vast potential to become one of the leaders in both production and consumption of biodiesel. India currently accounts for only 1% of the total global production. The transportation sector is one of the major consumers of biodiesel, followed by the energy and construction sectors, where biodiesel is used in operations.

As more and more Indians adopt alternative and sustainable fuels, the Indian biodiesel market is geared to rev up its production and bring in heavy revenues for its manufacturers in the years to come. Kotyark being the only listed pure-play biodiesel manufacturer in India, will undoubtedly benefit from the adoption of biodiesel and will also be in a position to lead industry-wide innovation.

Factors driving growth in this sector

India's energy demands are projected to double in the next two decades, owing to its increasing and upwardly mobile consumer profile. The need for transportation is also clearly set to rise to cater to the growing demands. With this context, coupled with the ongoing debate on sustainability, cleaner fuel alternatives are increasingly being sought by industries and individuals alike. Companies like Kotyark stand to gain from this trend, as biodiesel sales are expected to witness a significant push in the decades ahead.

Just like fossil fuel, for biodiesel too, public and fiscal policies play decisive roles. The ever-increasing crude oil import bills have also incentivised the government to switch to domestic fuel alternatives, with biodiesel being the frontrunner. Among other measures, the Indian government has emphasised on improving the country's energy security by reducing import dependence.

It has its target set on reducing India's carbon footprint by at least 30-35% by the year 2030, and in order to achieve this, it has adopted a five-step strategy that includes - increasing domestic production, adopting biofuels and renewables, implementing energy efficiency norms, improving refinery processes and achieving demand substitution.

Further, with its National Policy on Biofuels in 2018, the government has institutionalised its steps towards sustainability, thus pushing the demand for biodiesel. These strong tailwinds from the Indian government are enabling many domestic and international players to enter the biofuel industry in India.

Highlights of the National Policy on Biofuels, 2018

Raw material sourcing

As a measure towards import substitution and in a bid to phase out imported palm stearin oil, which at present is the primary raw material for manufacturing biodiesel, the government is promoting domestically available used cooking oil (UCO) as the feedstock.

UCO is abundantly available and can be collected from bulk consumers such as hotels, restaurants, canteens, etcetera, for conversion.

A mandatory blending of 5% biodiesel in diesel by 2030

The Indian government has proposed a target of 20% blending of ethanol in petrol and 5% blending of biodiesel in diesel by 2030. While many OMCs are already working towards this goal, many more are expected to join this mission soon.

Biodiesel Procurement by OMCs

In crores litres

A use case for Biodiesel in India

In developed markets such as the USA and Europe, biodiesel (B100) trades at a premium to diesel. However, consumers looking to support eco-friendly green fuels choose to buy biodiesel despite its premium pricing. While the biodiesel market is certainly not at par with the diesel market, yet, there is a reasonable level of acceptance of biodiesel among these consumers.

On the other hand, biodiesel still trades roughly at a 15-20% discount in India, which is significantly cheaper than diesel. Moreover, the Indian government extends a 12% GST input credit to commercial buyers of biodiesel. Yet, the uptake has not been as much as it should have, primarily due to the lack of awareness amongst the citizens. This certainly creates a strong use case for enhancing biodiesel demand in India. Further, Kotyark strongly believes that government policies and growing awareness about leading a sustainable life will bode well for biodiesel demand in the country in the years to come.

Key Performance Indicators

Numbers that tell our story

Kotyark has had a spectacular year, reaching multiple goals and achieving a significant scale of operations, i.e. topline, and margins, i.e. bottom line and in FY22. The Company has surpassed expectations, and this performance has boosted its morale and validated its vision for the use case of biodiesel in India. Having been in the industry for just a short period of 6 years, this early success comes as an approving nod to what the Company truly stands for. Kotyark hopes to maintain this arc of growth through its strategic outlook and foresightedness.

On a strong footing

Dear Shareholders,

It gives me great pleasure to write to you and address you with the happenings at Kotyark in FY22, in our first-ever annual report as a listed Company. I would like to begin by expressing my gratitude and thanking each and every one of you for your immense support and encouragement throughout our journey leading up to the IPO. We hope to deliver on all your expectations and create a future-ready and sustainable Company together.

Our financials validate our mission and strategies, enabling us to take on more challenges as we move ahead in this climb.

Now before I take you through our FY22 performance, let me take this opportunity to briefly introduce Kotyark to all our new shareholders and stakeholders. We are a Company that is engaged in the manufacturing of biodiesel and its by-products, and are one of the key players across the state of Rajasthan, India. Our Company focuses on green energy and sustainable development of renewable resources (biofuel) through the adoption of environment-friendly technology. Our manufacturing unit at Swaroopganj, District Sirohi, RICCO, Rajasthan, has a capacity of producing 500 KL of biodiesel per day from multi feedstock. We are, at present, the only pure-play listed biodiesel company in India after we concluded our IPO just last year in 2021.

When we started our journey in 2016, little did we know that we would reach where we have today. While it swells us with pride and happiness, it also reminds us of the longer journey we have now embarked on, and in which we simply cannot falter. On that note, let me now share the news from our FY22 performance. We have met and exceeded our expectations this year and have delivered a robust performance on all fronts. Our Revenue from Operations stood at ₹156.05 crores in FY22, which is an increase of 139% on a year-on-year basis; it is noteworthy to mention that we delivered this growth despite a delayed rise in fuel prices during Q4FY22. All this while, our growth has primarily been driven by higher volumes and operating efficiency of our manufacturing facility. Resultantly, our Operating Profit margins for the year stood significantly higher at 8.2% in FY22 compared to 4.5% in FY21. This increase in margins, along with the increase in our topline, has led us to deliver a staggering 727% increase in our net profit for the year. Our financials validate our mission and strategies, enabling us to take on more challenges as we move ahead in this climb. We are happy and geared to see what's in store for us next.

Now on the operational side, and in line with our strategy to expand our presence and revenue through mobile retail outlets (MRO), we have added eight more MROs of biodiesel under our brand 'Green N Green' this year. With this, we now have 25 operational MROs as of FY22 and are planning to add another 50 by applying for licences. Meanwhile, we have also made notable progress in leveraging the benefits of carbon credits in our business by engaging necessary consultants to guide us through this process. Given the current scale of operations, we are projecting a potential ~4 lakh units of carbon credits. The significant milestone that I would like to share is our announcement of the recommended dividend of ₹2 per share to all our shareholders. This is, of course, subject to approval at the AGM, but the welcoming news is a testament to our hard work, our strengthened balance sheet and the robust financial performance we have delivered over the year.

Given the current scale of operations, we are projecting a potential to generate up to ~4 lakh units of carbon credits.

What seems to be working in our favour is a mix of opportunities in terms of tailwinds from the industry and governmental impetus, which, when combined with our strengths, enables us to fully capitalise on the said opportunities. Our strengths lie in our diversified revenue streams, which include bulk buyers, retailers as well as OMCs, and our large unutilised capacities, which will help us grow without any additional CAPEX. Further, our indigenously designed manufacturing facility also acts as a significant advantage, given the scope of tweaks and upgrades that we can undertake at our end. All of these factors coalesce and peg Kotyark ahead of its competitors, giving it a marked edge.

The opportunities provided by the Indian government act as a catalyst for us, as we are ready to take on the fuel industry and revolutionise it with sustainable and alternative energy. In this regard, I must mention that we are delighted with the direction that the Indian government has accorded and are confident that these policy changes, such as the mandatory 5% blending targets of biodiesel in diesel by 2030, will bode very well for us. It will help us enhance our performance in the coming years and add fuel to our vision of becoming the leading Indian biodiesel manufacturer. Our journey thus far only solidifies our belief in our abilities, and we strongly feel that we have what it takes to actualise our vision.

In closing, I would once again like to thank all our shareholders and stakeholders for their commitment and dedication towards our Company, and for this we are eternally grateful. With your continued support and enthusiasm, we hope to stand true on all our promises and deliver strong performances year after year.

Your Sincerely,

Gaurang Shah
Chairman and Managing Director

Kotyark's Strategic Roadmap

Being the only listed pure-play biodiesel manufacturer in India, Kotyark is uniquely positioned to leverage the multitude of opportunities available in the Indian biodiesel market. It has the potential to become the harbinger of change in the alternate, clean and green fuel industry. Kotyark also understands its strengths and acknowledges its weaknesses in this regard, and it aims to capitalise on its strengths and mitigate its weaknesses in the times to come.

Strength

- Well established manufacturing unit
- Cost-effective production and timely fulfilment of orders
- Business from long standing relationships with customers
- Strong and enduring relationship with suppliers
- Experienced Promoter and Management

Weakness

- Working capital intensive business
- Limited bargaining power with suppliers
- Adverse movement in diesel prices may impact realisations of biodiesel as well

Internal

Opportunities

- Scalable business model
- Potential to increase production in existing facility
- Developing markets in neighbouring Indian states
- Increasing awareness for alternatives to fossil fuels

Threats

- Industry is significantly dependent on government policies
- Any material change in duties will adversely impact the Company's financials

External

Strategic Priorities

The Company has identified certain pivotal areas of improvement, and has deployed effective strategies to make it its strength going forward.

Growing its retail outlet network

Kotyark intends to grow its mobile and static retail outlet network, from its current 25 outlets to 250, within the next 3 years. The Company plans to apply for 50 additional MRO licences in the coming financial year.

Enhancing its capacity utilisation

As of FY22, Kotyark has a significant portion of un-utilised manufacturing capacity. This unutilized capacity offers Kotyark a significant headroom to grow in the coming few years without any additional CAPEX deployment. Kotyark is targeting to utilise its optimum capacity within the next 3 years.

Addressing raw material availability concerns

The Company has evaluated its raw material sourcing channels, and is currently working on implementing projects that address the long-standing concerns about feedstock. To that extent, an MoU has been signed with the Government of Rajasthan to explore means for operationalising the same.

What sets Kotyark apart from its peers

- One of the most efficient and productive biodiesel facilities in India
- Diversified revenue stream with exposure to OMCs, bulk buyers and retail consumers of biodiesel
- Large unutilised capacity offering headroom to grow without any CAPEX
- Strengthened and well-capitalised balance sheet after IPO

Management Discussion and Analysis

Global Biodiesel Industry

As per a market study conducted by Precedence Research, the global biofuel market is slated to achieve significant growth in the years to come. While in 2021, the global biofuels market was valued at USD 109.96 billion, it is predicted that in the next decade the market size would nearly double. With a CAGR of 8.3%, the market is expected to reach a size of approximately USD 201.21 billion. This phenomenal growth is slated to be buoyed significantly on account of the North American market, which not only has the largest aviation industry but is also home to a vast terrestrial transport network. These industries, which have been traditionally dependent on fossil fuels, have been at the frontlines of the global efforts to lower fossil fuel emissions and to limit the greenhouse effect.

Key Growth Drivers

Despite the proliferation of various alternate logistics solutions, surface transport remains one of the key drivers in the freight and passenger markets. However, these industries have been highly reliant on fossil fuels, posing short and long-term challenges. While, on the one hand, there is the looming spectre of environmental degradation, with greenhouse gas emissions expected to reach 43 billion metric tonnes by 2040, on the other hand, crude oil prices have been scaling new heights every now and then. Given the goals of reducing greenhouse gas emissions, these industries have been looking for easily available, affordable and renewable energy sources that can effectively supplement and eventually supplant the dependence on fossil fuels.

Parallely, there have been growing regulatory trends worldwide whereby governments have sought to provide impetus to alternatives to fossil fuels, thereby increasing awareness about and adopting alternate liquid fuels.

In January 2022, the US Environmental Protection Agency came out with a programme for streamlining the review and approval process for biofuels and chemicals to replace higher GHG-emitting fossil fuels. As part of the Clean Fuel Standard program, the Canadian government aims to set a goal of introducing a 15% ethanol blending requirement in traditional fuels. It also proposes to increase carbon taxes by CAD 10 to CAD 50 per tonne of emissions, thereby disincentivizing higher GHG emitting fossil fuels. Earlier this year, the Stanlow liquid container terminal at the Ellesmere port in the UK announced that it would be developing the country's largest biofuel storage hub to tap into emerging opportunities resulting from the global effort to transition to a post-fossil-fuel world. Parallely in Asia, Malaysia is on track to complete the implementation of its B20 palm oil biofuel program – where there is a mandate to manufacture biofuel with a 20% palm oil component for the transport sector – by the end of this year. Elsewhere, in Indonesia, the government allocated USD 195 million from the state budget as a stimulus to producers of palm oil biodiesel to tide over the pandemic-induced downturn. Recently, the Brazilian Ministry of Economy has also announced its decision to waive its import tariff on ethanol till the end of the year to mitigate against growing inflation, which is expected to give a significant boost to ethanol blending in the fossil fuels market.

Indian Biodiesel Industry

The demand for biodiesel in the Indian market stood at 170,000 tonnes in FY2021. This demand is expected to grow at a robust CAGR of 8.6% till 2030, taking the demand to roughly 260,000 tonnes by the end of the decade. With over-reliance on the import of crude oil creating pressures on the exchequer, the government has been incentivised to explore alternative fuels which are manufactured domestically, including and especially biodiesel.

Government of India Policy on Biodiesel

The Indian Government has taken significant steps to push for the increased manufacturing and adoption of biofuels by way of certain recent amendments to the national policy in this regard. Amongst other steps, the amended policy allows for the use of more feedstock for the production of biofuels. It also aims to advance the 20% ethanol blending target, which was set for 2030, to 2025-26. The Government is also expected to announce a funding scheme of ₹ 50 billion for 2G ethanol biorefineries over six years, which would be in supplementation to additional tax incentives. Further, higher purchase prices as compared to 1G biofuels are also expected to invigorate the setting up of supply chain mechanisms for biodiesel production from non-edible oilseeds, used cooking oil and short gestation crops. The Government has also introduced the GOBAR (Galvanising Organic Bio-Agro Resources) DHAN scheme – which is geared towards the management and conversion of cattle dung and solid waste in agricultural and dairy farms for use as compost and its rendition to biogas and bio-CNG. The food safety regulator, FSSAI, has also launched the RUCO (Repurpose Used Cooking Oil) Scheme, through which used cooking oil can be collected and converted to biodiesel.

Government of Rajasthan Policy on Biodiesel

The Government of Rajasthan has been the first to adopt the national policy for biofuels. It has also been instrumental in creating a practical framework for widespread biodiesel manufacturing. Towards this, the Government is aiming to increase the production of oilseeds, which would act as a significant raw material for biodiesel production. It is also looking to incentivise the establishment of supply chain mechanisms for the accelerated use of inedible oilseeds, used cooking oil and short gestation crops, in line with the national policy. It also seeks to tap into the vast pool of human resources in the form of women's self-help groups through the State Rural Livelihood Development Council, which may have avenues for higher incomes on account of integrating with the biodiesel supply chain.

To promote research and garner technical expertise in alternative fuels and energy resources, it also proposes establishing a Centre of Excellence in Udaipur.

Rajasthan was the first state in India to adopt the National Policy and create an implementable framework for Biodiesel production and manufacturing. Overall, it would focus on promoting and marketing biofuels, so that awareness about the same can be increased and adoption of the same can be institutionalised.

Growth Enablers

The Government of India has announced a national biofuel policy with the aim of increasing the usage of biofuel in the energy and transportation sector of the country. The salient features of this policy are highlighted below:

- An indicative target of 20% blending of ethanol in petrol and 5% blending of biodiesel in diesel by 2030
- The policy also indicates a vital gap in funding for 2G ethanol Bio refineries of ₹ 5,000 crores spread across six years in addition to tax incentives
- Thrust on research, development and demonstration in the field of biofuels feedstock production and advanced conversion technologies from identified feedstock
- Develop a National Biomass repository by conducting an appraisal of biomass across the country
- Other government initiatives include Pradhan Mantri JI-VAN Yojana, 2019, which is aimed at creating an ecosystem for setting up commercial projects and to boost Research and Development in the 2G Ethanol sector
- GOBAR (Galvanizing Organic Bio-Agro Resource) focused on managing and converting cattle dung and solid waste in farms to useful biogas and bio-CNG
- The rising crude oil import bill is also a key driver that is incentivising the government to look for alternative fuel sources

Management Discussion and Analysis

Company Overview

Kotyark Industries Limited (Kotyark) is revolutionising the fuel industry by providing sustainable alternatives to fossil fuels. Incorporated in 2016, Kotyark is the only listed Indian company that exclusively manufactures biodiesel and its by-products. The Company focuses on green energy and sustainable development of renewable resources (biofuel), through the adoption of environment-friendly technology, which is ultimately aimed at facilitating net reduction of greenhouse gas emissions.

Outlook

We have a good business outlook for the coming few years, underpinned by factors such as a significant unutilised capacity, combined with our core competencies such as excellent raw material sourcing, indigenously designed manufacturing facilities, and a diverse clientele and revenue streams. This is supported by tailwinds from the industry and governmental impetus.

Internal Control and Adequacy

The company has in place an adequate system of internal control commensurate with the size and nature of its business. These have been designed to provide reasonable assurance that all assets are safeguarded and protected against loss from unauthorised use or disposition and that all transactions are authorised, recorded, reported correctly, and the business operations are conducted as per the prescribed policies and procedures of the company. The Audit Committee and the management have reviewed the adequacy of the internal control systems and suitable steps were taken to improve the same.

Human Resource Development and Industrial Relations

Kotyark believes that its human resources are one of the most crucial assets and critical enablers of the Company's growth. To that extent, the Company engages with its employees to hone their skill sets and equip them with knowledge and know-how. It is also deeply invested in establishing its brand name to attract and retain the best talent in the market. During the period under review, employee relations continued to be healthy, cordial, and harmonious at all levels, and the Company aims to maintain such relations with the employees going forward as well. As on March 31, 2022 the Company has 38 permanent employees.

Risks & Concerns

Price Risk

Any adverse movement in raw material prices, such as used vegetable oil or inedible vegetable oil, can impact the Company's profitability. In addition, any unfavourable movement in the prices of the competing product, i.e., Diesel, can also impact Biodiesel prices.

Acceptance Risk

Biodiesel is an environment-friendly substitute and cost-efficient to Diesel, but any prolonged delay in consumer acceptance of Biodiesel can impact the Company's performance.

Policy Changes & Regulatory Risks

Diesel and Biodiesel are heavily regulated industries governed by various government policies. Accordingly, any adverse change in government policy regarding biodiesel blending, retail usage, raw material sourcing, etcetera, can impact the Company's performance.

Inconsistent State Policies

Un-defined state policies, and differing state laws for Biodiesel as a fuel, especially for retail customers, create a difficult environment for the industry incumbents to have multi-state operations. Non-alignment of key states can prove to be cumbersome for the entire industry.

Geographical Risk

The Company derives most of its business from Rajasthan, thus naturally leading to a business concentration risk from the state.

Cautionary Statement

Statements in the Management Discussion and Analysis and other parts of the report describing the Company's objectives, projections, estimates and expectations may be forward-looking statements. Actual results may differ materially from those expressed or implied due to various risks and uncertainties. Important factors that could make a difference to the Company's operations include economic and political conditions in India and other countries, in which the Company may operate. Other factors that may impact the Company's operations include volatility in interest rates, changes in government regulations and policies, tax laws, statutes, and other incidental factors. The Company does not intend to update these statements.

Explanatory Statement

Pursuant to Section 102 (1) of the Companies Act 2013 and Secretarial Standard 2 on General Meetings

The following statement sets out all material facts relating to certain Ordinary Business and Special Business as mentioned in the accompanying Notice:

ITEM NO. 4

To re-appoint M/s. Manubhai & Shah LLP, Chartered Accountants as statutory auditors of the Company and to fix their remuneration- **ORDINARY RESOLUTION**

Though not mandatory, this explanation is provided for reference.

M/s. Manubhai & Shah LLP (FRN: - 106041W and Peer Review Number. W100136), Chartered Accountants, were appointed as the Statutory auditors of the Company for One Year in the Annual General Meeting of the company held on July 13, 2021. Their term will end at the conclusion of this Annual General Meeting. On recommendation of Audit Committee and Board of Directors and on receipt of consent dated August 13, 2022 of M/s. Manubhai & Shah LLP, the Board of Directors hereby placed this resolution for re-appointment of Statutory Auditors for a further term of 1 year to hold office from the conclusion of 6th Annual General Meeting until the conclusion of 7th Annual General Meeting to be held in the calendar year 2023. The Board recommends the resolution at Item No. 4 for approval by the members. None of the Directors or their relatives are, in any way, concerned or interested, financially or otherwise, in the resolution set out at Item No.4 of the Notice.

ITEM NO. 5

To approve Cost Auditor's Remuneration for the Financial Year 2022-23: ORDINARY RESOLUTION

The Board of Directors at its meeting held on August 13, 2022, upon the recommendation of the Audit Committee, approved the appointment of M/s. Y. S. Thakar & Co., Cost and Management Accountants, Vadodara (Firm Registration No. 100463), to conduct the audit of the Cost records of the Company for the Financial Year ending on March 31, 2023 at a remuneration of ₹ 60,000.00 (Rupees sixty thousand only) plus applicable taxes.

In terms of the provisions of Section 148 of the Companies Act, 2013 read with Rule 14 of the Companies (Audit and Auditors) Rules, 2014 (as amended or re-enacted from time to time) the remuneration as mentioned above, payable to the

Cost Auditors, is required to be ratified by the Members of the Company.

The Board recommends the resolution set out under Item No. 5 for the approval of the Members by way of passing an Ordinary Resolution.

None of the Directors or Key Managerial Personnel of the Company or their relatives, are, in any way, concerned or interested, financially or otherwise, in the aforesaid resolution.

ITEM NO. 6 TO ALTER ARTICLES OF ASSOCIATION OF THE COMPANY: SPECIAL RESOLUTION

The Article number 14(2) provides that whenever Company proposes for increase in its subscribed Capital by issue of Further Shares the Notice of the same shall be dispatched to the Shareholders at least Three days before opening of the issue. Companies Act does not prescribe sending Notice at least three days before the opening of the Issue, therefore In order to align the Article as per Companies Act, 2013, it is proposed to delete the said clause. The approval of the members of the company is required, by way of special resolution pursuant to section 14 of The Companies Act, 2013 and accordingly the Board recommended the relevant resolution for the approval of members.

Brief of Proposed Amendment in Article of Association: -

- The existing sub-clause (2) of Article No 14 read as "The Notice shall be dispatched through registered post or speed post or through electronic mode to all the existing shareholders at least three days before opening of the issue." be deleted from the Articles of Association of the Company.
- Clause 14 (3) be renumbered as Clause 14 (2)

None of the Directors and Key Managerial Personnel of the Company or their relatives, are concerned or interested, financially or otherwise, in this resolution.

ITEM NO. 7 APPROVAL OF THE MATERIAL RELATED PARTY TRANSACTIONS WITH YAMUNA BIO ENERGY PRIVATE LIMITED: ORDINARY RESOLUTION

Section 188 of the Companies Act 2013 and the applicable Rules framed thereunder provided that any related party transaction will require prior approval of shareholders through ordinary resolution if the aggregate value of transaction(s) amounts to 10% or more of the annual turnover of the Company as per last audited financial statements of the Company.

Yamuna Bio Energy Private Limited is related parties with reference to the Company within the meaning of Clause (76) of section 2 of the Companies Act 2013.

The value of proposed aggregate transactions with Yamuna Bio Energy Private Limited is likely to exceed the said threshold limit during the financial year 2022-23.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

GLOBAL BIODIESEL INDUSTRY

As per a market study conducted by Precedence Research, the global biofuel market is slated to achieve significant growth in the years to come. While in 2021, the global biofuels market was valued at USD 109.96 billion, it is predicted that in the next decade the market size would nearly double. With a CAGR of 8.3%, the market is expected to reach a size of approximately USD 201.21 billion. This phenomenal growth is slated to be buoyed significantly on account of the North American market, which not only has the largest aviation industry but is also home to a vast terrestrial transport network. These industries, which have been traditionally dependent on fossil fuels, have been at the frontlines of the global efforts to lower fossil fuel emissions and to limit the greenhouse effect.

KEY GROWTH DRIVERS

Despite the proliferation of various alternate logistics solutions, surface transport remains one of the key drivers in the freight and passenger markets. However, these industries have been highly reliant on fossil fuels, posing short and long-term challenges. While, on the one hand, there is the looming spectre of environmental degradation, with greenhouse gas emissions expected to reach 43 billion metric tonnes by 2040, on the other hand, crude oil prices have been scaling new heights every now and then. Given the goals of reducing greenhouse gas emissions, these industries have been looking for easily available, affordable and renewable energy sources that can effectively supplement and eventually supplant the dependence on fossil fuels.

Parallely, there have been growing regulatory trends worldwide whereby governments have sought to provide impetus to alternatives to fossil fuels, thereby increasing awareness about and adopting alternate liquid fuels. In January 2022, the US Environmental Protection Agency came out with a programme for streamlining the review and approval process for biofuels and chemicals to replace higher GHG-emitting fossil fuels. As part of the Clean Fuel Standard program, the Canadian government aims to set a goal of introducing a 15% ethanol blending requirement in traditional fuels. It also proposes to increase carbon taxes by CAD 10 to CAD 50 per tonne of emissions, thereby disincentivizing higher GHG emitting fossil fuels. Earlier this year, the Stanlow liquid container terminal at the Ellesmere port in the UK announced that

it would be developing the country's largest biofuel storage hub to tap into emerging opportunities resulting from the global effort to transition to a post-fossil-fuel world. Parallely in Asia, Malaysia is on track to complete the implementation of its B20 palm oil biofuel program – where there is a mandate to manufacture biofuel with a 20% palm oil component for the transport sector – by the end of this year. Elsewhere, in Indonesia, the government allocated USD 195 million from the state budget as a stimulus to producers of palm oil biodiesel to tide over the pandemic-induced downturn. Recently, the Brazilian Ministry of Economy has also announced its decision to waive its import tariff on ethanol till the end of the year to mitigate against growing inflation, which is expected to give a significant boost to ethanol blending in the fossil fuels market.

OPPORTUNITIES & THREATS:

Indian Biodiesel Industry

The demand for biodiesel in the Indian market stood at 170,000 tonnes in FY2021. This demand is expected to grow at a robust CAGR of 8.6% till 2030, taking the demand to roughly 260,000 tonnes by the end of the decade. With over-reliance on the import of crude oil creating pressures on the exchequer, the government has been incentivised to explore alternative fuels which are manufactured domestically, including and especially biodiesel.

Government of India Policy on Biodiesel

The Indian Government has taken significant steps to push for the increased manufacturing and adoption of biofuels by way of certain recent amendments to the national policy in this regard. Amongst other steps, the amended policy allows for the use of more feedstock for the production of biofuels. It also aims to advance the 20% ethanol blending target, which was set for 2030, to 2025-26. The Government is also expected to announce a funding scheme of ₹ 50 billion for 2G ethanol biorefineries over six years, which would be in supplementation to additional tax incentives. Further, higher purchase prices as compared to 1G biofuels are also expected to invigorate the setting up of supply chain mechanisms for biodiesel production from non-edible oilseeds, used cooking oil and short gestation crops. The Government has also introduced the GOBAR (Galvanising Organic Bio-Agro Resources) DHAN scheme – which is geared towards the management and conversion of cattle dung and solid waste in agricultural and dairy farms for use as compost and its rendition to biogas and bio-CNG. The food safety regulator, FSSAI, has also launched the RUCO (Repurpose Used Cooking Oil) Scheme, through which used cooking oil can be collected and converted to biodiesel.

Government of Rajasthan Policy on Biodiesel

The Government of Rajasthan has been the first to adopt the national policy for biofuels. It has also been instrumental in creating a practical framework for widespread biodiesel manufacturing. Towards this, the Government is aiming to increase the production of oilseeds, which would act as a significant raw material for biodiesel production. It is also looking to incentivise the establishment of supply chain mechanisms for the accelerated use of inedible oilseeds, used cooking oil and short gestation crops, in line with the national policy. It also seeks to tap into the vast pool of human resources in the form of women's self-help groups through the State Rural Livelihood Development Council, which may have avenues for higher incomes on account of integrating with the biodiesel supply chain. To promote research and garner technical expertise in alternative fuels and energy resources, it also proposes establishing a Centre of Excellence in Udaipur.

Rajasthan was the first state in India to adopt the National Policy and create an implementable framework for Biodiesel production and manufacturing. Overall, it would focus on promoting and

marketing biofuels, so that awareness about the same can be increased and adoption of the same can be institutionalised.

Growth Enablers

The Government of India has announced a national biofuel policy with the aim of increasing the usage of biofuel in the energy and transportation sector of the country. The salient features of this policy are highlighted below:

- An indicative target of 20% blending of ethanol in petrol and 5% blending of biodiesel in diesel by 2030
- The policy also indicates a vital gap in funding for 2G ethanol Bio refineries of ₹ 5,000 crores spread across six years in addition to tax incentives
- Thrust on research, development and demonstration in the field of biofuels feedstock production and advanced conversion technologies from identified feedstock

- Develop a National Biomass repository by conducting an appraisal of biomass across the country

Other government initiatives include Pradhan Mantri JI-VAN Yojana, 2019, which is aimed at creating an ecosystem for setting up commercial projects and to boost Research and Development in the 2G Ethanol sector

- GOBAR (Galvanizing Organic Bio-Agro Resource) focused on managing and converting cattle dung and solid waste in farms to useful biogas and bio-CNG
- The rising crude oil import bill is also a key driver that is incentivising the government to look for alternative fuel sources.

OUTLOOK

We have a good business outlook for the coming few years, underpinned by factors such as a significant unutilised capacity, combined with our core competencies such as excellent raw material sourcing, indigenously designed manufacturing facilities, and a diverse clientele and revenue streams. This is supported by tailwinds from the industry and governmental impetus.

INTERNAL CONTROL AND ADEQUACY

The company has in place an adequate system of internal control commensurate with the size and nature of its business. These have been designed to provide reasonable assurance that all assets are safeguarded and protected against loss from unauthorised use or disposition and that all transactions are authorised, recorded, reported correctly, and the business operations are conducted as per the prescribed policies and

procedures of the company. The Audit Committee and the management have reviewed the adequacy of the internal control systems and suitable steps were taken to improve the same.

HUMAN RESOURCE DEVELOPMENT AND INDUSTRIAL RELATIONS

Kotyark believes that its human resources are one of the most crucial assets and critical enablers of the Company's growth. To that extent, the Company engages with its employees to hone their skill sets and equip them with knowledge and know-how. It is also deeply invested in establishing its brand name to attract and retain the best talent in the market. During the period under review, employee relations continued to be healthy, cordial, and harmonious at all levels, and the Company aims to maintain such relations with the employees going forward as well. As on March 31, 2022 the Company has 38 permanent employees.

RISKS & RISK MITIGATION

Independent Auditor's Report

To the Members of Kotyark Industries Limited (Formerly known as "Kotyark Industries Private Limited")

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the accompanying financial statements of Kotyark Industries Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2022, and the Statement of Profit and Loss, the Statement of Cash Flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Accounting Standards prescribed under section 133 of the Act read with the Companies (Accounting Standards) Rules, 2021 as amended ("Accounting Standards") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2022, and its profit, its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. We have determined that there are no key audit matters to communicate in our report.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Directors' Report including Annexures to the Directors' Report but does not include the Financial Statements and our auditor's report thereon. The other information is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

When we read the other Information, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and to comply with the relevant applicable requirements of the SA 720 'The Auditor's responsibilities Relating to Other Information'.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting Standards and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or

regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication

Other Matter

Comparative figures for the year ended / as at March 31, 2021 are as per financial statements prepared in connection with SME-IPO which was subject to our audit and we have expressed an unmodified opinion on the same vide our Audit Report dated September 4, 2021.

Report on Other Legal and Regulatory Requirements

Annexure A to the Independent Auditors' Report

[Annexure referred to in paragraph 1 (f) under 'Report on Other Legal and Regulatory Requirements' section of our report on Financial Statements for the year ended March 31, 2022 to the members Kotyark Industries Limited]

REPORT ON THE INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING UNDER CLAUSE (I) OF SUB-SECTION 3 OF SECTION 143 OF THE COMPANIES ACT, 2013 ("THE ACT")

We have audited the internal financial controls over financial reporting of Kotyark Industries Limited ("the Company") as of March 31, 2022 in conjunction with our audit of the Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the Financial Statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the criteria for internal financial control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

| <p>iii. The Company has not made any investments in, provided any guarantee or security, and granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or any other parties during the year, and hence reporting under clause (iii) of the Order is not applicable.</p> | |

- (f) The Company does not have investment in any subsidiary or associates or joint ventures and hence, reporting under clause (ix)(f) of the Order is not applicable.
- x. (a) In Our opinion, money raised by way of initial public offer during the year have been, prima facie, applied by the company for the purpose for which they were raised.
- (b) During the year the Company has not made any preferential allotment or private placement of shares or convertible debentures (fully or partly or optionally) and hence reporting under clause (x)(b) of the Order is not applicable to the Company.
- xi. (a) According to the information and explanations given to us, no fraud by the Company and no material fraud on the Company has been noticed or reported during the year.
- (b) To the best of our knowledge, no report under sub-section (12) of section 143 of the Companies Act has been filed in Form ADT-4 as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government, during the year and up to the date of this report.
- (c) As represented to us by the Management, there were no whistle blower complaints received by the Company during the year.
- xii. In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable.
- xiii. In our opinion, the Company is in compliance with Section 177 and 188 of the Companies Act, where applicable, for all transactions with the related parties and the details of related party transactions have been disclosed in the financial statements etc. as required by the applicable accounting standards.
- xiv. (a) In our opinion and based on our examination, the Company has an adequate internal audit system commensurate with the size and the nature of its business.
- (b) We have considered, the internal audit report issued to the Company during the year and covering the period October 1, 2021 to December 31, 2021 and the draft internal audit report where issued after the balance sheet date covering the period January 1, 2022 to March 31, 2022 for the period under audit.
- xv. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into non-cash transactions with directors or persons connected with him. Accordingly, paragraph 3(xv) of the Order is not applicable.

- xix. According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information accompanying the financial statements and our knowledge of the Board of Directors and Management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.
- xx. The Company was not having net worth of rupees five hundred crore or more, or turnover of rupees one thousand crore or more or a net profit of rupees five crore or more during the immediately preceding financial year and hence, provisions of Section 135 of the Act are not applicable to the Company during the year. Accordingly, reporting under clause 3(xx) of the Order is not applicable for the year.

Significant Accounting Policies to the Financial Statement

1. CORPORATE INFORMATION

The Company was originally incorporated on December 30, 2016 as "Kotyark Industries Private Limited" vide Registration No. 094939/ 2016-2017 under the provisions of the Companies Act, 2013 with the Registrar of Companies, Central Registration Centre. Further, the Company was converted into Public Limited Company and consequently name of company was changed from "Kotyark Industries Private Limited" to "Kotyark Industries Limited" vide Special resolution passed by the Shareholders at the Extra-Ordinary General Meeting held on July 24, 2021 and a fresh certificate of incorporation dated August 05, 2021 issued by the Registrar of Companies, Ahmedabad.

2. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

2.1. Basis of preparation

The accompanying Financial Statements have been prepared and presented under the historical cost convention on the accrual basis of accounting and comply with the requirements of Accounting Standards as specified under section 133 of the Companies Act, 2013(Act), read with the Companies (Accounting Standards) Rules, 2021 and other accounting principles generally accepted in India. The accounting policies have been consistently applied except where a newly issued Accounting Standard is initially adopted or a revision to an existing Accounting Standard requires a change in the accounting policy hereto in use.

2.2. System of Accounting:

The Financial Statements are prepared on historical cost basis. The company follows the mercantile system of accounting and recognizes income and expenditure on the accrual basis.

2.3. Use of Estimates:

The preparation of Financial Information requires the management of the company to make estimates and assumptions that affect the balances of assets and liabilities and disclosures relating to the contingent liability as at the date of the financial information and reported amounts of income and expenses like useful lives of property, plant and equipment, provision for taxation, etc., during the year. Management believes the estimates used in the preparation of the financial information are prudent and reasonable. Future results may vary from these estimates.

3. SIGNIFICANT ACCOUNTING POLICIES

I. Property, Plant and Equipment and Intangible Assets:

Property, plant and equipment are stated at their cost of acquisition less accumulated depreciation. The cost of acquisition includes freight, installation cost, duties, taxes and other incidental expenses, identifiable with the asset, incurred during the installation / construction stage in order to bring the assets to their working condition for intended use, including borrowing costs capitalized, if any, but are net of Input Tax Credits availed for the relevant element in the Cost. Property, plant and equipment include Lease hold Land, which is amortized equally over the tenure of Lease. The value of Lease hold Land includes cost of

premium and other expenses incurred in order to meet the condition of lease agreement and get the Land on Lease.

Intangible assets comprises of Trademark.

II. Depreciation and Amortisation:

Sr. No.	Nature of Asset	Asset Class	Useful Life (Years)
1	Storage Room	Buildings	25
2	Pressure Pumps	Plant & Machineries	8
3	Fire Extinguisher	Office Equipment	15
4	CCTV Camera	Office Equipment	6

On the additions / disposal during the year, depreciation is provided pro-rata on the basis of number of days for which the asset was used during the year.

Intangible assets are amortised over a period of 5 Years on straight line basis.

III. Inventories:

Inventories of raw material and finished goods are valued at lower of the cost or net realizable value. Obsolete, defective and unserviceable Inventory, if any, are duly provided for.

IV. Revenue Recognition:

Revenue from sale of products are recognised when the risk and rewards of ownership of products are passed on to the customers. Revenue is recorded exclusive of GST and net of trade and quantity discounts or rebates granted.

Income from Services rendered are booked based on agreements/ arrangements with the concerned parties.

Interest is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable. Dividend income is recognised if the right to receive payment is established by the Balance Sheet date.

V. Employee Benefits:

(a) Short term benefits:

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. These benefits include compensated absences such as privilege leave and sickness leave. The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognized during the period.

(b) Post-employment benefits:

Defined contribution plan

The Company's provident fund scheme is defined contribution plan. The Company's contribution paid/payable under the schemes is recognised as expense in the statement of Profit and Loss during the period in which the employee renders the related service.

IV. Goods and Service Tax:

Goods and service tax is accounted for in the books of accounts in accordance with the provisions of the goods and service tax law for the time being in force, and the liability or the credits are accordingly disclosed in the financial information.

V. Borrowing Costs:

Borrowing costs that are directly attributable to the acquisition of qualifying assets are to be capitalized for the year until the asset is ready for its intended use. A qualifying asset being, an asset that necessarily takes a substantial period of time to get ready for its intended use. Other borrowing costs are to be recognized as an expense in the year in which they are incurred.

VI. Accounting for Taxes on Income :

- (a) Income tax expense comprises current tax (i.e. amount of tax for the year determined in accordance with the Income Tax Act, 1961) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year).
- (b) The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the rates and laws that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty the assets can be realised in future; however, where there is unabsorbed depreciation and carry forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed at each balance sheet date and written down or written up to reflect the amount that is reasonably /virtually certain (as the case may be) to be realised.

VII. Leases :

Lease, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased asset during the lease term, are classified as operating leases. Lease payments under operating lease are recognised as an expense in the profit and loss account on a straight-line basis over the lease term, considering the renewal terms, if appropriate.

VIII. Impairment of Assets:

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount is the greater of the net selling price and value in use. In assessing value in use, the

estimated future cash flows are discounted to their present value based on an appropriate discount factor. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the profit and loss account. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciable historical cost.

IX. Contingencies / Provisions :

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Loss contingencies arising from claims, litigation, assessment, fines, penalties, etc. are recorded when it is probable that a liability has been incurred and the amount can be reasonably ascertained.

X. Earnings Per Share (EPS) :

Basic EPS is computed using the weighted average number of equity shares outstanding during the year. Diluted EPS is computed using the weighted average number of equity and dilutive equity equivalent shares outstanding during the year-end, except where the results would be anti-dilutive.

XI. Cash and Cash Equivalents :

Cash and Cash Equivalents comprises Cash-in-Hand, Short term Deposits and Balance in Current Accounts with Banks. Cash equivalents are short –term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

XII. Extra Ordinary items, if any, having a material bearing on the financial affairs of the Company are disclosed separately.

XIII. General:

Any other accounting policy not specifically referred to are consistent with generally accepted accounting principles.

Note 34.2: Reasons for Variance more than 25%

- 1) Current Ratio has improved mainly because of increase in GST credit (which is grouped under other current assets) as company is having inverted credit structure where raw material is taxed at 18% against which finished goods are taxed at 12% under GST Law.
- 2) Reduction in Debt Equity ratio pertains to re-payment of borrowings and issue of new equity shares.
- 3) Increase in Debt Service Coverage Ratio is result of higher EBIT margin earned.
- 4) Ratios related to Profitability / return on Capital has improved mainly on account of significant increase in Sales as well as Profit margins. Profit margins are mainly dependent on Crude price. The variation in the same is due to change in Raw Material price and price of Finished Product in the open Market which governs the selling as well as buying rates.
- 5) Movement in Inventory, Trade Receivable and Trade Payable Turnover is mainly on account of significant increase in sales due to increased demand and corresponding increase in purchase of raw material.
