			evaluation of the internal finan¢ial controls over finan¢ial reporting to future periods are subject
			to the risk that the internal financial control over financial reporting may become inadequate
			because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The experience adjustments on plan liabilities and assets, and net (surplus) / deficit for the years ended March 31, 2014, March 31, 2013 and March 31, 2012 are as follows:

Particulars	March 31, 2014	March 31, 2013	March 31, 2012
Defined benefit obligation at the end of the period	8.82	7.94	6.86
Fair value of plan assets	(8.04)	(5.88)	(5.12)
Net deficit	0.78	2.06	1.74
Experience adjustments on plan liabilities	0.51	0.24	0.18
Experience adjustments on plan assets	(0.10)	(0.03)	0.03

The principal actuarial assumptions used in determining gratuity obligation for the Group's plans are shown below:

Particulars		As at	As at
		March 31, 2016	March 31, 2015
Discount rate		7.80 % - 8.00 %	7.80 % - 8.00 %
Expected rate of return on assets		8.00 % - 9.00 %	8.00 % - 9.00 %
Employee turnover	1	1.00 % - 3.00 %	1.00 % - 3.00 %

The overall expected rate of return on assets is determined based on market prices prevailing on that date, applicable to the period over which the obligation is to be settled. The estimates of future salary increases, considered in actuarial valuation, take account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market. Based on the experience of the previous year, the Group expects to contribute Rs. 2.15 to the gratuity fund in the next year. However the actual contribution by the Group will be based in the actuarial valuation report received from the insurance company.
